No. MC 30504 (Deviation No. 25), TUCKER FREIGHT LINES, INC., P.O. Box 3144, South Bend, Ind. 46619, filed August 2, 1977. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over a deviation route as follows: From Springfield, Mo., over U.S. Highway 66 to junction Missouri Highway 5, thence over Missouri Highway 5 to junction U.S. Highway 54, thence over U.S. Highway 54 to junction U.S. Highway 63, thence over U.S. Highway 63 to Waterloo, Iowa, and return over the same route for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities over a pertinent service route as follows: From Springfield, Mo., over U.S. Highway 66 to junction U.S. Highway 71, thence over U.S. Highway 71 to Kansas City, Mo., thence over Alternate U.S. Highway 69 to junction U.S. Highway 69, thence over U.S. Highway 69 to Des Moines, Iowa, thence over U.S. Highway 65 to junction Iowa Highway 330, thence over Iowa Highway 330 to Marshalltown, Iowa, thence over Iowa Highway 14 to junction Iowa Highway 57, thence over Iowa Highway 57 to junction U.S. Highway 20, thence over U.S. Highway 20 to Waterloo, Iowa, and return over the same route.

No. MC 30504 (Deviation No. 26), TUCKER FREIGHT LINES, INC., P.O. Box 3144, South Bend, Ind. 46619, filed August 3, 1977. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over a deviation route as follows: From Springfield, Mo., over U.S. Highway 66 to junction Missouri Highway 5, thence over Missouri Highway 5 to junction U.S. Highway 54, thence over U.S. Highway 54 to junction U.S. Highway 63, thence over U.S. Highway 63 to junction U.S. Highway 30 near Tama, Iowa, and return over the same route for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities over a pertinent service route as follows: From Springfield, Mo., over U.S. Highway 66 to junction U.S. Highway 71, thence over U.S. Highway 71 to Kansas City, Mo., thence over Alternate U.S. Highway 69 to junction U.S. Highway 69, thence over U.S. Highway 69 to Des Moines, Iowa, thence over U.S. Highway 65 to junction Iowa Highway 330, thence over Iowa Highway 330 to Marshalltown, Iowa, thence over Iowa Highway 14 to junction Iowa Highway 57, thence over Iowa Highway 57 to junction U.S. Highway 20, thence over U.S. Highway 20 to Waterloo, Iowa, and return over the same route.

No. MC 30504 (Deviation No. 27), TUCKER FREIGHT LINES, INC., P.O. Box 3144, South Bend, Ind. 46619, filed August 3, 1977. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over a deviation route as follows: From Cincinnati, Ohio over U.S. Highway 27 to junction U.S. Highway 33, thence over U.S. Highway 33 to junction Indiana Highway 13, thence over Indiana Highway 13 to junction U.S. Highway 131 and return over the same route for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities over a pertinent service route as follows: From Cincinnati, Ohio over U.S. Highway 52 to junction U.S. Highway 31, thence over U.S. Highway 31 to junction U.S. Highway 33, thence over U.S. Highway 33 to junction Indiana Highway 120, thence over Indiana Highway 120 to junction Indiana Highway 15, thence over Indiana Highway 15 to junction Michigan Highway 103, thence over Michigan Highway 103 to junction U.S. Highway 131, and return over the same route.

No. MC 41432 (Deviation No. 29), EAST TEXAS MOTOR FREIGHT LINES, INC., 2355 Stemmons Freeway, P.O. Box 10125, Dallas, Tex. 75207, filed August 8, 1977. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over deviation routes as follows: (1) From Jacksonville, Tex., over U.S. Highway 79 to Rockdale, Tex., thence over U.S. Highway 77 to Hallettsville, Tex., thence over Alternate U.S. Highway 90 to Seguin, Tex., (2) From Jacksonville, Tex., over U.S. Highway 79 to Rockdale, Tex., thence over U.S. Highway 77 to Hallettsville, Tex., thence over Alternate U.S. Highway 90 to Seguin, Tex., thence over Texas Highway 46 to New Braunfels, Tex., and (3) From Jacksonville, Tex., over U.S. Highway 79 to Rockdale, Tex., thence over U.S. Highway 77 to Hallettsville, Tex., thence over Alternate U.S. Highway 90 to Seguin, Tex., thence over Texas Highway 123 to San Marcos, Tex., and return over the same routes for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities over a pertinent service route as follows: From Jacksonville, Tex., over U.S. Highway 69 to Alto, Tex., thence over Texas Highway 21 to Crockett, Tex., thence over U.S. Highway 287 to Corrigan, Tex., thence over U.S. Highway 59 to Houston, Tex., thence over U.S. Highway 90 to San Antonio, Tex., thence over U.S. Highway 81 to San Marcos, Tex., and return over the same route.

No. MC 56640 (Deviation No. 3), DELTA LINES, INC., P.O. Box 2081, Oakland, Calif. 94604, filed July 14, 1977. Carrier's representative: Marshall Berol, 601 Calif. St., San Francisco, Calif. 94108. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over deviation routes as follows: (1) From junction Interstate Highway 5 and California Highway 89 over California Highway 89 to junction California Highway 44, thence over California Highway 44 to junction California Highway 36, (2) From junction Interstate Highway 5 and California Highway 89 over California Highway 89 to junction California Highway 36, and (3) From junction Interstate Highway 5 and California Highway 44 over California Highway 44 to junction California Highway 36 and return over the same routes for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities, over a pertinent service route as follows: From Mt. Shasta, Calif., over Interstate Highway 5 (formerly U.S. Highway 99) to Red Bluff, Calif., thence over California Highway 99 to junction California Highway 36, thence over California Highway 36 to Susanville, Calif., and return over the same route.

No. MC 65916 (Deviation No. 3), WARD TRUCKING CORP., Ward Tower, 2nd Ave. and 7th St., Greenwood, Altoona, Pa. 16603, filed August 2, 1977. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over a deviation route as follows: From Blairsville, Pa., over U.S. Highway 22 to Murrysville, Pa., and return over the same route for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities over a pertinent service route as follows: From Blairsville, Pa., over U.S. Highway 119 to junction U.S. Highway 322 near DuBois, Pa., thence over U.S. Highway 322 to junction Interstate Highway 80, thence over Interstate Highway 80 to junction Pennsylvania Highway 18, thence over Pennsylvania Highway 18 to Rochester, Pa., thence over unnumbered highway via Aliquippa, Pa., to Sewickley, Pa., thence over Pennsylvania Highway 65 to Pittsburgh, Pa., thence over U.S. Highway 22 to Murrysville, Pa., and return over the same route.

Motor Carrier Alternate Route Deviations

NOTICE

The following letter-notices to operate over deviation routes for operating convenience only have been filed with the Commission under the Deviation Rules—Motor Carrier of Passengers (49 CFR 1042.(c)(9)).

Protests against the use of any proposed deviation route herein described may be filed with the Commission in the manner and form provided in such rules at any time, but will not operate to stay commencement of the proposed operations unless filed within 30 days from the date of this FEDERAL REGISTER notice.

Each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its request.

MOTOR CARRIERS OF PASSENGERS

No. MC 109780 (Deviation No. 48), CONTINENTAL TRAILWAYS, 1505 S. Central Ave., Los Angeles, Calif. 90021, filed August 10, 1977. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *passengers and their baggage*, and *express* and *newspapers* in the same vehicle with passengers, over a deviation route as follows: From Seligman, Ariz., over Interstate Highway 40 to Kingman, Ariz., and return over the same route for operating convenience only. The notice indicates that the carrier is presently authorized to transport passengers and the same property over a pertinent service route as follows: From Seligman, Ariz., over U.S. Highway 66 to Kingman, Ariz., and return over the same route.

Motor Carrier Intrastate Application(s)

NOTICE

The following application(s) for motor common carrier authority to operate in intrastate commerce seek concurrent motor carrier authorization in interstate or foreign commerce within the limits of the intrastate authority sought, pursuant to Section 206(a)(6) of the Interstate Commerce Act. These applications are governed by Special Rule 245 of the Commission's General Rules of Practice (49 CFR 1100.245), which provides, among other things, that protests and requests for information concerning the time and place of State Commission hearings or other proceedings, any subsequent changes therein, and any other related matters shall be directed to the State Commission with which the application is filed and shall not be addressed to or filed with the Interstate Commerce Commission.

Maine Docket No. X–23 filed August 10, 1977. Applicant: THIBEAULT EXPRESS, INC., Turner St., Brunswick, Maine 04011. Certificate of Public Convenience and Necessity sought to operate a freight service follows: Transportation of *General commodities* and provide for the interlining of shipments with carriers whose terminals are located in Scarboro, Maine, with respect to A–1 through A–3 below: A–1 From Portland-South Portland, Maine, to Bath and Lisbon, Maine as follows: Between Lisbon and Brunswick, Maine including Lisbon, Lisbon Center, Lisbon Falls, Pejepscot, Topsham, Bath, and Brunswick, serving to and/or from all points. A–2 from or to Freeport, Yarmouth and Portland, South Portland, Maine with only such freight as is shipped from or destined to points Lisbon to Brunswick inclusive as listed above. A–3 between Brunswick and Harpswell, Maine passing through and serving Great Island, Cundy's Harbor, Orr's Island and Bailey Island, Maine. Intrastate, interstate and foreign commerce authority. Hearing: Date, time and place not yet fixed. Requests for procedural information should be addressed to the Maine Public Utilities Commission, State House Annex, Capitol Shopping Center, Augusta, Maine 04333 and should not be directed to the Interstate Commerce Commission.

Maine Docket No. X–71 filed August 15, 1977. Applicant: DUGAS EXPRESS CO., 101 Knox St., Lewiston, Maine 04240. Certificate of Public Convenience and Necessity sought to operate as a *common carrier*, from Portland-South Portland, Maine, to Lewiston, Maine, passing through and serving with pick-up and delivery service in both directions, the following points: Lewiston, Auburn, Danville Junction, Gray, New Gloucester, Upper Gloucester, West Falmouth, Portland, and South Portland.

NOTE.—Applicant proposes to provide for the interlining of shipments with carriers whose terminals are located in Scarboro, and Biddeford, Maine with respect to authority above. Intrastate, interstate and foreign commerce authority sought. Hearing: Date, time and place not yet fixed. Requests for procedural information should be addressed to the Maine Public Utilities Commission, State House Annex, Capitol Shopping Center, Augusta, Maine 04333 and should not be directed to the Interstate Commerce Commission.

Maine Docket No. X–256 filed August 15, 1977. Applicant: FOGG & JORDAN, INC., doing business as, MERRILL'S EXPRESS, 16 Allen Ave. Extension, Falmouth, Maine 04105. Applicant's representative: John G. Feehan, One Canal Plaza, Portland, Maine 04101. Certificate of Public Convenience and Necessity sought to operate as a *common carrier* as follows: A–1 Portland-South Portland, Maine, to Pownal, Maine, handling freight to and or from Portland-South Portland, Cumberland Center, Cumberland Junction, North Falmouth, North Pownal, Pownal Center, North Yarmouth, Walnut Hill, West Cumberland, and West Pownal, Maine; A–2 Irregular Routes, Household goods, between points in Portland, Maine, and between said points on the one hand, and, points in Maine, on the other hand, and Scarborough, Maine, restricted to the interlining of freight only. Intrastate, interstate and foreign commerce authority sought. Hearing: Date, time and place not yet fixed. Requests for procedural information should be addressed to the Maine Public Utilities Commission, State House Annex, Capitol Shopping Center, Augusta, Maine 04333 and should not be directed to the Interstate Commerce Commission.

By the Commission.

H. G. HOMME, Jr.,
Acting Secretary.

1

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION.

TIME AND DATE: 9:30 a.m. (Eastern Time), Thursday, September 1, 1977.

PLACE: Chairman's Conference Room, No. 5240, on the fifth floor of the Columbia Plaza Office Building, 2401 E Street NW., Washington, D.C. 20506.

STATUS: Open to the public.

MATTER TO BE CONSIDERED:

Veterans Preference Act; Suggested Amendments

In response to a request from the General Accounting Office, the Commission will consider its position on proposals to change current laws concerning certain employment preference given to veterans.

A majority of the entire membership of the Commission determined by a recorded vote that the business of the Commission requires that this meeting be held in order to provide a timely response to the General Accounting Office, and that no earlier announcement was possible.

The vote was as follows: In favor of change:

Eleanor Holmes Norton, Chair
Ethel Bent Walsh, Commissioner
Daniel E. Leach, Commissioner

Opposed: None.

CONTACT PERSON FOR MORE INFORMATION:

Marie D. Wilson, Executive Officer, Executive Secretariat, at (202) 634–6748.

This Notice Issued August 29, 1977.

[S–1209–77 Filed 8–30–77;9:10 am]

2

BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM.

FEDERAL REGISTER CITATION OF PREVIOUS ANNOUNCEMENT: 42 FR 43176, August 26, 1977.

PREVIOUSLY ANNOUNCED TIME AND DATE OF THE MEETING: 10:00 a.m., Wednesday, August 31, 1977.

CHANGES IN THE MEETING: Addition of the following closed item to the meeting:

Proposed increase in annuities for Board Plan retirees and survivor annuitants.

This item will follow consideration of the following announced open items:

1. Issues related to simplication of the advertising and open end credit provisions of the Truth in Lending Act.
2. Postponement of the effective date of the descriptive billing requirements of Regulation Z (Truth in Lending) relating to cash advance checks.
3. Possible amendments to (a) Regulation H (Membership of State Banking Institutions in the Federal Reserve System) to require that State member banks, or subsidiaries, that are registered clearing agencies must file notice with the Board of all final disciplinary sanctions imposed by them on firms participating in the operations of the clearing agency, and (b) Regulation H and Regulation Y (Bank Holding Companies), pursuant to requirements of the Securities Exchange Act, to establish procedures for requesting stays and review by the Board of disciplinary sanctions and denials of participation imposed by bank clearing agencies. (Proposed earlier for public comment; Docket No. R–0042).
4. Proposed amendments to the Board's Rules Regarding Delegation of Authority, concerning approval of certain categories of foreign branch applications.
5. Report to the Federal Deposit Insurance Corporation regarding the competitive factors involved in the proposed merger of The First National Bank of Canton, Canton, Mississippi, with The Mississippi Bank, Jackson, Mississippi.
6. Any agenda items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION:

Mr. Joseph R. Coyne, Assistant to the Board, (202–452–3204).

Dated: August 30, 1977.

THEODORE E. ALLISON,
Secretary of the Board.

[S–1211–77 Filed 8–30–77;10:00 am]

3

BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM.

TIME AND DATE: 10:00 a.m., Tuesday, September 6, 1977. The closed portion of the meeting will commence at the conclusion of the open discussion.

PLACE: 20th Street and Constitution Avenue, NW., Washington, D.C. 20551.

STATUS: Part of the meeting will be open; part will be closed.

MATTERS TO BE CONSIDERED:

Open portion:

1. Proposed acquisition of computer equipment at the Federal Reserve Bank of St. Louis.
2. Proposal to purchase property and construct an addition at the Omaha Branch of the Federal Reserve Bank of Kansas City.
3. Proposal to operate an automated clearing house at Little Rock, Arkansas.
4. Any agenda items carried forward from a previously announced meeting.

Closed portion:

1. Proposed renovations to the Federal Reserve Bank of Kansas City building.
2. Proposed property acquisition at the New Orleans Branch of the Federal Reserve Bank of Atlanta.
3. Any agenda items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION:

Mr. Joseph R. Coyne, Assistant to the Board: (202–452–3204).

Dated: August 29, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[S–1207–77 Filed 8–29–77;2:15 pm]

4

NATIONAL TRANSPORTATION SAFETY BOARD.

TIME AND DATE: 9:30 a.m., Thursday, September 8, 1977. [NM–77–27].

PLACE: NTSB Board Room, National Transportation Safety Board, 800 Independence Avenue, SW., Washington, D.C. 20594.

STATUS: The first item on the agenda will be open to the public; the second item will be closed to the public.

MATTERS TO BE CONSIDERED:

1. *Discussion.*—Closeout of Safety Recommendations A–72–3, A–75–80, A–77–7, and R–73–11.
2. *Discussion.*—Staff processing of safety recommendations following a major accident.

CONTACT PERSON FOR MORE INFORMATION:

Sharon Flemming, (202–755–4930).

[S–1210–77 Filed 8–30–77;9:10 am]

5

NUCLEAR REGULATORY COMMISSION.

Meetings during the week of August 22, 1977 (Change Notice).

APPROVAL: By unanimous vote on August 24, 1977, the Commission determined pursuant to 5 U.S.C. 552b(e)(1) and § 9.107(a) of the Commission's Rules that Commission business requires that these agenda items be held on less than one week's notice to the public. The need for the meetings did not arise until August 24 and immediate discussion is required because timely consideration of issues requires meeting at this time.

On August 24, 1977, the Nuclear Regulatory Commission (all members participating) voted unanimously to close the second meeting:

MEETINGS: FRIDAY, AUGUST 26, 9:00 a.m.:

1. Request by Carolina Power & Light Company to Store Spent Fuel Discharged from the H. B. Robinson Reactor at Branswick Units 1 and 2 and to Have Such Storage Indemnified. (Open.)
2. Discussion of Personnel Matter. (Closed-Exemption 6.) The meeting will be to discuss a personnel matter.

ATTENDANCE: At the Closed Meeting will be Commissioners only.

PLACE: Commissioners' Conference Room, 1717 H St., NW., Washington, D.C.

CONTACT PERSON FOR MORE INFORMATION:

Walter Magee, Office of the Secretary, telephone 202–634–1410.

Dated: August 25, 1977.

WALTER MAGEE,
Chief, Operations Branch, Office of the Secretary.

[S–1204–77 Filed 8–26–77;10:54 am]

6

NUCLEAR REGULATORY COMMISSION.

TIME AND DATE: Friday, August 26, 1977.

PLACE: Commissioners' Conference Room, 1717 H St., NW., Washington, D.C.

STATUS: Open/Closed (Additional Items).

MATTERS TO BE CONSIDERED:

9:00 a.m.:

1. Request by Carolina Power & Light Company to Store Spent Fuel Discharged from the H. B. Robinson Reactor at Brunswick Units 1 and 2 and to Have Such Storage Indemnified. (Open.)
2. Discussion of Draft Administration Bill for Nuclear Plant Licensing Reform (continuation of 8/24 meeting). (Closed-Exemption 9.)
3. Discussion of Personnel Matter. (Closed-Exemption 6.)

11:30 a.m.:

Briefing on Pending ALAB Reviews (continuation of 8/24 meeting). (Closed-Exemption 10.)

CONTACT PERSON FOR MORE INFORMATION:

Walter Magee (202–634–1410).

WALTER MAGEE,
Chief, Operations Branch, Office of the Secretary.

AUGUST 25, 1977.

[S–1203–77 Filed 8–26–77;10:54 am]

7

SECURITIES AND EXCHANGE COMMISSION.

TIME AND DATE: August 29, 1977, 11:00 a.m.

PLACE: Room 825, 500 North Capitol Street, Washington, D.C.

STATUS: Closed meeting.

SUBJECT MATTER:

Consideration of litigation matter.

Chairman Williams, Commissioners Loomis, Evans, and Pollack voted to close the meeting and determined that no earlier notice thereof was possible.

AUGUST 29, 1977.

[S–1208–77 Filed 8–29–77;2:50 pm]

8

FEDERAL DEPOSIT INSURANCE CORPORATION.

TIME AND DATE: 10:30 a.m., September 6, 1977.

PLACE: Room 6135, FDIC Building, 530 17th Street, NW., Washington, D.C.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

Request pursuant to section 19 of the Federal Deposit Insurance Act for the Corporation's consent to service of a person convicted of an offense involving dishonesty or a breach of trust as a director, officer, or employee of an insured bank:

Name of person and of bank authorized to be exempt from disclosure pursuant to the provisions of subsection (c)(6) of the "Government in the Sunshine Act" (5 U.S.C. (c)(6)).

Recommendations regarding the liquidation of assets acquired by the Corporation in its capacity as receiver, liquidator, or liquidating agent of those assets:

Case No. 43,167–1—International City Bank and Trust Company New Orleans, Louisiana.

10

FEDERAL DEPOSIT INSURANCE CORPORATION.

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 11:00 a.m. on Tuesday, September 6, 1977, the Federal Deposit Insurance Corporation's Board of Directors will meet in open session to consider the following matters:

Disposition of minutes of previous meetings

Applications for Federal deposit insurance:

The Peoples Commercial Bank, to be located at 73 Troy Road, East Greenbush, New York, for Federal deposit insurance.

Brighton Bank, to be located at 7101 South 2000 East, Salt Lake City, Utah, for Federal deposit insurance.

Northern Hancock Bank & Trust Co., to be located at Third and Washington Streets, Newell, West Virginia, for Federal deposit insurance.

Applications for consent to establish branches:

The Citizens Savings Bank, Ithaca, New York, for consent to establish branches within the Pyramid Mall, 40 Catherwood Road, Village of Lansing, Ithaca, New York, and within the East Hill Plaza Shopping Center, corner of Judd Falls Road and Ellis Hollow Road, Town of Ithaca, New York.

Richmond County Savings Bank, West New Brighton, New York, for consent to establish a branch at 132 Avenue U, southwest corner of West 8th Street, New York (Brooklyn), New York.

Requests for extensions of time in which to establish branches:

The Arizona Bank, Phoenix, Arizona, for an extension of time to February 1, 1978 in which to establish a branch at Southern Avenue and Longmore Drive, Mesa, Arizona.

Bank of Mt. Juliet, Mount Juliet, Tennessee, for an extension of time to September 17, 1978 in which to establish a branch at the intersection of Route 3, South Mount Juliet Road and Interstate 40, Mount Juliet, Tennessee.

Application for consent to establish three remote service facilities (electronic branches):

Niagara County Savings Bank, Niagara Falls, New York, for consent to establish remote service facilities (electronic branches) in Super Duper Supermarkets at 3185 Southwestern Boulevard (Unincorporated Area), Orchard Park, New York, and at 123 Grey Street, East Aurora, New York, and in Sample, Incorporated, at 1631 Hertel Avenue, Buffalo, New York.

Recommendation regarding the liquidation of assets acquired by the Corporation in its capacity as receiver, liquidator, or liquidating agent of those assets:

Memorandum re: American Bank & Trust Company, New York, New York.

Recommendations with respect to payment for legal services rendered and expenses incurred in connection with receivership and liquidation activities:

Powell, Goldstein, Frazer & Murphy, Atlanta, Georgia, in connection with the liquidation of The Hamilton Bank and Trust Company, Atlanta, Georgia.

Mize, Thompson & Blass, Gulfport, Mississippi, in connection with the liquidation of International City Bank and Trust Company, New Orleans, Louisiana.

Sullivan & Worcester, Boston, Massachusetts, in connection with the receivership of Surety Bank and Trust Company, Wakefield, Massachusetts.

Patterson & Patterson, Whitfield, Manikoff and White, Bloomfield Hills, Michigan, in connection with the receivership of Birmingham Bloomfield Bank, Birmingham, Michigan.

Mize, Thompson & Blass, Gulfport, Mississippi, in connection with the liquidation of Bank of Picayune, Picayune, Mississippi.

Parsons, Canzona, Blair & Warren, Red Bank, New Jersey, in connection with the liquidation of The Bank of Bloomfield, Bloomfield, New Jersey.

Hughes, Hubbard & Reed, New York, New York, in connection with the liquidation of Franklin National Bank, New York, New York.

Strasburger & Price, Dallas, Texas, in connection with the liquidation of The Hamilton National Bank of Chattanooga, Chattanooga, Tennessee.

Miller & Martin, Chattanooga, Tennessee, in connection with the liquidation of The Hamilton National Bank of Chattanooga, Chattanooga, Tennessee.

Recommendation with respect to the amendment of Corporation rules and regulations:

Memorandum and resolution proposing the final adoption of amendments to Part 303 of the Corporation's rules and regulations, entitled "Applications, Requests and Submittals," so as to include applications for mergers or assumption transactions within the current procedures applied to all other application proceedings.

Reports of committees and officers:

Minutes of the actions approved by the Committee on Liquidations, Loans and Purchases of Assets pursuant to authority delegated by the Board of Directors.

Report of the Executive Secretary regarding the transmittal of "no significant effect" competitive factor reports.

Reports of the Director of the Division of Bank Supervision with respect to applications or requests approved by him and the various Regional Directors pursuant to authority delegated by the Board of Directors.

Report of the Division of Liquidation, for the period June 16, 1977-August 16, 1977, detailing all disbursements in excess of $10,000 and all sales of real estate properties in connection with the liquidation of The Hamilton National Bank of Chattanooga, Chattanooga, Tennessee, pursuant to authority delegated by the Board of Directors.

Reports with respect to security transactions authorized by the Chairman.

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550 17th Street, NW., Washington, D.C.

Requests for information concerning the meeting may be directed to Mr. Alan R. Miller, Executive Secretary of the Corporation, at (202) 389-4446.

Dated: August 30, 1977.

11

FEDERAL DEPOSIT INSURANCE CORPORATION.

FEDERAL DEPOSIT INSURANCE

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 10:45 a.m. on Tuesday, September 6, 1977, the Federal Deposit Insurance Corporation's Board of Directors will meet in closed session, by authority of section 552b(d)(4), (c)(4), (c)(8), (c)(9)(A)(ii), and (c)(10) of title 5, United States Code, to consider the following matters:

Application of proposed bank for Federal deposit insurance coincident with conversion of a savings and loan association into a mutual savings bank:

Capital Mutual Savings Bank, Olympia, Washington, for Federal deposit insurance.

Applications for consent to establish branches:

First Marine Bank & Trust Company of the Palm Beaches, Riviera Beach, Florida, for consent to establish a branch at 1201 East Blue Heron Boulevard, Riviera Beach, Florida.

North Conway Bank, North Conway, New Hampshire, for consent to establish a branch at Route 16, Bartlett (Glen), New Hampshire.

North New York Savings Bank, White Plains, New York, for consent to establish a branch at 120 North Village Avenue, Village of Rockville Centre, New York.

Application for consent to move a branch:

Banco Credito y Ahorro Ponceno, Ponce, Puerto Rico, for consent to move a branch from the corner of Calle Patriota Pozo and Calle Juan Ramon Veles to the corner of Calle Patriota Pozo and Carretera No. 2, Manati, Puerto Rico.

Applications for consent to merge and establish branches:

First Bank and Trust, Boynton Beach, Florida, an insured State nonmember bank, for consent to merge under its charter, and with the title "First Bank and Trust, Palm Beach County," with First Bank, Delray Beach, Florida, Delray Beach, Florida, and First Bank West, Palm Beach County (P.O. Lake Worth), Florida, also insured State nonmember banks, and to establish the two offices of First Bank, Delray Beach, Florida and the sole office of First Bank West as branches of the resultant bank.

Southern Bank and Trust Company, Greenville, South Carolina, an insured State nonmember bank, for consent to merge under its charter and title with Morgan Bank and Trust, Spartanburg, South Carolina, also an insured State nonmember bank, and to establish the two offices of Morgan Bank and Trust as branches of the resultant bank.

Recommendations regarding the liquidation of assets acquired by the Corporation in its capacity as receiver, liquidator, or liquidating agent of those assets:

Case No. 43,156-L—Reserves for Losses and Allotments for Insurance Expenses.

Case No. 43,165-L—Franklin National Bank, New York, New York.

Case No. 43,166-L—Northeast Bank of Houston, Houston, Texas.

Case No. 43,171-SR—American Bank & Trust Company, New York, New York.

Case No. 43,172-NR—United States National Bank, San Diego, California.

Case No. 43,175-NR—United States National Bank, San Diego, California.

Case No. 43,178-SR—Sharpstown State Bank, Houston, Texas.

Case No. 43,180-L—The Hamilton National Bank of Chattanooga, Chattanooga, Tennessee.

Recommendation with respect to payment for legal services rendered and expenses incurred in connection with receivership and liquidation activities:

Pryor, Cashman, Sherman and Flynn, New York, New York, in connection with the receivership of American Bank & Trust Company, New York, New York.

Recommendations with respect to the initiation or termination of cease-and-desist proceedings or termination-of-insurance proceedings against certain insured banks:

Names and locations of banks authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(8), (c)(9)(A)(ii), and (c)(10) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(8), (c)(9)(A)(ii), and (c)(10)).

The meeting will be held in Room 6135 of the FDIC Building located at 550 17th Street NW., Washington, D.C.

Requests for information concerning the meeting may be directed to Mr. Alan R. Miller, Executive Secretary of the Corporation, at (202) 389-4446.

Dated: August 30, 1977.

FEDERAL DEPOSIT INSURANCE CORPORATION,
ALAN R. MILLER,
Executive Secretary.

APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Proposed Base Flood Elevation Determinations for Various Communities

V 42 170 SEP 1 77 UMI

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Federal Insurance Administration

[24 CFR Part 1917]

[Docket No. FI-3218]

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations for City of Sunnyvale, Calif.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elecations (100-year flood) listed below for selected locations in the City of Sunnyvale, Calif. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at City Hall, 456 West Olive Street, Sunnyvale, California.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mayor Donald Logan, City Hall, P.O. Box 607, 456 West Olive Street, Sunnyvale, California 94088.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or toll free line 800–424–8872, room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevation (100-year flood) for the City of Sunnyvale, California, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Calabazas Creek	Mountain View-Alviso Rd.	8
	Bayshore Freeway	18
	Central Expressway	37
	Southern Pacific RR	47
	Lochinvar Ave.	128
Sunnyvale East Channel.	Caribbean Dr.	8
	Mountain View-Alviso Rd.	11
	Ahwanee Ave.	25
	Wolfe Rd.	45
	Kifer Rd.	62
	Southern Pacific RR	74
	Iris Ave.	109
	Dunholme Way	163
Sunnyvale West	Caribbean Dr.	8
	Mathilda Ave.	13
	Mountain View-Alviso Rd.	24
	Bayshore Freeway	26

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001–4128); and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: July 28, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

[Docket No. FI-3219]

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations for City of Belle Glade, Fla.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the City of Belle Glade, Fla. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at City Hall, 110 Southwest Avenue East, Belle Glade, Fla.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mayor W. R. Kirk, City Hall, 110 Southwest Avenue East, Belle Glade, Fla. 33430.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or toll free line 800–424–8872, room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the City of Belle Glade, Fla., in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Lake Okeechobee	Land lake way of Hoover Dike.	25

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended, (42 U.S.C. 4001–4128); and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended (39 FR 2687, January 24, 1974).)

Issued: July 28, 1977.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations for Village of Rosemont, Cook County, Ill.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100–year flood) listed below for selected locations in the Village of Rosemont, Cook County, Illinois. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review on the Bulletin Board in the Mayor's Office, 9301 West Bryn Mawr Avenue, Rosemont.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mayor Dan E. Stephens, 9301 West Bryn Mawr Avenue, Rosemont, Ill. 60018.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or toll free line 800–424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100–year flood) for the Village of Rosemont, Cook County, Illinois in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100–year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Des Plaines River	Downstream corporate limits.	626
	Kennedy Expressway (downstream crossing).	628
	Kennedy Expressway (upstream crossing).	628
	Higgins Rd.	627
	Upstream corporate limits.	628
	Devon.	628
Willow Creek	Downstream corporate limits.	627
	River Rd.	630
	Northwest Tollway	641
	Interstate 294	641
	Ruby St.	641
	Route 72	635
	Soo Line Dr.	640
	Orchard Dr.	640
	Route 45	641
	Lee St.	643
	Upstream corporate limits.	643

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001–4128); and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: July 28, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

[Docket No. FI-3225]

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations for Township of Park, Mich.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the Township of Park, Michigan. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at Township Hall, 1464 Ottowa Beach Road, Holland, Mich.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mr. E. J. Van Wieren, Park Township Supervisor, Township Hall, 1464 Ottowa Beach Road, Holland, Mich. 49423.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or toll free line 800–424–8872, room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100–year flood) for the Township of Park, Michigan, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected actions are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Pine Creek	Ottawa Beach Rd.	583
	West Lakewood Blvd.	586
	James St.	590

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001–4128); and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: July 28, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations for Township of Whitney, Mich.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the Township of Whitney, Mich. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at Whitney Township Hall, Au Gres, Mich.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mr. Ken W. Fox, Township Supervisor, Township of Whitney, North U.S. 23, Au Gres, Mich.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or toll free line 800–424–8872, room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the Township of Whitney, Michigan, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations for City of Lockport, Niagara County, N.Y.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed Rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the City of Lockport, Niagara County, New York.

These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the bulletin board in the Municipal Building, 1 Locks Plaza, Lockport, New York.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify the Honorable Michael Shanley, Mayor of Lockport, Municipal Building, 1 Locks Plaza, Lockport, New York 14094.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or Toll Free Line 800–424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the City of Lockport, Niagara County, New York, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of Flooding	Location	Elevation in feet, national geodetic vertical datum
Eighteenmile Creek.	Stone Rd. (C.R. 23)	361
	Gooding St.	440
	William St. (upstream).	465
	Clinton St. (upstream).	487
	Wilson Parkway (extended).	617
	Davison Rd.	621
Gulf Branch	Niagara St. (upstream).	470
	Michigan St. (extended).	400
	Trowbridge St. (extended).	366
Lincoln Avenue branch.	Hoover Parkway (extended).	632

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; (42 U.S.C. 4001–4128); and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: July 28, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations for Town of Ontario, Wayne County, N.Y.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the Town of Ontario, Wayne County, New York.

These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the Ontario Town Hall, 1850 Ridge Road, Ontario, New York 14519.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mr. Robert Pinkney, Town Supervisor, Town of Ontario, Town Hall, 1850 Ridge Road, Ontario, New York 14519.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or Toll Free Line 800–424–8872, Room 5270, 451 Seventh Street, Southwest, Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the Town of Ontario, New York, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also

V 42 170 SEP 1 77 UMI

be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Mill Creek	Downstream of Driveway Bridge.	254
	Downstream of Ginna access road.	257
	Downstream of Farm Bridge.	261

PART III

CONSUMER PRODUCT SAFETY COMMISSION

TOYS AND OTHER ARTICLES INTENDED FOR USE BY CHILDREN UNDER 8 YEARS OF AGE

Technical Requirements Identifying Sharp Metal or Glass Edges

V 42 170 SEP 1 77 UMI

CONSUMER PRODUCT SAFETY COMMISSION

[16 CFR Part 1500]

IDENTIFICATION OF CERTAIN TOYS AND OTHER ARTICLES PRESENTING POTENTIAL LACERATION INJURY HAZARDS DUE TO SHARP METAL OR GLASS EDGES

Proposed Technical Requirements

AGENCY: Consumer Product Safety Commission.

ACTION: Proposed Regulation.

SUMMARY: The Commission is proposing a regulation that would establish technical requirements for toys and other articles intended for use by children under 8 years of age. These requirements would identify sharp metal or glass edges on such children's articles that could injure children. If the Commission identifies sharp metal or glass edges on particular children's articles that present an unreasonable risk of injury to children under 8 years of age, it will initiate rulemaking proceedings to ban those articles.

DATES: Comments must be received on or before October 3, 1977. The proposed effective date would be 365 days after publication of final requirements.

ADDRESS: Send comments to the Office of the Secretary, Consumer Product Safety Commission, 1111 18th Street, NW., Washington, D.C. 20207.

FOR FURTHER INFORMATION CONTACT:

Elaine H. Besson, Office of Program Management, Consumer Product Safety Commission, Washington, D.C. 20207 (301—492–6453).

SUPPLEMENTARY INFORMATION: On January 7, 1975, the Consumer Product Safety Commission, pursuant to section 2(f)(1)(D) of the Federal Hazardous Substances Act (FHSA) (15 U.S.C. 1261(f)(1)(D), proposed regulations to ban toys intended for children under 8 years of age[1] that present an unreasonable risk of personal injury from laceration or avulsion hazards due to sharp edges (40 FR 1488). The proposed regulations also set forth test criteria for determining whether toys intended for children under 8 years of age present those hazards.

At the Commission meeting of April 7, 1977, the Commission voted to withdraw its proposed regulations and to repropose the sharp edge test criteria, with certain changes, as a technical requirements regulation.

The effect of the technical requirements regulation proposed in this document, if issued in final form, would be to identify toys containing sharp metal or glass edges that the Commission preliminarily believes are hazardous to children under 8 years of age. Because such toys may not necessarily present a mechanical hazard under the FHSA (section 2(s), 15 U.S.C. 1261(s)), the Commission is not proposing a regulation that would automatically classify such toys as banned hazardous substances. Instead, the Commission will regulate such toys on a product-by-product basis whenever the test procedures identify them as presenting sharp metal or glass edges and the Commission believes that they present a mechanical hazard as defined in the FHSA.

The Commission's reasons for its proposal of this product-by-product regulatory approach for toys with metal or glass edges and the manner in which the Commission will use this approach are discussed below.

RATIONALE FOR REPROPOSAL

The Commission has decided to withdraw the January 7, 1975, proposed regulation and to repropose the sharp edge test criteria, with certain changes, as a technical requirements regulation for the following reasons:

1. In response to the January 7, 1975, proposed sharp edge regulation, the Commission received extensive comment which criticized both the technical requirements and the sharp edge test procedure. Considerable staff effort analyzing those comments has resulted in the staff recommendation that substantial technical changes be made in the proposal. These changes are discussed more fully in the section entitled "Changes to the Proposal" below.

2. The proposed banning regulation of January 7, 1975, and the technical requirements regulation proposed below include in their scope all products intended for children within an age span ranging from 0 to 8 years. However, the Commission believes that it would be unwise to attempt to apply a single sharp edge test criterion in a self-executing banning regulation to the numerous products which make up the play environment of children between the ages of 0 and 8 years. Sharp edge tests on toys conducted by the Commission staff showed that some edges which were classified sharp by the test instrument and were accessible by the crieria of the proposed regulations may not constitute an unreasonable risk of injury.

3. Staff analyses of the Commission's injury data associated with products intended for children indicate that injuries to young children are predominantly lacerations, punctures and avulsions. However, many of these injuries appear to occur as a result of some form of violent activity such as swinging or throwing the product, or running and subsequently falling on it. Although this type of activity and the resultant potential risk of injury associated with children's products are included within the term "reasonably foreseeable damage or abuse," as used in the FHSA (15 U.S.C. 1261(s)), the proposed banning regulations of January 7, 1975 were never intended to address such activity or risk. Rather, that proposal was aimed at the casual handling of toys, which includes the range of activity associated with unpacking, handling, operating, and playing with toys, including foreseeable misuse and types of play not intended by the manufacturer. The degree of injury that results from throwing or swinging toys at high velocities is more a function of velocity than the detailed geometry of the edge.

For the reasons discussed above, the Commission is proposing in the regulation below certain technical requirements for manufacturers to follow in designing and manufacturing toys without sharp edges.

Toys that do not comply with the technical requirements will be reviewed by the Commission and its staff on a product-by-product basis for further regulatory action. Under this approach, toys not meeting the technical requirements would not be classified as banned hazardous substances under the FHSA until they are the subject of a completed proceeding under section 2(f)(1)(D) of the FHSA (15 U.S.C. 1261). In contrast, under the approach that was proposed in January 1975, toys not meeting the sharp edge test criteria would have been automatically banned.

The Commission believes that consumers, State and local governments, and other interested persons should be given an opportunity to comment on the technical requirements regulation followed by a product-by-product banning approach before the Commission adopts it.

BACKGROUND

In response to the Commission's January 7, 1975, proposed regulation on sharp edges, comments were received from 34 individual toy manufacturers or importers, five trade associations, five consumers, three testing organizations, two retailers, and one consumer group.

The Commission's responses and conclusions to the major issues raised in the comments that are pertinent to the proposal are discussed below.

1. *Injury data.* Several commentors contend that the sharp edge regulations as proposed would not reduce or eliminate any of the injuries reported in the Commission's National Electronic Injury Surveillance System (NEISS) because 60 percent of the injuries discussed in the Commission's in-depth investigations result from falling or impacting a toy and not the casual handling of toys.

Other commentors content that NEISS data is not an adequate basis for proposing the sharp edge regulations and several commentors state that an analysis of NEISS reports suggests that the regulations, as proposed, were not warranted by the injury statistics cited.

The Commission points out that NEISS surveillance data are primarily an indicator of need and not a justification for regulation. The NEISS data do not distinguish between product-caused and product-related injuries and do not identify whether an injury resulted from the normal use or the reasonably foreseeable misuse of a product. Such information is obtained through in-depth investigations that are performed by the Commission. However, NEISS surveillance data provide information on the type and severity of injuries and the ages of those being injured. Therefore NEISS data are only one factor the Commission uses in making its findings of an unreasonable risk of injury pursuant to the FHSA.

The Commission offers the following explanation of how NEISS surveillance data are applicable to the regulation proposed below.

A review of NEISS injury data indicates that a substantial number of children under 8 years of age are receiving laceration and avulsion injuries from toy-related accidents. In calendar year 1976 an estimated 43,300 children under 8 years of age were treated in hospital emergency rooms for such injuries.

In order to determine the extent to which lacerations and punctures are occurring from toys intended for children under 8 years of age, the Commission staff divided toys into the following three categories.

a. Toys primarily intended for use by children under the age of 8 years.

b. Toys primarily intended for use by children 8 years to 14 years of age.

c. Toys intended for use by children in both age groups.

Of the estimated 43,300 injuries treated in 1976, an estimated 9,000 were associated with products intended specifically for use by children under 8 years of age. An additional 30,800 injuries were associated with products intended for use by children in both the under 8 year and in the 8-to-14 year age groups.

In addition based on NEISS estimates, laceration and avulsion injuries accounted for over half (approximately 53 percent) of all toy related injuries to children under 8 years of age.

The Commission points out that injuries of the type addressed by the regulation being proposed are serious enough to require emergency room treatment as shown by the fact that NEISS surveillance data are obtained from reports of injuries that are treated in hospital emergency rooms. The Commission belives that a purchaser of toys for children under 8 years of age does not expect such articles to cause laceration or avulsion injuries to the children using them. The Commission therefore finds that toys that can lacerate skin and cause bleeding, during normal use or reasonably foreseeable misuse, constitute an unreasonable risk of injury.

The Commission notes that while many toy-related laceration injuries may cause only minor bleeding, some injuries are more severe. Such injuries warrant the adoption of reasonable regulations to reduce or eliminate their occurrence.

The Commission emphasizes that the proposed technical requirements are intended to set a standard of safety to reduce the risk of injury not only for the products currently available to young children, but also for the new and redesigned products for which there is no hazard experience data available to the Commission. The Commission estimates that between 3000 and 5000 new children's products are introduced into the marketplace each year. It is anticipated therefore that the technical requirements proposed below will reduce the occurrence of laceration and avulsion injuries associated with the new products that will be available for children.

The injury reports and the Commission staff's analysis of injuries related to sharp edges on toys may be seen in the Office of the Secretary, Consumer Product Safety Commission, 1111 18th Street NW., Washington, D.C., during working hours Monday through Friday.

2. *Sharp Edge Test Criteria*—a. *Sharp edge tester.* The proposed January 7, 1975 regulations prescribed a sharp edge test developed for the Commission by the National Bureau of Standards (NBS). The sharp edge test was designed to distinguish, on the basis of sharpness, between sharp and dull edges that children can contact during the casual handling of toys. Casual handling includes the range of activity associated with unpacking, handling, operating, and playing with toys, including foreseeable misuse and other types of play not intended by the manufacturer. However, such foreseeable misuse does not include throwing or swinging a toy at high velocities.

Under the sponsorship of the Commission and its predecessor agency, the Bureau of Product Safety, Food and Drug Administration, the NBS conducted research on certain aspects of human skin cutting. The results are set forth in an NBS report entitled "Some Cutting Experiments on Human Skin and Synthetic Materials", NBSIR 73–262 (October 1973). In the study, tests were performed in which the cutability of excised cadaver skin was examined using "standard edges" of differing edge geometries. The edges for these tests were selected for having typical geometries and varied abilities to cut skin. Skin samples were wrapped around a cylindrical hardwood mandrel that turned a single rotation while the test edge was held stationary and a known force applied. The resultant data were summarized for various force levels and the edges were ranked in order of sharpness.

In a related effort, NBS reported in a document entitled "A Study of the Strength Capabilities of Children Ages Two through Six," NBSIR 73–156 (August 1973), that the average maximum gripping force for children 5 years of age is 20 lbs. Older children are stronger and reach larger force levels but have more accurate sense of judgment and are less likely to indiscriminately grasp an object with maximum force. The Commission believed that a force level of 20 pounds was a reasonable base to determine the force level for the sharp edge test method. Data from these two NBS reports established the criteria which was used as a basis for the sharp edge test proposed on January 7, 1975.

NBS developed a prototype test device for sharp edges in toys which is described in an NBS report entitled "An Inspection Procedure for Detecting Hazardous Edges," NBSIR 74–428 (April 1974). The device is designed to be handheld, usable in any orientation, and easy to operate. The diameter of the rotating mandrel approximates the size of a child's finger and is wrapped with a simulated skin. Material suitable for use with the test device as the simulated skin is a tape made from polyetrafluoroethylene (TFE) and has an adhesive backing to provide for easy mounting on the mandrel.

The Commission's January 7, 1975 proposed regulations specified a test based on the device developed by NBS. The proposed test method established the sharpness of an edge by its ability to cut through a specified simulated skin at force of 3.8 pounds which was found to simulate behavior of human skin at a force of 20 pounds.

Because various brands and lots of polytetrafluorothylene tape have differing degrees of cutability, the Commission proposed a tape qualifying procedure along with the sharp edge test method. Certain standard edges which NBS had chosen as sharp and dull edges based on the human skin cutting tests were used to select and qualify the tape, thereby reducing variability in results obtained during actual testing. This would allow several tapes to qualify.

The NBS reports cited above may be seen in the Office of the Secretary, CPSC, 1111 18th Street, Washington, D.C., during working hours Monday through Friday.

b. *Articulated probe.* A three-knuckle articulated probe, designed by Underwriters Laboratories (UL) to simulate the penetration of a finger into a small slot or hole, was specified in the proposal on January 7, 1975, for use in determining the accessibility of sharp edges to children. An edge that is accessible to this probe was determined to be accessible to a child and therefore subject to the sharp edge test. The dimensions for the probe were based on the depth of penetration of fingers into slots and holes having respective widths and diameters ranging from 0.125 inch to 1.0 inch of 100 adult males, 100 adult females, and 100 children. The dimensions used to construct the probe were set so that no more than five percent of the group with the greatest finger penetration (adult females) could reach into the slots and holes to a length greater than that of the probe.

Use and Abuse Test Procedures. The proposed regulations referenced Commission regulations that prescribe test procedures for simulating the use and abuse of toys and games (16 CFR 1500.50 through 1500.53, published in the FEDERAL REGISTER on January 7, 1975 (40 FR 1480)). These tests are preformed in order to simulate the normal use and reasonably foreseeable damage or abuse that is included in the statutory definition of mechanical hazard.

As the regulations were originally proposed, any toy intended for children under 8 years of age would be classified as

[1] The Commission intends that the scope of this technical requirements regulation will include other articles intended for use by children under 8 years of age as well as toys. However in an effort to simplify reading the preamble, the term toy(s) hereafter will be used inclusively for both toys and other articles intended for use by children.

V 42 170 SEP 1 77 UMI V

a hazardous substance and, therefore, a banned hazardous substance if such toy failed to comply with the accessibility and sharp edge test method before or after being subjected to the appropriate use and abuse tests.

CHANGES TO THE PROPOSAL

1. *Test Criteria.* In response to the proposal of January 7, 1977, the Commission received many comments which criticized the test procedures, the background experiments which were used to establish the criteria for the proposed tester, and the tester itself. The majority of the comments questioned the rationale for selecting, as the average maximum gripping force of a 5-year-old child, the 20-pound force level at which children may grasp toys during play. The selection of this force as the force at which any edge can be expected to be applied to human skin without causing a bleeding cut produced an extremely stringent requirement which, if promulgated under FHSA would, in the opinion of many manufacturers, be impossible to meet. The commenters questioned the validity of the data presented in the NBS report "Some Cutting Experiments on Human Skin and Synthetic Materials," NBSIR 73-262. The comments noted the apparent absence of an established relationship between the cutability of skin samples excised from cadavers, the NBS tests, and the cutability of skin on human body. It was pointed out that the NBS tests were performed on skin which had had the subdermal fat removed and was backed by a hardwood mandrel. It was theorized that skin on the human body, which in most locations has a resilient subdermal fatty layer, would not be cut as easily as the excised skin in the NBS tests.

In addition, many commenters questioned the applicability of the proposed sharp edge test to plastics.

The Commission believes these comments have merit. Therefore, additional staff research has been conducted in support of the reproposal below. The test procedure has been reviewed with the goal of revising the requirements such that only edges which are similar to those known to have caused injury or which on a "reasonable man" basis could be judged hazardous would fail the requirements.

The results of additional testing and review of the originally proposed sharp edge test method have led the Commission to the conclusion that the sharp edge test and requirements be reproposed with the changes discussed in paragraphs 2, 3, 4, 5 and 6 below.

2. *Sharp edge test procedure.* a. Tape specifications. In addition to the many comments addressing the severity of the test requirements in the proposed sharp edge regulation, the notice drew much criticism aimed at the repeatability of the test method. As proposed, the test method allowed the use of any roll of TFE tape as a cut indicator, provided it could be calibrated by a specified procedure which incorporated the use of certain standard edges. The lack of availability of standard edges on a commercial basis made the calibration method impractical for most affected manufacturers to use. Furthermore, it was found that even tape which proved to be acceptable by the calibration procedure may provide differing results if different brands of tape were used because the acceptable range was too large.

Additional tests were performed to determine the cutting variability of a single brand of tape from different rolls as well as the variability within a single roll. As a result of those tests, the Commission staff has recommended the use of a single brand of tape known as CHR type 'T' TFE tape. The use of this tape is specified in footnote 4 to section (e)(3) of the technical requirements proposed below.

In addition, during subsequent testing of rolls of tape it was found that TFE tape is temperature sensitive and undergoes a temperature transition at 30° C (86° F). At this point the cutability characteristics of the TFE tape may change. The staff have, therefore, recommended a change in the test procedure which limits the permissible temperature of the tape while the test is being performed. (See section (e)(3) of the technical requirements below.)

b. Force level. As discussed above extensive comments to the January 7, 1975, proposal led to the reevaluation of certain aspects of the tester and test method. As proposed a force of 3.8 pounds was applied to an edge to determine if it was hazardous based on its ability to cut through the tape.

The Commission staff reviewed test results from the NBS studies and sought additional information on skin cutting characteristics.

The staff also reviewed the results of tests performed by the Department of Anatomy at the University of Virginia. Blades with edges of similar geometries to those of the NBS tests, were examined for their cutting ability on live and dead pigs' skin and on cadaver skin, both on the body and excised from the body.

The tests were performed over a range of force levels. These tests did not support the implication that human skin and pigs' skin differ in their resistance to cutting since excised samples of each behaved generally in similar ways in cutting tests. Skin with subcutaneous tissue removed (as used in the NBS tests) and cadaver skin in place over bone (leg skin over shinbone) showed the least resistance to cutting injury.

In a summary of observations on cuts, the University of Virginia report was able to identify blades with certain edge geometries which are considered sharp since they consistently cut deeply into or through the skin under the application of light forces. Other blades, however, rarely cut skin unless it was tested with the subcutaneous tissue removed against a hard backing and were considered dull.

Copies of the University of Virginia report may be seen in the Office of the Secretary, Consumer Product Safety Commission, 1111 18th Street NW., Washington, D.C., during working hours Monday through Friday.

A further examination of In-depth Investigation Reports (IDI's) concerning toy related laceration injuries showed that exposed edges on toys punched from sheet metal which had not been deburred or otherwise treated were a common cause of injury.

To determine the mandrel force at which hazardous toy edges would cut TFE tape, the Commission staff conducted some tests on edges taken from toy samples. These samples were of the same manufacturer and model as toys which were reported by IDI's to have caused laceration injuries to children during normal play. All were toys which were stamped from sheet metal and all had an accessible edge on which ragged burrs or feathering subjectively indicated the presence of a hazard.

A roll of TFE tape was selected which had exhibited a cutting performance which was in the middle of the force range observed for those tapes which were tested against a single edge in the tape variability tests previously discussed in paragraph 2a of this section. The toy edges were tested with a bench model sharp edge tester using that tape. The minimum force which was required to consistently cause cuts in the TFE tape with toy edges ranged from 1.00 to 1.35 pounds depending on the sharpness of the edges. The sharpest of the toy edges would consistently cut tape at 1.00 pound and might also have cut at lower forces. The bench tester in its present form has a minimum force of 1.00 pound. Based on staff recommendations, the Commission is proposing that the same basic test procedure as contained in the January 7, 1975, proposal be incorporated in the technical requirements regulation proposed below. A proposed maximum mandrel force has been designated as 1.35 pounds (6.00 newtons), because this was the minimum force required to consistently fail all of the tested edges which had caused laceration injuries.

Detailed engineering drawings for a suitable sharp edge tester which meets the requirements stated in section (d)(2) of the proposal below are available at a minimum cost from the Office of the Secretary, Consumer Product Safety Commission, 1111 18th Street NW., Washington, D.C. 20207.

3. *Limitation to metal and glass edges.* a. Many commenters question the applicability of the proposed sharp edge test to plastics. They question whether the requirements should be applied to toys constructed on non-metals, when the supporting research was limited to metal edges.

Upon reexamining the basis for proposing application of the sharp edge regulations to toys constructed of all materials, the Commission makes the following observations:

i. The research performed by NBS upon which the design of the sharp edge test procedure is based, and the subsequent research by the University of Virginia determined the laceration hazards of only metal edges. No determinations of the laceration hazards of nonmetal edges were performed.

ii. Certain physical properties of glass (modulus of elasticity and hardness) which determine its resistance to deformation are closer to those properties of metal than to plastic or other nonmetals from which toys are constructed. For example, glass possesses a hardness quality similar to metal and metal alloys and has a modulus of elasticity of about 10,000,000 pounds per square inch that is within the modulus range of aluminum alloys, which is 9,900,000 to 10,300,000 pounds per square inch. Plastics, however, are relatively soft and generally have modulus of elasticity below 750,000 pounds per square inch.

Based on staff recommendations, the Commission concludes, therefore, that the scope of the proposed regulations should be limited to toys containing edges constructed of metal and/or metal alloys or glass and that are intended for children under 8 years of age. For purposes of the regulations, the Commission is defining the term glass as a hard, brittle, amorphous substance produced by fusion, usually consisting of mutually dissolved silica and silicates that also contain soda and lime. It may be transparent, translucent, or opaque.

The Commission will consider at a later time whether there is a need to address the potential laceration hazards of nonmetal materials except glass used in toys that are intended for children under 8 years of age.

4. *Accessibility criteria*—a. *Probes.* In reexamining the research supporting the proposed articulated probe, the Commission finds that the probe, designed by UL was intended to prevent electric shock where simple contact results in serious injury. UL based the design of the articulated probe on the finger penetration depth of 100 adult males, 100 adult females, and 100 children. The Commission therefore has redrafted the accessibility criteria to simulate only accessibility for children's fingers.

The Commission selected the anthropometric measurements [1] of young children for the lengths and the diameters of the small and middle fingers as well as the dimensions for hand clearance. Because children up to the age of 8 years are in a period of rapid growth, the anthropometric measurements were divided into two age groups—0 to 3 years and over 3 years up to 8 years of age.

To insure protection of the greatest number of children in each age group, the Commission selected anthropometric measurements that reflect the following assumptions:

i. That the younger children in each age group have narrower hands and therefore can reach into openings which would be inaccessible to an older child.

ii. That the older children in each age group have longer fingers and therefore can touch the inside components of toys which would be inaccessible to a younger child.

Furthermore, anthropometric data are not available for the dimensions of a child's index finger. Those dimensions have been approximated by averaging the respective dimensions of the small and middle finger of children in the two age groups.

In the 0 to 3-year age group, measurements for a fifth-percentile 3-month-old's small and middle fingers were averaged and used to approximate the diameter of the index finger. Measurements for a 95th-percentile 3-year-old's small and middle fingers were averaged and used to approximate the length of the index finger. The minimum hand-clearance measurement of a fifth-percentile 3-month-old child was selected. These measurements were then used to define the dimensions of probe A.

For explanatory purposes, the various percentiles refer to how the size and proportions of one child within a particular age range compare with respect to the size and proportions of other children in the same age range. For example, a fifth-percentile 3-month-old child represents a child of this age, the size of whom is such that 95 percent of the children of same age are larger and only five percent are smaller.

Similarly for the over 3-year to 8-year age group, measurements for the small and middle fingers of a fifth-percentile child 37–42 months of age were averaged and used to approximate the diameter of the index finger. Measurements for the small and middle fingers of a 95th-percentile child 85–96 months of age were averaged and used to approximate the length of the index finger. The minimum hand-clearance dimensions for a fifth-percentile child 37–42 months of age were selected. These dimensions were then used to define the dimensions of probe B.

Accordingly, probes A and B shown in figure 2 of the regulation below are to be used as follows:

Probe A is to be used to determine the accessibility of edges in holes, recesses, or openings on toys intended for children 3 years of age or less.

Probe B is to be used to determine the accessibility of edges in holes, recesses, or openings on toys intended for children over 3 years up to 8 years of age.

The Commission notes that the accessibility probes are articulated in two rather than three places, as was the proposed articulated probe, because only two finger joints customarily go through an opening that will not accept the entire hand.

Detailed engineering drawings to enable the construction of the redesigned accessibility probes shown in figure 2 of the regulation below are available at a minimal cost from the Office of the Secretary, Consumer Product Safety Commission, 1111 18th Street, NW., Washington, D.C. 20207.

Based on staff recommendations and the anthropometric measurements from the University of Michigan study on the physical characteristics of children (cited in footnote 2, above) for two age groups—0 to 3 years and over 3 years up to 8 years of age, the Commission has defined accessibility for holes, recesses, and openings on toys and other children's articles as described in the following sections b, c, and d. (Holes, recesses, and openings will be referred to hereafter in this paragraph, 4, as openings).

b. *Finger access.* Section 1500.49 (c)(3)(i) of the proposed regulation proposed below provides that access into openings which are large enough to accept a child's finger but too small to accept a child's hand shall be determined by the appropriate accessibility probe shown in figure 2 of the regulation below.

The Commission notes that as indicated in section (c)(3)(i) of the proposal below each of the two joints on the probe may be rotated up to 90 degrees to simulate knuckle movement and that the total depth of insertion for accessibility shall be up to the collar on the probe that is appropriate for either the 0 to 3-year age group (probe A) or the over 3-year to 8-year age group (probe B).

The Commission points out that the diameter of the collar on each probe is representative of the hand-clearance diameter of a fifth percentile child in the youngest age category within each age group. For the 0 to 3-year age group, the youngest age category is 0–3 months of age and for the over 3-year to 8-year age group, the youngest age category is 37–42 months of age.

c. *Hand access but not shoulder access.* Section (c)(3)(ii) of the proposed regulation proposed below provides that access into openings large enough to accept a child's hand and arm but too small to admit the child's torso (body trunk) shall be determined by the dimensions of the entrance of the opening. Such openings include openings that are larger than the width of a child's hand but smaller than the breadth of a child's shoulders. For the reasons given below, the Commission finds that a depth-of-insertion factor of two and one-quarter multiplied by the minor dimension of an opening is appropriate to determine the accessibility of edges in such openings.

The Commission defines a minor dimension of an opening in footnote 1 to section (c)(3)(i), as the diameter of the largest sphere that will pass through the opening. The minor dimension of an opening can be determined by using a pair of calipers. This dimension multiplied by two and one-quarter determines the maximum depth of insertion for accessibility.

The Commission points out that the value of two and one-quarter is the approximate average of the ratio of arm length to shoulder breadth for a 50th percentile child in each of the two age groups—0 to 3 years and over 3 years to 8 years of age. For example, the depth of insertion into an opening with a minor dimension slightly smaller than the breadth of a child's shoulders will be slightly less than the length of the child's arm.

[1] All measurements were obtained from the University of Michigan's study, "Physical Characteristics of Children as Related to Death and Injury for Consumer Product Design and use" (Highway Safety Research Institute, The University of Michigan, Ann Arbor, Mich. 48105).

V 42 170 SEP 1 77 UMI

The Commission notes that the detachable extensions on the accesibility (finger) probes shown in figure 2 of the regulation below are appropriate for determining the accessibility of edges recessed in openings that are larger than the diameter for hand clearance but smaller than the dimension for shoulder breadth. For testing purposes, the appropriate insertion depth should be marked on the probe extension by any suitable means and is the distance from that mark to the tip of the simulated finger. The probe, attached to the probe extension, should be inserted in any direction into the opening up to the depth of the previously made mark. Each probe joint may be rotated up to 90 degrees to simulate knuckle movement and any edge that can be contacted by the finger portion of the probe, forward of the probe collar, shall be considered accessible.

d. *Total accessibility.* The Commission has decided that openings larger than the breadth of a child's shoulders shall be considered totally accessible. Therefore section (c)(3)(iii) of the regulation proposed below makes provision for the use of probes for such openings.

For the 0 to 3-year age group, the Commission believes that a shoulder breadth measurement of 7.36 inches is appropriate. This measurement represents a fifth-percentile one-year-old child, since children who are under one-year of age are less mobile and therefore are less likely to climb into cavities than children who are one-year of age or older.

For the over 3-year to 8-year age group, the Commission believes that a shoulder breadth measurement of 9.00 inches is appropriate. This measurement represents a fifth percentile child in the age category of 37–42 months.

The Commission believes that since significant growth occurs within the 0 to 3-year and the over 3-year to 8-year age groups, the measurements of 7.36 and 9.00 inches, respectively, provide an appropriate margin of safety in the tests for accessibility.

The Commission believes that for toys intended for children 0 to 3-years of age, access into openings with a minor dimension (defined above in paragraph 4–c) of 7.36 inches or larger shall be considered totally accessible to a child. For toys intended for children over 3 years to 8 years of age, access into openings with a minor dimension of 9.00 inches or larger shall be considered totally accessible to a child. Because openings that are totally accessible to children in the 0–8 years age span may contain smaller openings that are not totally accessible to such children, access into these smaller openings shall be determined by the appropriate procedures explained about in paragraphs 4—b or c.

e. *Inaccessible edges.* From the results of sharp edge tests conducted on a representative sample of toys, the Commission observes that tabs and other protrusions or edges do not present a laceration hazard if such protrusions or edges are flush with the toy or other protecting surface. The Commission therefore finds that an edge shall be considered inaccessible if it is protected by an adjacent surface and any gap between the edge and the adjacent surface does not exceed 0.020 inch both before and after application of the appropriate use and abuse test procedures referenced in section (b)(1) of the regulations proposed below.

Accordingly, the accessibility criteria explained above in this paragraph 4 are included below in proposed § 1500.49(c).

5. *Product-by-product regulatory approach.* The technical requirements regulation concerning toys containing edges is proposed under the authority of section 10 of the FHSA as a regulation for the efficient enforcement of the FHSA. Like the use and abuse regulations (16 CFR 1500.50 through 1500.53), the proposed regulation would establish testing criteria but would not itself ban any toy intended for children under 8 years of age. The testing criteria include the sharp edge test instrument, the accessibility probes, and the use and abuse tests. If any toy contains metal or glass edges that are identified as sharp, the Commission and its staff will evaluate the toy to determine if it presents a mechanical hazard.

If any such toy does appear to present a mechanical hazard under section 2(s) of the FHSA, the Commission will propose that it be classified as a hazardous substance (and thus a banned hazardous substance) according to sections 2(f)(1)(D), 2(q)(1)(A), and 3(e)(1) of the FHSA (15 U.S.C. 1261, 1262). Interested persons will be notified of the proposal and will have an opportunity to comment to the Commission, in accordance with the Administrative Procedure Act (5 U.S.C. 553). Notification will be by publication of the proposal in the FEDERAL REGISTER or by actual notice to the manufacturer of the affected toy, with notice to the general public, where appropriate. After the Commission and its staff evaluate all comments received, the Commission will issue a final regulation classifying the toy as a hazardous substance (and thus a banned hazardous substance) if the Commission believes that the toy presents a mechanical hazard.

If the Commission decides that a toy containing an edge, identified as sharp by the test criteria, does not present a mechanical hazard, the Commission will not initiate regulatory action against that toy.

Since this proposed regulation does not in itself ban toys, the Commission will follow the procedures described in this section and will review those toys which fail the sharp edge test criteria on a product-by-product basis. The Commission therefore encourages manufacturers of children's products to make every effort to insure that their product lines comply with the technical requirements because products which fail the test criteria may be subject to additional regulatory action which may lead to those products being declared banned hazardous substances.

6. *Use and abuse test procedures.* The proposed regulation below would require testing sharp edges before and after application of the appropriate use and abuse test procedures (16 CFR 1500.50 through 1500.53). These test procedures published as final regulations in the FEDERAL REGISTER of January 7, 1975 (40 FR 1480), do not in and of themselves ban toys and games. Rather, they are for use in exposing potential hazards that result from the normal use or the reasonably foreseeable damage or abuse to which toys and games may be subjected.

The use and abuse test procedures are to be used whenever they are referenced in regulations that are issued pursuant to the FHSA. Such regulations may identify particular mechanical hazards as defined by section 2(s) of the FHSA, which provides, in part, that (a toy) may be determined to present a mechanical hazard if, in normal use or when subjected to reasonably foreseeable damage or abuse, its design or manufacture presents an unreasonable risk of personal injury from edges.

Bites tests for various age categories are among the Commission's use and abuse test procedures for simulating normal use or reasonably foreseeable damage or abuse. With regard to the bite tests, the Commission finds, based on staff recommendations, that there is some doubt whether children can bite at the force levels specified in each of the bite tests and maintain these forces for the specified ten seconds.

The Commission's research for the bite test procedures and force levels included a study by Dr. Wilton M. Krogman.[*] A copy of the study by Dr. Krogman may be seen in the Office of the Secretary, Consumer Product Safety Commission, 1111 18th Street NW., Washington, D.C., during working hours Monday through Friday.

After considering the Krogman study and the staff's recommendations, the Commission concludes that the bite tests prescribed by §§ 1500.51(c), 1500.52(c), and 1500.53(c) should not be referenced in the proposed regulation below. Section (b)(1) of the regulation proposed below reflects this decision.

EXEMPTIONS

1. *Individual products.* Certain children's products are covered by specific regulations under the FHSA. In the case of bicycles and baby cribs, the Commission notes that these products are covered by comprehensive regulations that address the hazard of sharp edges.

Therefore, the Commission proposes to exempt from this technical requirements regulation the bicycles and baby cribs in categories that are addressed in the following three sets of individual product banning regulations:

a. Full-size baby cribs (16 CFR 1500.18(a)(13) and Part 1508) promulgated in the FEDERAL REGISTER of November 21, 1973 (38 FR 32129).

b. Bicycles (16 CFR 1500.18(a)(12) and Part 1512), amended November 13, 1975 (40 FR 52815 and 52828), published in the FEDERAL REGISTER in entirety as amended January 28, 1976 (41 FR 4144) and corrected (printer's error) February 6, 1976 (41 FR 5386).

c. Non-full-size baby cribs (16 CFR 1500.18(a)(14) and Part 1509) promulgated in the FEDERAL REGISTER of February 12, 1976 (41 FR 6238).

2. *Model and craft kits.* An industry association requested that any sharp edge regulation exempt model and craft kits because the data, test methods, and other criteria on which the regulation would be based are wholly inapplicable and irrelevant to the essential nature and use patterns of such kits.

The Commission considers adding such an exemption unnecessary because most children under 8 years of age do not have the dexterity and the reading ability for assembling complicated model and craft kits. The Commission believes also that model and craft kits in the marketplace today are usually not intended for use by children under 8 years of age. Therefore, the Commission finds that such kits are excluded from the scope of the proposed regulation below.

For purposes of the exclusion, the Commission recognizes that model and craft kits are articles containing components which may be unfinished and which require assembly or other necessary processing by the user in order to arrive at a finished product.

3. *Toys and other articles with functional sharp edges.* The Commission is proposing to exempt from the technical requirements those toys that have sharp edges by reason of their functional purpose, such as toy scissors and tool kits: *Provided,* The toy is identified by a conspicuous, legible and visible label as having sharp edges. The Commission is also proposing an exemption for other children's articles that have sharp edges by reason of their functional purpose, such as children's ice skates and children's cutlery. For purposes of both exemptions, non-functional sharp edges may be present on the toy or other article.

PREEMPTION

Section 18(b)(1)(B) of the FHSA, as amended, states:

> Except as provided in paragraphs (2), (3) and (4), if under regulations of the Commission promulgated under or for the enforcement of section 2(q) a requirement is established to protect against a risk of illness or injury associated with a hazardous substance, no State or political subdivision of a State may establish or continue in effect a requirement applicable to such substance and designed to protect against the same risk of illness or injury unless such requirement is identical to the requirement established under such regulations.

The regulations proposed below are requirements established to protect against the hazard of sharp edges on toys intended for children under 8 years of age and they are Commission regulations issued for the enforcement of section 2(q) of the FHSA. Therefore, if the regulations proposed below are issued in final form, the Commission believes and intends that state and local governments would be prohibited from establishing or enforcing any nonidentical requirement that addresses the hazard of sharp edges on toys intended for children under 8.

The Commission's proposed regulations are "technical requirements" that establish manufacturing criteria for toys intended for children under 8. As long as states or local governments use these same criteria to regulate such toys, their regulations would be considered to be identical to the Commission's regulations. Even if a state or local government were to impose different penalties or use different procedures to regulate toys, there would be no preemption as long as the manufacturing criteria were identical. As an example, if a state were to ban automatically any toy not meeting the criteria, the Commission's position is that such a ban is not preempted by the Commission's technical requirements.

EFFECTIVE DATE

It is contemplated that the effective date will be 365 days from publication of a final regulation establishing technical requirements to identify toys with potentially hazardous sharp metal or glass edges for all products subject to the regulation and introduced into interstate commerce after that date. For purposes of the regulation, introduction into interstate commerce is defined as follows: A toy manufactured outside the United States is introduced into interstate commerce when it is first brought within a U.S. port of entry. A top manufactured in the United States is introduced into interstate commerce (a) at the time of its first interstate sale, or (b) at the time of its first intrastate sale if one or more of its components and/or raw materials were received interstate.

ENVIRONMENTAL CONSIDERATIONS

An assessment of the potential environmental impact has been made of proposed § 1500.49 establishing technical requirements to identify toys and other articles that are intended for use by children under 8 years of age and that have sharp metal or glass presenting a potential laceration or avulsion injury hazard. The Commission concludes that there are no potentially significant environmental impacts associated with the proposal. Therefore, there is no need for an environmental impact statement. A copy of the environmental assessment may be inspected at the Office of the Secretary.

METRIC CONVERSION

Throughout the regulation English figures are used. The metric approximations in parentheses are included for convenience and information only.

THE PROPOSAL

Accordingly, pursuant to provision of the Federal Hazardous Substances Act (secs 2(s), 10(a), 74 Stat. 378 (15 U.S.C. 1261, 1269)) in accordance with the provisions of 5 U.S.C. 553, and under authority vested in the Commission by the Consumer Product Safety Act (Pub. L. 92–573, sec. 30(a), 86 Stat. 1231 (15 U.S.C. 2079(a)), the Commission proposes to amend 16 CFR Part 1500 by adding a new § 1500.49 as follows:

§ 1500.49 Technical requirements for determining a sharp metal or glass edge in toys and other articles intended for use by children under 8 years of age.

(a) *Objective.* The sharp edge test method prescribed by paragraph (d) of this section will be used by the Commission in making a preliminary determination that metal or glass edges on toys and other articles intended for use by children under 8 years of age, and such edges exposed in normal use or as a result of reasonably forseeable damage or abuse of such toys and articles present a potential risk of injury by laceration or avulsion under section 2(s) of the Federal Hazardous Substances Act (15 U.S.C. 1261(s)). The Commission will further evaluate toys and other articles with edges that are identified as presenting a potential risk of laceration or avulsion injury to determine the need for individual product regulation.

(b) *Scope.*—(1) *General.* The sharp edge test of paragraph (d) of this section is applicable to toys or other articles containing metal or glass edges that are introduced into interstate commerce on or after (365 days after publication in the FEDERAL REGISTER of a final regulation). The sharp edge test shall be applied to any portion of the test sample before and after subjecting the test sample to the use and abuse tests of § 1500.51, 1500.52, and 1500.53 (excluding the bite test—paragraph (c) of each section).

(2) *Exemptions.* (i) Toys and other children's articles that are the subject of any of the following regulations are exempt from this § 1500.46: The regulations for bicycles, non-full-size baby cribs, and full-size baby cribs (Parts 1508, 1509, and 1512 of this chapter.)

(ii) Toys that by reason of their functional purpose necessarily present the hazard of sharp metal or glass edges and that do not have any nonfunctional sharp metal or glass edges are exempt from this section: *Provided,* The toy is identified by a conspicuous, legible, and visible label at the time of any sale, as having functional sharp metal or glass edges. Examples of these are a pair of toy scissors or toy tool kits.

(iii) Articles, besides toys, intended for use by children that by reason of their functional purpose necessarily present the hazard of sharp metal or glass edges and that do not have any nonfunctional sharp metal or glass edges are exempt from this section. Examples of these are children's ice skates and children's cutlery.

(3) *Definitions*—(i) *Glass.* For the purpose of this regulation the Commission defines glass as a hard, brittle, amorphous substance produced by fusion, usually consisting of mutually dissolved silica and silicates that also contain soda and lime.

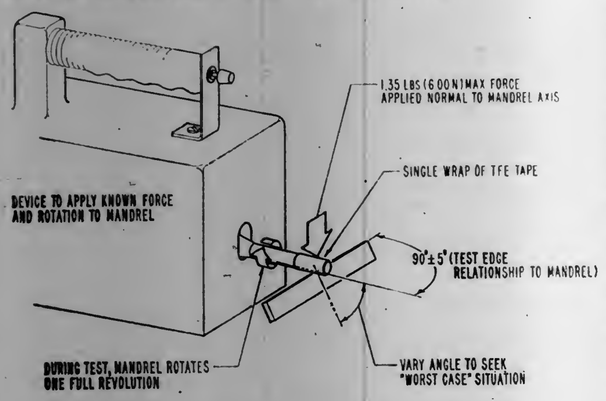
[*] Manual and Oral Strengths of American White and Negro Children, Ages 3–6," by Dr. Wilton Krogman (the study by Dr. Krogman, dated September 1, 1971, was sponsored by the Closure Committee of the Glass Container Manufacturers Institute, Inc.).

V 42 170 SEP 1 77 V UMI

(ii) *Metal.* For the purpose of this regulation the Commission intends the word metal to include both elemental metals and metal alloys.

(c) *Accessibility*—(1) *General.* Any metal or glass edge that is accessible either before or after the tests of §§ 1500.51, 1500.52, and 1500.53 (excluding the bite test—paragraph (c) of each section) are performed shall be subject to the sharp edge test of paragraph (d) of this section.

(2) *Accessible edges.* (i) An accessible metal or glass edge for a toy or article intended for children 3 years of age or less is one that can be contacted by any portion forward of the collar of the accessibility probe designated as probe A in figure 2 of this section.



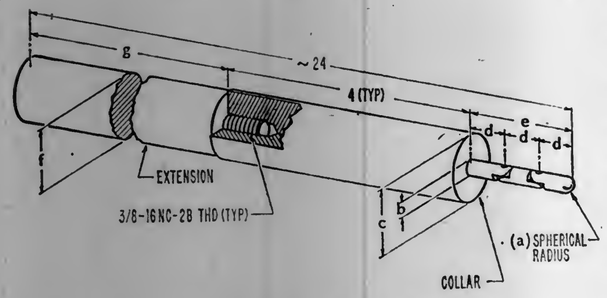


FIG 1—PRINCIPLE OF SHARP EDGE TEST

		a	b	c	d	e	f	g
(CHILDREN 0-36 MONTHS INCL)	PROBE A	.110	.220	1.020	.577	1.731	1	18 9/32
(" 37-96 " ")	PROBE B	.170	.340	1.510	.760	2.280	1 1/2	17 25/32

ALL DIMENSIONS IN INCHES

FIG 2—ACCESSIBILITY PROBES

(ii) An accessible edge for a toy or article intended for children over 3 years up to 8 years of age is one that can be contacted by any portion forward of the collar of the accessibility probe designated as Probe B in figure 2 of this section.

(iii) An accessible edge for a toy or article intended for children of ages spanning both age groups is one that can be contacted by any portion forward of the collar of either Probe A or Probe B, as shown in figure 2 of this section.

(3) *Insertion depth.* (i) For any hole, recess, or opening having a minor dimension[4] smaller than the collar diameter of the appropriate probe, the total insertion depth for accessibility shall be up to the collar on the appropriate probe. Each probe joint may be rotated up to 90 degrees to simulate knuckle movement.

(ii) For any hole, recess, or opening having a minor dimension larger than the collar diameter of Probe A, but less than 7.36 inches (186.9 millimeters), when Probe A is used, or a minor dimension larger than the collar diameter of Probe B, but less than 9.00 inches (228.6 millimeters), when Probe B is used, the total insertion depth for accessibility shall be determined by inserting the appropriate probe with the extension, shown in Figure 2, in any direction up to two and one quarter times the minor dimension of the hole, recess, or opening, measured from any point in the plane of the opening. Each probe joint may be rotated up to 90 degrees to simulate knuckle movement.

(iii) For any hole, recess, or opening having a minor dimension of 7.36 inches (186.9 millimeters) or larger when Probe A is used, or a minor dimension of 9.00 inches (228.6 millimeters) or larger when Probe B is used, the total insertion depth for accessibility is unrestricted unless other holes, recesses, or openings within the original hole, recess, or opening are encountered with dimensions specified in paragraph (c)(3)(i) or (ii) of this section. In such instances, the appropriate paragraphs (c)(3)(i) or (ii) of this section shall be followed. If both probes are to be used, a minor dimension that is 7.36 inches (186.9 millimeters) or larger shall determine unrestricted access.

(4) *Inaccessible edges.* Metal or glass edges shall be considered inaccessible without testing with a probe if they lie adjacent to a surface of the test sample, and any gap between the edge and the adjacent surface does not exceed 0.020 inch (0.50 millimeter) both before and after the tests of 1500.51, 1500.52, and 1500.53 (excluding the bite test—paragraph (c) of each section) are performed. For example, a lap joint in which a metal edge is overlapped by a parallel surface, any burr or feather-edge on the side closest to the protecting parallel surface is considered inaccessible if the gap between the edge and the parallel surface is no greater than 0.020 inch (0.50 millimeter).

(d) *Sharp edge test method*—(1) *Principle of operation*—The test shall be performed with a sharp edge tester[5] which contains a cylindrical mandrel capable of rotation at a constant velocity. The full circumference of the mandrel shall be wrapped with a single layer of polytetrafluoroethylene (TFE) tape as specified in paragraph (e)(3) of this section. The mandrel shall be applied to the edge to be tested with a normal force of up to but not exceeding 1.35 pounds (6.00 Newtons) such that the edge contacts the approximate center of the width of the tape as shown in figure 1 of this section. The mandrel shall be rotated through one complete revolution while maintaining the force against the edge constant. Linear motion of the mandrel along the line of the edge shall be prevented. The edge shall be identified as sharp if it completely cuts through the tape for a length of not less than ½ inch (13 millimeters) at any force up to 1.35 pounds (6.00 Newtons).

(2) *Procedure* (i) The edge of the sample to be tested shall be held in such a manner that it does not move during the test. If the full mandrel force of 1.35 pounds (6.00 Newtons) causes the edge to bend, a reduced mandrel force may be used.

(ii) Part of the test sample may need to be removed to allow the sharp edge testing device to test an edge that is accessible by the criteria of paragraph (c) of this section. Such dismantling of the test sample could affect the rigidity of the edge in question. The sharp edge test shall be performed with the edge supported so that its stiffness approximates but is not greater than the edge stiffness in the assembled sample.

(iii) Conduct of a sharp edge test is as follows: Wrap one layer of polytetrafluoroethylene (TFE) tape, described in paragraph (e)(3) of this section, around the full circumference of the mandrel in an unstretched state. The ends of the tape shall be either butted or overlapped not more than 0.10 inch (2.5 millimeters). Apply the mandrel, at the approximate center of the tape, to the edge of the test sample with a force of up to, but not greater than 1.35 pounds (6.00 newtons) measured in a direction at right angles to the mandrel axis. The mandrel shall be placed so that its axis is at 90 degrees ±5 degrees to the line of a straight test edge or 90 degrees ±5 degrees to a tangent at the point of contact with a curved test edge. The point of contact between the test edge and the mandrel shall be in the approximate center of the width of the tape. The axis of the mandrel may be positioned anywhere in a plane which is at right angles to either the line of a straight test edge or to a tangent at the point of contact with a curved test edge. The operator should seek the orientation most likely to cause the edge to cut the tape. Maintain the force against the edge and rotate the mandrel through one complete revolution while preventing any linear motion of the mandrel along the edge. Release the mandrel from the edge and remove the tape without enlarging any cut or causing any score to become a cut. A cut in the tape with a length of not less than ½ inch (13 millimeters) identifies an edge as sharp.

(e) *Specifications for sharp edge test equipment.* The following specifications shall apply to the equipment to be used in sharp edge test described in paragraph (d) of this section:

(1) The rotation of the mandrel shall produce a constant tangential velocity of 1.00±0.08 inch per second (25.4±2.0 millimeters per second) during the center 75 percent of its rotation and shall have a smooth start and stop.

(2) The mandrel shall be made of steel. The test surface of the mandrel shall be free of scratches, nicks, or burrs and shall have a surface roughness no greater than 16 microinches (0.40 micron). The test surface shall have a hardness no less than 40 as measured on the Rockwell "C" scale, as determined pursuant to ASTM E 18–74 entitled "Standard Test Methods for Rockwell Hardness and Rockwell Superficial Hardness of Metallic Materials," published July 1974.[6] The diameter of the mandrel shall be 0.375±0.005 inch) (9.35±0.12 millimeters). The mandrel shall be of suitable length to carry out the test.

(3) The tape shall be pressure-sensitive polytetrafluoroethylene (TFE) high temperature electrical insulation tape as described in MIL–I–23594B. The thickness of the polytetrafluoroethylene backing shall be between 0.0026 inch (0.066 millimeter) and 0.0035 inch (0.089 millimeter).[7] The adhesive shall be a pressure-sensitive silicone polymer with a nominal thickness of 0.003 inch (.08 millimeter). The width of the tape shall not be les than ¼ inch (6 millimeters). While conducting sharp edge tests the temperature of the tape shall be maintained between 70°F (21.1° C) and 80°F (26.6° C).

(f) For the purpose of conformance with the technical requirements prescribed by this § 1500.49, the English figures shall be used. The metric approximations are provided in parentheses for convenience and information only.

Interested persons are invited to submit, on or before October 3, 1977, written comments regarding this proposal. The Commission will consider late comments to the extent practicable. Comments and any accompanying data or material should be submitted, preferably in five copies, addressed to the Secretary, Consumer Product Safety Commission, 1111 18th Street, N.W., Washington, D.C. 20207. Comments may be accompanied by a memorandum or brief in support thereof. Received comments may be seen in the Office of the Secretary, at the above address, during working hours Monday through Friday.

Dated: August 26, 1977.

RICHARD RAPPS,
Secretary,
Consumer Product Safety Commission.

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER—PESTICIDE PROGRAMS

[FRL 769-7; OPP-30015]

PART 162—REGULATIONS FOR THE ENFORCEMENT OF THE FEDERAL INSECTICIDE, FUNGICIDE, AND RODENTICIDE ACT

Optional Procedures for Classification of Pesticide Uses by Regulation

AGENCY: Office of Pesticide Programs, Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: This regulation establishes optional procedures for the classification by regulation of uses of pesticide products for restricted use.

The Agency is undertaking this action in order to comply with the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, requirement that pesticide uses be classified for either restricted or general use. By establishing these procedures the Agency will also be supporting the applicator certification program and providing an additional measure of environmental protection. Those uses that are not classified restricted via this process have been left unclassified as additional data will have to be examined prior to proposing a general use classification.

EFFECTIVE DATE: September 1, 1977.

FOR FURTHER INFORMATION CONTACT:

James H. White, Project Leader (WH-570), Office of Pesticide Programs, Environmental Protection Agency, Room E509A, 401 M Street SW., Washington, D.C. 20460, Telephone: 202-755-8297.

SUPPLEMENTARY INFORMATION: The Agency is also publishing three other related documents in this separate part. Comments pertaining to all four documents from the FIFRA Scientific Advisory Panel and the U.S. Department of Agriculture (USDA), and the responses of the Deputy Assistant Administrator for Pesticide Programs to these comments are published as an appendix to this rulemaking document.

One of the documents (OPP-30016) adds subsections to § 162.30 relating to compliance, amendments of registrations, labeling, hearing rights, and enforcement. Although those subsections are also procedural in nature, they will not apply until after the promulgation of a final rule under § 162.30(c)(3). Accordingly, the Agency has determined, in the public interest, to promulgate the additional subsections as proposed regulations and to specifically solicit public comment.

Another document (OPP-30017) is a proposed rule listing 23 active ingredients which have been reviewed by the Agency thus far. Some of the uses of these active ingredients have been classified for restricted use; others remain unclassified.

The fourth document (OPP-30018) is an advance notice of proposed rulemaking which presents a list of active ingredients which the Agency intends to review and classify. Additional information is being solicited.

Section 3(d) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended, provides that as part of the registration of a pesticide the Administrator shall classify its uses as being for general use or restricted use. It further provides that a use shall be classified as restricted if the Administrator determines that the use of the pesticide, when applied in accordance with its directions for use, warnings and cautions, or in accordance with a widespread and commonly recognized practice, may generally cause, without additional regulatory restrictions, unreasonable adverse effects on the environment, including injury to the applicator. The regulatory restriction may take the form of a requirement that the product having a restricted use be applied only by or under the direct supervision of a certified applicator, or such other requirement as the Administrator may provide by regulation.

The Act further provides that the Administrator is to reregister and classify all previously registered pesticides by October 21, 1977, and must implement State programs for the certification of applicators by that same date. However, unforeseen difficulties with the reregistration process have seriously delayed progress, and current projections for the completion of reregistration and classification extend well beyond the October 1977 deadline. Nevertheless, classification of substantial numbers of pesticide products is desirable in order to lessen the risks involved in pesticide use, to preserve the integrity of the certification program, and to provide needed support for the States in this area. Accordingly, the Agency has decided to proceed with classification apart from the reregistration process.

In order to accomplish this goal as expeditiously as possible, the Administrator has established an optional procedure which will allow him, at his discretion to classify uses by means of rulemaking. This procedure will not necessarily apply to individual products or individual uses of individual products, but rather will provide for classification of uses by groups of products. Thus, the Administrator may describe a group comprised of all products which contain a particular active ingredient or contain a particular active ingredient in a particular concentration range, formulation type, or combination of concentration range and formulation type. He may then classify for restricted use some or all uses of the products in that group. This approach will be consistent with the generic registration authority being requested of the Congress.

The Agency wishes to emphasize that the establishment of this optional procedure for classification by regulation does not alter the status of classification as an integral part of the registration or reregistration processes. This is merely an optional procedure and, as explained more fully below, it will focus on the "incremental" risk/benefit analysis established by § 162.11(c). This will involve a comparison of restricted and unrestricted use, and a use will be classified if the incremental risks of unrestricted use outweigh the incremental benefits of unrestricted use. Classification is also appropriate if it will avoid the need to cancel a use of a pesticide in a situation where, but for the classification and imposition of restrictions, the risks of that use would exceed the benefits. That decision will require an evaluation of the overall risks and benefits associated with a use, and will be accomplished during the "rebuttable presumption against registration" (RPAR) process set forth in § 162.11 (a) and (b). Evaluations of overall risks and benefits will also occur in making decisions whether to register or reregister products, and classification decisions made in those contexts also may focus on reduction of overall risks. Moreover, since this optional procedure only involves an incremental, and not an overall risk/benefit analysis, a decision under the optional procedure to restrict (or not to restrict) a use of a product will not in any way imply that the product will (or will not) ultimately satisfy the statutory standards governing registration or reregistration.

In determining whether to classify a use of a group of products as restricted under this procedure, the Administrator shall apply the criteria specified in § 162.11(c) (1), (2), and (4). If these criteria for general use are not met, the Administrator will perform the incremental risk/benefit analysis outlined in § 162.11(c). This incremental risk/benefit analysis requires the Administrator to compare the incremental benefits of unrestricted use (those over and above the benefits of restricted use) with the incremental risks of unrestricted use (those over and above the risks of restricted use).

In evaluating the incremental risks of unrestricted use, the Administrator will focus on those risks which could be reduced by restriction. This would include reduction of risk to the applicator (by a requirement that the applicator be certified or under the direct supervision of a trained, certified applicator) as well as reduction of risk to non-applicators, fish and wildlife, and non-target species. Conversely, in evaluating the incremental benefits of unrestricted use, the Administrator will focus on benefits which would be lost if the use were restricted. The predominant factor here will be the extent to which the imposition of a restriction will limit access to, or the availability of, a product.

If the Administrator determines that the incremental risks of unrestricted use outweigh the incremental benefits from unrestricted use, he will classify the use as restricted. Before reaching a final decision to classify, however, the Administrator will also consider whether specific standardized language can be developed for incorporation on the labels

of products in the affected groups, which would be adequate to reduce the risk of unreasonable adverse effects on the environment so as to eliminate the need for restricted classification of use(s) of any product so labeled. If the Administrator affirmatively determines that such language has been developed, he shall not classify the use for restricted use.

If the Administrator tentatively determines to classify a use of a group of products as restricted, he will publish a notice of proposed rulemaking in the FEDERAL REGISTER describing the category of products, identifying the use proposed to be classified as restricted, and setting forth the nature of the proposed restrictions. These restrictions may include a limitation to application by or under the direct supervision of a certified applicator, or may take the form of any other regulatory restriction, including those described in § 162.11(c)(5). The notice will also contain a summary of the basis for the proposed classification and will state how an interested person may obtain further information concerning the basis for the proposed action.

After publication of the notice, there will be a comment period of at least 45 days during which a registrant or any other interested party may submit written comments on the proposed classification and the proposed restriction(s). These comments may specifically include any pertinent test data, including data relating to the criteria specified in § 162.11(c) (1), (2), and (4), and may suggest proposed label and labeling language for the group which, if contained in the label and labeling of any product in the group would, in the opinion of the commenter, eliminate the need for restricted use classification of that product. It should be stressed that any suggested language must be of general applicability to the entire group of products; the Agency will generally not review proposed modifications on an individual product-by-product basis as a part of this rulemaking.

After consideration of the comments received, the Administrator may publish a final rule in the FEDERAL REGISTER classifying a use of all products within a product group as restricted and establishing the use restrictions pertaining to that use. The final rule would also specify standardized language which, if contained in the label or labeling of any product in the group, will eliminate the need for restricted use classification of that product. The Administrator is required to notify by certified mail all registrants whose products may be affected by the restriction.

The Administrator has determined that there are compelling public interest reasons for these regulations to be made effective at this time without notice and opportunity for comment by the public. These regulations contain rules of Agency procedure. Section 553 (b) of the Administrative Procedure Act, Title 5, U.S.C., provides that all regulations governing procedure or practice may be published without the requirement of notice and opportunity for public comment. These regulations impose no new substantive requirements or standards for classification, but merely specify and explain the procedures that the Agency will use in classifying uses by regulation. These procedures shall take effect upon publication. Any delay in the effectiveness of these procedures may interfere with the orderly and timely classification of pesticide products by regulation.

Finally, the Agency has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Analysis Statement under Executive Orders 11821 and 11949 and OMB Circular A-107

Effective on September 1, 1977, Part 162 is amended as set forth below.

Dated: August 16, 1977.

DOUGLAS M. COSTLE,
Administrator.

(Secs. 3, 25(a), Federal Insecticide, Fungicide, and Rodenticide Act, as amended (7 U.S.C. 136 et seq.).)

Part 162 of 40 CFR is amended by adding the new § 162.30 to read as follows:

§ 162.30 Optional procedures for classification of pesticide uses by regulation.

(a) *Restricted use classification groups.* The Administrator may by regulation, describe a group of products having common characteristics, and may, by regulation, classify for restricted use (see FIFRA section 3(d)) some or all uses of all products included in that group. Such a group may be comprised of:

(1) Those products which contain active ingredients in common; or

(2) Those products which contain active ingredients in common and are in a particular concentration range, formulation type, or combination of concentration range and formulation type.

(b) *Criteria.* A use shall be classified for restricted use if the Administrator determines that the incremental risks of unrestricted use outweigh the incremental benefits of unrestricted use. The Administrator shall apply the criteria specified in § 162.11(c)(1), (2), and (4) to make this determination.

(c) *Procedure.* (1) If the Administrator preliminarily determines that some or all uses of a group of products should be classified for restricted use under this section, he shall publish a notice of proposed rulemaking in the FEDERAL REGISTER describing the group of products, the use(s) proposed to be classified as restricted, and the nature of the proposed restrictions. Such notice shall also set forth a summary of the basis for the proposed classification and state how an interested person may obtain further information concerning the basis for the proposed action.

(2) After publication of the notice in the FEDERAL REGISTER, a registrant or any other interested party may submit written comments on the proposed classification and the proposed restriction(s). Pertinent test data and other information may be submitted, as may proposed label and labeling language which, if contained in the label and labeling of any product in the group would, in the submitter's opinion, eliminate the need for a restricted use classification of the product. The comment period shall be not less than 45 days.

(3) After consideration of the comments received, the Administrator may publish a final rule in the FEDERAL REGISTER classifying a use as restricted and specifying the terms of restriction. The Administrator shall notify by certified mail all registrants whose products have uses that are restricted.

(4) The final rule may also specify language which, if contained in the label and labeling of any product in the group, would eliminate the need for a restricted use classification of the product.

DEPARTMENT OF AGRICULTURE,
OFFICE OF THE SECRETARY,
Washington, D.C., June 15, 1977.

MR. EDWIN JOHNSON,
Deputy Assistant Administrator, Office of Pesticide Programs, Environmental Protection Agency, Washington, D.C.

DEAR MR. JOHNSON: This letter is in response to your June 1, 1977 transmittal letter concerning the classification of restricted use pesticides by regulation. The Department supported the concept of classification by regulation in testimony before Congressional committees in April and June of this year. We have emphasized the need to implement the restricted use program on schedule and agree with EPA's opinion that the program cannot be initiated in a timely manner through the reregistration process. Accordingly, we continue to endorse the concept of establishing restricted use categories on the basis of regulations, and hope that these preliminary suggestions assist your agency in its consideration of this important topic.

1. The preamble to the proposed regulations states "that restriction will only have a minimal impact on availability because of the large number of certified applicators and the relative lack of difficulty of obtaining applicator certification." (p. 4). This statement may not adequately permit consideration of specific effects of a restricted classification for all uses, particularly the minor usee. We believe that deletion of the statement would avoid any appearance of pre-judgment of the effects of restricted use classification, and would permit greater agency flexibility in the classification program.

2. In 40 CFR 162.30 (a) through (c), as proposed states: "The Agency will not review proposed [label] modifications on an individual product-by-product basis" (p. 6). In our opinion there probably will be instances where individual product consideration may be beneficial. Accordingly, the proposal would better serve the public interest if the word "generally" were inserted between the words "not" and "review."

3. At page 2, in the Supplementary Information section, the foregoing problem is again emphasized. The proposed regulations provide that: 'This procedure will not apply to individual products or individual uses of individual products, but rather will provide for classification of uses by groups of products." This deficiency can be remedied by inserting the word "necessarily" between the words "not" and "apply."

4. Under proposed § 162.30(i) it will be difficult to enforce equitably the requirement for relabeling of existing stocks at the retail level within the proposed periods. Therefore, we suggest that an extended time schedule be adopted as an effective date rather than

V 42 170 SEP 1 77 V UMI

utilizing prosecutorial discretion regarding violations. It seems unfair to place a retail dealer in violation of the EPA regulations because he did not have time to relabel his inventory. State regulatory agencies that have had extensive experience with the problem of existing inventories have found it desirable to provide one year for compliance with relabeling requirements.

5. Proposed §§ 162.30(d) through (i) may limit the scope of the hearings provided by FIFRA under section 6(b)(1) regarding changes in classification and under section 3 on applications for registration. The rationale for the proposed regulation is that a previous opportunity to present evidence will have been provided by the agency through its notice of intent to classify products as restricted and the opportunity for comment on the proposal. The rule-making procedure might be improved by also providing for adjudicative procedure, where desired.

The Department appreciates this opportunity to comment on the proposed regulations for classification. We continue to believe that the standards for determining those pesticides and their uses that require restriction need to be amended. In some instances, the criteria in 40 CFR 162.11(c)(1), (2) and (4) are inappropriate and must be amended before the classification process to be established pursuant to these regulations can be reasonably accomplished. Finally, it must emphasize that we have not had time to complete a comprehensive evaluation of the actual proposed list of restricted uses of particular pesticides, and are, therefore, obliged to stress that we will present our opinions regarding that matter after your agency publishes the initial proposal.

Sincerely,

ERRETT DECK,
Coordinator, Office of Environmental Quality Activities.

DEPARTMENT OF AGRICULTURE,
OFFICE OF THE SECRETARY,
Washington, D.C., June 20, 1977.

Mr. EDWIN JOHNSON,
Deputy Assistant Administrator, Office of Pesticide Programs, U.S. Environmental Protection Agency, Washington, D.C.

DEAR MR. JOHNSON: In reviewing a copy of my June 15, 1977 letter regarding the classification of restricted uses of pesticides by regulation, I find that a paragraph of my rough draft was left out. This paragraph quoted below will provide you with approval for you to publish the proposed procedures and proposed restricted uses of pesticides as per your desired schedule.

"In order to expedite your publication of the proposed optional procedures as well as the final optional procedures, we will comment on both within the 15 days provided for final regulations. Although the Department has not had time to complete evaluation of the actual proposed restricted uses of certain pesticides, it is suggested that you proceed with the publication of the proposed restricted uses. We will be willing to assist your agency in the evaluation of the comments that are received on these uses prior to your final adoption."

Sincerely,

ERRETT DECK,
Coordinator, Office of Environmental Quality Activities.

July 19, 1977.

Mr. ERRETT DECK,
Coordinator, Office of Environmental Quality Activities, U.S. Department of Agriculture, Washington, D.C.

DEAR MR. DECK: We have received your letter expressing your suggestions relating to the proposed regulations under Section 3(d) and 25(a) of FIFRA for the classification of pesticides. We greatly appreciate your cooperation and quick response on this topic. The mutual agreement to waive the statutory review periods will greatly speed up the implementation of this needed proram. Our response to your specific comments is noted below.

1. We accept your suggestion to delete this sentence to allow more flexibility in the classification program.

2. We accept your suggestion to add the word "generally" to that sentence. This also will provide for flexibility.

3. We accept your suggestion to insert the word "necessarily" to the specific sentence in keeping with suggestion No. 2 above.

4. We accept your suggestion to extend the time periods for the relabeling of pesticides. We have extended the time for relabeling at the retail level from 90 to 180 days. We also have changed the time schedule to function as an effective date rather than using prosecutorial discretion regarding violations. If the written comments strongly indicate that the relabeling deadlines be further extended, the Agency will consider such extension in promulgation of final regulations.

5. We have not changed the wording of proposed § 162.30(h) regarding the scope of hearings allowed under this procedure. The Agency wants to limit the scope of such hearing to prevent the introduction of unrelated issues at a hearing based on a classification issue. This approach will help to shorten lengthy administrative hearings.

Thank you again for working with us in implementing the classification program.

EDWIN L. JOHNSON,
Deputy Assistant Administrator for Pesticide Programs.

FEDERAL INSECTICIDE, FUNGICIDE, AND RODENTICIDE ACT (FIFRA)

SCIENTIFIC ADVISORY PANEL

Review of FIFRA Section 3(d) Draft Optional Procedures for Classification of Pesticide Uses by Regulations

The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Scientific Advisory Panel has completed review of final proposed rulemaking for classification of pesticide uses by regulation. Expedited procedures were followed throughout the review in order to assist the U.S. Environmental Protection Agency to rapidly move forward with a regulatory program on classification of pesticides which is a critical aspect of successful implementation of programs for certification of operators under Section 4(c)(4) of FIFRA.

In response to a request by EPA for scientific support while reviewing the document, the Panel conducted a series of open meetings to markup a progressively improving proposed regulation. Following each session, the Agency would appropriately amend the document in consideration of public comments and recommendations of the Panel. The Panel reviewed the classification of pesticides document and associated materials provided by EPA in support of the proposal in open meetings as follows: subcommittee meetings at Bryce Mountain, Va., during the period April 22-23, 1977, and April 29, 1977; and formal Panel review in Washington, D.C. during the period May 26-27, 1977. In addition, the Chairman and Vice-Chairman of the Advisory Panel met in Executive Session in Washington on July 7, 1977 to certify that the document reflecting final Agency Policy was appropriately amended in accordance with recommendations of the Panel and to conduct a final telephonic roll-call of the membership.

Maximum public participation was encouraged at all meetings. In addition to comments by representatives of EPA, public comments were received during the meetings from the pesticide industry, the U.S. Department of Agriculture, the Environmental Defense Fund, and representatives of the National Agricultural Chemicals Association. Public notice of all meetings was published in the FEDERAL REGISTER on April 7, 1977; May 11, 1977; and May 20, 1977. Written statements were received from the following sources: American Cyanamid Company, Chevron Chemical Company, Dow Chemical Company, E. I. duPont and Company, Mobay Chemical Company, Pennwalt Corporation, Union Carbide Corporation, and Velsicol Chemical Corporation.

On the basis of consideration of all matters brought during Panel meetings, matters brought out in written statements from the public, and careful review of the proposed regulations, the Panel submits the following report:

The FIFRA Scientific Advisory Panel feels that the document describing Optional Procedures for Classification of Pesticide Uses by Regulation, as written in the draft dated 30 June 1977, deals effectively with this procedure.

The Panel agrees with all proposed classification of pesticide uses as restricted except for aldicarb. Data currently available for review by the Panel on aldicarb does not warrant restriction of use of this product. The basis for restriction of use is the potential avian hazard of aldicarb. The Scientific Advisory Panel does not feel that the data reviewed by the Panel on this pesticide supports a demonstrated avian hazard as a result of the use of this product in the recommended manner. Additional comments relative to this potential hazard are solicited by the Panel.

A majority of the FIFRA Scientific Advisory Panel concurred in the above report following a special telephonic poll of the membership by Dr. Torgeson and Dr. Neal on July 7, 1977. No votes were recorded from Drs. Davies, Davis, and Metcalf due to their unavailability on the day of the poll.

For the Chairman.

Certified as an accurate report of findings:

H. WADE FOWLER, JR., PH. D.,
Executive Secretary, FIFRA Scientific Advisory Panel.

U.S. ENVIRONMENTAL PROTECTION AGENCY,
Washington, D.C., July 21, 1977.

Subject: Review of Proposed Procedures for Classification of Pesticide Uses by Regulation.

From: Deputy Assistant Administrator for Pesticide Programs.

To: H. Wade Fowler, Jr., Ph.D., Executive Secretary, FIFRA Scientific Advisory Panel.

I have received the report of the Scientific Advisory Panel based on their review of the proposed procedures for the classification of pesticide uses by regulation. I am pleased with the manner and depth of review by the Panel. In addition, EPA is appreciative of the expeditious handling of this proposal. The review made by the Panel as well as the input received at their public review and in written statements aided greatly in the development of these regulations.

The Agency recognizes that the Panel does not agree with the decision of EPA's scientific personnel to restrict some uses of aldicarb. I assume that this disagreement is limited to the agricultural uses of aldicarb and does not include the proposed restrictions for greenhouse and nursery uses. If this is not the case, please advise. To receive additional input on this issue the agency will propose to restrict uses of aldicarb in order to receive written comments from other parties. A final decision will be made after considering any additional written comments that may be received regarding the proposal.

Thank you again for your support on the classification document.

EDWIN L. JOHNSON.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 162]

[FRL 769-8; OPP-30016]

CLASSIFICATION OF PESTICIDE USES BY REGULATION

Optional Procedures

AGENCY: Office of Pesticide Programs, Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: This proposed rule amends 40 CFR 162.30 and establishes the procedures to be followed by registrants after the promulgation of a final rule classifying a use of a pesticide product for restricted use. The purpose of this proposed rulemaking is to provide proposed deadlines for submittal of appropriate applications for amended registration, label, and labeling requirements for restricted use products, enforcement procedures, and a discussion of the hearing rights of pesticide registrants. This notice also proposes to amend 40 CFR 162.10 by deleting the requirement for applicator categories on the label and revising the restricted use classification label statement.

DATE: Comments must be received on or before October 3, 1977.

ADDRESS COMMENTS TO: Federal Register Section, Technical Services Division (WH-569), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460. Comments should be filed in triplicate and bear the identifying notation "OPP-30016." All written comments will be available for public inspection from 8:30 a.m. to 4 p.m. Monday through Friday.

FOR FURTHER INFORMATION CONTACT:

James H. White, Project Leader (WH-570), Office of Pesticide Programs, Environmental Protection Agency, Room E509A, 401 M Street, SW., Washington, D.C. 20460, 202-755-8297.

SUPPLEMENTARY INFORMATION: Three related documents are also published in this part of the FEDERAL REGISTER. Comments pertaining to all four documents are published as an appendix to the rulemaking document.

Subsections (a), (b), and (c) of § 162.30, which are published on and effective as of this date, established optional procedures for the classification of pesticide uses by regulation. These proposed subsections ((d), (e), (f), (g), (h), and (i)), which are also procedural in nature, relate to matters following the promulgation of a final rule classifying a use as restricted; compliance, amendments of registrations, labeling, hearing rights, and enforcement. Since these subsections will not be applicable until a use is actually restricted under the procedures outlined in subsections (a), (b), and (c), the Agency has determined, in the public interest, to specifically solicit comment on the subsections contained in this notice.

COMPLIANCE

Under the proposal, after publication of a final rule classifying a use of a group of products as restricted, the Administrator would issue a notice of intent to cancel the registration of a product in tha group unless the registrant, not later than 45 days after the effective date of the final rule, had submitted an appropriate application for amended registration based solely on the changes required in this regulation. No other types of amendments will be considered under this procedure.

The contents of that application would be determined by two factors. The first factor would be whether the final rule specified standardized language which, if contained in the label and labeling of any product in the group, would eliminate the need for restricted use classification of that product. If the final rule did specify such language, the application for amended registration could be based solely on a proposed label and proposed labeling which incorporated the standardized language.

The second factor would be whether or not all the uses of the product had been classified for restricted use. If all uses were restricted (and the final rule did not provide for standardized labeling language), the application for amended registration would have to be based solely on a proposed label and proposed labeling which complied with proposed § 162.30(g). The label would have to contain the statement of restricted use classification required by § 162.10(j)(2) and the labeling would have to contain directions for use which are consistent with the terms of restriction. The amended label could consist of an adhesive sticker which contains the statement of restricted use classification required by § 162.10(j)(2).

If some but not all uses had been classified for restricted use (and the final rule did not provide for standardized labeling language), the registrant would have two options. First, he might base his application for amended registration on a proposed label and labeling which complied with proposed § 162.30(g) with respect to the uses which had been classified as restricted; the label and labeling could also contain directions for use for the remaining, unclassified uses. The amended label could consist of an adhesive sticker which contains the statement of restricted use classification required by § 162.10(j)(2). According to 40 CFR 162.10(j) a product which bears directions for both restricted and unrestricted uses may only be sold to certified applicators or persons under their direct supervision. In addition, it would be a use inconsistent with the labeling for an individual, other than a certified applicator or someone under his direct supervision, to use such a product even for its unclassified uses. Second, the registrant might instead request that the existing registration be "split" into two registrations, one pertaining only to the uses which had been classified for restricted use, and the other pertaining only to the remaining unclassified uses. In this case, the application would request amendment of the existing registration to pertain to the restricted uses only or to the restricted uses and unclassified uses, and would propose a label and labeling for this registration which comply with proposed § 162.30(g). The amended label could consist of an adhesive sticker which contains the statement of restricted use classification required by § 162.10(j)(2). The application would also request issuance of a new registration number for the remaining unclassified uses. These types of registrations will not be handled as "new" registrations under 40 CFR 162.6 requiring the submission of new data nor considered as reregistrations of currently registered products. Rather, these types of requests will be handled routinely by issuing a new registration number without a data review.

A third option was considered, but is not included in these proposed regulations. Under that option, the registrant could request that the registration be amended to permit the product to be marketed under a label which would pertain only to uses that had not been classified for restricted use, but which would bear a legend stating that certain other uses are classified for restricted use, and which would refer the purchaser to the retailer for further information. There would also be supplementary restricted-use labeling which would comply with proposed § 162.30(g). An application under that option would include copies of both the label and the supplementary labeling intended to accompany the label; would state that the product will be marketed with the label, and that shipments of the product to retailers will include or be accompanied by the supplementary labeling; and would state that retailers will be instructed not to distribute or sell products bearing the supplementary labeling unless the retailer's customer furnishes suitable evidence that he is entitled to purchase pesticide products which have a use classified as restricted. That option would have the advantage of limiting the distribution, marketing, and storage problems which would be presented if the registrant had to distribute two products in order to comply with these regulations. It would be, however, a difficult option to implement and enforce. Consequently, it is not included in the regulations at this time, but the Agency is specifically soliciting comments respecting this or similar options.

The Administrator, in accordance with the procedures set out in § 162.6, would conditionally accept the proposed label and labeling submitted in support of an application for amended registration if he determined that they complied with applicable requirements.

In the case of an application for a new registration of a product which has a use classified as restricted, the Administrator would issue a notice of intent to deny registration unless the proposed label and labeling submitted as part of the application for new registration met the pertinent requirements of proposed

§ 162.30(d)(2)(i) or § 162.30(d)(2)(ii). Thus, an applicant for new registration would have two alternatives: he could propose a label and labeling which contain the standardized language specified in the final rule, if applicable; or he could propose a label and labeling which comply with proposed § 162.30(g) with respect to the uses which have been classified for restricted use and which may also contain directions for use for the remaining unclassified uses. A restricted use classification made under this regulation will generally apply to new registrations of that pesticide unless the applicant for a new registration submits new information that convinces the Agency that a particular use should not be restricted. If this happens, the Agency will propose to amend the regulation by removing that use from the restricted list.

CONSIDERATION OF DATA

Since the use of data by the Agency to classify a use of a registrant's product as restricted does not give advantage or benefit to the registrant, it is not "considered • • • in support of" an application for new or amended registration. Therefore, a registrant would not be required to offer (in applications made under paragraphs (d) and (e)) to compensate under FIFRA section 3(c)(1)(D) the owner(s) of the data used by the Agency to reach a decision under paragraph (b). Moreover, the Agency would be free to use data to reach such decisions despite allegations that the data is protected from disclosure to the public under FIFRA section 10(b).

HEARING RIGHTS

If the Administrator issued a notice of intent to cancel or deny registration, he would thereafter issue a final order of cancellation or denial of registration unless the registrant or applicant requested a hearing in accordance with Section 6(b)(1) or 3(c)(6) of FIFRA. However, the rulemaking proceeding under § 162.30(b) by then will already have provided an ample opportunity, during the comment period, for examination and challenge of the factual basis of the Administrator's proposed classification, for submission of relevant data relating to any risk criterion or to the risk/benefit analysis, and for submission of suggested label and labeling language which would eliminate the need for classification. Therefore, in the interest of promoting administrative efficiency and to avoid prolonged and duplicative evidentiary hearings, the hearing would be limited to the sole issue (as to which the registrant or applicant would have the affirmative burden of proof) of whether the registrant or applicant had submitted an application for new or amended registration which complied with the provisions of this section. If the registrant or applicant failed to sustain its burden of proof, the Administrator would issue a final order cancelling or denying registration.

ENFORCEMENT LIABILITIES

If any person fails to comply with any of the labeling requirements set out in this regulation, the product may be considered to be misbranded; misbranding violations will be handled under the regular enforcement proceedings contained in FIFRA.

Section 2(q)(2)(B) states that:

A pesticide is misbranded if the labeling does not contain a statement of the use classification under which the product is registered

Section 12(a)(1)(E) makes it unlawful for any person in any State "to distribute, sell, offer for sale, hold for sale, ship, deliver or offer to deliver, to any person • • • any pesticide which is • • • misbranded."

Section 12(a)(2)(E) states that:

It shall be unlawful for any person who is a registrant, wholesaler, dealer, retailer, or other distributor to advertise a product registered under this Act for restricted use without giving the classification of the product assigned to it under Section 3.

Section 12(a)(2)(F) states that:

It shall be unlawful for any person to make available for use, or to use, any registered pesticide classified for restricted use for some or all purposes other than in accordance with section 3(d) and any regulations thereunder.

Registrants whose products have a use which has been classified for restricted use must comply with the time deadlines as set forth in this regulation. Failure to comply with the requirements of this regulation may subject registrants to civil penalties under Section 14(a)(1) or criminal penalties under Section 14(b)(1). Misbranded products may also be subject to a "stop sale, use or removal" order, or seizure, under Section 13 of FIFRA.

Within 90 days after a product's amended labeling has been conditionally accepted, registrants must affix the amended label to all quantities of such products within their control. The Agency considers products at the distributor level to be within the effective control of a registrant. Registrants are accordingly encouraged to distribute amended labeling to their customers in a timely manner, with directions on how such labeling is to be affixed. The amended labeling may be in the form of an adhesive sticker or an adhesive label to cover the old label until the use of the new labeling reaches each level of the distribution process. Registrants, by establishment, must also certify to the Agency that they have affixed such amended labeling to all quantities of such products within their control. After the 90 day period, no such product may be released for shipment by a registrant unless it bears the amended labeling.

Within 180 days after conditional acceptance of a restricted product's amended labeling, retailers or other persons engaged in the sale or distribution of the product must affix the amended labeling to all quantities of such products within their control. After the 180 day period, no such product may be sold or distributed unless it bears the amended labeling.

Any wholesaler, dealer, retailer, or other distributor who makes available any restricted use pesticide to applicators who are neither certified nor working under the supervision of a certified applicator would be in violation of Section 12(a)(2)(F) and subject to enforcement liability under Section 14 of FIFRA.

In advertising a pesticide, failure to properly include the classification of a restricted use pesticide is a violation of Section 12(a)(2)(E) and may subject a registrant, dealer, distributor, or other person engaged in the distribution or sale of an restricted use pesticide to enforcement action under Section 14.

The Agency recognizes that the deadlines contained in this regulation are short. In keeping with the general objective of achieving a smooth transition, the Agency intends to apply these requirements in a common sense manner.

LABEL WORDING

The Agency is also proposing to amend 40 CFR 162.10 by revising § 162.10(j)(2)(i)(B). This amendment would change the wording of the statement which appears on the label of a restricted use pesticide to read: "For retail sale to and use only by Certified Applicators or persons under their direct supervision, and only for those uses covered by the Certified Applicator's certification." Certified applicators or persons under their direct supervision may not purchase or use restricted use pesticides for uses that are not covered by the applicator's certification. The purpose of the proposed change is to clarify that an applicator who is certified for one or more restricted uses of a product is not necessarily certified for all restricted uses of that product.

Finally, the Agency is proposing to delete 40 CFR 162.10(i)(2)(x)(D), which currently requires that the category or categories of certified applicator(s) to whom use is restricted be placed on the label. The Agency has determined that this requirement is unnecessary, since a certified applicator or person under his direct supervision is limited to those uses covered by the applicator's certification. In addition, the designation of the category of applicator on the label would administratively complicate the regulatory work of State officials, especially where subcategories have been instituted.

NOTE.—The Agency has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Analysis under Executive Order 11821 and 11949 and OMB Circular A-107.

Dated: August 16, 1977.

DOUGLAS M. COSTLE,
Administrator.

40 CFR Part 162 is proposed to be amended by deleting § 162.10(i)(2)(x)-(D) and by revising § 162.10(j)(2)(i)(B) to read as follows:

§ 162.10 Labeling requirements.

• • • • • • •

(j) • • •

(2) • • •

V 42 170 SEP 1 77 UMI

(i) • • •

(B) Directly below this statement on the front panel, a summary statement of the terms of the restriction shall appear. If use is restricted to certified applicators, the following statement is required: "For retail sale to and use only by Certified Applicators or persons under their direct supervision, and only for those uses covered by the Certified Applicator's certification." If, however, other regulatory restrictions are imposed, the Administrator will define the appropriate wording for the terms of the restriction by regulation.

It is proposed to amend Part 162 of 40 CFR by adding the following new paragraphs (d) through (i) to § 162.30 (Optional Procedures for Classification of Pesticide Uses by Regulation).

§ 162.30 Optional procedures for classification of pesticide uses by regulation.

• • • • • •

(d) *Compliance: Currently registered products.* Unless the registrant submits an appropriate application for amended registration within 45 days after the effective date of the final rule, the Administrator shall issue a notice of intent to cancel the registration of a pesticide product which has a use classified under this section for restricted use.

(1) *Amended registration; all uses restricted.* If all uses of a product have been classified for restricted use, the application for amended registration shall be based solely on a proposed label and proposed labeling which:

(i) Contain the language specified in the final rule under paragraph (c) (4) of this section, if applicable; or

(ii) comply with paragraph (g) of this section.

(2) *Amended registration; some but not all uses restricted.* If some but not all uses of a product have been classified for restricted use, the application for amended registration shall:

(i) Be based solely on a proposed label and proposed labeling which contain the language specified in the final rule under paragraph (c) (4) of this section, if applicable; or,

(ii) Be based solely on a proposed label and proposed labeling which comply with paragraph (g) of this section with respect to the uses which have been classified as restricted, and which may also contain use directions for the remaining unclassified uses; or

(iii) Request that the registration be split into two registrations. One registration may pertain only to those uses that have been classified for restricted use or pertain to the uses which have been classified as restricted and which may also contain use directions for the remaining uses; the application shall propose a label and labeling for this product which comply with paragraph (g) of this section, and shall request amendment of the existing registration accordingly. The other registration shall pertain only to those uses not classified for restricted use; the application shall propose a label and labeling for this product, and shall request issuance of a new registration number for the product.

(3) *Conditional acceptance.* The Administrator, in accordance with § 162.6, shall conditionally accept the proposed label(s) and labeling submitted under paragraph (d) (1) or (d) (2) of this section, if he determines that they comply with the applicable requirements of this section.

(e) *Compliance: new products.* The Administrator shall issue a notice of intent to deny an application for registration of a new pesticide product, any use of which has been classified for restricted use under this section, unless the proposed product label(s) and labeling meet the pertinent requirements of paragraph (d) (2) (i) or (d) (2) (ii) of this section. An applicant may submit new data that indicates that a previously restricted use should not be restricted.

(f) *Consideration of data.* It is the Administrator's position that the fact that he relied upon an item of data in making a determination under paragraph (b) of this section would not mean that the item of data would thereby have been "• • • considered by the Administrator in support of any • • • application for registration • • •" within the meaning of Section 3(c) (1) (D) of the Act.

(g) *Label and labeling.* A pesticide product which has a use classified for restricted use shall bear a label which contains the statements of restricted use classification required by § 162.10(j) (2). Any labeling accompanying a pesticide product, any use of which has been classified for restricted use, shall contain directions for use which are consistent with the terms of the restriction.

(h) *Hearing rights.* If the Administrator issues a notice of intent to deny or cancel registration in accordance with paragraph (d) or (e) of this section, he shall issue a final order of denial or cancellation of registration unless the applicant or registrant, as provided by aw:

(1) requests a hearing in accordance with section 3(c) (6) or 6(b) (1) of the Act, which hearing shall be limited to the sole issue of whether the applicant or registrant has submitted an application for new or amended registration which complies with the provisions of this section; and

(2) sustains the affirmative burden of proving that it has submitted an application for new or amended registration which complies with the provisions of this section.

(i) *Enforcement.* (1) No product classified for restricted use may be released for shipment by the registrant after the 90th day after receiving conditional acceptance of the amended labeling unless the product bears such amended labeling.

(2) No product classified for restricted use may be distributed or sold by a retailer or other person after the 180th day after the product's labeling has been conditionally accepted unless the product bears such amended labeling.

(3) Registrants must submit the following certification statement within 120 days after receiving conditional acceptance of amended labeling:

I certify that all pesticides within my effective control, which are subject to the regulations concerning the classification of pesticide uses found at § 162.30, have been labeled with the amended labeling submitted under § 162.30 (d) (1) or (d) (2).

This certification statement shall be submitted by each production establishment of the registrant to the Regional Office (% Regional Enforcement Director) having jurisdiction over the State in which the establishment is located.

(Secs., 3, 25(a), Federal Insecticide, Fungicide and Rodenticide Act, as amended (7 U.S.C. 136 et seq.).)

[40 CFR Part 162]

[FRL 770-1; OPP-30017]

PESTICIDE USE RESTRICTIONS

AGENCY: Environmental Protection Agency, Office of Pesticide Programs.

ACTION: Proposed Rule.

SUMMARY: This proposed rule amends 40 CFR Part 162 by adding a new § 162.31, which lists uses of certain pesticide products that the Agency proposes to classify as restricted under the procedures of 40 CFR 162.30. The purpose is to notify and solicit comments from registrants, users and other interested parties on these proposed use restrictions.

DATE: Comments must be received on or before October 17, 1977.

ADDRESS COMMENTS TO: Federal Register Section, Technical Services Division (WH-569), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460. Comments should be filed in triplicate and bear the identifying notation "OPP-30017." All written comments will be available for public inspection from 8:30 a.m. to 4 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT:

James H. White, Project Leader (WH-570), Office of Pesticide Programs, Environmental Protection Agency, Room E509A, 401 M Street SW., Washington, D.C. 20460. (202-755-8297).

SUPPLEMENTARY INFORMATION: Three related documents are also published in this part of the FEDERAL REGISTER. Comments pertaining to all four documents are published as an appendix to the rulemaking document.

Section 3(d) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended, requires the Administrator to classify uses of pesticides as "general" or "restricted." The criteria for classifying a use are contained in 40 CFR 162.11(c). The procedures by which the Administrator may, by rulemaking, classify a use of a pesticide as "restricted" have been set out in § 162.30.

This rulemaking proceeding will allow interested persons to comment on, and propose modifications to, the Agency's proposed classification decisions. Following a forty-five day comment period,

EPA will carefully consider the information and data received, modify its proposed decisions as necessary, and publish in the FEDERAL REGISTER the Agency's final classification decisions relating to the pesticide uses under consideration.

DETERMINATION OF PRIORITIES

The Agency selected a set of potentially hazardous chemicals from those previously identified by the Office of Pesticide Programs as "Candidate Chemicals for Restricted Use" and concentrated on classifying the restricted uses of these chemicals at this time. This "candidate" list of chemicals was released on December 2, 1976, and written comments on the list were officially requested in the March 11, 1977, FEDERAL REGISTER Notice of "Intent to Develop a Regulation Regarding the Classification of Restricted Use Pesticides" (42 FR 13581). The criteria used to select the first set of chemicals primarily related to the toxicity of the active ingredient, the availability of data, the complexity of the classification decision, and the resources available for the classification effort. Prior to its release, the December list was reviewed and commented on by scientific groups from California, Indiana, New York, and North Carolina, as well as by a group of scientists assembled in Washington.

The December "candidate" list of active ingredients was compiled using two earlier lists of chemicals likely to have restricted uses. The purpose of these lists was to assist State regulatory and training officials in developing their certification and training programs required under section 4 of FIFRA, as amended. The earlier lists were intended to assist the State Lead Agencies and the Cooperative Extension Services in concentrating their efforts on those applicators of pesticides that would most likely need to be certified.

Chemicals were included on the earlier lists for three reasons:

(1) They exceeded the hazard indications of Toxicity Category I which are specified in 40 CFR 162.10(h);

(2) They were listed by State officials and the U.S. Department of Agriculture as chemicals with important agricultural uses; and

(3) One or more of the uses of each is currently being restricted by one or more States.

These factors were also considered when the December list was compiled and in determining the priority of chemicals proposed to be classified in this notice.

CLASSIFICATION CRITERIA AND PROCEDURES

The FIFRA requires the Administrator to classify a pesticide, or particular use or uses of a pesticide, as "restricted" if such use or uses may generally cause unreasonable adverse effects on the environment, including injury to the applicator. Adhering to these mandates, the Agency promulgated regulations on July 3, 1975, setting forth registration, reregistration and classification procedures (40 FR 28242). The criteria for classification are stated in § 162.11(c). These criteria relate to acute toxicity and subacute, chronic or delayed effects on man or other nontarget organisms (including mammalian and avian species, aquatic organisms, and nontarget plants). To apply these criteria, the Agency assembled a group of toxicologists and environmental specialists.

Their review included examination of data concerning mammalian acute oral LD50, acute inhalation LC50, acute dermal LD50, primary eye and skin effects, avian acute oral LD50, avian subacute dietary LC50, fish acute LC50 for cold and warm water species as necessitated under 162.11(c)(2).

The assembled material was reviewed by EPA toxicologists who determined classification based on potential hazards to humans and domestic animals under criteria outlined in § 162.(11)(c)(2). This review covered acute toxicity based on oral, dermal, inhalation and ocular routes of exposure. This was followed by a review conducted by fish and wildlife specialists of environmental hazards to nontarget organisms under the criteria outlined in § 162.11(c)(2). Data on toxicity to mammalian, avian and fish species were examined and a classification opinion provided.

If any of the uses of a chemical failed to meet the criteria for general use classification under § 162.11(c)(2), the reviewers proceeded to consider the adequacy of labeling under the procedures outlined in § 162.11(c)(3). Sample labels of products in a particular use group were reviewed to see if adequate labeling was present to remove that use from consideration as restricted.

Such removal is authorized if justified by the adequacy of label and label directions, the type of formulation, the method of packaging, or other factors that would reduce the potential hazard to the point where restriction is not warranted. The label samples did not indicate that adequate labeling was generally present for those uses which are now proposed to be restricted. This step was followed by a review of epidemiological studies, use history, accident data, monitoring data, or other evidence that could influence the classification decision as authorized under § 162.11(c)(4).

These opinions were then studied by review teams made up of both Agency personnel and outside experts, formed to deal separately with insecticides, rodenticides, fumigants, fungicides, and herbicides. The teams reviewed the classification opinions as well as the scientific support material.

Under § 162.11(c)(2), a use restriction is to be based on an incremental risk/benefit analysis. When a pesticide use fails to satisfy the general use criteria of §§ 162.11(c)(1) and 162.11(c)(2), a significant risk is indicated. The Agency presumes that a use restriction will reduce that risk. If there are no significant benefits of unrestricted use, any significant risk of unrestricted use would outweigh the benefits of unrestricted use. If the benefits of unrestricted use are significant, the benefit/risk analysis becomes more comprehensive. In applying this standard, the Agency found no significant benefits of unrestricted use that outweighed the risks of unrestricted use for those uses proposed to be classified as restricted by this notice.

These step-by-step reviews led to a tentative classification decision summary on each active ingredient. Comments on the decision summaries were received from several State Lead Agencies, State Cooperative Extension Services, as well as the U.S. Department of Agriculture, EPA Regional Offices, major manufacturers, user groups, environmental interest groups and selected scientists such as members of the Inter-Society Consortium for Plant Protection (ISCPP). The EPA teams refined the tentative classification decision summaries based on input from these groups. The decision summaries were then reviewed by the Registration Division product managers. Copies of the decision summaries may be obtained by specifying the active ingredient and writing to the Project Leader at the address cited above.

The proposed regulation lists the active ingredients and the formulations being considered, cites the criteria exceeded, and lists other supporting information on each active ingredient. By means of this proposed regulation, EPA is soliciting additional information through public comment that may be helpful in making the final classification decision. To be considered, this information must be received on or before October 17, 1977. Following review of the comments received in response to the proposed regulations, EPA will make its final classification decisions relative to the chemicals listed in the regulation.

STATUS OF CLASSIFICATIONS

This proposed regulation only serves to classify uses as restricted. If a use is not restricted by this regulation, it does not mean that it is classified as general under Section 3 of FIFRA. The Agency may at any time classify further uses as restrictive. New information received by the Agency may indicate that a use should be classified as restricted or general, or that cancellation action should be initiated. Pesticide uses not reviewed and/or classified at this time will be further prioritized on the basis of potential hazard and will be classified in the future, either by regulation or through the registration/reregistration process.

NOTE.—The Environmental Protection Agency has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Analysis under Executive Orders 11821 and 11949 and OMB Circular A-107.

Dated: August 16, 1977.

DOUGLAS M. COSTLE,
Administrator.

(Secs. 3(d), 25(a), Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (7 U.S.C. 136 et seq.).)

It is proposed to amend Part 162 of 40 CFR by adding a new § 162.31 to read as follows:

§ 162.31 Pesticide use restrictions.

The following uses of pesticides are restricted as specified under 162.30:

V 42 I 170 SEP 1 77 UMI

ACTIVE INGREDIENT	FORMULATION	USE PATTERN	CLASSIFICATION	CRITERIA INFLUENCING RESTRICTION
ACROLEIN	As sole active ingredient. No mixtures registered.	All uses	Restricted	Inhalation hazard to humans. Residue effects on avian species and aquatic organisms.
ACRYLONITRILE	In combination with carbon tetrachloride. No registrations as the sole active ingredient.	All uses	Restricted	Other hazards-accident history of both acrylonitrile and carbon tetrachloride products.
ALDICARB	As sole active ingredient. No mixtures registered.	All uses	Restricted	Outdoor uses-Residue effects on avian species. Indoor uses-Accident history.

ACTIVE INGREDIENT	FORMULATION	USE PATTERN	CLASSIFICATION	CRITERIA INFLUENCING RESTRICTION
ALLYL ALCOHOL	All formulations	All uses	Restricted	Acute dermal toxicity.
ALUMINUM PHOSPHIDE	As sole active ingredient. No mixtures registered.	All uses	Restricted	Inhalation hazard to humans.

ACTIVE INGREDIENT	FORMULATION	USE PATTERN	CLASSIFICATION	CRITERIA INFLUENCING RESTRICTION
AZINPHOS METHYL	All liquids with a concentration greater than 13.5%.	All uses	Restricted	Inhalation hazard to humans.
	All dusts and wettable powders	All uses	Restricted	Other hazards-use and accident history.
	All liquids with a concentration of 13.5% and below.	1) All domestic uses 2) All uses on orchards, citrus, nut crops, and ornamentals 3) All aerial applications Non-domestic ground uses except to orchards, citrus, nut crops, ornamentals, and cranberries.	1) Restricted 2) Restricted 3) Restricted Unclassified	1) Acute dermal toxicity. Acute oral toxicity. 2) Residue effects on mammalian species. 3) Effects on aquatic organisms from drift.

ACTIVE INGREDIENT	FORMULATION	USE PATTERN	CLASSIFICATION	CRITERIA INFLUENCING RESTRICTION
AZINPHOS METHYL (continued)	Liquid formulations 13.5% or less in combination with endrin, toxaphene, endosulfan.	All uses	Unclassified	Classification will be based on evaluation of the hazards of endrin, toxaphene, endosulfan.
	All formulations.	All aerial applications.	Restricted	Effects on aquatic organisms from drift.
	All formulations.	Cranberries	Restricted	Effects on aquatic organisms.
CALCIUM CYANIDE	As sole active ingredient. No mixtures registered.	All uses	Restricted	Inhalation hazard to humans.
DEMETON	1% fertilizer formulation, 1.985% granular formulation.	All uses, including domestic uses.	Restricted	Domestic uses — Acute oral toxicity. Acute dermal toxicity. Non-domestic outdoor uses-Residue effects on avian and mammalian species.
	All granular formulations, emulsifiable concentrates and concentrated solutions.	All uses	Restricted	Acute dermal toxicity. Residue effects on mammalian and avian species.

ACTIVE INGREDIENT	FORMULATION	USE PATTERN	CLASSIFICATION	CRITERIA INFLUENCING RESTRICTION
ENDRIN	All emulsions, dusts, wettable powders, pastes, and granular formulations 2% and above.	All uses	Restricted	Acute dermal toxicity. Hazard to non-target organisms.
	All concentrations less than 2%.	All uses	Restricted	Hazard to non-target organisms.
ETHYL PARATHION	All granular and dust formulations greater than 2%, fertilizer formulations, wettable powders, emulsifiable concentrates, concentrated suspensions, concentrated solutions.	All uses	Restricted	Inhalation hazard to humans. Acute dermal toxicity. Residue effects on mammalian, aquatic, avian species.
	Smoke fumigants	All uses	Restricted	Inhalation hazard to humans.
	Dust and granular formulations 2% and below.	All uses	Restricted	Other hazards-accident history.

ACTIVE INGREDIENT	FORMULATION	USE PATTERN	CLASSIFICATION	CRITERIA INFLUENCING RESTRICTION
FLUOROACETAMIDE/1081	As sole active ingredient in baits. No mixtures registered.	All uses.	Restricted	Acute oral toxicity.
HYDROCYANIC ACID	As sole active ingredient. No mixtures registered.	All uses	Restricted	Inhalation hazard to humans.
METHOMYL	As sole active ingredient in 1% to 2.5% baits (except 1% fly bait)	Non-domestic outdoors-agricultural crops, ornamental and turf. All other registered uses.	Restricted	Residue effects on mammalian species.
	All concentrated solution formulations.		Restricted	Other hazards-accident history.
	90% wettable powder formulations (not in water soluble bags)		Restricted	Other hazards-accident history.
	90% wettable powder formulation in water soluble bags.		Unclassified	
	All granular formulations.		Unclassified	

ACTIVE INGREDIENT	FORMULATION	USE PATTERN	CLASSIFICATION	CRITERIA INFLUENCING RESTRICTION
METHOMYL (continued)	25% wettable powder formulation.		Unclassified	
	In 1.24% - 2.5% dusts as sole active ingredient and in mixtures with fungicides and chlorinated hydrocarbon, inorganic, organic phosphate and biological insecticides		Unclassified	
METHYL BROMIDE	All formulations in containers greater than 1.5 lbs.	All uses	Restricted	Other hazards — accident history.
	Containers with not more than 1.5 lbs. of methyl bromide with 0.25% to 2.0% chloropicrin as an indicator.	Single applications (non-domestic use) for soil treatment in closed systems.	Unclassified	
	Container with not more than 1.5 lbs. having no indicator.	All uses	Restricted	Other hazards — accident history.

ACTIVE INGREDIENT	FORMULATION	USE PATTERN	CLASSIFICATION	CRITERIA INFLUENCING RESTRICTION
METHYL PARATHION	All dust and granular formulations less than 5%.	All uses	Restricted	Other hazards-accident history. All foliar applications restricted based on residue effects on mammalian and avian species.
	Microencapsulated	All uses	Restricted	Residue effects on avian species. Hazard to bees.
	All dust and granular formulations 5% and greater and all wettable powders and liquids.	All uses	Restricted	Acute dermal toxicity. Residue effects on mammalian and avian species.
MEVINPHOS	All emulsifiable concentrates and liquid concentrates.	All uses	Restricted	Acute dermal toxicity. Residue effects on mammalian and avian species.
	Psycodid filter fly liquid formulations.	All uses	Restricted	Acute dermal toxicity.
	2% Dusts	All uses	Restricted	Residue effects on mammalian and avian species.

ACTIVE INGREDIENT	FORMULATION	USE PATTERN	CLASSIFICATION	CRITERIA INFLUENCING RESTRICTION
PARAQUAT (dichloride) and PARAQUAT bis(methyl sulfate)	All formulations and concentrations except those listed below.	All uses	Restricted	Other hazards-Use and accident history, human toxicological data.
	Pressurized spray formulation containing .44% Paraquat bis(methyl sulfate) and 15% petroleum distillates as active ingredients.	Spot weed and grass control.	Unclassified	
	Liquid fertilizers containing concentrations of .025% Paraquat dichloride and .03% Atrazine; .03% Paraquat dichloride and .37% Atrazine, .04% Paraquat dichloride and .49% Atrazine.	All uses	Unclassified	

ACTIVE INGREDIENT	FORMULATION	USE PATTERN	CLASSIFICATION	CRITERIA INFLUENCING RESTRICTION
PICLORAM	All formulations and concentrations except Tordon 101 R.	All uses	Restricted	Hazard to non-target organisms (specifically non-target plants both crop and non-crop; and aquatic organisms). It should be noted that in addition to the above criteria considerable emphasis for restriction was based on the existing stewardship program restricting certain uses by the principal registrant and recurring reports of phytotoxicity to such economically important crops as tomatoes, potatoes, tobacco, legumes and succulent ornamentals caused by contaminated water supplies (1 ppb range) from runoff and leaching.
	Tordon 101 R Forestry Herbicide containing 5.4% Picloram and 20.9% 2,4-D.	Control of unwanted trees by cut surface treatment.	Unclassified	
SODIUM CYANIDE (Note: M-44 sodium cyanide capsules may only be used by certified applicators who have also taken the required additional training)	All capsules and ball formulations.	All uses	Restricted	Inhalation hazard to humans.
SODIUM FLUOROACETATE	All solutions and dry baits	All uses	Restricted	Acute oral toxicity. Hazard to non-target organisms. Use and accident history.

UMI

ACTIVE INGREDIENT	FORMULATION	USE PATTERN	CLASSIFICATION	CRITERIA INFLUENCING RESTRICTION
STRYCHNINE	All dry baits, pellets and powder formulations greater than .5%.	All uses	Restricted	Acute oral toxicity. Hazard to non-target avian species. Use and accident history.
	All dry baits, pellets and powder formulations.	All uses calling for burrow builders.	Restricted	Hazard to non-target organisms.
	All dry baits, pellets and powder formulations .5% and below.	All uses except subsoil. All subsoil uses.	Restricted Unclassified	Hazard to non-target organisms.
SULFOTEPP	Sprays and smoke generators.	All uses	Restricted	Inhalation hazard to humans.
TEPP	Emulsifiable concentrate formulations.	All uses	Restricted	Inhalation hazard to humans. Dermal hazard to humans. Residue effects on mammalian and avian species.

[40 CFR Part 162]

[FRL 770-27; OPP-30018]

PESTICIDE USE RESTRICTIONS

Advance Notice of Proposal Rulemaking

AGENCY: Environmental Protection Agency, Office of Pesticide Programs.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: This notice lists certain pesticides whose uses may be proposed to be restricted under § 162.31. The purpose of this notice is to solicit more information on these chemicals so that the Agency can make an informed decision on whether or not to propose any use of these pesticides as restricted.

DATE: Comments must be received on or before October 3, 1977.

ADDRESS COMMENTS TO: Federal Register Section, Technical Services Division (WH-569), Office of Pesticide Programs, Environmental Protection Agency, 401 "M" Street SW., Washington, D.C. 20460. Comments should be filed in triplicate and bear the identifying notation "OPP-30018." All written comments will be available from 8:30 a.m. to 4 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT:

James H. White, Project Leader (WH-570), Office of Pesticide Programs, Environmental Protection Agency, Room E509A, 401 M Street SW., Washington, D.C. 20460 202-755-8297.)

SUPPLEMENTARY INFORMATION: Three related documents are also published in this Part of the FEDERAL REGISTER. Comments pertaining to all four documents are published as an appendix to the rulemaking document.

Section 3(d) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended in 1972 and 1975 (Pub. L. 92-516, 86 Stat. 983; Pub. L. 94-140, 89 Stat. 755; 7 U.S.C. 136 et seq.), requires the Administrator to classify uses of pesticides as "general" or "restricted." The procedures which the Administrator may use to classify a use by regulation are set out in 40 CFR 162.30. Certain pesticide uses have been proposed to be restricted in 40 CFR 162.31. The Agency is currently considering proposing uses of certain other pesticides as restricted. These pesticides are considered by the Agency to have a high priority in the classification process.

The purpose of this notice is to solicit additional information in the form of written comments that would impact on the proposed classification decision. Information that would be valuable to this process includes technical data such as dermal and inhalation studies on specific formulations and the use history of the pesticide and its formulations. Use history would include accident reports involving injury to applicators, fish and wildlife or other non-target organisms. Also of interest would be reports on the positive aspects of pesticide usage, i.e., field experience with no discernible adverse effects.

In the past the Agency has formally requested additional information on certain chemicals under the authority of section 6(a)(2) of FIFRA. The Agency wants to avoid duplicate requests for information and the classification process will utilize any information previously submitted under 6(a)(2). Therefore, it will not be necessary for a registrant to resubmit any such information. Furthermore, the request for information under this notice is not a formal requirement for the registrants, but has been proposed merely to afford all interested parties a chance to submit any information they believe would impact on the classification decision of the chemicals cited in this section.

Interested persons are invited to submit their arguments or views with respect to any pesticide listed in this advance notice, together with any support data or documentation they may wish to submit on or before October 3, 1977.

The following is a list of chemicals to be considered next for classification:

Carbofuran
Carbon disulfide
Chlorfenvinphos
Chloropicrin
Clonitralid
Cycloheximide
Dicrotophos
Dimethoate
Dioxathion
Diquat
Disulfoton
Endosulfan
Endothall
EPN
Ethoprop
Ethyl 3-methyl-4-(methylthio) phenyl (1-methylethyl) phosphoramidate
Ethylene dibromide
Ethylene dichloride
Fensulfothion
Fenthion
Fonofos
Formaldehyde
Hexachlorobenzene
Methamidophos
Methidathion
Monocrotophos
Nicotine (alkaloid)
O,O-bis (p-chlorophenyl) acetimidoylphosphoramidothioate
Oxamyl
Oxydemeton methyl
Phorate
Phosphamidon
Phosphorus
Temephos
Terbufos
Toxaphene
Xlyene (aquatic uses)
Zinc phosphide

This advance notice of proposed rulemaking is issued under the authority of Section (40 CFR 162) of the amended FIFRA.

Dated: August 16, 1977.

DOUGLAS M. COSTLE,
Administrator.

PART V

CONSUMER PRODUCT SAFETY COMMISSION

■

LEAD-CONTAINING PAINT

Banned Hazardous Products

V 42 170 SEP 1 77 7 UMI

Title 16—Commercial Practices

CHAPTER II—CONSUMER PRODUCT SAFETY COMMISSION

SUBCHAPTER B—CONSUMER PRODUCT SAFETY ACT REGULATIONS

PART 1145—REGULATION OF PRODUCTS SUBJECT TO OTHER ACTS UNDER THE CONSUMER PRODUCT SAFETY ACT

Lead-Containing Paint and Certain Consumer Products Bearing Lead-Containing Paint

AGENCY: Consumer Product Safety Commission.

ACTION: Final rule.

SUMMARY: The Commission issues a final rule determining that it is in the public interest to regulate lead-containing paint and certain consumer products bearing such paint under the Consumer Product Safety Act (CPSA) rather than the Federal Hazardous Substances Act (FHSA). (See also FR Doc. 77-25473 published elsewhere in this part of the FEDERAL REGISTER.) According to the CPSA, the Commission may not regulate under the CPSA a risk of injury that could be eliminated or reduced to a sufficient extent under the FHSA, unless the Commission finds by rule that it is in the public interest to do so.

EFFECTIVE DATE: This rule becomes effective February 28, 1978.

FOR FURTHER INFORMATION CONTACT:

Charles M. Jacobson, Directorate for Compliance and Enforcement, Consumer Product Safety Commission, Washington, D.C. 20207, phone 301-492-6400.

SUPPLEMENTARY INFORMATION:

BACKGROUND

On August 10, 1976, by publication of a notice in the FEDERAL REGISTER (41 FR 33636), the Commission proposed a rule finding, under section 30(d) of the Consumer Product Safety Act (15 U.S.C. 2079 (d), that it is in the public interest to regulate lead-containing paint and toys and furniture bearing such paint under the CPSA rather than under the Federal Hazardous Substances Act (FHSA) (15 U.S.C. 1261-1264). Section 30(d) of the CPSA, as amended by the Consumer Product Safety Commission Improvements Act of 1976 (Pub. L. 94-284; 90 Stat. 510), 15 U.S.C. 2079(d)), provides that:

> (d) A risk of injury which is associated with a consumer product and which could be eliminated or reduced to a sufficient extent by action under the Federal Hazardous Substances Act . . . may be regulated under [the CPSA] only if the Commission by rule finds that it is in the public interest to regulate such risk of injury under [the CPSA].

Also on August 10, 1976, the Commission proposed a regulation under the CPSA that would declare the following to be banned hazardous products (41 FR 33637): (1) lead-containing paint and similar surface-coating materials containing more than a safe level of lead, (2) toys, and other articles intended for use by children, bearing lead-containing paint and similar surface-coating materials containing more than a safe level of lead, and (3) articles of furniture bearing lead-containing paint or other similar surface-coating materials containing more than a safe level of lead. In the same document, the Commission also announced a proceeding under the 1976 amendments to the Lead-Based Paint Poisoning Prevention Act (LBPPPA) to determine a "safe level" of lead in paint.

The Commission also proposed to revoke the existing FHSA regulations that ban lead-containing paint above the 0.5 percent level and toys and other articles intended for use by children bearing such paint (16 CFR 1500.17(a)(6)) at the time any final CPSA regulations covering these products are issued in order to prevent an unnecessary duplication of regulations (41 FR 33640).

The Commission's rationale in the proposed 30(d) rule for proceeding under the CPSA rather than FHSA was that the LBPPPA required the Commission to determine a safe level of lead in paint within six months after June 23, 1976, and that the evidentiary hearing required for FHSA rulemaking would be too time consuming for LBPPPA purposes. In addition, the Commission noted that the requirement for an oral presentation of views under the CPSA and the requirement for an oral hearing under the LBPPPA are compatible and could be consolidated procedurally because both hearings are informal.

COMMENTS ON THE PROPOSAL

In response to the proposal, two comments were received.

The National Paint and Coatings Association (NPCA), in written and oral comments, suggested that the LBPPPA proceeding be consolidated with a proceeding under the FHSA rather than under the CPSA. The NPCA stated that evidentiary hearings are only required by the FHSA when objections based on reasonable grounds are filed to a regulation. The commenter went on to assert that if reasonable grounds are established by legally valid objections, then it is in the public interest to hold the evidentiary hearings.

In response to this comment, the Commission notes that the oral hearing held on September 13, 1976, on both the LBPPPA and CPSA matters provided ample opportunity for public participation in the rulemaking process, and the Commission does not agree that a formal hearing under the FHSA would be in the public interest. The September 13 hearing allowed a full range of opinions to be heard on the proposed rules. In addition, written rebuttal comments after the hearing were permitted. Thus, all interested persons were given the opportunity to fully participate in the proceedings, unhindered by the strictures of a formal evidentiary hearing.

In addition to written and oral comments on the proposal, public comment was solicited on a draft environmental impact statement, made public on February 4, 1977, that was submitted to the President's Council on Environmental Quality, pursuant to the provisions of the National Environmental Policy Act (42 U.S.C. 4321-4347). The draft statement posed a wide range of alternatives for regulating lead-containing paint and certain consumer products bearing such paint, thereby providing yet another forum for public input into the proposed rules.

The NPCA also stated that it was concerned that its pending petitions (see 37 FR 25849) to exempt certain products from the FHSA lead paint regulations will now have to be refiled couched in terms that apply to the provisions of the CPSA. The Commission points out that the subject matter of all of the pending FHSA exemptions has been considered in issuing the CPSA banning regulation (see FR Doc. 77-25472, appearing elsewhere in this part of the FEDERAL REGISTER). Refiling of these petitions is, therefore, not necessary.

The only other commenter on the proposed rule, the Toy Manufacturers of America, Inc., supported the consolidation of proceedings under the LBPPPA and CPSA pursuant to section 30(d) and the issuance of a final banning regulation under the CPSA.

Accordingly, the Commission finds that the public interest requires the regulation of lead-containing paint and certain other consumer products bearing such paint under the provisions of the CPSA rather than the FHSA. Therefore, pursuant to section 30(d) of the Consumer Product Safety Act (Sec. 30(d), Pub. L. 92-573, 86 Stat. 1231, as amended 90 Stat. 510; 15 U.S.C. 2079(d)), the Commission amends Title 16, Chapter II, by adding to Subchapter B a new Part 1145, reading as follows:

Sec.
1145.1 Scope.
1145.2 Paint (and other similar surface-coating materials) containing lead; toys, children's articles, and articles of furniture bearing such paint (or similar surface-coating materials); risk of lead poisoning.

AUTHORITY: Sec. 30(d), Pub. L. 92-573, 86 Stat. 1231, as amended 90 Stat. 510; 15 U.S.C. 2079(d).

§ 1145.1 Scope.

In this Part 1145, the Commission establishes rules which provide that risks of injury associated with consumer products that could be eliminated or reduced to a sufficient extent by action under the Federal Hazardous Substances Act (FHSA) (15 U.S.C. 1261-1274), the Poison Prevention Packaging Act of 1970 (PPPA) (15 U.S.C. 1471-1476), or the Flammable Fabrics Act (FFA) (15 U.S.C. 1191-1204) will be regulated under the Consumer Product Safety Act (CPSA) (15 U.S.C. 2051-2081). Section 30(d) of the CPSA, as amended, provides that a risk of injury which is associated with a consumer product and which could be eliminated or reduced to a sufficient extent by action under the FHSA, PPPA, or the FFA may be regulated under this act only if the Commission by rule finds it is in the public interest to regulate such risk of injury under this act.

§ 1145.2 Paint (and other similar surface-coating materials) containing lead; toys, children's articles, and articles of furniture bearing such paint (or similar surface-coating materials); risk of lead poisoning.

(a) The Commission finds that it is in the public interest to reduce the risk of lead poisoning to young children from the ingestion of paint and other similar surface-coating materials by action under the Consumer Product Safety Act rather than under the Federal Hazardous Substances Act because of the desirability of consolidating the public procedures related to such regulation with the proceeding to determine a safe level of lead under the Lead-Based Paint Poisoning Prevention Act (42 U.S.C. 4801-4846), as amended by the National Consumer Health Information and Health Promotion Act of 1976 (Pub. L. 94-317; 90 Stat. 705-706). Consolidation of these proceedings facilitates greater public participation and a more expeditious resolution of the issues.

(b) Paint an dother similar surface-coating materials containing lead and toys, children's articles, and articles of furniture bearing such paint or other similar surface-coating materials that present a risk of lead poisoning to young children by ingestion shall therefore be regulated under the Consumer Product Safety Act. Such regulation shall include all directly related pending and future rulemaking, as well as all directly related pending and future action on petitions.

Effective date: This Part shall become effective February 28, 1978.

(Authority: Sec. 30(d), Pub. L. 92-573, 86 Stat. 1231, as amended 90 Stat. 510; 15 U.S.C. 2079(d)).

Dated: August 26, 1977.

RICHARD E. RAPPS,
Secretary, Consumer Product Safety Commission.

[FR Doc.77-25471 Filed 8-31-77;8:45 am]

SUBCHAPTER B—CONSUMER PRODUCT SAFETY ACT REGULATIONS

PART 1303—LEAD-CONTAINING PAINT AND CERTAIN CONSUMER PRODUCTS BEARING LEAD-CONTAINING PAINT

Establishment as Banned Hazardous Products

AGENCY: Consumer Product Safety Commission.

ACTION: Final rule.

SUMMARY: In this document, the Commission declares that the following products are banned hazardous products under the Consumer Product Safety Act:

1. Paint and other similar surface-coating materials containing more than 0.06 percent lead.
2. Toys, and other articles intended for use by children, bearing paint or other similar surface-coating materials containing more than 0.06 percent lead.
3. Furniture articles bearing paint or other similar surface-coating materials containing more than 0.06 percent lead.

The Commission issues this ban in order to eliminate or reduce the unreasonable risk of injury associated with lead poisoning in children.

DATES: Effective date: The regulation issued below applies to the enumerated products that are manufactured after February 27, 1978.

ADDRESSES: All material which the Commission has that is relevant to this rule may be seen in, or copies obtained from, the Office of the Secretary, Consumer Product Safety Commission, 3rd Floor, 1111 18th Street, Washington, D.C. 20207.

FOR FURTHER INFORMATION, CONTACT:

Charles M. Jacobson, Directorate for Compliance and Enforcement, Consumer Product Safety Commission, Washington, D.C. 20207, telephone 301-492-6400.

SUPPLEMENTARY INFORMATION:

BACKGROUND

On August 10, 1976, the Commission proposed a rule (16 CFR Part 1150, issued below as 16 CFR Part 1303) to declare the following products to be banned hazardous products under the Consumer Product Safety Act (CPSA): (1) paint and similar surface-coating materials containing more than a safe level of lead, (2) toys and other articles intended for use by children, that bear paint or other similar surface-coating materials containing more than a safe level of lead, and (3) furniture articles bearing paint or other similar surface-coating materials containing more than a safe level of lead (41 FR 33637). What would be deemed to be a "safe level" was proposed to be a percentage that would be determined by the Commission in a proceeding conducted, after the proposal, under the Lead-Based Paint Poisoning Prevention Act (LBPPPA), as amended (42 U.S.C. 4801-4846). This proceeding under the LBPPPA was also initiated by a notice in the August 10, 1976, issue of the FEDERAL REGISTER (41 FR 33636). A detailed history of the Commission's involvement with proceedings to regulate lead-based paint is given in the preamble of the FEDERAL REGISTER notice that proposed the ban under the CPSA (41 FR 33637) and in section I-A of the Final Environmental Impact Statement on Lead Content in Paint, copies of which may be obtained from the Office of the Secretary.

The LBPPPA, as amended by the National Consumer Health Information and Health Protection Act of 1976 (Pub. L. 94-317), directed the Commission to determine, by December 23, 1976, whether a level of lead in excess of 0.06 percent but not over 0.5 percent, was safe. If the Commission were unable to determine a safe level of lead in this range, paint manufactured after June 22, 1977, containing more than 0.06 percent lead would be considered "lead-based paint." As explained in the FEDERAL REGISTER of February 16, 1977 (42 FR 9404), the Commission, after holding a hearing and considering comments on the issue, determined (on December 16, 1976) that the available data and information did not support a finding that a level of lead in paint above 0.06 percent but not over 0.5 percent is safe. Accordingly, the congressionally-established definition of "lead-based paint" under the LBPPPA as paint having more than 0.06 percent lead became automatically effective on June 23, 1977. The LBPPPA as amended directs the Department of Health, Education, and Welfare to take action with respect to lead-based paint on cooking, eating, and drinking utensils, and the Department of Housing and Urban Development is directed to take action with respect to lead-based paint in residential structures constructed or rehabilitated with Federal assistance. The Consumer Product Safety Commission is directed to "take such steps and impose such conditions as may be necessary or appropriate to prohibit the application of lead-based paint to any toy or furniture article."

The Commission proposed 16 CFR Part 1150 (now Part 1303) in order to reduce the unreasonable risk of injury associated with lead-containing paint having more than a safe level of lead. The setting of the 0.06 percent definition of lead-based paint as the level to be regulated by Part 1303 is intended to accomplish this result, and it will also comply with the directive of the LBPPPA that the Commission should take steps to prohibit the application of lead-based paint to any toy or furniture article. It should be noted, however, that the Commission's action is broader than the LBPPPA's directive in that the paint itself is declared to be a banned hazardous product, as are articles, other than toys, intended for the use of children.

CU PETITION

The Commission's action has the effect of granting a petition filed February 24, 1975, by Consumers Union, requesting a regulation that would ban household paint and toys or other children's articles bearing paint containing more than 0.06 percent lead. (Petition numbers CP 75-15 and HP 75-14.)

FHSA REGULATIONS

There is a regulation currently in effect under the Federal Hazardous Substances Act (FHSA), 15 U.S.C. 1261-1274, that declares household paints and other similar surface-coating materials containing more than 0.5 percent lead to be banned hazardous substances (16 CFR 1500.17(a)(6)). In addition, toys, and other articles intended for use by children, bearing such paint or similar surface-coating materials, are banned. Artists' paints and related materials were subsequently exempted from this regulation. A provision that would have been effective January 1, 1974, to reduce the allowable lead content in these substances to 0.06 percent was stayed by the Food and Drug Administration (FDA) on August 10, 1972 (37 FR 16078), and subsequently by the Commission on December 27, 1973 (38 FR 35302) and December

V 42 170 SEP 1 77 UMI

9, 1974 (39 FR 42902). (The Commission assumed the functions under the FHSA from the FDA on May 14, 1973.)

Before the functions under the FHSA were transferred to the CPSC, the National Paint and Coatings Association (NPCA), a trade association representing the surface coatings manufacturing industry, petitioned the FDA to amend 21 CFR 191.9 (a)(6) (now 16 CFR 1500.17(a)(6)) to exempt the lead-containing coatings listed below from classification as banned hazardous substances for consumer use.

1. Automotive, agricultural, and industrial equipment refinish coatings.

2. Industrial (and commercial) building and equipment maintenance coatings, including traffic and safety marking coatings.

3. Graphic arts coatings (products marketed solely for application on billboards, road signs, and similar uses and for identification marking in industrial buildings).

4. Touch-up coatings for automobiles, agricultural and industrial equipment, lawn and garden equipment, boats, outboard motors, motorized recreational vehicles, and appliances.

5. Exterior marine coatings for small craft application.

6. Exterior rubber-based roof coatings.

7. Exterior primer coatings for wood siding containing extractives (products marketed solely for application on redwood and cedar).

On December 5, 1972, FDA published in the FEDERAL REGISTER (37 FR 25849) a proposal to exempt these seven types of coatings from classification as banned hazardous substances. This notice also stayed the regulation's applicability to these products pending the issuance of the final exemption regulation. In addition, as requested by NPCA's petition, it was proposed that these products have the following inscriptions on their labels:

WARNING

CONTAINS LEAD. DRIED FILM OF THIS PAINT MAY BE HARMFUL IF EATEN OR CHEWED.

Do not apply on toys and other children's articles, furniture, or interior surfaces of any dwelling or facility which may be occupied or used by children.

Do not apply on those exterior surfaces of dwelling units, such as window sills, porches, stairs, or railings to which children may be commonly exposed.

Keep out of reach of children.

To date, this proposal has not been acted upon by FDA or CPSC (which assumed jurisdiction over the FHSA regulation in 1973). Although, as explained below, the Commission is issuing 16 CFR Part 1303 under the authority of the Consumer Product Safety Act (CPSA), 15 U.S.C. 2051–2081, the Commission has considered the merits of these requests for exemptions in issuing Part 1303. An explanation of the Commission's reasons for granting or denying each exemption is given below under the heading "NPCA Exemption Requests."

It should be noted, however, that 16 CFR Part 1303, issued below, is broader than the existing FHSA regulation in that Part 1303 also applies to furniture articles bearing paint or similar surface-coating material containing more than 0.06 percent lead.

During the time that Part 1303 is effective, the present regulations under the FHSA will be revoked (see FR Doc. 77-25473 published elsewhere in this part of the FEDERAL REGISTER).

CPSA RULE

In the August 10, 1976, FEDERAL REGISTER notice that proposed the ban under the CPSA, the Commission also proposed a rule (16 CFR Part 1145), which would constitute the Commission's finding that it is in the public interest to regulate paint and other similar surface-coating materials, and toys, children's articles, and furniture articles bearing such paint or other similarly surface-coating materials, under the Consumer Product Safety Act rather than the Federal Hazardous Substances Act. Section 30(d) of the CPSA requires the Commission to make the finding, by rule, before it may regulate, under the CPSA, a risk of injury which could be eliminated to a sufficient extent by action under the FHSA. In FR Doc. 77-25471, published elsewhere in the Rules and Regulations section of this issue of the FEDERAL REGISTER, the Commission has issued this rule.

Section 9(a)(2) of the CPSA provides that the Commission shall give interested persons an opportunity for the oral presentation of data, views, or arguments relating to the proposal of a ban, in addition to an opportunity to make written submissions. The oral proceeding for comments on the proposed ban was held on September 13, 1976, and was combined with the oral hearing for the LBPPPA proceeding to determine if a safe level of lead between 0.06 percent and 0.5 percent could be ascertained. The comments that were made on the proposal in that hearing are addressed below in the section of this notice entitled "Safe Level of Lead in Paint, on Toys and on Furniture".

Pursuant to section 9(a)(1) of the CPSA, the date by which the Commission must either issue a rule or withdraw the proposal has been extended to September 2, 1977, for the reasons stated in FEDERAL REGISTER notices published October 6, 1976 (41 FR 44126), and July 7, 1977 (42 FR 34892).

SUMMARY OF COMMENTS

The Commission received 58 comments on its August 10, 1976, proposal to ban lead-containing paint for consumer use and certain consumer products bearing such paint. In addition, over 200 comments were received on the December 5, 1972, Food and Drug Administration proposal (37 FR 25849) to exempt 7 types of paints and coatings from classification as banned hazardous substances under the FHSA. As previously discussed, those 7 exemptions were never finally acted upon, although the regulation was stayed as to these products. The comments on the 7 exemption requests are analyzed below, and exemptions to the final CPSA ban are granted or denied based on the merits of the requests for FHSA exemptions. The issues raised by the comments and the Commission's reasons why the Commission did or did not change the proposal in response to the comments are explained below.

1. *Safe Level of Lead in Paint, on Toys and on Furniture.* In the FEDERAL REGISTER of August 10, 1976, the Commission proposed to regulate lead-containing paint at the LBPPPA level for consumer product paints and for toys, other articles for use by children, and furniture bearing such paint. On February 16, 1977 (42 FR 9404), the Commission announced its decision (of December 16, 1976) under the LBPPPA that the available scientific information is insufficient to determine if a level of lead in paint above 0.06 percent but not over 0.5 percent is safe.

Prior to the December 16, 1976, decision, the Commission received many comments on the danger to children of lead in paint, and in particular on the question of what percentage level of lead in paint should be allowed in any regulation issued by the Commission. The February 16, 1977 document discusses these comments. They are also briefly summarized below.

The National Academy of Sciences (NAS), in a report submitted to the Commission entitled Recommendations for the Prevention of Lead Poisoning in Children, stated that a 0.5 percent lead in paint level represents a hazard to children with pica for paint and specifically recommended that the deliberate addition of lead to paint for residential buildings or other surfaces accessible to children be immediately discontinued and that a level not to exceed 0.06 percent lead in the final dried product be set for regulatory purposes. The NAS Report criticized the animal studies conducted for the CPSC in 1974 that recommended a 0.5 percent limit for not adequately simulating the conditions found in young children. (See, T. Kneip, et al., Lead Toxicity Studies in Infant Baboons—A Toxicological Model for Childhood Lead Poisoning, Draft of Final Report, N.Y. Institute of Environmental Medicine, November 1974; R. Purdy, et al., Toxicological Investigation of Chronic Lead Paint Ingestion in the Juvenile Baboon, Final Report, Southwest Foundation for Research and Education, Dec. 1974.)

Comments from the Center for Disease Control of the Department of Health, Education, and Welfare, urged the Commission to adopt a level below 0.5 percent. The Center for Disease Control stated that they believed a 0.06 percent level to be achievable and enforceable. In addition, several medical experts, and several consumer groups expressed opinions in support of the 0.06 percent lead level.

The National Paint and Coatings Association (MPCA) stated it would support a standard of "no lead intentionally added in the formulation of the product". They suggested, however, that a level of 0.2 percent would be necessary in order to provide a margin for inadvertent contamination of paint with lead.

Representatives of the toy industry recommended adoption of a 0.25 percent lead level, primarily to achieve uniformity with certain foreign standards. Neither the NPCA nor those representing the toy industry, however, provided toxicity data to support a determination that the suggested levels were safe.

Two commenters stated that the ultimate objective is to manufacture lead-free paint, but they recognized that, for the present, a 0.06 percent level is more practical because an allowance must be made for possible lead contamination of raw materials and manufacturing equipment.

Having considered all comments, written and oral with respect to the determination of a safe level of lead in paint for purposes of a CPSA banning regulation, the Commission sees no reason to deviate from its proposal to use the LBPPPA safe level for lead in paint as the maximum allowable lead content in this banning regulation. The Commission points out that it is unaware of any data or information sufficient to establish the safety of lead at a level over 0.06 percent.

As far as the problem of inadvertent contamination of paint with lead is concerned, the Commission notes that NPCA itself has stated that most current consumer paints comply with a 0.06 percent level. More stringent housekeeping practices by manufacturers should bring the other paints within the prescribed limit. This issue is further discussed in the section of this preamble entitled "Economic Considerations".

Finally, the Commission cannot ignore the legislative mandate embodied in the LBPPPA, which strongly suggests that no level higher than 0.06 percent lead in paint is safe by mandating a 0.06 percent standard in the absence of an affirmative finding that a higher level is safe. Consequently, for purposes of this CPSA regulation, consumer product paints containing more than 0.06 percent lead and toys and other children's articles and furniture bearing such paint are banned hazardous products.

2. *Scope.* In response to the proposal of August 10, 1976, industry representatives asked that certain items of furniture and certain paints be excluded from the ban.

Several commenters requested that metal furniture, including metal chests, desks, and bed frames be excluded from the furniture that would be banned by the proposal. The commenters stated that the coatings on this furniture are resistant to chewing by children since they are baked on at high temperatures, making them hard and durable.

The Commission declines to exempt metal furniture because it has not received sufficient data to justify an exemption. The Commission points out, however, that manufacturers of metal furniture may petition for an exemption of such articles in accordance with the criteria set out in the section of this Preamble entitled "Future Exemption Requests".

Commenters also requested that home appliances, such as ranges, refrigerators, and dishwashers, fixtures such as bathroom fixtures, toilet seats, kitchen cabinets, and lighting fixtures be excluded from the scope of the ban. The reasons given for these requests were that coatings on appliances and fixtures are hard and durable and tightly adhere to the products, making it difficult for children to chew or chip the coatings by biting.

The Commission notes that because the August 10, 1976 proposal contained no definition of the term "furniture article," there has apparently been some confusion as to the coverage of the term. The Commission points out that it does not consider appliances or fixtures to be furniture. Therefore, the items are outside the scope of this banning regulation.

Several commenters suggested that window shades, wall hangings, venetian blinds and similar items should be excluded from the ban. The Commission does not consider these items to be furniture, so they are therefore not within the scope of the regulation.

The NPCA and some manufacturers asked that mirrors with lead-containing mirror backing paint be exempted from the ban because there is no history of the paint having been ingested by children, the paint is inaccessible, and the paint itself is not sold to consumers. In addition, the lead is important as an anti-corrosive and adhesive. The commenters note that while the life of a mirror without a backing of lead-containing paint is only 2 or 3 years, the life of a mirror with such a backing is estimated at 25 to 40 years.

The Commission agrees with the commenters' arguments. Since mirrors which are part of furniture articles are furniture within the scope of the ban, the Commission grants an exemption for such mirrors which have lead-containing backing paint. The Commission notes, however, that this exemption only extends to the mirror itself; a wooden frame around a mirror, for instance, must comply with the provisions of this regulation.

The Commission has also decided to exempt artists' paints and related materials from the regulation. The Commission proposed to exempt this category of paints in the August 10, 1976 document, and these products are exempted from the FHSA regulation (16 CFR 1500.17(a)(6)(i)(D)) that currently bans paints containing more than 0.5 percent lead and toys and other children's articles bearing such paint. The Commission notes that over the years it has not been made aware of any problems resulting from the FHSA exemption and concludes that the exemption should be continued in effect.

3. *NPCA Exemption Requests.* As previously mentioned in the FEDERAL REGISTER of December 5, 1972 (37 FR 25849), the Food and Drug Administration, published in response to a petition by the National Paint and Coatings Association, seven proposed exemptions from the banning regulation on lead-containing paints and other similar surface-coating materials that had been issued under the Federal Hazardous Substances Act (FHSA). The seven proposed exemptions involve certain refinish coatings, industrial maintenance coatings, graphic arts coatings, touchup coatings, exterior marine coatings, exterior roof coatings, and exterior primer coatings. These are further identified below. Mandatory cautionary labeling for the subject products was also proposed.

Effective May 14, 1973, functions under the FHSA were transferred to the Consumer Product Safety Commission by section 30(a) of the Consumer Product Safety Act (15 U.S.C. 2079(a)). The Commission has considered the merits of the December 5, 1972, proposal in this CPSA regulation. Over 200 comments were received on the proposed exemptions. While 115 of the comments generally supported the proposals, others were critical of various aspects of the proposed exemptions. The principal issues raised and the Commission's conclusions are as follows:

(a) *Automotive, agricultural, and industrial equipment refinish coatings.* Many commenters stated that because these products are not generally distributed through consumer channels and because they are applied on surfaces generally not accessible to children, the possibility of ingestion of lead-containing paint chips by children is extremely remote. The commenters further pointed out that these special coatings are so expensive compared to household paints that it is highly unlikely that they would be used on either the interior or exterior of a house.

A public interest research group disagreed with the proponents of this proposed exemption because it believes that there is no guarantee that children will not acquire lead in their blood from these products, even though they may not be generally available in or around the household. However, those favoring the exemption maintain that the proposed cautionary labeling would effectively protect people from using such coatings on home surfaces or other surfaces accessible to children.

The Commission notes that since this regulation is being promulgated under the CPSA, the Commission's rulemaking powers are limited to articles which are "consumer products". Section 3(a)(1)(C) of the CPSA specifies that "motor vehicles and motor vehicle equipment" are excluded from the scope of the act. National Highway Traffic Safety Administration (NHTSA) attorneys have informed the Commission that paint specifically for use on automobiles is "motor vehicle equipment" under NHTSA jurisdiction. Therefore, since automotive coatings are excluded from Commission jurisdiction under the CPSA, no exemption for them need be granted. The coatings are outside the scope of this regulation.

Nevertheless, agricultural and industrial equipment refinish coatings, to the extent they are customarily available to

V 42 170
SEP 1 77
UMI

consumers, are within the Commission's regulatory power under the CPSA. With regard to these two types of coatings, the Commission concludes that they pose no substantial hazard to children because the products on which they are used are not generally accessible to children and therefore, these coatings are exempted from the regulation, provided they are labeled in accordance with section 1303.3 (a).

(b) *Industrial (and commercial) building and equipment maintenance coatings, including traffic and safety marking coatings.* Industrial paints consist of glossy enamels and red lead primers and are used on machinery, equipment, steel doors and frames, and steel structural members and as safety marking paint. Commercial building maintenance coatings include a wide range of paints for use on plumbing, electrical conduits and equipment, steel doors, as well as exposed steel structural members.

Nearly all the responses received favored exempting these coatings. Since the coatings, commenters reasoned, are applied to surfaces which are not likely to be chewed by children, such as highways and bridges, they cannot be viewed as creating a substantial hazard to children. Many commenters also noted that lead-containing pigments, such as red lead, are essential in aiding against corrosion and weathering of industrial and commercial buildings and equipment. In addition, they pointed out that no satisfactory substitute for yellow lead chromate has been found for use in traffic paint.

A contrary view expressed by some commenters is that, while these products are not customarily produced or distributed for sale to or for use by consumers nor easily accessible to children, the small-size packaging of these special coatings makes them available to the consuming public and thus accessible to children. Also, a building which is industrial or commercial may later become residential. However, those in favor of the exemption stated that precautionary labeling would prevent any misuse of such coatings in the home.

While most industrial and commercial maintenance coatings are not available to consumers and therefore are not "consumer products" within the scope of the ban, the Commission realizes that some industrial and commercial coatings may be customarily sold to consumers through retail or wholesale sources or otherwise made available for their use. The Commission believes, however, that the likelihood that these consumer products will be used on surfaces accessible to children is small. In addition, the Commission believes that the precautionary labeling provisions of section 1303.3(a) which inform consumers of the areas on which the paints may not safely be applied, will adequately address any danger of misuse of these products.

The Commission recognizes the importance of red lead primers in preventing the corrosion of steel structures and yellow lead chromate in insuring the durability and brilliance of traffic paint. Therefore, the Commission agrees to exempt the subject coatings.

(c) *Graphic art coatings (products marketed solely for application on billboards, road signs and similar uses and for identification marking in industrial buildings.)* Most of the comments on this proposed exemption favored granting it. The main reasons given for why such an exception would be justified were that these lead-containing paints are necessary to insure durability and brilliance of color and pose no hazard to children since they are not sold or intended for consumer use. Some commenters stressed that since there presently exists no acceptable non-leaded colorant, denying the exception would inevitably result in increased costs, which the consuming public would ultimately bear.

Some consumer groups stated that graphic art coatings are packaged in such a form that they are suitable for consumer use and, therefore, should be included within the scope of this regulation.

The Commission notes that while graphic art coatings are generally applied by professional sign painters and are usually not sold to consumers, the signs (billboards, road signs, etc.) are often for the use of consumers. Therefore, graphic art coatings are "consumer products."

The Commission, however, believes the coatings should be exempt from the scope of this regulation. The Commission finds that the coatings are normally applied to areas which are inaccessible to children. Although the Commission recognizes that occasionally graphic art coatings may be brought into the home, this would not be frequent. The Commission believes the precautionary labeling specified in the rule should address any potential problem of application to inappropriate surfaces.

(d) *Touchup coatings for automobiles, agricultural and industrial equipment, lawn and garden equipment, boats, outboard motors, motorized recreational vehicles, and appliances.* Industry comments supporting this proposed exemption stated that it is unlikely that children would chew on the hard metal surfaces to which these touchup coatings are applied. In addition, manufacturers expressed concern over the absence of an appropriate substitute material.

Other commenters urged that these coatings not be exempted because they are readily available for consumer use.

As previously discussed, coatings specifically designed for use on automobiles are considered motor vehicle equipment and are excluded from the Commission's jurisdiction under the CPSA. Similarly, U.S. Coast Guard officials inform that coatings applied to boats or their component parts are considered boat equipment which could be subjected to safety regulation under the Federal Boat Safety Act of 1971. (CPSA section 30(a)(1)(G) excludes boats and boat equipment which could be subjected to safety regulation under the Federal Boat Safety Act from the definition of "consumer product.") Coatings applied to motorized recreational vehicles would in most instances be motor vehicle equipment or boat equipment. Therefore, it is not necessary that touchup coatings specifically for use on automobiles, boats, motorized recreational vehicles and outboard motors be exempted by the Commission since they are not within the scope of the regulation.

Touch-up coatings for agricultural and industrial equipment, lawn and garden equipment, and appliances, are available to consumers and therefore, fall within the coverage of the CPSA. The Commission has decided to grant an exemption for these coatings. The Commission notes that the coatings are applied over small areas and on surfaces which do not lend themselves to chewing by children. In addition, the Commission finds that the warning label required by section 1303.3(a) will provide additional protection by indicating to the purchaser that such coatings should not be applied to any surface accessible to children.

(e) *Exterior marine coatings for small craft application.* The comments endorsing this proposed exemption emphasized that lead-containing marine coatings are necessary to control corrosion since no effective substitute for lead is currently available. Other comments opposed this proposal because small craft are often stored in the vicinity of consumers' homes and the coatings may, therefore, be accessible to children.

The CPSA excludes boats and boat equipment which could be subjected to safety regulation under the Federal Boat Safety Act of 1971 from the definition of "consumer product". Since exterior marine coatings for small craft are considered to be "boat equipment," the Commission concludes that it need not exempt these products, because they are not within the jurisdiction of the CPSA.

(f) *Exterior rubber-based roof coatings.* Commenters favoring the proposed exemption stated that lead oxides are the only known materials available for improving the water resistance of roofs. They also stressed that roofs are surfaces not easily accessible to children.

However, some commenters opposed exempting these coatings because roofs are often used as play areas for urban children and therefore, the lead content of the coatings would be accessible to children. They further maintained that lead oxides used as curing agents for liquid coatings are replaceable by other metallic oxides as well as certain metal-free organic substances.

The Commission has decided to deny the request for this proposed exemption because it is possible that roofs could be converted into play areas, thereby exposing children to a dangerously high level of lead. The Commission believes that there are practical and acceptable substitutes for lead oxides in such products. In addition, the Commission has concluded that an exemption should not be granted because industry has failed to provide sufficient information regarding these products to convince the Commission to act favorably on the request.

(g) *Exterior primer coatings for wood siding containing extractives (products marketed solely for use on redwood and cedar).* Commenters favoring this proposed exemption stated that the primers are inaccessible to children and that lead compounds are necessary in these primers in order to prevent discoloration of cedar and redwood before the topcoat is applied.

Several commenters, including an industry commenter, strongly opposed the exclusion of these coatings from the regulation. They recognized that a primer need only be used once and thus, there is no build up of layers (the primary cause of lead poisoning), but indicated that this does not eliminate the possibility of children ingesting low-level lead paint chips. Also, the commenters pointed out that many wood primer coatings are suitable for a variety of wood surfaces, such as interior wood paneling and wood trim, and are not exclusively for outdoor use. The commenters further stressed that there are presently available several non-lead substitutes which have provided satisfactory results in preventing discoloration.

The Commission concludes that these lead-containing primers should not be exempted because the interior surfaces (e.g., paneling, trim) and exterior surfaces (e.g., siding, porches, or decks) to which these primers are applied are accessible to children. Also, since non-lead substitutes are readily available and are produced by the leading paint manufacturers, banning wood primer coatings containing more than 0.06 percent lead should not create an unreasonable burden on industry.

4. *Economic Considerations.* Many comments on the proposed regulation related to the economic and practical effects of lowering the permissible lead level for paints and other similar surface coatings. These comments and comments on the draft environmental statement are extensively addressed in the final environmental impact statement which is on file with the Council on Environmental Quality and is available for public inspection in the Office of the Secretary. The economic comments on the August 10, 1976 proposal are briefly discussed below.

The primary economic effect of the proposed regulation would be to eliminate the use of lead driers in paints since lead pigments are already precluded from practical use under the FHSA 0.5 percent lead restriction. Several industry commenters noted that as a result of the elimination of lead driers, the drying time of solvent-thinned paints would be lengthened and in fact, outside painting with these products at temperatures below 50° F and 70 percent or more relative humidity might not be feasible.

The Commission does not dispute the accuracy of the industry claim. However, the Commission points out that the painting industry has always been plagued by the vagaries of the weather and outdoor painting is not normally done during periods of precipitation, freezing temperatures, and high winds. In addition, at more moderate temperatures, other driers, particularly zirconium, may be substituted for lead with little or no sacrifice to solvent-thinned paint performance.

Other industry comments stated that the adoption of the 0.06 percent level for consumer paints would force a manufacturer who produced both consumer and commercial type paints to segregate his equipment to prevent contamination of the consumer paint. The commenters further noted that this creates a heavy burden and might put certain small manufacturers out of business. A consumer group, however, pointed out that even without the 0.06 percent requirement, manufacturers must maintain strict housekeeping standards because they routinely mix various colors, resins, and solvents.

The Commission agrees that present operating procedures in the paint industry require segregation of ingredients and equipment and the maintenance of good housekeeping practices to assure tint and color fidelity of paints. The Commission believes that the prevention of contamination of consumer products with residues from previously manufactured batches of industrial paints should require only strict adherence to established practices. Further, if additional housekeeping requirements are necessary to maintain the lead level within prescribed limits, the Commission does not believe that the increased costs will be great.

Industry representatives also commented that adoption of the 0.06 percent level would result in significantly increased costs for manufacturers since they would have to test paints to determine that lead levels comply with the ban.

First of all, the Commission notes that several commenters, including NPCA, stated that most household paints today comply with the 0.06 percent level. Studies sponsored by the Commission have shown that over 95 percent of latex-based and nearly 70 percent of oil-based paints intended for consumers have lead levels at or below 0.06 percent See "CPSC Lead-in-Paint Marketplace Survey, 1974–1975".) In addition, the Commission does not agree that small manufacturers may not be able to afford the costs of testing paints for lead at a level of 0.06 percent. The data available to the Commission indicate that the costs of testing are very small compared with the total price of a gallon of paint. The Commission believes that the costs of testing may be further reduced by requiring certification of lead content from suppliers and by increased quality control to reduce the need for testing each batch of products.

5. *Exemption for Catalyzed Coatings for Radio-Controlled Powered Model Aircraft.* On March 19, 1976, NPCA petitioned (HP 76–11) for the exemption of coatings marketed solely for use on radio-controlled powered model aircraft from classification as a banned substance under the lead-in-paint regulations of the Federal Hazardous Substances Act.

The Commission has determined to grant this petition and to issue an exemption for these coatings at this time. Catalyzed coatings marketed solely for use on radio-controlled powered model aircraft are, therefore, exempt from this banning regulation, provided they are labeled in accordance with section 1303.3 (a).

In granting the exemption, the Commission recognizes that the planes to which these coatings are applied are relatively expensive and are marketed mainly for adult use. In addition, the coatings themselves are expensive, are sold in small amounts, and are specialized. Therefore, it is unlikely that they would be used on surfaces from which it may reasonably be expected that children would ingest the dried paint film.

6. *Future Exemption Requests.* The Commission points out that it will consider other exemption requests that are brought to its attention. The requests should comply with the Commission's Procedures for Petitioning for Rulemaking Under Section 10 of the Consumer Product Safety Act (16 CFR 1110, 41 FR 43126, September 29, 1976) and should be accompanied by technical data establishing such facts as why lead is an essential component of the product(s) and/or why the product(s) presents no risk of ingestion by children. A specific description of the product, including the complete chemical formulation and the product's name, the product's characteristics after application, promotional and labeling information, and information on the use patterns of the product should also be supplied. In addition, it would be helpful to the Commission in evaluating requests if manufacturers would include with their submissions information on their substitution plans should the exemption be denied and information on whether the product is currently being distributed.

Manufacturers may request confidential treatment of portions of submitted information in accordance with the Commission's regulations under the Freedom of Information Act. (16 CFR § 1015, issued February 27, 1977 at 42 FR 10490.)

7. *Testing.* A number of comments recommended that the Commission adopt and include in the rule a uniform quantitative method of testing for lead in paint. The Commission has decided not to prescribe any specific method for testing paints for their lead content. The Commission recognizes that analytical chemistry is a dynamic science and that the inclusion of a specific procedure within the rule might reduce scientific activity and initiative. It might also delay the use of newer, and possibly simpler, procedures. Any scientifically acceptable method can be used to determine the lead content of consumer paints. The Commission, upon request, will supply details of the procedure used by its laboratories for this purpose.

8. *Effective date.* Commenters have suggested various effective dates for the

UMI
V 42 170
SEP 1 77
UMI

regulation, ranging from 6 months to 5 years after promulgation. One commenter suggested that the 0.06 percent level be phased in gradually over a one to three year period.

The Commission notes that those manufacturers who presently produce paint containing more than 0.06 percent lead must reformulate their product to use non-lead driers, order and receive and certify ingredients, test pilot batches, set up production of the product, and arrange for testing of production batches. Manufacturers of children's articles and furniture must be able to locate certified supplies of complying paint.

The Commission believes that a 180-day effective date would give all but the most inefficient firms enough time to become fully aware of the requirements of the regulation and make the adjustments in production outlined above. The Commission also believes that manufacturers of products which must use complying paint will be able to make the necessary arrangements within this time period. The Commission notes that many paints already comply with the 0.06 percent level.

In addition, the Commission points out that it has received no data convincingly demonstrating the need for a longer period of time to comply.

Section 9(d)(1) of the CPSA states that if the Commission wants to make a consumer product safety rule effective more than 180 days from the date of promulgation, the Commission must make a special finding that a later effective date is in the public interest. The Commission is unable to make such a finding with regard to this ban. The Commission has determined, however, to make this ban applicable only to products subject to the ban that are manufactured after the effective date. The Commission believes that applicability of the regulations to all goods in commerce on the effective date would pose very difficult compliance problems for the wholesalers or retailers of either paint or painted products. The impact would probably be especially large on small businesses. The Commission concludes that such an impact is unwarranted in view of the purpose of the regulation to prevent the future buildup of unnecessarily high levels of lead in layers of dried paint. Moreover, this policy is consistent with the LBPPPA in which "lead-based paint" is defined as paint containing more than 0.06 percent lead manufactured after the act's effective date (June 23, 1977). Paint manufactured prior to the effective date of the CPSA regulation but sold after that date must still comply with the 0.5 percent limit of the FHSA regulation so the Commission believes that the public will not be unprotected while paint inventories are depleted.

DESCRIPTION OF THE BAN

Terms of the ban. In Part 1303, the following consumer products are declared to be banned hazardous products under section 8 of the Consumer Product Safety Act:

(1) Paint and similar surface-coating materials that contain lead or lead compounds and in which the lead content (calculated as lead metal) exceeds 0.06 percent of the total weight of the nonvolatile content of the paint or the weight of the dried paint film.

(2) Toys and other articles intended for use by children that bear paint or similar surface-coating materials that contain lead or lead compounds and in which the lead content (calculated as lead metal) exceeds 0.06 percent of the total weight of the nonvolatile content of the paint or the weight of the dried paint film.

(3) Furniture articles that bear paint or similar surface-coating materials that contain lead or lead compounds and in which the lead content (calculated as lead metal) exceeds 0.06 percent of the total weight of the nonvolatile content of the paint or the weight of the dried paint film.

"Paint and similar surface-coating materials," "toys and other articles intended for use by children," and "furniture articles" are defined in § 1303.2. The definition of "furniture articles" indicates that appliances such as ranges, refrigerators, and dishwashers, fixtures such as bathroom fixtures, kitchen cabinets, and chandeliers, and other household items such as window shades and venetian blinds are not covered by the regulation.

The following products are specifically exempted from the ban:

(1) Mirrors which are part of furniture articles to the extent they bear lead-containing backing paint.

(2) Artists' paints and related materials.

The following products are specifically exempted from the ban, provided they bear the cautionary labeling specified in § 1303.3(a):

(1) Agricultural and industrial equipment refinish coatings.

(2) Industrial (and commercial) building and equipment maintenance coatings, including traffic and safety marking coatings.

(3) Graphic art coatings (i.e., products marketed solely for application on billboards, road signs, and similar uses and for identification marking in industrial buildings).

(4) Touchup coatings for agricultural equipment, lawn and garden equipment, and appliances.

(5) Catalyzed coatings marketed solely for use on radio-controlled model powered aircraft.

Scope and application. Since this ban is being issued under the Consumer Product Safety Act, the rule applies only to those products that are "consumer products" as defined in section 3(a)(1) of the Act. Accordingly, the regulation applies to items subject to the ban that are customarily produced or distributed for sale to or for the use, consumption, or enjoyment of consumers. Paints and coatings for motor vehicles and boats are not included within the scope of the ban. In addition to those products which are sold directly to consumers, the ban applies to products which are used or enjoyed by consumers after sale, such as paints used in apartments, schools, hospitals, parks, playgrounds, and public buildings or other areas where consumers will have direct access to the painted surface.

FINDINGS

1. *CPSA Section 8.* Section 8(1) and (2) of the CPSA require that, before issuing a consumer product safety rule declaring a product to be a banned hazardous product, the Commission shall find (1) that the product presents an unreasonable risk of injury and (2) that no feasible safety standard can adequately protect the public from the unreasonable risk of injury associated with the product.

(a) *Unreasonable risk of injury.* This regulation is intended to reduce or eliminate the unreasonable risk of injury associated with lead poisoning in children. The main source of lead in childhood lead poisoning is lead-containing paint. Lead-containing paint or peelings are sometimes eaten by children, especially those with pica (a poorly understood phenomenon meaning the repetitive ingestion of nonfood substances). Certain surfaces, such as toys or furniture, are easily accessible to children for the ingestion of such chips and therefore, present a particular hazard.

The adverse health effects of such poisoning in children are numerous and can cause a wide range of disorders such as hyperactivity, slowed learning ability, withdrawal, blindness, and even death. These effects are discussed in more detail in section 1303.5(a) of Part 1303.

The Commission believes that the Congressional intent expressed in the amended LBPPPA is for all paint for consumer use which meets the LBPPPA definition of "lead-based paint," as determined by the Commission in LBPPPA proceedings, and certain consumer products bearing such paints (notably toys and other children's articles and furniture) to be considered as presenting an "unreasonable risk of injury" as that term is used in sections 8 and 9 of the CPSA. This intent is manifested in the LBPPPA by provisions directing this and other federal agencies to take certain regulatory actions with respect to "lead-based paint", including the specific provision directing the CPSC to prohibit the application of "lead-based paint" to any toy or furniture article.

In addition, in determining whether a specific risk of injury is "unreasonable", the Commission balances the probability that the risk will result in harm and the gravity of the harm against a rule's effect on the product's utility, cost, and availability to the consumer.

The Commission notes that the seriousness of the lead poisoning problem is well documented. (See National Academy of Sciences, Recommendations for the Prevention of Lead Poisoning in Children, Washington, D.C., July, 1976.) The Commission further points out that its own studies have shown that over 95 percent of latex-based and nearly 70 percent of oil-based paints intended for consumers have lead levels at or below 0.06 percent. The Commission believes that the elimination of lead driers in paints will not affect their utility since in most cases satisfactory substitutes are currently available. Therefore, the Commission concludes that the impact of this ban on the utility, cost, and availability of paints, toys and other children's articles, and furniture is outweighed by the need to protect the public from the hazard associated with lead-containing paints.

Accordingly, the Commission finds that the following products present an unreasonable risk of injury:

1. Paint and other similar surface-coating materials that contain lead or lead compounds of which the lead content (calculated as lead metal) is in excess of 0.06 percent lead which is defined under the LBPPPA as lead-based paint.

2. Toys and other articles intended for use by children that bear any paint or similar surface-coating materials containing more than 0.06 percent lead.

3. Articles of furniture that bear any paint or similar surface-coating materials containing more than 0.06 percent lead.

(b) *No Feasible Safety Standard.* The Commission is not aware of a technologically feasible procedure for detoxifying a hazardous quantity of lead when present in paint. Accordingly, the Commission finds that a safety standard for paint and similar surface-coating materials containing more than 0.06 percent lead is not feasible and would not adequately protect the public from the unreasonable risk of injury associated with these products.

2. *CPSA Section 9(b).* Section 9(b) of the CPSA, 15 U.S.C. 2058(b), as amended requires the Commission to consider and take into account in the promulgation of a rule the special needs of elderly and handicapped persons to determine the extent to which such persons may be adversely affected by such rule. The Commission has considered these needs and has determined that no adverse effect on elderly or handicapped persons will result from this regulation. It is in the best interest of the entire public, including the elderly and handicapped, that overall lead levels in paint be reduced.

3. *CPSA Section 9(c).* Section 9(c) of the CPSA requires that prior to promulgating a consumer product safety rule the Commission shall consider and shall make appropriate findings for inclusion in such a rule as to: (1) The degree and nature of the risk of injury the rule is designed to eliminate or reduce; (2) the approximate number of consumer products, or types or classes thereof, subject to such rule; (3) the need of the public for the consumer products subject to such rule, and the probable effect of such rule upon the utility, cost, or availability of such products to meet such need; (4) any means of achieving the effect of the order while minimizing adverse effects on competition or disruption or dislocation of manufacturing and other commercial practices consistent with the public health and safety; (5) that the rule is reasonably necessary to eliminate or reduce an unreasonable risk associated with such product; and (6) that the promulgation of the rule is in the public interest (15 U.S.C. 2058(c)).

The findings required by Section 9(c) of the act have been made by the Commission and are incorporated in § 1303.5 of the rule below.

ENVIRONMENTAL IMPACT OF THE BAN

Pursuant to its responsibilities under the National Enviromnental Policy Act (NEPA) (42 U.S.C. 4321–4347 as amended by Pub. L. 94–83, August 8, 1975), the Commission has considered the potential environmental effects of this regulation and has prepared an environmental impact statement to reflect this. A draft statement was submitted to the Council on Environmental Quality which, in the FEDERAL REGISTER of February 4, 1977 (42 FR 6879), announced that the document was available for public comment. Pursuant to Council Guidelines (40 CFR 1500 et seq.), public comment was allowed for 45 days from publication of the notice of availability.

The Commission addressed the comments that were received in the final statement, dated May 2, 1977. The availability of the final impact statement was announced in the FEDERAL REGISTER of June 10, 1977 (42 FR 29948). The final statement may be inspected in the Office of the Secretary of the Commission.

CONCLUSION

Having considered the published proposal, the oral and written responses to the proposal, and other relevant material, the Commission issues a ban of lead-containing paint, toys and other children's articles, and furniture bearing such paint as set forth below.

Therefore, pursuant to the provisions of the Consumer Product Safety Act (secs. 8 and 9, 86 Stat. 1215–17, as amended, 90 Stat. 506, 15 U.S.C. 2057, 2058), a new Part 1303 is added to Title 16, Chapter II, Subchapter B, as follows:

PART 1303—LEAD-CONTAINING PAINT AND CERTAIN CONSUMER PRODUCTS BEARING LEAD-CONTAINING PAINT

Sec.
1303.1 Scope and application.
1303.2 Definitions.
1303.3 Exemptions.
1303.4 Banned hazardous products.
1303.5 Findings.

AUTHORITY: Secs. 8, 9, 86 Stat. 1215–1217, as amended 90 Stat. 506; 15 U.S.C. 2057, 2058.

§ 1303.1 Scope and application.

(a) In this Part 1303, the Consumer Product Safety Commission declares that paint and similar surface-coating materials for consumer use that contain lead or lead compounds and in which the lead content (calculated as lead metal) is in excess of 0.06 percent of the weight of the total nonvolatile content of the paint or the weight of the dried paint film (which paint and similar surface-coating materials are referred to hereafter as "lead-containing paint") are banned hazardous products under sections 8 and 9 of the Consumer Product Safety Act (CPSA), 15 U.S.C. 2057, 2058. (See Parts 1145.1 and 1145.2 for the Commission's finding under section 30(d) of the Consumer Product Safety Act (CPSA) that it is in the public interest to regulate lead-containing paint and certain consumer products bearing such paint under the CPSA.) The following consumer products are also declared to be banned hazardous products:

(1) Toys and other articles intended for use by children that bear "lead-containing paint".

(2) Furniture articles for consumer use that bear "lead-containing paint".

(b) This ban applies to the products in the categories described in paragraph (a) of this section that are manufactured after February 27, 1978, and which are "consumer products" as that term is defined in section 3(a)(1) of the Consumer Product Safety Act. Accordingly, those of the products described above that are customarily produced or distributed for sale to or for use, consumption, or enjoyment of consumers in or around a household, in schools, in recreation, or otherwise are covered by the regulation. Paints and coatings for motor vehicles and boats are not included within the scope of the ban because they are outside the statutory definition of "consumer product". In addition to those products which are sold directly to consumers, the ban applies to products which are used or enjoyed by consumers after sale, such as paints used in residences, schools, hospitals, parks, playgrounds, and public buildings or other areas where consumers will have direct access to the painted surface.

(c) The Commission has issued the ban because it has found (1) that there is an unreasonable risk of lead poisoning in children associated with lead content of over 0.06 percent in paints and coatings to which children have access and (2) that no feasible consumer product safety standard under the CPSA would adequately protect the public from this risk.

§ 1303.2 Definitions.

(a) The definitions in section 3 of the Consumer Product Safety Act (15 U.S.C. 2052) shall apply to this Part 1303.

(b) For purposes of this Part:

(1) "Paint and other similar surface-coating materials" means a fluid, semi-fluid, or other material, with or without a suspension of finely divided coloring matter, which changes to a solid film when a thin layer is applied to a metal, wood, stone, paper, leather, cloth, plastic, or other surface. This term does not include printing inks or those materials which actually become a part of the substrate, such as the pigment in a plastic article, or those materials which are actually bonded to the substrate, such as by electroplating or ceramic glazing.

(2) "Lead-containing paint" means paint or other similar surface coating

UMI
V 42 170
SEP 1 77
UMI

materials containing lead or lead compounds and in which the lead content (calculated as lead metal) is in excess of 0.06 percent by weight of the total nonvolatile content of the paint or the weight of the dried paint film.

(3) "Toys and other articles intended for use by children" means those toys and other articles which are intended to be entrusted to or for use by children. This would not include all articles to which children might have access simply because they are present in a household.

(4) "Furniture article" means those movable articles, (i) used to support people or things; (ii) other functional or decorative furniture articles, including, but not limited to, products such as beds, bookcases, chairs, chests, tables, dressers, desks, pianos, console televisions, and sofas. The term "furniture article" does not include appliances, such as ranges, refrigerators, dishwashers, clothes washers and dryers, air conditioners, humidifiers, and dehumidifiers; fixtures such as bathroom fixtures, built-in cabinets, chandeliers, windows, and doors; or household items such as window shades, venetian blinds, or wall hangings and draperies.

§ 1303.3 Exemptions.

(a) The categories of products listed in paragraph (b) of this section are exempted from the scope of the ban established by this Part 1303, provided:

(1) That these products bear on the main panel of their label, in addition to any labeling that may be otherwise required, the signal word "Warning" (unless some other signal word is required) and the following statement: "Contains Lead. Dried Film of This Paint May Be Harmful If Eaten or Chewed."

(2) (i) That these products also bear on their label the following additional statement or its practical equivalent:

Do not apply on toys and other children's articles, furniture, or interior surfaces of any dwelling or facility which may be occupied or used by children.

Do not apply on exterior surfaces of dwelling units, such as window sills, porches, stairs, or railings, to which children may be commonly exposed.

Keep out of reach of children.

(ii) If the statement required by the preceding paragraph (a) (2) (i) is placed on a label panel other than the main panel, the label statement required to be on the main panel by paragraph (a) (1) of this section shall contain the following additional statement: "See other cautions on —— (insert 'side' or 'back', as appropriate) panel."

(3) That the placement, conspicuousness, and contrast of the label statements required by this section (a) comply with the requirements of the Federal Hazardous Substances Act at 16 CFR 1500.121.

(b) The following products are exempt from the scope of the ban established by this Part 1303, provided they comply with the requirements of paragraph (a) of this section:

(1) Agricultural and industrial equipment refinish coatings.

(2) Industrial (and commercial) building and equipment maintenance coatings, including traffic and safety marking coatings.

(3) Graphic art coatings (i.e., products marketed solely for application on billboards, road signs, and similar uses and for identification marking in industrial buildings).

(4) Touchup coatings for agricultural equipment, lawn and garden equipment, and appliances.

(5) Catalyzed coatings marketed solely for use on radio-controlled model powered aircraft.

(c) The following products are exempt from the scope of the ban established by Part 1303 (no cautionary labeling is required):

(1) Mirrors which are part of furniture articles to the extent that they bear lead-containing backing paint.

(2) Artists' paints and related materials.

§ 1303.4 Banned hazardous products.

The following consumer products, manufactured after February 27, 1978, unless exempted by § 1303.3, are banned hazardous products (see the definitions in section 1303.2):

(a) Paint and other similar surface-coating materials which are "lead-containing paint."

(b) Toys and other articles intended for use by children that bear "lead-containing paint."

(c) Furniture articles that bear "lead-containing paint."

§ 1303.5 Findings.

(a) *The degree and nature of the risk of injury.* (1) The Commission finds that the risk of injury which this regulation is designed to eliminate or reduce is lead poisoning in children. The adverse effects of this poisoning in children can cause a range of disorders such as hyperactivity, slowed learning ability, withdrawal, blindness, and even death. The final Environmental Impact Statement on Lead in Paint which is on file with the President's Council on Environmental Quality (and available for inspection in the Office of the Secretary) contains in Appendix A a detailed discussion of the health effects of lead in paint. These effects will only be summarized here.

(2) Lead is a cumulative toxic heavy metal which, in humans, exerts its effects on the renal, hematopoietic, and nervous systems. Newer concepts indicate that there are three stages to childhood lead poisoning. The adverse health effects in the first stage are not clinically present but metabolic changes can be observed. During the second stage or symptomatic stage such symptoms as loss of appetite, vomiting, apathy, drowsiness, and inability to coordinate voluntary muscle movements occur. The aftereffects of this stage include seizure disorders as well as various behavioral and functional disorders which are often included under the heading of minimal brain dysfunction. Studies suggest that this syndrome may include hyperactivity, impulsive behavior, prolonged reaction time, perceptual disorders and slowed learning ability. The adverse health effects of the third stage may be permanent and can include blindness, mental retardation, behavior disorders, and death.

(3) The Commission notes that children with pica are of special concern with regard to lead poisoning. Pica, the repetitive ingestion of nonfood substances, occurs in 50 percent of children between the ages of one and three, and studies indicate that at this age lead is absorbed more rapidly than lead is absorbed in adults. Pica for paint is believed to be episodic and can occur 2 to 3 times a week.

(4) The Commission also notes that there are no reports of injuries caused by lead paint poisoning in the Commission's National Electronic Injury Surveillance System (NEISS) data, which reflect hospital emergency room treatment. Lead paint poisonings result from a chronic hazard rather than from an acute hazard of the type generally treated in emergency rooms; and NEISS reporting, therefore, does not reflect this type of chronic hazard or injuries.

(5) Former U.S. Surgeon-General Jesse L. Steinfeld, however, estimated in 1971 that 400,000 pre-school American children have elevated body lead burdens. The National Bureau of Standards in 1972 estimated that 600,000 young children have unduly high lead blood content.

(b) *Products subject to this ban.* (1) The products banned by this rule are listed in section 1303.4.

(2) The term "paint" comprises a variety of coating materials such as interior and exterior household paints, varnishes, lacquers, stains, enamels, primers, and similar coatings formulated for use on various surfaces. Based on 1976 data, the Commission estimates that over 400 million gallons of paint a year valued at approximately $2.5 billion could potentially be subject to this rule.

(3) All products commonly known as toys and other articles intended for the use of children are subject to this rule. The categories of products within this classification are numerous and include items and equipment for play, amusement, education, physical fitness, and care of children. Retail sales in 1976 of products considered to be toys or other articles intended for use of children are estimated at around $4 billion.

(4) For the purposes of this rule, furniture articles are certain movable articles used to support people or things or other functional or decorative furniture articles such as couches, beds, tables, chairs, chests, and the like. Appliances and similar equipment, household fixtures, and certain other household items such as window shades, blinds, wall hangings, and the like are not included within the definition of furniture. The regulation applies to furniture for use in households, schools, in recreation, or otherwise. In 1972, the value of shipments of items of furniture such as those named above was as follows: wood household furniture $2,716 million; metal household furniture $859 million; wood television and radio cabinets $293 million; and $190 million for other household furniture made of plastic, reed and rattan. (Not included in the above are some $2 billion worth of upholstered furniture and $300 million in convertible sofas, chair beds and studio couches.)

(c) *Need of the public for the products and effects of the rule on their utility, cost, and availability.* (1) The public need for paints of various types and for furniture and other articles is substantial and well established. The Commission finds that the need of the public for paint containing more than 0.06 percent lead or for the affected products that are coated with materials containing more than 0.06 percent lead is limited. The Commission has determined that there are products containing more than the 0.06 percent level of lead which meet a public need and for which substitutes are either not available or are not sufficiently effective and to which access by children to the coatings or the surfaces to which they are applied is unlikely. Accordingly, these products have been specifically exempted from the scope of the regulation in § 1303.3.

(2) The Commission finds that the effects of this rule on the cost, utility, and availability of paints and painted articles will be small. The Commission notes that over 95 percent of latex-based and nearly 70 percent of oil-based paints have lead levels at or below the level set by Part 1303.

(i) *Costs.* The Commission estimates that the added costs to the consumer for paints affected by this rule will not exceed 5 to 10 cents per gallon. Costs to consumers for furniture and for toys and other articles intended for the use of children are not expected to increase as the result of compliance with the regulation.

(ii) *Utility.* The Commission finds that for water-based or latex paints and coatings subject to this rule, reducing the amount of allowable lead to 0.06 percent will not have adverse effects on their utility. For certain solvent-thinned coatings, however, lead driers will have to be replaced by non-lead driers such as zirconium to comply with the 0.06 percent level (Driers are not used in latex paints). An impact on the paint industry may result because current non-lead driers may not dry satisfactorily in low temperatures or high humidity conditions, and so the painting industry in some areas at certain times of the year may suffer a reduction of effective painting time.

(iii) *Availability.* Substitutes at comparable prices are available for paints and for products banned by this rule. The Commission believes that the reduction of lead to a level of 0.06 percent will not affect the availability of water-based or latex paints. Sales of such coatings currently exceed sales of solvent-based coatings, and because of the drying problem mentioned above, the trend toward increased use of water-based paints may be accelerated somewhat by the effects of the ban.

(d) *Alternatives.* (1) The Commission has considered other means of achieving the objective of this rule, but has found none that would cause less disruption or dislocation of manufacturing and other commercial practices, consistent with public health and safety.

(2) The Commission estimates that this ban may, because of testing costs and the necessity for improved housekeeping practices in the manufacture of paint and similar surface-coating materials to prevent lead contamination, have some relatively minor adverse effect on individual firms within some markets.

(3) The Commission, however, finds that competition will not be adversely affected by this rule. Although costs of reformulation and testing may be relatively higher for small manufacturers than large manufacturers, these costs are not so onerous as to lead to greater concentration in the industry. The period of time before the effective date is sufficient to minimize problems of compliance with the rule.

(4) The reduction of the permissible level of lead in paint will affect paint manufacturers, raw materials suppliers, professional and non-professional painters, and manufacturers of furniture and children's articles. For those producers of paint which are already subject to the regulations under the Federal Hazardous Substances Act (FHSA), the impact of this CPSA ban will involve only a change to non-lead driers since lead pigments are precluded from practical use under the 0.5 percent lead restriction now in effect under the FHSA (16 CFR 1500,17 (a)(6)). The manufacturers of some painted furniture who were not affected by the 0.5 percent limit under the FHSA may now be, if they use lead pigments or driers. Producers of children's articles who were subject to the 0.5 percent FSHA limit will have to ensure that the paint they use conforms to the 0.06 percent level.

(e) *Conclusion.* The Commission finds that this rule, including its effective date, is reasonably necessary to eliminate or reduce the unreasonable risk of lead poisoning of young children that is associated with the banned products which are described in § 1303.4 and that promulgation of the rule is in the public interest.

Effective date: February 28, 1978.

(Secs. 8, 9, 86 Stat. 1215–1217, as amended 90 Stat. 506; 15 U.S.C. 2057, 2058.)

Dated: August 26, 1977.

RICHARD E. RAPPS,
Secretary, Consumer Product Safety Commission.

[FR Doc.77-25472 Filed 8-31-77;8:45 am]

SUBCHAPTER C—FEDERAL HAZARDOUS SUBSTANCES ACT REGULATIONS

PART 1500—HAZARDOUS SUBSTANCES AND ARTICLES, ADMINISTRATION AND ENFORCEMENT REGULATIONS

Certain Lead-Containing Paint; Toys and Other Articles Bearing Such Paint Intended for Use by Children

AGENCY: Consumer Product Safety Commission.

ACTION: Final rule.

SUMMARY: The Commission issues an amendment partially revoking a regulation under the Federal Hazardous Substances Act (FHSA) declaring certain lead-containing paint, and toys or other articles intended for use by children bearing such paint, to be banned hazardous substances. The amendment provides that the FHSA regulation will not be applicable to products manufactured after February 27, 1978, but will continue to apply to products manufactured on and prior to that date. This amendment is necessary because elsewhere in this issue of the FEDERAL REGISTER the Commission issues a new regulation under the Consumer Product Safety Act for certain lead-containing paint and toys and furniture bearing such paint manufactured after February 27, 1978.

EFFECTIVE DATE: The amendment issued below is effective February 28, 1978.

FOR FURTHER INFORMATION CONTACT:

Charles M. Jacobson, Directorate for Compliance and Enforcement, Consumer Product Safety Commission, Washington, D.C. 20207, telephone 301–492–6400.

SUPPLEMENTARY INFORMATION: On August 10, 1976, by publication of a notice in the FEDERAL REGISTER (41 FR 33637), the Commission proposed a rule under section 8 of the Consumer Product Safety Act (CPSA), 15 U.S.C. 2057, declaring the following to be banned hazardous products: (1) Lead-containing paint and similar surface-coating materials containing more than a safe level of lead, (2) toys and other articles intended for use by children bearing lead-containing paint or other similar surface-coating materials containing more than a safe level of lead, and (3) articles of furniture bearing lead-containing paint or other similar surface-coating materials containing more than a safe level of lead. At the same time the Commission proposed to revoke the existing regulation (16 CFR 1500.17(a)(6)) under the Federal Hazardous Substances Act (FHSA), 15 U.S.C. 1261–1274, relating to lead-containing paint and toys and other articles intended for use by children, bearing such paint, when the final CPSA banning regulation is issued.

The determination of a safe level of lead in paint was made by the Commission in accordance with a separate proceeding under the Lead-Based Paint Poisoning Prevention Act (LBPPPA) (42 U.S.C. 4801 et. seq.), as amended (Pub. L 94–317). In the FEDERAL REGISTER of February 16, 1977 (42 FR 9404), the Commission announced its decision that available scientific information is insufficient to establish that a level of lead in paint above 0.06 percent but not over 0.5 percent is safe. A final CPSA rule incorporating this determination and implementing the proposed ban appears elsewhere in this part of the FEDERAL REGISTER (see FR Doc. 77–25472, supra).

The Commission is amending 16 CFR 1500.17(a)(6), which was issued under the FHSA, to prevent an unnecessary

UMI
V 42 170 SEP 1 77 UMI

duplication of regulations now that final CPSA lead-in-paint rules are being issued at 16 CFR Part 1303. The Commission has decided not to revoke 16 CFR 1500.17(a)(6) entirely as proposed, so that products manufactured before the effective date of the CPSA ban will still be subject to a lead limit. Currently, 16 CFR 1500.17(a)(6) declares as banned hazardous substances any paint or other similar surface-coating material that contains lead compounds in which the lead content (calculated as lead metal) is in excess of 0.5 percent of the total weight of the contained solids or dried paint film. Section 1500.17(a)(6) also declares as banned hazardous substances any toy or other article intended for use by children that bears such paint or coating material.

Section 1500.17(a)(6) also contains certain provisions (subdivisions (i)(A) and (ii)(A)) that were stayed as a result of objections filed pursuant to section 701(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 371(e)). The stayed provisions would have lowered the 0.5 percent permitted level of lead to 0.06 percent. Thus, only the 0.5 percent level prescribed by § 1500.17(a)(6) is in effect. (See FEDERAL REGISTER documents of August 10, 1972 (37 FR 16078), December 27, 1973 (38 FR 35302), and December 9, 1974 (39 FR 42902).)

The CPSA banning regulation appearing elsewhere in this part of the FEDERAL REGISTER (see FR Doc. 77-25472) includes the exemption for artists' paint presently contained in § 1500.17(a)(6). The CPSA regulation also disposes of all outstanding exemption proposals and petitions to amend § 1500.17(a)(6).

The Commission points out that the sole purpose of this amendment is to prevent an unnecessary duplication of regulations. Therefore, the amendment to partially revoke 16 CFR 1500.17(a)(6) is conditional upon Part 1303 continuing in full force and effect. If, at any time, any requirement of Part 1303 relating to products within the scope of 16 CFR 1500.17(a)(6) is stayed, revoked, or set aside by judicial or other action, the amendment partially revoking 16 CFR 1500.17(a)(6) is withdrawn, and a FEDERAL REGISTER notice will be issued reinstating the appropriate portions of 16 CFR 1500.17(a)(6).

AMENDMENT

Accordingly, pursuant to provisions of the Federal Hazardous Substances Act (sec. 2(f)(1)(A), (q), 74 Stat. 372, 374, as amended by 80 Stat. 1304–1305; (15 U.S.C. 1261 (f)(1)(A), (q)) and the Federal Food, Drug and Cosmetic Act (section 701 (e), (f), (g), 52 Stat. 1055, 1056, as amended 70 Stat. 919, 72 Stat. 948; (21 U.S.C. 371 (e)(f)(g))) and under authority vested in the Commission by the Consumer Product Safety Act (sec. 30(a), 86 Stat. 1231; 15 U.S.C. 2079(a)), the Commission amends 16 CFR Part 1500.17(a)(6) by adding a new subparagraph (iii) as follows:

§ 1500.17 Banned hazardous substances.

(a) * * *

(6) * * *

(iii) Since the Commission has issued comprehensive regulations for lead-containing paint and certain consumer products bearing such paint at the 0.06 percent level under the Consumer Product Safety Act (see 16 CFR Part 1303), subparagraphs (i) and (ii) of section 1500.17(a)(6) are revoked as to the subject products manufactured after February 27, 1978.

This revocation is conditional upon Part 1303 continuing in full force and effect.

(Secs. 2 (f)(1)(A), (q), 74 Stat. 372, 374, as amended 80 Stat. 1304–1305 (15 U.S.C. 1261 (f)(1)(A), (q)); secs. 701 (e), (f), (g), 52 Stat. 1055, 1056, as amended 70 Stat. 919, 72 Stat. 948 (21 U.S.C. 371 (e), (f), (g)); sec. 30(a), 86 Stat. 1231 (15 U.S.C. 2079(a)).)

Effective date: The amendment is effective February 28, 1978.

Dated: August 26, 1977.

RICHARD E. RAPPS,
Secretary, Consumer Product Safety Commission.

[Docket No. 17154; Notice No. 77-20]

OPERATIONS REVIEW PROGRAM NOTICE NO. 6

General Operating and Flight Rules and Related Airworthiness Standards

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rule making.

SUMMARY: This notice describes the FAA's disposition of certain proposals discussed at the Operations Review Conference. After consideration of these proposals, the FAA has determined that certain amendments to the rules applicable to aircraft, airmen and special issues are needed to expand, clarify or simplify these rules and to provide a level of safety commensurate with the development and expansion of the aviation system. Certain other proposals were withdrawn by their proponents. Other proposals are being removed from further consideration after review by the FAA. The proposals, withdrawals and removals are contained in this notice.

DATES: Comments must be received on or before December 1, 1977.

ADDRESSES: Send comments on the proposals in duplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC-24), Docket No. 17154, 800 Independence Avenue SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT:

Donald A. Schroeder, Safety Regulations Division, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591; telephone: 202-755-8715.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Comments relating to the environmental, energy, or economic impact that might result from adoption of the proposals contained in this notice are invited. Communications should identify the regulatory docket or notice number and be submitted in duplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attention: Rules Docket, AGC-24, 800 Independence Avenue SW., Washington, D.C. 20591. All communications received on or before December 1, 1977 will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

For convenience, each proposal in this notice is numbered separately. The FAA requests that interested persons, when submitting comments, refer to proposals by these numbers and by the sections to which they relate.

Availability of This Notice

Any person may obtain a copy of this notice of proposed rule making (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue SW., Washington, D.C. 20591, or by calling 202-426-8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

Background

The aviation industry in the United States and abroad has grown substantially during the last ten years. Paralleling its rapid growth and numerous technological advances are significant changes in the operating environment in which airmen, air agencies and aircraft operators function.

To enable the FAA to become even more responsive to the needs of the general public and the aviation community in fulfilling the Agency's aviation safety responsibilities, the FAA issued Notice No. 75-9 (40 FR 8585; February 28, 1975) inviting all interested persons to submit proposals for consideration during the Operations Review Program.

In response to that invitation, the FAA received more than 5,000 individual comments contained in 123 submissions. Based on these comments and on the Compilation of Proposals, the FAA prepared a number of working documents for the Operations Review Conference held in Arlington, Va., on December 1-5, 1975. The FAA distributed those documents to each person who participated in the Operations Review Program and to all other interested persons who requested them.

The Operations Review Conference was attended by more than 600 persons. Various committees discussed all the scheduled agenda items during the conference. Summaries were given by the FAA Committee Chairmen at the close of discussions on each agenda item. Persons present were given the opportunity to correct those oral summaries. Those summaries were edited and combined with an attendee list for the conference and with transcripts of certain plenary session speeches and were distributed to all attendees and to all persons requesting them in accordance with a Notice of Availability (Notice No. 75-9A; 41 FR 9413; March 4, 1976).

The Proposals

This notice deals with selected proposals concerning Part 91 contained in the following Operations Review Committee Workbooks:

Committee No.:	Title
1	Aircraft Equipment and Requirements.
2	Aircraft Maintenance.
3	Aircraft Operating Rules.
4	Airmen Certification.
10	Special Issues.

A number of the proposals contained in both the Compilation and the working documents are not included in this notice. The proposals listed in Appendices I and II fall into two categories as follows: Appendix I—Proposals withdrawn; Appendix II—Proposals removed from further consideration.

Drafting Information

The principal authors of this document are J. T. Morse and T. G. Walenta, Flight Standards Service, and R. B. Elwell, Office of the Chief Counsel.

The Proposed Amendments

Accordingly, the Federal Aviation Administration proposes to amend Parts 23, 25, 27, 29, and 91 of the Federal Aviation Regulations (14 CFR Parts 23, 25, 27, 29, and 91) as follows:

PART 23—AIRWORTHINESS STANDARDS; NORMAL, UTILITY, AND ACROBATIC CATEGORY AIRPLANES

6-1. By amending § 23.1413 by adding a new paragraph (c) to read as follows:

§ 23.1413 Safety belts and harnesses.

• • • • • •

(c) Each safety belt must be equipped with a metal-to-metal buckle or latching device.

Explanation. Aircraft safety belts of the metal-to-fabric type use serrated cams that tighten against the webbing material of the safety belt and are usually actuated by a throwover type buckle. Usage has shown that the cam's action will wear and deteriorate the webbing material causing a loss of friction which allows the webbing to slip under the cam. As a result, the belt fails to lock effectively. These proposals provide for a metal-to-metal buckle or latching device which are designed to prevent this.

Ref. Proposal No. 205; §§ 23.1413, 25.-1413, 27.1413, 29.1413, and 91.33(b)(12); Committee 1; Agenda Item B-1.

PART 25—AIRWORTHINESS STANDARDS; TRANSPORT CATEGORY AIRPLANES

6-2. By amending § 25.1413 by adding a new paragraph (d) to read as follows:

§ 25.1413 Safety belts.

• • • • • •

(d) Each safety belt must be equipped with a metal-to-metal buckle or latching device.

Explanation. See explanation for Item 6-1.

Ref. Proposal No. 205; §§ 23.1413, 25.-1413, 27.1413, 29.1413, and 91.33(b)(12); Committee 1; Agenda Item B-1.

PART 27—AIRWORTHINESS STANDARDS; NORMAL CATEGORY ROTORCRAFT

6-3. By amending § 27.1413 by adding a new pargraph (c) to read as follows:

§ 27.1413 Safety belts.

• • • • • •

(c) Each safety belt must be equipped with a metal-to-metal buckle or latching device.

Explanation. See explanation for Item 6-1.

Ref. Proposal No. 205; §§ 23.1413, 25.-1413, 27.1413, 29.1413, and 91.33(b)(12); Committee 1; Agenda Item B-1.

PART 29—AIRWORTHINESS STANDARDS; TRANSPORT CATEGORY ROTORCRAFT

6-4. By amending § 29.1413 by designating the current provision as paragraph (a) and by adding a new paragraph (b) to read as follows:

§ 29.1413 Safety belts: passenger warning device.

• • • • • •

(b) Each safety belt must be equipped with a metal-to-metal buckle or latching device.

Explanation. See explanation for Item 6-1.

Ref. Proposal No. 205; §§ 23.1413, 25.-1413, 27.1413, 29.1413, and 91.33(b)(12); Committee 1; Agenda Item B-1.

PART 91—GENERAL OPERATING AND FLIGHT RULES

6-5. By amending § 91.4 by revising the heading, by designating the current provision as paragraph (b), and by adding a new paragraph (a) to read as follows:

§ 91.4 Aircraft operator responsibility.

(a) No person may release an aircraft under their control to another person for the purpose of flight unless that person first determines who intends to serve as pilot in command and determines that the pilot in command has current certificates and ratings for the flight operation intended.

(b) • • •

Explanation. Current § 91.4 uses the word "operate" with respect to aircraft, however, the word is used only in reference to a pilot in command of aircraft requiring more than one required pilot. There is no general requirement for the person who releases an aircraft to another for flight to first determine who intends to serve as pilot in command and to then determine that the pilot in command has current certificates and ratings as provided in the regulations. Section 91.4(a) is proposed to expressly require this.

Ref. Proposal No. 164; § 91.4; Committee 4; Agenda Item C.

6-6. By amending § 91.14 by amending the heading, by redesignating paragraphs (a)(1) and (a)(2) as paragraphs (a)(2) and (a)(3) respectively, and by adding a new paragraph (a)(1) to read as follows:

§ 91.14 Use of safety belts.

(a) Unless otherwise authorized by the Administrator—

(1) No pilot may take off a U.S. registered civil aircraft (except a free balloon that incorporates a basket or gondola and an airship) unless the pilot in command of that aircraft ensures that each person on board is briefed on how to fasten and unfasten his safety belt.

• • • • • •

Explanation. A recent survivable accident involving an aircraft that caught fire after impact resulted in a casualty because a passenger, attempting to rescue a disabled passenger, was unable to release the safety belt. To prepare passengers to cope with such emergencies, they should be briefed before takeoff on how to fasten and unfasten safety belts. Since current § 91.14 does not require that briefing, this proposal would add a new § 91.14(a)(1) to require it. Additionally, the heading is changed to reflect the expanded applicability of the rule.

Ref. Proposal No. 173; § 91.14; Committee 3; Agenda Item A.

6-7. By amending § 91.21 (a) and (b)(3) to read as follows:

§ 91.21 Flight instruction; simulated instrument flight and certain flight and certain flight tests.

(a) No person may operate a civil aircraft (except a manned free balloon) that is being used for flight instruction unless that aircraft has fully functioning dual controls. However, instrument flight instruction may be given in a single-engine airplane equipped with a single, functioning, throwover control wheel, in place of fixed, dual controls of the elevator and ailerons, when:

(1) The instructor has determined that the flight can be conducted safely; and

(2) The person manipulating the controls has at least a private pilot certificate with appropriate category and class ratings.

(b) • • •

(3) Except in the case of lighter-than-air aircraft, that aircraft is equipped with fully functioning dual controls. However, simulated instrument flight may be conducted in a single-engine airplane, equipped with a single, functioning, throwover control wheel, in place of fixed, dual controls of the elevator and ailerons, when—

(i) The safety pilot has determined that the flight can be conducted safely; and

(ii) The person manipulating the control has at least a private pilot certificate with appropriate category and class ratings.

• • • • • •

Explanation. Current § 91.21 prohibits a person from operating a civil aircraft for flight instruction unless that aircraft has fully functioning dual controls. The FAA has issued twelve exemptions since June 1962, which allowed the Aircraft Owner's and Pilots Association (AOPA) and the AOPA Air Safety Foundation to conduct simulated instrument instruction at flight training clinics using single-engine airplanes equipped with a single, functioning throwover control wheel in place of the fixed dual controls of the elevator and ailerons. This proposal would allow the use of a single-engine airplane equipped with a single, functioning, throwover control wheel for instrument flight instruction and simulated instrument flight. The instrument flight instructor or safety pilot, as appropriate, must first determine that the flight can be conducted safely and that the pilot manipulating the controls has at least a private pilot certificate with appropriate category and class ratings.

Ref. Proposal No. 183; § 91.21 (a) and (b)(3); Committee 3; Agenda Item A.

6-8. By adding a new § 91.22 to read as follows:

§ 91.22 Fuel requirements for flight under VFR.

(a) No person may begin a flight in an airplane under VFR unless (considering wind and forecast weather conditions) there is enough fuel to fly to the first point of intended landing and, assuming normal cruising fuel consumption—

(1) During the day, to fly after that for at least 30 minutes; or

(2) At night, to fly after that for at least 45 minutes.

(b) No person may begin a flight in a rotorcraft under VFR unless (considering wind and forecast weather conditions) there is enough fuel to fly to the first point of intended landing and, assuming normal cruising fuel consumption, to fly after that for at least 20 minutes.

Explanation. This proposal moves the 30 minute VFR day fuel reserve, now required in § 91.207 (which provides for large and turbine powered multiengine airplanes) to a new § 91.22 so that this requirement will apply to all airplanes. Additionally, fuel requirements are added for night VFR flight and rotorcraft operations. Although the proposal recommended that at least a one hour fuel reserve be required for night VFR beyond the first point of intended landing, the FAA has determined that a 45 minute reserve is sufficient.

Over the past five years, approximately 140 fuel exhaustion accidents have occurred in the United States. Most of these accidents involved VFR flight under Part 91, many occurred at night and many involved rotorcraft. This proposal should help to prevent similar occurrences and enhance aviation safety. Section 91.207 would be deleted (see Item 7-19).

Ref. Proposal No. 185; § 91.22; Committee No. 3; Agenda Item 1.

6-9. By revising § 91.23 to read as follows:

§ 91.23 Fuel requirements for flight in IFR conditions.

(a) Except as provided in paragraph (b) of this section, no person may operate a civil aircraft in IFR conditions

UMI
V 42 170
SEP 1 77
UMI

unless it carries enough fuel (considering weather reports and forecasts, and weather conditions) to—

(1) Complete the flight to the first airport of intended landing;

(2) Fly from that airport to the alternate airport; and

(3) Fly after that for 45 minutes at normal cruising speed.

(b) Paragraph (a)(2) of this section does not apply if—

(1) Part 97 of this subchapter prescribes a standard instrument approach procedure for the first airport of intended landing; and

(2) For at least one hour before and one hour after the estimated time of arrival at the airport, the weather reports or forecasts or any combination of them, indicate—

(i) The ceiling will be at least 1500 feet above the lowest circling MDA; or if circling is not authorized for the airport, a ceiling of at least 1500 feet above the lowest published instrument approach minimum or 2000 feet above the airport elevation, whichever is higher; and

(ii) Visibility will be at least three miles, or two miles more than the lowest applicable visibility minimums, whichever is greater, or the instrument approach procedure to be used at the first airport of intended landing.

Explanation. Current § 91.23, in part, bases the determination of whether an alternate airport is required on an altitude above the published minimum obstruction clearance altitude (MOCA), minimum en route IFR altitude (MEA), or the altitude prescribed for the initial approach segment of the instrument approach procedure of the airport of first intended landing. Flight planning would be simpler if a ceiling forecast is used which provides that for at least one hour before and one hour after the estimated time of arrival at the airport, the weather reports or forecasts or any combination of them indicate that the ceiling will be at least 1500 feet above the lowest circling minimum descent altitude (MDA), or, if circling is not authorized for the airport, a ceiling of at least 1500 feet above the lowest published instrument approach minimum, or 2000 feet above the airport elevation, whichever is higher. This proposal incorporates these provisions.

Additionally, the improved performance and reliability of modern aircraft makes it unnecessary to base the need for an alternate airport upon weather forecasts covering the period two hours before and two hours after the estimated time of arrival at the first airport of intended landing. This proposal reduces the time to one hour before and one hour after, respectively.

Current § 91.23 bases the designation of an alternate airport solely on forecast weather. This proposal would allow the use of weather reports, forecasts, or a combination of them. This should provide more planning flexibility in making decisions as to the need for an alternate airport.

The visibility requirements in this proposal have been changed to the lowest applicable visibility minimums instead of the lowest authorized landing minimum visibility. The term "applicable" means that visibility minimums are limited by the navigational equipment in the aircraft to be used.

Ref. Proposal No. 186; § 91.23; Committee No. 3; Agenda Item I.

6–10. By revising § 91.25 (a)(2) and (d) to read as follows:

§ 91.25 VOR equipment check for IFR operations.

(a) • • •

(2) Has been operationally checked within the preceding ten hours of flight time and was found to be within the limits of the permissible indicated bearing error set forth in paragraph (b) or (c) of this section.

• • • • • •

(d) Each person making the VOR operational check as specified in paragraph (b) or (c) of this section shall enter the date, place, bearing error, aircraft tachometer time, or, in its absence, the aircraft time to date, and his signature in the aircraft log or other record. In addition, if a test signal radiated by the repair station, as specified in paragraph (b)(1) of this section, is used, an entry must be made in the aircraft log or other record by the repair station certificate holder or his representative certifying to the bearing transmitted by the repair station for the check and the date of transmission.

Explanation. This proposal deletes the ten-day VOR operational check requirement in current § 91.25(a)(2). Since changes in the receiving characteristics of VOR equipment are likely to be related more to flight time than calendar time, the ten-day requirement is not necessary. Also, the improved reliability of VOR equipment supports this change in test requirements.

Current § 91.25(d) does not require the recording of the aircraft time on the VOR operational check entry in the aircraft log or other record. Thus, it may be difficult to determine if the VOR operational check had been conducted within the past ten hours of flight time. This proposal makes it easier for a person making a VOR operational check to determine the time since the last check by requiring a recording of aircraft time in the log or other record. There is no useful purpose for retaining a permanent record of these checks and the word "permanent" would be deleted.

Ref. Proposal Nos. 191, 194 and 195; § 91.25(d); Committee 2; Agenda Item K.

6–11. By amending § 91.29 by adding a new paragraph (c) to read as follows:

§ 91.29 Civil aircraft airworthiness.

• • • • • •

(c) The pilot in command of a civil aircraft shall ensure that mechanical discrepancy noted during flight is entered in the aircraft log and maintenance record of the aircraft upon completion of the next landing following the the detection of the discrepancy.

Explanation. The recording of mechanical discrepancies noted during flight should help to ensure that these irregularities will be brought to the attention of the next operator of the aircraft, thus enhancing safety.

Ref. Proposal No. 304; § 91.29; Committee 2; Agenda Item P.

6–12. By revising § 91.33(b)(12) to read as follows:

§ 91.33 Powered civil aircraft with standard category U.S. airworthiness certificates; instrument and equipment requirements.

• • • • • •

(b) • • •

(12) Except as to airships, an approved safety belt for each occupant who has reached his second birthday. After (two years after the effective date of the amendment based on this notice), each safety belt must be equipped with an approved metal-to-metal buckle or latching device. The rated strength of each safety belt shall not be less than that corresponding with the ultimate load factors specified in the current applicable aircraft airworthiness requirements considering the dimensional characteristics of the safety belt installation for the specific seat or berth arrangement. The webbing of each safety belt shall be replaced as required by the Administrator.

Explanation. See explanation for Item 6–1.

Ref. Proposal No. 205; §§ 23.1413, 24.143, 27.1413, 29.1413, and 91.33(b)(12).

§ 91.36 [Amended]

6–13. By inserting the words "for altitudes ranging from sea level to the maximum operating altitude of the aircraft" immediately before the period at the end of § 91.36(b).

Explanation. Data correspondence accuracy for a given installation needs to be accurate for the operating conditions actually encountered. There is no practical need for accuracy above the maximum operating altitude of the aircraft. The proposal, therefore, states the requirement that the equipment need only be tested and calibrated to transmit altitude data for altitudes ranging from sea level to the maximum operating altitude of the aircraft.

Ref. Proposal No. 215; § 91.36(b); Committee 1; Agenda Item B–1.

§ 91.45 [Amended]

6–14. By changing the semicolon to a period and adding the sentence, "Takeoffs with full controllability from wet runways may be approved for a specific model aircraft without a showing of actual operating takeoff techniques if justified on the basis of relevant engineering data" immediately after § 91.45(a)(3)(ii).

• • • • • •

Explanation. Current § 91.45(a)(3)(ii) requires an actual demonstrated takeoff on a wet runway with one engine inoperative for the specific model aircraft to be approved for ferry flight and allows no latitude for approval based solely on engineering findings. This proposal would allow approval after review of relevant engineering data. There would be no change in the existing level of safety since a wet runway test would still be required if engineering findings are not conclusive.

Ref. Proposal No. 224; § 91.45(a)(3)(ii); Committee 3; Agenda Item 3.

6–15. By revising § 91.54(a)(2) to read as follows:

§ 91.54 Truth in leasing clause requirement in leases and conditional sales contracts.

(a) • • •

(2) The name and address (printed or typed) and the signature of the person responsible for operational control of the aircraft under the lease or contract of conditional sale, and certification by that person that he understands his responsibilities for compliance with applicable Federal Aviation Regulations.

• • • • • •

Explanation. This proposal provides for more positive identification by requiring a printed or typed name and address. In many contracts, the signature of the responsible individual is not legible and the address is absent. This information would assist the FAA in monitoring large aircraft lease operations.

Ref. Proposal No. 230; § 91.54; Committee 10; Agenda Item E.

6–16. By amending § 91.83(b) to read as follows:

§ 91.83 Flight plan; information required.

• • • • • •

(b) *Exceptions to applicability of paragraph (a)(9) of this section.* Paragraph (a)(9) of this section does not apply if Part 97 of this subchapter prescribes a standard instrument approach procedure for the first airport of intended landing and, for at least one hour before and one hour after the estimated time of arrival, the weather reports or forecasts or any combination of them, indicate—

(1) The ceiling will be at least 1,500 feet above the lowest circling MDA; or if circling is not authorized for the airport, a ceiling of at least 1,500 feet above the lowest published instrument approach minimum or 2,000 feet above the airport elevation, whichever is higher; and

(2) Visibility will be at least three miles, or two miles more than the lowest applicable visibility minimum, whichever is greater, for the instrument approach procedure to be used at the first airport of intended landing.

Explanation. This change is necessary for consistency with § 91.23. See explanation for Item 7–10.

Ref. Proposal No. 248; § 91.83; Committee 3; Agenda Item I.

§ 91.193 [Amended]

6–17. Section 91.193 is amended by deleting the words "more than six but" in paragraph (c)(3).

Explanation. Present § 91.193(c)(3) requires that one hand fire extinguisher must be conveniently located in the passenger compartment of each airplane accommodating more than six but less than 31 passengers. In consideration of passenger safety, the FAA believes that one hand fire extinguisher should be readily available in the passenger compartment of each airplane accommodating less than 31 passengers.

Ref. Proposal No. 321; § 91.193(c)(3); Committee No. 10; Agenda Item G.

§ 91.201 [Amended]

6–18. Section 91.201 is amended by inserting the words "or sideways" between the words "forward" and "under" in paragraph (b).

Explanation. A number of passenger seats have been installed which have sufficient space between the inboard leg and the aisle to allow an item of baggage to be stowed under the seat and have no restraint sideways. The proposed amendment would allow the stowage of carry-on baggage under passenger's seats only if it would not slide forward or sideways. The current rule prohibits only the forward slide of baggage. The additional restraint should prevent under seat baggage from sliding into the aisle and would further enhance passenger safety.

Ref. Proposal No. 324; § 91.201(b); Committee 10; Agenda Item G.

§ 91.207 [Amended]

6–19. By deleting § 91.207.

Explanation. See explanation for Item 6–8.

Ref. Proposal No. 185A; § 91.207; Committee No. 3; Agenda Item I.

6–20. By amending § 91.213(c) to read as follows:

§ 91.213 Second in command requirements.

• • • • • •

(c) No person may designate a pilot to serve as second in command nor may any pilot serve as second in command of an airplane required under this section to have two pilots, unless that pilot meets the qualifications for second in command prescribed in § 61.55 of this chapter.

Section 91.213(a) specifies that, except as provided in § 91.213(c), no person may operate a large airplane without a pilot designated as second in command. Section 91.213(c) limits the requirement for a second in command (in a large aircraft) to airplanes "requiring two pilots under the type certification requirement." The qualification requirements for second in command contained in § 61.55 applies to all large airplanes regardless of the number of pilots required for type certification. To make it clear that all large aircraft require a second in command, § 91.213 proposes to amend current paragraph (c) to delete ". . . requiring two pilots under the type certification requirements . . .," thus correcting the current inconsistency.

Ref. Proposal No. 330; § 91.213(c); Committee 4; Agenda Item D.

APPENDIX I.—Proposals Withdrawn By Proponent

[The proposals listed below were withdrawn by their proponents after the publication of the committee workbooks. The proponents or other interested persons may submit similar proposals in the future. The withdrawal of FAA proposals does not commit the FAA to any future course of action.]

APPENDIX II.— Proposals Removed From Consideration From The Operations Review Program

[Based on the FAA's review of the discussion at the Operations Review Conference and of the information submitted by interested persons, the following proposals considered at the Operations Review Conference are removed from consideration for the reasons listed.]

14 CFR (FAR section)	Proposal No.	Committee No.	Agenda item	Proponent
Pt. 91	148	10	A	Pacific Southwest Airlines.
Pt. 91 or 121	156	10	A	Association of Flight Attendants.
Pt. 91	158	1	B-1	C. Hewitt.
Pt. 91D	159	1	B-1	National Transportation Safety Board.
Pt. 91D	160	1	B-1	Do.
91.1	161	3	A	Secretariat General a L'Aviation Civile.
91.3(b)	163	3	A	Air Taxi and Commercial Pilots Association.
91.3(c)	166	3	A	Pacific Southwest Airlines.
91.3(c)	166A	3	A	Do.
91.9	168	3	A	Air Transport Association of America.
91.30	169	3	A	S. Lyon.
91.11(a)(1)	171	10	B	Air Transport Association of America.
91.11	172	10	B	Do.
91.19	180	3	A	Do.
91.21	184	3	A	Air Line Pilots Association.
91.25	190	3	K	Air Transport Association of America.
91.29	192	3	K	Aircraft Owners and Pilots Association.
91.25(b)(1)	193	3	K	Do.
91.29	199	3	N	Aircraft Owners and Pilots Association.
91.33(b)	209	1	B-1	National Air Transport Association.
91.33(e)	210	1	B-1	Sun Chemical Corp.
91.33	211	1	B-1	Do.
91.33(e)	212	1	B-1	General Motors Corp.
91.33(e)	213	1	B-1	Do.
91.33	214	1	B-1	General Aviation Manufacturers Association.
91.33	216	1	B-1	Sun Chemical Corp.
91.40	220	3	A	Aircraft Owners and Pilots Association.
91.41(h)	221	3	N	S. Corso.
91.57	223	1	B-2	Air Line Pilots Association.
91.53	229	1	B-2	Do.
91.58	230	10	A	Aircraft Owners and Pilots Association.
91.55	233	3	B	Air Transport Association of America.
91.33 (b), (e)	244	5	D	R. Taylor.
91.33 (b), (e)	245	6	D	Aircraft Owners and Pilots Association.
91.170	305	3	F	Sun Chemical Corp.
91 subpt. D	310	3	A	D. K. Hillery.
91.209 and 91.209	325	10	G	Do.
91. app. A	336	1	B-2	Sun Chemical Corp.
91. app. A-4	337	3	N	S. Corso.

Proposal 148 This proposal would have amended Part 91 Subpart A to impose cross wind landing restrictions other than those listed in the Airplane Flight Manual. The FAA believes that the current regulations are adequate and the proposal is unnecessary.

Proposal 158 This proposal would have amended §§ 91.33 and 91.52 to allow small aircraft to operate below 3,000 feet with no radio, emergency locator transmitter, or anti-collision lights. The FAA believes that these amendments are not appropriate since the current regulations provide a level of safety which should not be reduced.

Proposal 159 This proposal would have amended Part 91 to require shoulder harnesses to be installed and used in all small airplanes. Part 23 has been amended to require, in newly manufactured aircraft, the installation of a safety belt and shoulder harness for each front seat and a safety belt or safety belt and shoulder harness for other seats. Part 91 has been amended to require, after July 18, 1978, the use of a shoulder harness at crew stations (if the harness is installed). Small aircraft manufactured after July 18, 1979 shall have an approved shoulder harness for each front seat. Hence, the FAA believes that there is not sufficient justification for a requirement to retrofit all small aircraft at this time.

Proposal 160 This proposal would have amended Part 91 to require the use of a white flashing strobe light of high intensity, when required by the aircraft's airworthiness certificate, in place of incandescent lights. The FAA believes that the regulations should specify performance standards and not a particular type of light.

Proposal 161 This proposal would have amended § 91.1 to allow, within the United States, the use of operational rules of other countries as well as the use of rules contained in Annex 6 of the Convention on International Civil Aviation. The FAA believes that the current regulations are adequate and to change them, as proposed, could lead to confusion and adversely affect safety.

Proposal 163 This proposal would have extended the authority of the pilot in command to deviate from any rule to the extent necessary to meet the emergency. Section 91.3 provides for deviation from Subparts A & B when in-flight emergencies require immediate action by the pilot. Deviation authority from all FARs would not enhance safety. Insufficient justification was presented for broadening the emergency authority provisions.

Proposal 166 This proposal would have added a new § 91.5(c) to require additional preflight actions concerning information on landing field conditions. The FAA believes that current data available to the pilot provides an acceptable level of safety.

Proposal 166A This proposal would have amended the preflight actions of the pilot as required by § 91.5 to insure that each pilot has the latest available information concerning obstructions that might exist on the planned route of travel. The FAA believes the proposal is unworkable since much of the information proposed as needed is not available.

Proposal 168 This proposal would have revised § 91.9 to include a stipulation that "No person may intentionally operate an aircraft in a careless or reckless manner • • •" Since proof of intent is extremely difficult, the proposed amendment would make § 91.9 nearly unenforcable. Hence, the FAA disagrees with this proposal.

Proposal 169 This proposal would have eliminated § 91.10 on the basis it is superfluous in view of § 91.9. The FAA does not agree since persons operating aircraft in a careless or reckless manner on the ground are provided for in § 91.10.

Proposal 171 This proposal would have amended § 91.11 by increasing, beyond the current eight hour limitation, the period of time which crewmembers of a civil aircraft must abstain from the consumption of alcoholic beverages. The FAA considers the eight hour restriction valid in the absence of sufficient data presented to support a change.

Proposal 180 This proposal would have amended § 91.19 to exempt handheld electronic calculators from the current usage limitations in that section. Since the evidence presented is inconclusive as to whether such calculators could cause electronic interference, the FAA believes that the current restrictions are necessary.

Proposal 184 This proposal would have revised § 91.21 to prohibit instrument training devices that cover any portion of the windshield; limiting all airborne simulated instrument conditions to the use of a hood worn by the pilot. The FAA agrees with the need for adequate vision during training situations; however, certain tested devices satisfactorily fulfill the safety requirements of § 91.21(b). A ban on all methods of simulation, except for the hood, could discourage future development of training devices.

Proposal 190 This proposal would have changed requirements affecting the tolerances and time limitations allowed for the VOR check. The FAA has determined that insufficient justification was presented to assure the same level of safety.

Proposal 192 This proposal would have revised § 91.25 to differentiate between aircraft flown for hire and others in the requirements for the VOR equipment check for IFR operations. The FAA

believes the IFR environment is a common system; therefore, the same standards should apply for all operations. Secondly, the proposal would have extended the required operational check for VOR equipment to 90 days. As indicated in the explanation for the proposed amendment to § 91.25, (Items 7–10), the FAA believes that changes in the receiving characteristics of VOR equipment are likely to be related more to flight time than calendar time. Hence, the FAA does not support the proposed extension of the required operational check to 90 days.

Proposal 193 This proposal would have amended certain paragraphs of § 91.25 by imposing more stringent standards of accuracy tests for VOR equipment. The FAA believes there was insufficient statistical data presented to support a change, nor any indication that the change would contribute to flight safety.

Proposal 199 This proposal would have amended § 91.29 to require the owner or operator of a civil aircraft to provide the pilot with an aircraft that has been maintained and inspected as required by the applicable rules of Subpart C of Part 91 and in accordance with the provisions of other applicable parts. The FAA believes that there is no need for additional rulemaking since current rules require the owner/operator to inspect and maintain his aircraft.

Proposal 209 This proposal would have deleted § 91.33(b)(11). The FAA believes this would not be in the interest of safety since this section is designed as a minimum requirement to protect passengers carried for hire over water and beyond power-off gliding distance from shore.

Proposal 210 This proposal would have amended § 91.33 by adding additional requirements for instrument lighting during night VFR conditions. The FAA has determined that insufficient justification was presented for a rule change.

Proposal 211 This proposal would have amended § 91.33 to require altimeter tests in accordance with Part 43, Appendix F for all IFR flight, and added a requirement for a vertical speed indicator. The FAA has determined that insufficient justification was presented for a rule change.

Proposal 212 This proposal would have allowed a flight to enter an altitude above 24,000 feet with an inoperative DME. The FAA believes that flight above 24,000 feet without a DME should apply only to emergency conditions when the DME fails in flight while above 24,000 feet.

Proposal 213 This proposal would have deleted § 91.33(e) requiring DME for flight above 24,000 feet MSL. The FAA has determined that insufficient justification was presented for a rule change.

Proposal 214 This proposal would have deleted § 91.35(b) requiring an accuracy test of automatic pressure altitude reporting equipment. The FAA believes this operational requirement is necessary to ensure proper calibration of equipment required under § 91.24 and such a deletion could adversely affect safety.

Proposal 216 This proposal would have added a new paragraph to Part 43 requiring an entry in the aircraft records of work performed. The FAA believes the intent of the proposal is adequately covered by current § 43.9.

Proposal 220 This proposal would have amended § 91.40 to allow limited category aircraft to carry cargo for hire. The FAA believes public safety would be adversely affected by allowing the proposed operations.

Proposal 221 This proposal would have amended § 91.41(h) to change the maintenance inspection concept for provisionally certificated aircraft. The FAA believes the inspections required by the current regulations provide the required level of safety.

Proposals 226 and 228 These proposals would have deleted portions of § 91.52(b) and § 91.52(f) concerning emergency locator transmitters. The FAA has determined that insufficient justification was presented for a rule change.

Proposal 229 This proposal would have eliminated § 91.53, which requires the reporting of certain aircraft information. The FAA is of the opinion that the report is necessary to insure an efficient and safe air traffic system that responds to the needs of the public.

Proposal 233 This proposal would have amended § 91.55 and Appendix B of Part 91 to allow aircraft operations in excess of Mach 1, subject to the current conditions prescribed in Section 2(b) of Appendix B of Part 91, without the operator first obtaining an authorization based on a showing that conditions and limitations can be met. The issue of sonic boom and protection of public health and welfare should be treated separately under the procedures specified in Section 611 of the Federal Aviation Act of 1958, as amended by the Noise Control Act of 1972.

Proposal 244 and 245 These proposals would have changed § 91.83(b) which specifies alternate airport weather minimums. Concern was expressed with interpretation, clarity, and applicability of the present requirements. The FAA believes the changes to § 91.23 (Proposal Nos. 186 and 187) will incorporate the major recommendations and should satisfactorily relieve these problems, increase the effectiveness of the regulations, and promote a higher level of safety.

Proposal 303 This proposal would have added a "mechanical reliability report" under § 91.179. The FAA believes the present voluntary reporting system to be desirable and that such a requirement would be burdensome to the general aviation industry.

Proposal 316 This proposal would have added a new § 91.184 to impose flight and duty time limitations on flight crewmembers in certain Part 91 operations. The FAA has determined that insufficient justification was presented for a rule change.

Proposal 325 This proposal would have amended the regulations to provide for stowage of carry-on baggage on airplanes having a seating capacity of more than four passengers. Present rules prohibit the stowage of carry-on baggage aboard an airplane having a seating capacity of more than 19 passengers, unless stowage is conducted in accordance with paragraph (a) and (b) of § 91.201. Since airplanes with a seating capacity of more than four passengers do not normally have room available in the cabin to stow baggage and cargo, except in the approved cargo bin and baggage racks, the proposed rule change is not feasible.

Proposal 336 This proposal would have amended Part 91, Appendix A2(b)(3) by requiring the externally vented static pressure system to be appropriately heated or have equivalent means of preventing malfunctioning due to ice on the static source. The FAA believes this requirement to be adequately covered by § 23.1325 and § 25.1325 of the Federal Aviation Regulations.

Proposal 337 This proposal would have amended Part 91, Appendix A4 by deleting all details of Category II maintenance schedules requiring the publication of these rules in an advisory circular form. The FAA believes these practices should be retained in a regulatory form and a relaxation of these rules would derogate safety in Category II operations.

(Secs. 313, 314, and 601 through 610 of the Federal Aviation Act of 1958 (49 U.S.C. 1354, 1355, and 1421 through 1430) and section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A–107.

Issued in Washington, D.C. on August 24, 1977.

	HEW/FDA			HEW/FDA
	HEW/HRA			HEW/HRA
	HEW/HSA			HEW/HSA
	HEW/NIH			HEW/NIH
	HEW/PHS			HEW/PHS

Documents normally scheduled on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

HIGHLIGHTS—Continued

NEW ANIMAL DRUGS
HEW/FDA provides for safe and effective use of a phenylbutazone tablet used to treat certain inflammatory conditions in dogs; effective 9–2–77 ... 44226
HEW/FDA establishes that drugs containing chloroform are "new animal drugs" and must be subject of an approved new animal drug application for marketing; effective 10–3–77 ... 44225

NEW DRUGS
HEW/FDA rescinds proposal to withdraw approval of tranylcypromine sulfate tablets; effective 9–2–77 ... 44288
HEW/FDA adds tranylcypromine sulfate to list of drugs which may remain on market pending completion of additional studies ... 44286
HEW/FDA offers opportunity for hearing on less-than-effective indications for certain antilipemic drugs; hearing requests due 10–3–77 ... 44278
HEW/FDA proposes to withdraw approval of new drug application for combination drug containing syrosingopine and hydrochlorothiazide; hearing requests due 10–3–77 ... 44279

HEALTH MANPOWER
HEW/HRA publishes annual update of low-income levels which determine eligibility for repayment of loans for health professions ... 44289

ANTIBIOTIC DRUGS
HEW/FDA clarifies packaging requirements for drugs intended for parenteral use; effective 10–3–77 ... 44225
HEW/FDA approves certification of vidarabine monohydrate ophthalmic ointment; effective 9–2–77 ... 44223

SACCHARIN
HEW/FDA extends comment period on proposed restricted use; comments by 10–3–77 ... 44247

ADULT EDUCATION PROGRAMS
HEW/OE proposal prescribing new maintenance of effort requirements and provisions for waivers; comments by 10–17–77 (Part VI of this issue) ... 44405

MINIMUM WAGES
Labor/ESA publishes general wage determination decisions for Federal and federally assisted construction projects, and index as of 8–5–77 (2 documents) (Part VII of this issue) ... 44410, 44486

CHARACTER SETS FOR OPTICAL RECOGNITION
Commerce/NBS solicits comments by 12–1–77 on proposed revision of Federal information processing standard ... 44259

TELEVISION RECEIVERS FROM JAPAN
ITC publishes notice of termination of preliminary investigation ... 44323

MEDICARE
HEW/HCFA announces economic index for 6–77 thru 6–78; effective 7–1–77 ... 44291

HEALTH PLANNING
HEW/HRA publishes notice of determination of population of health service areas ... 44288

OIL IMPORTS
FEA proposes to amend Guideline for granting exception relief for persons importing residual fuel oil into District I; comments by 9–22–77 ... 44244

TARIFFS OF COMMON CARRIERS OF PROPERTY
ICC revises regulations governing the construction, filing, and posting of tariffs by motor common property carriers and certain water carriers; effective 10–5–77 ... 44236

Title 3—The President

PROCLAMATION 4518

National Lupus Week, 1977

By the President of the United States of America

A Proclamation

The medical challenge which the disease lupus erythematosus presents is the subject of many research projects in hospitals and medical centers throughout the United States. The disease most often strikes during its victims' most active and productive years, and can affect many organs of the body with inflammation and changes in structure and function.

The cause of lupus still eludes investigators, but promising leads into its relationship to the immune system, as well as to other factors, may yield new understanding of the origin of this chronic inflammatory disease. which afflicts an estimated fifty thousand new victims annually.

The Federal Government is supporting an aggressive program of research into the cause and treatment of lupus, which, it is hoped, will ultimately lead to its prevention or control. Genetic studies suggesting the role of heredity in the occurrence of lupus have begun to provide important information. The study of immunity, the body's ability to resist disease, is now pointing the way to an understanding of the relationship to lupus of abnormal immune reactions of the body. Although a cure must await further knowledge of the basic cause, presently available forms of treatment can frequently delay the often grave consequences of the disease.

In recognition of the seriousness of lupus and America's commitment to its control, the Congress, by joint resolution approved July 25, 1977, has requested the President to issue a proclamation designating the week of September 18 through 24, 1977, as National Lupus Week and calling for its appropriate observance.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, do hereby designate the week of September 18 through 24, 1977, as National Lupus Week. I invite the Governors of the several States and the Commonwealth of Puerto Rico, the Mayor of the District of Columbia, the chief officials of local governments, the medical profession, and the people of the United States to observe that week with appropriate ceremonies and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this thirty-first day of August, in the year of our Lord nineteen hundred seventy-seven, and of the Independence of the United States of America the two hundred and second.

Jimmy Carter

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 7—Agriculture

CHAPTER VII—AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE (AGRICULTURAL ADJUSTMENT), DEPARTMENT OF AGRICULTURE

PART 701—NATIONAL RURAL ENVIRONMENTAL PROGRAMS FOR 1975 AND SUBSEQUENT YEARS

Forestry Incentives Program

AGENCY: Agricultural Stabilization and Conservation Service, Department of Agriculture.

ACTION: Final rule.

SUMMARY: The purpose of this rule is to revise the regulations concerning cost-sharing with the same landowner more than once on the same acreage. Previous rules allowed cost-sharing only once except where plantations were heavily overtopped by hardwood sprouts. This rule would allow repetitive timber stand improvement measures on the same acreage where recommended by the service forester as sound silvicultural practice.

EFFECTIVE DATE: September 2, 1977.

FOR FURTHER INFORMATION CONTACT:

Robert J. Mondloch, (ASCS) (202–447–6221).

SUPPLEMENTARY INFORMATION: The Forestry Incentives Program provides cost-sharing for landowners to reforest or improve existing stands of forest trees. Previous rules allowed cost-sharing only once on the same acreage with the same landowner, except where plantations needed release from hardwood sprouts. This rule has been found to be too restrictive and silviculturally unsound. Direct seeding is an economical way of reforestation yet frequently requires thinning within 3 years. Successive thinnings in a dense stand may be the only feasible way of treatment. Thinning followed by a later pruning is a common and sound practice. The winter planting season is rapidly approaching. Accordingly, it is hereby found and determined that compliance with notice, public procedure, and 30-day effective date provisions of 5 U.S.C. 553 is impracticable and contrary to the public interest.

Accordingly, 7 CFR § 701.41 is amended to read as follows:

§ 701.41 Restoration of practices.

(a) Cost-sharing may be authorized under the program only for the establishment or installation of the practices contained in this part. Cost-sharing may not be authorized for repeating any of the practices in this part with the same owner on the same acreage, except as provided in paragraph (b) or (c) of this section.

(b) Cost-sharing may be authorized for the replacement, enlargement, or restoration of practices for which cost-sharing has been allowed under the program only if all of the following conditions exist:

(1) Replacement or restoration of the practice is needed to solve the problem;

(2) The failure of the original practice was not due to the lack of proper maintenance by the current operator; and

(3) The county committee believes that the replacement or restoration of the practice merits consideration under the program to an equal extent with other practices.

(c) Cost-sharing may be authorized for timber stand improvement measures carried out in repetitive steps where, in the judgement of the forester, the stand treatment warrants such silvicultural practice.

(Sec. 4, 49 Stat. 164, Secs. 7–15, 16(a), 16(f), 16A, 17, 49 Stat. 1148, as amended, 71 Stat. 176, 71 Stat. 426, 72 Stat. 864, 75 Stat. 233, 86 Stat. 676; (16 U.S.C. 590g-590o, 590p(a), 590pA, 590q); Secs. 1001–1009, 87 Stat. 241 (16 U.S.C. 1501–1510).)

Signed at Washington, D.C., on August 23, 1977.

RAY FITZGERALD,
Administrator, Agricultural Stabilization and Conservation Service.

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Lemon Reg. 108]

PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of California-Arizona lemons that may be shipped to fresh market during the weekly regulation period September 4–10, 1977. This regulation is needed to provide for orderly marketing of fresh lemons for the regulation period because of the production and marketing situation confronting the lemon industry.

EFFECTIVE DATE: September 4, 1977.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250. (202–447–3545).

SUPPLEMENTARY INFORMATION: *Findings.* (1) Pursuant to the amended marketing agreement and Order No. 910, as amended (7 CFR Part 910), regulating the handling of lemons grown in California and Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of the recommendations and information submitted by the Lemon Administrative Committee established under the amended marketing agreement and order, and upon other available information, it is found that the limitation of handling of such lemons, as provided in this regulation will tend to effectuate the declared policy of the act.

(2) The need for this regulation to limit the quantity of lemons that may be marketed during the specified week stems from the production and marketing situation confronting the lemon industry.

(i) The committee has submitted its recommendation for the quantity of lemons it consider advisable to be handled during the specified week. The recommendation resulted from consideration of the factors covered in the order. The committee further reports the demand for lemons is very similar to last week, good on size 140's and smaller, but poorer on larger sizes. Average f.o.b. price was $6.73 per carton the week ended August 27, 1977, compared to $6.65 per carton the previous week. Track and rolling supplies at 165 cars were up 15 cars from last week.

UMI
V 42 171
SEP 2 77
UMI

(ii) Having considered the recommendation and information submitted by the committee, and other available information, the Secretary finds that the quantity of lemons which may be handled should be established as provided in this regulation.

(3) It is further found that it is impracticable and is contrary to the public interest to give preliminary notice, engage in public rulemaking procedure, and postpone the effective date until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553), because the time intervening between the date when information upon which this regulation is based became available and the time when it must become effective to effectuate the declared policy of the act is insufficient. A reasonable time is permitted, for preparation for the effective time; and good cause exists for making the regulation effective as specified. The committee held an open meeting during the current week, after giving due notice, to consider supply and market conditions for lemons and the need for regulation. Interested persons were afforded an opportunity to submit information and views at this meeting. The recommendation and supporting information for regulation during the period specified were promptly submitted to the Secretary after the meeting was held, and information concerning the provisions and effective time had been provided to handlers of lemons. It is necessary, to effectuate the declared policy of the act, to make this regulation effective as specified. The committee meeting was held on August 30, 1977.

§ 910.408 Lemon Regulation 108.

(a) • • •

(b) *Order.* (1) The quantity of lemons grown in California and Arizona which may be handled during the period September 4, 1977, through September 10, 1977, is established at 200,000 cartons.

(2) As used in this section, "handled" and "carton(s)" have the same meaning as when used in the amended marketing agreement and order.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.)

Dated: August 31, 1977.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.77–25913 Filed 9–1–77;12:04 pm]

[Pear Reg. 7, Amdt. 1]

PART 917—FRESH PEARS, PLUMS, AND PEACHES GROWN IN CALIFORNIA

Grade, Size, and Container

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This amendment increases the percentage of size 165 fresh Bartlett and Max-Red (Max-Red and Red Bartlett) varieties of pears grown in California which may be shipped, effective August 29, 1977. The amendment takes into consideration the marketing situation facing the California pear industry, and is consistent with the size composition of the estimated crop.

EFFECTIVE DATE: August 29, 1977.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, (202–447–3545).

SUPPLEMENTARY INFORMATION: *Findings.* Pursuant to the marketing agreement, as amended, and Order No. 917, as amended (7 CFR Part 917), regulating the handling of fresh pears, plums, and peaches grown in California, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of recommendations and information submitted by the Pear Commodity Committee, established under the marketing agreement and order, and other available information, it is found that the regulation of handling of pears, as provided in this amendment will tend to effectuate the declared policy of the act.

Amendment of the regulation is necessary to permit pear handlers to ship a larger percentage of 165 size pears, because of the large amount of small sized pears, particularly in the Lake District, and as estimates of total fresh shipments are reduced. The committee now estimates total 1977 season fresh Bartlett pear shipments at 3,400 carlots, compared with 4,210 estimated earlier. The amendment should result in increased shipments because it would increase the amount of size 165 pears permitted to be shipped to 17.647 percent, from the current 5.263 percent.

It is further found that it is impracticable and is contrary to the public interest to give preliminary notice, engage in public rulemaking procedure, and postpone the effective date of this amendment until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553), because the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient, and this amendment relieves restrictions on the handling of pears.

The provisions in paragraph (a)(2) of § 917.445 Pear Regulation 7 (42 FR 35937) are hereby amended to read as follows:

§ 917.445 Pear Regulation.

• • • • • •

(a) • • •

(2) Any box or container of Bartlett or Max-Red (Max-Red Bartlett, Red Bartlett) varieties of pears unless such pears are of a size not smaller than the size known commercially as size 150: *Provided*, That a handler may ship, during quantity of such pears which are smaller than the size known commercially as size 150 if (i) such smaller pears are not smaller than the size known commercially any day from any shipping point, as cially as size 165, and (ii) the quantity of such smaller pears shipped from such shipping point does not, at the end of any day during the aforesaid period, exceed 17.647 percent of such handler's total shipments of such pears, shipped from the same shipping point, which are not smaller than the size known commercially as size 150;

• • • • • •

(Secs. 1–19, 48 Stat. 31, as amended, (7 U.S.C. 601–674).)

Dated: August 29, 1977, to become effective August 29, 1977.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

Title 9—Animals and Animal Products

CHAPTER I—ANIMAL AND PLANT HEALTH INSPECTION SERVICE, DEPARTMENT OF AGRICULTURE

SUBCHAPTER C—INTERSTATE TRANSPORTATION OF ANIMALS (INCLUDING POULTRY) AND ANIMAL PRODUCTS

PART 73—SCABIES IN CATTLE

Areas Quarantined

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: The purpose of these amendments is to quarantine portions of Monterey and San Benito Counties in California because of the existence of cattle scabies. Psoroptic cattle scabies was confirmed in Monterey and San Benito Counties, California, by Veterinary Services Laboratories. Therefore, in order to prevent the dissemination of cattle scabies it is necessary to quarantine the infested areas.

EFFECTIVE DATE: August 29, 1977.

FOR FURTHER INFORMATION CONTACT:

Dr. Glen O. Schubert, Chief Staff Veterinarian, Sheep, Goats, Equine and Ectoparasites Staff, USDA, APHIS, VS, Federal Building, Room 737, 6505 Belcrest Road, Hyattsville, MD 20782, (301) 436–8322.

SUPPLEMENTARY INFORMATION: These amendments quarantine portions of Monterey and San Benito Counties in California because of the existence of cattle scabies. The restrictions pertaining to the interstate movement of cattle from quarantined areas as contained in 9 CFR Part 73, as amended, will apply to the areas quarantined.

Accordingly, Part 73, Title 9, Code of Federal Regulations, as amended, restricting the interstate movement of cattle because of scabies, is hereby amended as follows:

In § 73.1a, a new paragraph (d) is added to read:

§ 73.1a Notice of quarantine.

• • • • • •

(d) Notice is hereby given that cattle in certain portions of the State of California are affected with scabies, a contagious, infectious, and communicable disease; and, therefore, the following areas in such State are hereby quarantined because of said disease:

1. That portion of Monterey County comprised of secs. 25, 26, 27, 28, 29, 32, 33, 34, 35, and 36, T. 15 S. R. 5. E.

2. That portion of Monterey County comprised of secs. 1, 2, 3, 4, 5, 6, 9, 10, 11, 12, 13, 14, 15, 16, 22, 23, 24, 25, 26, and 27, T. 16 S., R. 5 E.

3. That portion of Monterey County comprised of secs. 17, 18, 19, 20, 29, 30, 31, and 32, T. 15 S., R. 6 E.

4. That portion of Monterey County comprised of secs. 5, 7, 18, and 19, T. 16 S., R. 6 E.

5. That portion of San Benito County comprised of secs. 15, 16, 21, 22, 28, 33, and 34, T. 15 S., R. 6 E.

• • • • • •

(Secs. 4–7, 23 Stat. 32, as amended; secs. 1 and 2, 32 Stat. 791–792, as amended; secs. 1–4, 33 Stat. 1264, 1265, as amended; secs. 3 and 11, 76 Stat. 130, 132; (21 U.S.C. 111–113, 115, 117, 120, 121, 123–126, 134b, 134f); 37 FR 28464, 28477; 38 FR 19141)

The amendments impose certain further restrictions necessary to prevent the interstate spread of cattle scabies and must be made effective immediately to accomplish their purpose in the public interest. It does not appear that public participation in this rulemaking proceeding would make additional relevant information available to the Department.

Accordingly, under the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to the amendments are impracticable and contrary to the public interest, and good cause is found for making the amendments effective less than 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 29th day of August 1977.

NOTE.—The Animal and Plant Health Inspection Service has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A–107.

PIERRE A. CHALOUX,
Deputy Administrator, Veterinary Services.

[FR Doc.77–25692 Filed 9–1–77;8:45 am]

PART 78—BRUCELLOSIS

Subpart D—Designation of Brucellosis Areas, Specifically Approved Stockyards, and Slaughtering Establishments

BRUCELLOSIS AREAS

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: The Animal and Plant Health Inspection Service is amending its Brucellosis Regulations. These amendments update the Brucellosis regulations by providing the current status of various counties and States which have been designated Certified Brucellosis-Free Areas, Modified Certified Brucellosis Areas, or Noncertified Areas for purposes of interstate movement of cattle and bison from such areas. This action is required because of the change in the Brucellosis status of the areas affected.

EFFECTIVE DATE: September 2, 1977.

FOR FURTHER INFORMATION CONTACT:

Dr. A. D. Robb, U.S. Department of Agriculture, Animal and Plant Health Inspection Service, Veterinary Services, Hyattsville, Maryland, Room 805, (301–436–8713).

(b) *Specific Counties Within States.*

SUPPLEMENTARY INFORMATION: The amendments delete the following areas from the list of Modified Certified Brucellosis Areas in § 78.21 and add such areas to the list designated as Certified Brucellosis-Free Areas in § 78.20 because it has been determined that they now come within the definition of a Certified Brucellosis-Free Area in § 78.1(1): Butte and Clark Counties in Idaho; Decatur, Monroe, and Sioux Counties in Iowa; and Barber, Brown, Chase, Clark, Ellsworth, Gray, Hamilton, Kearny, Kiowa, Meade, Ness, Pottawatomie, Pratt, Rawlins, Republic, Rooks, Rush, Saline, Shawnee, Stanton, and Wichita Counties in Kansas.

Accordingly, §§ 78.20, 78.21, and 78.22 of Part 78, Title 9, Code of Federal Regulations, designating Certified Brucellosis-Free Areas, Modified Certified Brucellosis Areas, and Noncertified Areas, respectively, are amended to read as follows:

§ 78.20 Certified Brucellosis-Free Areas.

The following States, or specified portions thereof, are hereby designated as Certified Brucellosis-Free Areas:

(a) *Entire States.*

Arizona, California, Connecticut, Delaware, Hawaii, Indiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Montana, Nevada, New Hampshire, New Jersey, New York, North Carolina, North Dakota, Ohio, Oregon, Pennsylvania, Rhode Island, South Carolina, Vermont, Virginia, Washington, West Virginia, Wisconsin, Virgin Islands.

Alabama. Dale, Geneva.

Arkansas. Baxter, Benton, Boone, Bradley, Calhoun, Carroll, Clay, Cleveland, Columbia, Dallas, Drew, Fulton, Garland, Grant, Greene, Johnson, Madison, Marion, Monroe, Montgomery, Newton, Ouachita, Pike, Searcy, Sharp, Stone, Union, Woodruff.

Colorado. Adams, Alamosa, Arapahoe, Archuleta, Baca, Bent, Boulder, Chaffee, Cheyenne, Clear Creek, Conejos, Costilla, Crowley, Custer, Delta, Denver, Dolores, Douglas, Eagle, Elbert, El Paso, Fremont, Garfield, Gilpin, Grand, Gunnison, Hinsdale, Huerfano, Jackson, Jefferson, Kiowa, Kit Carson, Lake, La Plata, Larimer, Las Animas, Lincoln, Logan, Mineral, Moffat, Montezuma, Montrose, Morgan, Otero, Ouray, Park, Phillips, Pitkin, Prowers, Pueblo, Rio Blanco, Rio Grande, Routt, Saguache, San Juan, San Miguel, Sedgwick, Summit, Teller, Washington, Weld.

Florida. Baker, Bay, Brevard, Calhoun, Citrus, Dixie, Escambia, Franklin, Gadsden, Gulf, Hamilton, Holmes, Jackson, Leon, Liberty, Monroe, Okaloosa, Orange, Santa Rosa, Seminole, Taylor, Wakulla, Walton, Washington.

Georgia. § 78.22 Noncertified Areas.

The following States, or specified portions thereof, are hereby designated as Noncertified Brucellosis Areas:

(a) *Entire States.*

(b) *Specific Counties Within States.*

Missouri. Morgan.

(Secs. 4–7, 23 Stat. 32, as amended; secs. 1 and 2, 32 Stat. 791–792, as amended; sec. 3, 33 Stat. 1265, as amended; sec. 2, 65 Stat. 693; and secs. 3 and 11, 76 Stat. 130, 132 (21 U.S.C. 111–113, 114a–1, 115, 117, 120, 121, 125, 134b, 134f); 37 FR 28464, 28477; 38 FR 19141, 9 CFR 78.25.)

The amendments impose certain restrictions necessary to prevent the spread of brucellosis in cattle and relieve certain restrictions presently imposed. They should be made effective promptly in order to accomplish their purpose in the public interest and to be of maximum benefit to persons subject to the restrictions which are relieved. It does not appear that public participation in this rulemaking proceeding would make additional relevant information available to the Department.

Accordingly, under the administrative procedure provisions of 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to the amendments are impracticable, unnecessary, and contrary to the public interest, and good cause is found for making them effective less than 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 29th day of August 1977.

NOTE.—The Animal and Plant Health Inspection Service has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

PIERRE A. CHALOUX,
Deputy Administrator,
Veterinary Services.

CHAPTER III—FOOD SAFETY AND QUALITY SERVICE MEAT AND POULTRY INSPECTION DEPARTMENT OF AGRICULTURE

SUBCHAPTER A—MANDATORY MEAT INSPECTION

PART 318—ENTRY INTO OFFICIAL ESTABLISHMENTS; REINSPECTION AND PREPARATION OF PRODUCTS

Minimum Cooking Requirements for Cooked Beef Roast

AGENCY: Food Safety and Quality Service, USDA.

ACTION: Final rule.

SUMMARY: This rule establishes the requirement that all cooked beef roast be cooked to a minimum internal temperature of 145° F. (63° C.). There has been increasing evidence in recent months that *Salmonella* food poisoning has been caused by consumption of cooked beef roast. Heating cooked beef roast to the required temperature will destroy the *Salmonella* food poisoning organisms.

EFFECTIVE DATE: September 2, 1977.

FOR FURTHER INFORMATION CONTACT:

Dr. R. Engel, Director, Scientific Services, Meat and Poultry Inspection Program, Food Safety and Quality Service, U.S. Department of Agriculture, Washington, D.C. 20250 (202–447–2326).

SUPPLEMENTARY INFORMATION:

BACKGROUND

Recent outbreaks of human salmonellosis involving the consumption of commercially produced cooked beef roast have been carefully investigated and evaluated by the epidemiologists and laboratories of local, State, and Federal agencies. The data produced supports the following conclusions:

1. The physical nature of raw beef roasts is such that the penetration of microorganisms, including *Salmonella* into the deepest portions of the roasts may occur. Gaps in intermuscular fascia, knife cuts and deep folds are some of the physical features that contribute to such penetration. Deep inoculation of *Salmonella* bacteria and other microorganisms may also occur during boning, packing, defrosting and precook handling of the raw roasts or by the flow of natural juices during the cooking process.

2. There is presently no minimum temperature requirement for all beef roasts cooked during processing. Consequently, some cooking procedures currently in use do not assure the death of *Salmonella* bacteria in the interior of cooked beef roasts. In investigating some recent cases of human salmonellosis, Food Safety and Quality Service employees have conducted epidemiological studies and follow-up laboratory examinations of cooked beef roasts. They have discovered the same species of *Salmonella* in the interior of the roasts and in the human subjects. Results of these studies are available from Dr. R. Engel. (RA)

3. The failure of current cooking procedures for this product to kill all *Salmonella* bacteria has resulted in a significant public health hazard. In the last 24 months alone commercially produced cooked beef roast has been incriminated as the product responsible for 10 outbreaks involving a conservatively estimated 110 cases of human salmonellosis.

4. A minimum temperature of 145°F. (63° C.) in all parts of each beef roast is necessary to assure the death of all *Salmonella* bacteria that may be present. This conclusion is supported by numerous scientific papers on the time-temperature relationships required to kill *Salmonella* bacteria in foods. Some of these references are:

Angelotti et al. 1959. Time-temperature effects on salmonellae and staphylococci in foods. I. Behavior in broth cultures and refrigerated foods. Technical Report F 59–2. U.S. Dept. of Health, Ed. and Wel.; Public Health Service; Ch., O.

Baird-Parker, A.C. et al. 1970. The effect of water activity on the heat resistance of heat sensitive and heat resistant strains of salmonellae. J. App. Bact. 33, 515–522.

Moran, A.B. 1975. Report on beef cooked to temperature lower than 145° F. Parts one, two and three. USDA, APHIS, MPI. Unpublished.

Ng., H. et al. 1969. Heat resistance of *Salmonella:* the uniqueness of *Salmonella senftenberg* 775 W. App. 1. Micro. 17, No. 1 (78–82).

Bayne, H.G. et al. 1964. Heat resistance of *Salmonella typhimurium* and *Salmonella senftenberg* 775–W in chicken meat. Poultry Sci. 43:1302–1303.

Of the 10 outbreaks mentioned in paragraph 3 above, six have been discovered since the beginning of August. Of the conservatively estimated 110 cases of salmonellosis, 54 have been discovered since the first of August. Most of this great increase in the number of cases found results from intensive Federal-State investigation into the incidence of human salmonellosis following the consumption of this product.

The Administrator has now determined that an imminent health hazard exists. Therefore, under the authority contained in the Federal Meat Inspection Act (21 U.S.C. 601 et seq.), he hereby amends Part 318 of the Federal Meat Inspection Regulations (9 CFR Part 318) to add a new § 318.17 to read as follows:

§ 318.17 Cooking requirements for cooked beef roast.

Cooked beef roast shall be prepared by a cooking procedure that produces a minimum temperature of 145° F. (63° C.) in all parts of each roast.

(Section 21, 34 Stat. 1264, 21 U.S.C. 621; 42 FR 35625, 35631.)

Immediate regulation of this problem is required in order to protect the public health. Further, it does not appear that additional relevant information would be made available by public participation in rulemaking proceedings on this amendment. Accordingly, it is found upon good cause under the administrative procedure provisions of 5 U.S.C. 553, that notice and other public procedure with respect

UMI
V 42 171
SEP 2 77
UMI

to this amendment are impracticable, unnecessary, and contrary to the public interest, good cause is found for making this amendment effective less than 30 days after publication in the FEDERAL REGISTER.

NOTE.—The Food Safety and Quality Service has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

Done at Washington, D.C., on August 31, 1977.

ROBERT ANGELOTTI,
Administrator,
Food Safety and Quality Service.

Title 10—Energy

CHAPTER II—FEDERAL ENERGY ADMINISTRATION

PART 211—MANDATORY PETROLEUM ALLOCATION REGULATIONS

Amendments Clarifying Entitlements Treatment of Exchanges for the Strategic Petroleum Reserve

AGENCY: Federal Energy Administration.

ACTION: Final rule.

SUMMARY: The Federal Energy Administration (FEA) hereby adopts amendments to the domestic crude oil allocation (entitlements) program to clarify the entitlements treatment of exchanges or matching purchase and sales transactions which the Federal Government enters into in connection with the acquisition of crude oil for storage in the Strategic Petroleum Reserve (SPR). This rule provides that refiners or other firms which enter into exchanges or matching purchase and sales transactions with the Federal Government for the delivery of crude oil for storage in the SPR shall not receive entitlements for the delivery of that crude oil. In such cases, the entitlements shall be issued to the refiner or other firm from which the Federal Government purchases imported crude oil for purposes of satisfying its obligation pursuant to the exchange or matching purchase and sale transaction.

EFFECTIVE DATE: Date of issuance, as set forth below.

FOR FURTHER INFORMATION CONTACT:

Deanna Williams (FEA Reading Room), 12th and Pennsylvania Avenue NW., Room 2107, Washington, D.C. 20461 (202–566–9161).

SUPPLEMENTARY INFORMATION:

I. BACKGROUND

II. DISCUSSION OF COMMENTS

III. AMENDMENTS ADOPTED

I. BACKGROUND

On August 3, 1977, FEA issued a notice of proposed rulemaking and public hearing which proposed amendments to the domestic crude oil allocation (entitlements) program to clarify the entitlements treatment of exchanges or matching purchase and sales transactions having the same effect as exchanges which the Government enters into in connection with the acquisition of crude oil for the SPR (42 FR 39990, August 8, 1977). Under the provisions of a final rule adopted on April 25, 1977, refiners or other firms receive entitlements for sales of imported crude oil for storage in the SPR (42 FR 21761, April 29, 1977).

In its August 3 notice, FEA explained that in many instances it will be less expensive and more efficient to acquire crude oil for the SPR through exchanges or matching purchase and sales transactions than to acquire crude oil only through direct purchases. Because there has been uncertainty as to which firm would receive entitlement issuances for sales of crude oil to the SPR where such sales are in connection with an exchange or matching purchase and sale transaction, FEA issued the August 3 notice to propose a rule to clarify the entitlements treatment in such instances.

The August 3 notice of proposed rulemaking basically provided that refiners or other firms which enter into exchanges or matching purchase and sales transactions with the Federal Government for the delivery of crude oil for storage in the SPR would not earn entitlements for the delivery of that crude oil. The proposal provided that the entitlements would be earned by the refiner or other firm from which the Federal Government purchases crude oil for purposes of satisfying its obligation pursuant to the exchange or matching purchase and sale transaction.

II. DISCUSSION OF COMMENTS

FEA received five comments in response to the August 3 notice. Four of the comments supported the proposal. The fifth comment argued that the adjustment to crude oil runs to stills made by the firm selling the replacement oil to the Government should be limited to the volume of crude oil actually delivered into the SPR. For example, if firm A delivered 99,000 barrels of crude oil for storage in the SPR pursuant to an exchange agreement with the Government, and the Government purchased 100,000 barrels of crude oil from firm B for delivery to firm A, firm B would be permitted to include only 99,000 barrels in its crude oil runs to stills if this suggestion was adopted. FEA does not believe that it is equitable to treat firms selling crude oil to the Federal Government for redelivery to another firm on a basis any different than firms selling crude oil directly for storage in the SPR. Accordingly, FEA has determined not to adopt this suggestion.

III. AMENDMENTS ADOPTED

The amendments adopted today are, with one exception discussed below, as proposed in the August 3 notice of proposed rulemaking. Section 211.67(d)(6) is amended to provide that a refiner will not earn entitlements for delivery of crude oil to the Federal Government for storage in the SPR, where that delivery is part of an exchange or part of a matching purchase and sale transaction which has the same effect as such an exchange. In such cases, the entitlements shall be earned by the refiner or other firm from which the Government purchases imported crude oil for purposes of satisfying its obligation pursuant to the exchange or matching purchase and sale transaction. The entitlement issuances to such refiner or other firm shall be on the same basis as those with respect to refiners or other firms from which imported crude oil is acquired for storage in the SPR. Section 211.67(d)(7) is also amended to provide the same entitlements treatment as described above for firms other than refiners that enter into exchange agreements or matching purchase and sales transactions with the Federal Government.

An example of the application of the amendments adopted would be as follows: the Government would contract to receive 100 barrels of crude oil delivered to the SPR in the month of July from firm A, in exchange for which the Government would deliver 100 barrels of imported crude oil to firm A in September. In September, the Federal Government would purchase 10 barrels of imported crude oil from firm B to be delivered to firm A and thus fulfill the Government's obligation under the exchange agreement. Under the amendments adopted today, firm B would earn entitlements for delivering 100 barrels of imported crude oil to the Government for redelivery to firm A on the same basis as if the imported crude oil were delivered to the Federal Government for storage in the SPR. Under the reporting procedures described in the April 25 final rule, firm B's September sale to the Government would be reported in October as an adjustment to firm B's August crude oil runs to stills.

In the August 3 notice of proposed rulemaking, FEA stated that the proposed amendments would not affect the treatment of crude oil exchanges or matching purchase and sales transactions under § 211.67(g). Under § 211.67(g), no domestic crude oil is deemed transfered in an exchange or matching purchase and sale transaction in which only quality and location differentials are given effect in the calculation of the exchange ratio. The amendments adopted today will permit the Federal Government to acquire domestic crude oil for storage in the SPR, in those limited cases where that domestic crude oil is not purchased directly, but is acquired through an exchange for imported crude oil purchased by the Government. It is important to note here that the FEA is currently in the process of evaluating whether or not domestic crude oil should be purchased directly for storage in the SPR.

The amendments adopted today do not limit the Government to exchanges and matching purchase and sales transactions in which only quality and location differentials are given effect, and provide that in any case where a refiner or other firm delivers crude oil to the SPR pursuant to an exchange or matching purchase and sale transaction, no domestic crude oil shall be deemed to have been transferred. Thus, refiners and other firms who enter into exchanges or matching purchase and sales transactions with the Federal Government will be deemed to retain the domestic crude oil given up in such transactions even where such agreements reflect factors other than quality or location differentials. The provisions of § 211.67(g)(2) have been incorporated by reference, so that refiners or other firms will include the volumes of domestic crude oil given up in such transactions in their crude oil receipts at the time such volumes would be included in a firm's crude oil receipts under the provisions of § 211.67(g)(2). Section 211.67(g)(2) generally provides that the volume of domestic crude oil given up in an exchange are included in a firm's crude oil receipts at the time the crude oil acquired pursuant to the exchange would have constituted a crude oil receipt.

The FEA has determined that the August 3 notice of proposed rulemaking does not contain a major proposal requiring preparation of an Inflationary Impact Statement under Executive Order 11821 and OMB Circular A-107.

(Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended, Pub. L. 93-511, Pub. L. 94-99, Pub. L. 94-133, Pub. L. 94-163, and Pub. L. 94-385; Federal Energy Administration Act of 1974, Pub. L. 93-275, as amended, Pub. L. 94-163, as amended, Pub. L. 94-385; Energy Policy and Conservation Act, Pub. L. 94-163, as amended, Pub. L. 94-385; E.O. 11790, 39 FR 23185.)

In consideration of the foregoing, Part 211 of Chapter II, Title 10 of the Code of Federal Regulations, is amended as set forth below.

Issued in Washington, D.C., August 30, 1977.

ERIC J. FYGI,
Acting General Counsel.

Section 211.67 is amended by adding the following at the ends of the first sentences of subparagraphs (6) and (7) of paragraph (d):

§ 211.67 Allocation of domestic crude oil.

* * * * * * *

(d) *Adjustments to volume of crude oil runs to stills.*

* * * * * * *

(6) * * *; and *provided further, that,* in any case where the United States Government acquires crude oil for storage in the Strategic Petroleum Reserve pursuant to an exchange or matching purchase and sale transaction, the refiner from which that crude oil is acquired for storage in the Strategic Petroleum Reserve shall not be eligible for any entitlement issuances under this subparagraph (6), nor shall any domestic crude oil be deemed to have been transferred by that refiner in that exchange or transaction and such retained volumes of domestic crude oil shall be included in its crude oil receipts under the provisions of § 211.67(g)(2), but a refiner or firm other than a refiner from which the United States Government acquires imported crude oil for purposes of satisfying its obligation pursuant to that exchange or transaction shall be eligible for entitlement issuances on the same basis as refiners from which imported crude oil is acquired for storage in the Strategic Petroleum Reserve.

(7) * * *; and, *provided further, that,* in any case where the United States Government acquires crude oil for storage in the Strategic Petroleum Reserve pursuant to an exchange or matching purchase and sale transaction, the firm from which that crude oil is acquired for storage in the Strategic Petroleum Reserve shall not be eligible for any entitlement issuances under this subparagraph (7), nor shall any domestic crude oil be deemed to have been transferred by that firm in that exchange or transaction of such retained volumes of domestic crude oil shall be included in its crude oil receipts under the provisions of § 211.67(g)(2), but a refiner or firm other than a refiner from which the United States Government acquires imported crude oil for purposes of satisfying its obligation pursuant to that exchange or transaction shall be eligible for entitlement issuances on the same basis as refiners from which imported crude oil is acquired for storage in the Strategic Petroleum Reserve.

Title 20—Employees' Benefits

CHAPTER III—SOCIAL SECURITY ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

[Regulations No. 5, further amended]

PART 405—FEDERAL HEALTH INSURANCE FOR THE AGED AND DISABLED

Subpart P—Certification and Recertification; Requests for Payment Replacement of Lost, Stolen or Forged Medicare Checks

AGENCY: Health Care Financing Administration, HEW.

ACTION: Final rule.

SUMMARY: This rule provides procedures for the replacement of lost, stolen, or forged Medicare checks. It also provides that state law will govern reclamation proceedings to recover the amounts of checks paid to unauthorized persons. The rule is necessary because (1) the Medicare law does not include any directions as to the procedures to follow in these situations and (2) checks issued by Medicare fiscal intermediaries and carriers are not covered by Federal law and regulations governing checks issued by the Treasury of the U.S. The rule is intended to provide procedures in regulation form to reimburse beneficiaries for their Medicare checks which have been lost, stolen, or destroyed and to protect the Medicare trust funds from theft or fraud.

DATES: The amendments will be effective October 3, 1977.

FOR FURTHER INFORMATION CONTACT:

Stanley Katz, Division Director, 6401 Security Boulevard, Baltimore, Md. 21235, telephone 301–594–9319.

SUPPLEMENTARY INFORMATION: On February 20, 1976, a Notice of Proposed Rulemaking was published in the FEDERAL REGISTER (41 FR 7785). The Notice made known proposed amendments to Subpart P, Regulations No. 5 (20 CFR Part 405) regarding replacement of lost, stolen, or forged Medicare checks.

The amendments relate principally to Medicare checks drawn on commercial banks rather than the Treasury of the United States, and provide for: (1) Issuance of new checks by the Health Care Financing Administration's (HCFA's) Medicare fiscal intermediaries and carriers if the original checks have been lost, stolen, or paid to unauthorized persons; (2) reclamation proceedings to recover the proceeds of checks paid to unauthorized persons; and (3) issuance of substitute checks, if the original checks have not been negotiated, for example because they were mutilated or destroyed.

Since checks issued by Medicare fiscal intermediaries and carriers to disburse title XVIII health insurance program funds are drawn on commercial banks, rather than the Treasury of the United States, they are not subject to Federal law and regulations governing Treasury checks. These regulations, therefore, provide that the HCFA rather than the Treasury Department, will coordinate investigations to determine whether Medicare checks issued by intermediaries and carriers were paid to unauthorized persons as a result of a forged endorsement. These investigations may include analysis of all types of evidence of unauthorized negotiation in addition to that relating to the endorsement itself. The amendments also provide that appropriate State laws will be utilized in the reclamation proceedings to recover the proceeds of forged checks or checks paid

UMI
V 42 171
SEP 2 77
UMI

to unauthorized persons. The desired result of the amendments will be more prompt reimbursement to beneficiaries by the HOFA of Medicare checks which have been lost, stolen or destroyed. Under ordinary circumstances, a check may be replaced following an administrative determination that a check was lost, stolen or paid on a forged or unauthorized endorsement. The title of Subpart P of Part 405 is being revised to encompass the scope of the new amendments.

Interested persons were given 30 days from the date of publication in the FEDERAL REGISTER to submit data, views or arguments with regard to the proposed changes. Comments and suggestions received with regard to this Notice of Proposed Rule Making (NPRM), responses thereto, and changes in the proposed amendments are summarized below:

Three comments were received in response to the proposed amendments:

1. The first suggested that the requirements in the amendments for settlement of a claim prior to the recovery of the check be changed to provide that the payee must not knowingly have participated, either directly or indirectly, in the proceeds of the negotiation or payment. The amendments published under NPRM stated that the payee must not have participated either directly or indirectly in the proceeds of the negotiation or payment, and did not distinguish between "knowing" and "unknowing" participation in the proceeds. The suggested change was not adopted. Since a payee who participated in the proceeds has already benefited from the program payment, settlement in the payee's favor would permit payment in excess of the benefit amount due, rather than provide protection against the loss of the proceeds of the check.

2. The second comment requested that § 405.1696 be revised to provide that corporate trustees appointed by the various State courts to act in a representative capacity for payees be authorized to sign claims based only upon information and belief. If a payee is deceased or incompetent, the authorized representative may file a claim for replacement or reissuance of a lost, stolen, destroyed, or forged check issued on behalf of the payee based upon the representative's best information and belief. Therefore, paragraphs (b) and (c) of § 405.1696 have been amended to clarify the limited responsibility of an authorized representative in this respect.

3. The third comment suggested that consideration should be given to establishing maximum time periods for the check replacement and reclamation procedures set forth in §§ 405.1696 (a), (b), and (c) and 405.1697. It is not feasible to adopt this proposal because the length of time required to complete an investigation and the time required by the HCFA to verify forgery will vary considerably based upon the particular circumstances in each case. It is the intent of the amendments that carriers and intermediaries issue replacement checks and make settlement as soon as the safeguards against abuse in §§ 405.1696 (b) and (c) are met.

4. Some editorial changes have been made. "Health Care Financing Administration" or "HCFA" has been substituted for "Social Security Administration" or "SSA." This reflects the Reorganization Order of the Secretary of Health, Education, and Welfare (42 FR 13262) of March 9, 1977, which transferred the Bureau of Health Insurance, SSA and delegations pertaining to the Bureau from the Commissioner of SSA to the Administrator, Health Care Financing Administration. The Bureau is responsible for administering the Medicare program.

After due consideration of the comments received, the amendments are hereby adopted as revised and set forth below.

(Secs. 205(a), 1102, 1814, 1815, 1816, 1833, 1842, 1871, 1872, and 1874; 53 Stat. 1368, as amended, 49 Stat. 647, as amended, 79 Stat. 294, as amended, 79 Stat. 297, 79 Stat. 302, as amended, 79 Stat. 309, as amended, 79 Stat. 331, and 79 Stat. 332; 42 U.S.C. 405(a), 1302, 1395f, 1395g, 1395h, 1395l, 1395u, 1395hh, 1395ll, and 1395kk.)

(Catalog of Federal Domestic Assistance Programs No. 13.800, Health Insurance for the Aged—Hospital Insurance; No. 13.801, Health Insurance for the Aged—Supplementary Medical Insurance.)

NOTE.—The Health Care Financing Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 (November 27, 1974) as amended by Executive Order 11949 (December 31, 1976) and OMB Circular A-107.

Dated: July 27, 1977.

ROBERT A. DERZON,
Administrator, Health Care, Financing Administration.

Approved: August 30, 1977.

HALE CHAMPION,
Acting Secretary of Health, Education, and Welfare.

Part 405 of Chapter III of Title 20 of the Code of Federal Regulations is amended as set forth below.

1. The title of Subpart P of Part 405 which presently reads "Certification and Recertification; Requests for Payment" is revised to read as follows:

Subpart P—Certification and Recertification; Claims and Benefit Payment Requirements; Check Replacement Procedures

2. New §§ 405.1695 through 405.1697 are added to read as follows:

§ 405.1695 Replacement of U.S. Government checks that are lost, stolen, defaced, mutilated, destroyed, or paid on forged endorsements.

The Treasury Department is responsible for the investigation and settlement of claims in connection with Treasury checks issued on behalf of the Health Care Financing Administration (HCFA) when HCFA serves as fiscal intermediary (see §§ 405.651, 405.654) for direct dealing Medicare providers. The HCFA will forward reports of lost, stolen, defaced, mutilated, destroyed, or forged Treasury checks to the Treasury Department disbursing center responsible for issuance of the check. Replacement or reclamation of such Treasury checks will be undertaken in accordance with Treasury Department regulations (31 CFR Parts 235, 240 and 245).

§ 405.1696 Replacement of intermediary and carrier checks that are lost, stolen, defaced, mutilated, destroyed, or paid on forged endorsements.

(a) The Health Care Financing Administration (HCFA) is responsible for coordinating the investigation and settlement of claims in connection with intermediary and carrier checks, including the determination that a check endorsement has been forged. Those checks which are suspected of having a forged endorsement will be analyzed by the HCFA and a determination will be made concerning the authenticity of the endorsement. A payee dissatisfied with such a determination may obtain an independent administrative review upon request. HCFA will forward reports concerning lost, stolen, defaced, mutilated, destroyed, or forged carrier and intermediary checks to the issuing office of the Medicare intermediary or carrier.

(b) The carrier or intermediary will make settlement in favor of the payee prior to the recovery of the amount of the check (see § 405.1697) if the facts in the case establish:

(1) That the check is still outstanding and has not been paid; or

(2) That the check has been paid on a forged endorsement of the payee's name, and:

(i) The payee has not participated either directly or indirectly in the proceeds of such negotiation or payment, and

(ii) The payee states in writing, after examining the check or copy thereof, that the endorsement on the check is not the payee's; or the payee's authorized representative states in writing, after examining the check or copy thereof, that the endorsement on the check is not the payee's to the best of the representative's knowledge or belief.

(c) If the check has not been paid, the carrier or intermediary will enter and maintain a stop payment order against the check, and will issue another check. In those cases where the beneficiary or his authorized representative requests another check in place of a defaced, mutilated, or destroyed check, the carrier or intermediary will obtain any remains of the check available and issue a substitute check.

§ 405.1697 Reclamation proceedings in cases of forgery of intermediary and carrier checks.

Checks issued by Medicare fiscal intermediaries and carriers to disburse title XVIII health insurance program payments are drawn on commercial banks and not the Treasury of the United States; and for this reason, such checks are not subject to the Federal laws and Treasury Department regulations which govern Treasury checks. When the Health Care Financing Administration determines that a check has been paid on a forged endorsement, the intermediary or carrier will make settlement in favor of the payee pursuant to § 405.1696 (b)(2), and the Medicare intermediary or carrier will take appropriate action to recover the amount of the forged check in accordance with the applicable State law.

[Reg. No. 16]

PART 416—SUPPLEMENTAL SECURITY INCOME FOR THE AGED, BLIND, AND DISABLED

Subpart K—Income and Exclusions

Subpart L—Resources and Exclusions

EXCLUSION OF JUDGMENT PAYMENTS TO MEMBERS OF THE GRAND RIVER BAND OF OTTAWA INDIANS

AGENCY: Social Security Administration, DHEW.

ACTION: Final rules.

SUMMARY: The amendments to Regulations No. 16, Subparts K and L of Title 20 of the Code of Federal Regulations (20 CFR) concern an exclusion of per capita judgment payments made to, or held in trust for, members of the Grand River Band of Ottawa Indians from consideration as income or a resource under the Supplemental Security Income (SSI) program. The amendments are required by section 6 of Pub. L. 94-540, effective October 18, 1976, and exclude from consideration as income or a resource funds received or held in trust pursuant to a judgment in Indian Claims Commission docket numbered 40-k. The purpose of the amendments is to reflect this exclusion.

EFFECTIVE DATE: The amendments shall be effective September 2, 1977.

ADDRESSES: Although the Notice of Proposed Rule Making is being dispensed with for the reasons cited in the Supplementary Information section, consideration will be given to any data, views, or arguments pertaining thereto which are submitted in writing to the Commissioner of Social Security, Department of Health, Education, and Welfare, P.O. Box 1585, Baltimore, Md. 21203, on or before October 17, 1977.

Copies of all comments receive in response to this notice will be available for public inspection during regular business hours at the Washington Inquiries Section, Office of Information, Social Security Administration, Department of Health, Education, and Welfare, North Building, Room 4146, 330 Independence Avenue SW., Washington, D.C. 20201.

FOR FURTHER INFORMATION CONTACT:

Mr. S. J. Weissman, Legal Assistant Social Security Administration, 6401 Security Boulevard, Baltimore, Md. 21235, telephone: 301—594-7341.

SUPPLEMENTARY INFORMATION: Pub. L. 94-540 provides for the disposition of funds appropriated by the Act of October 21, 1968 (82 Stat. 1190, 1198), to pay a judgment to the Grand River Band of Ottawa Indians in Indian Claims Commission docket numbered 40-K. The judgment funds are to be distributed on a per capita basis to, or held in trust for, persons determined to be eligible by the Secretary of the Interior.

Section 6 of Pub. L. 94-540 further provides that the funds distributed per capita or held in trust shall not be considered income or resources or otherwise utilized as a basis for denying or reducing the financial assistance or other benefits to which such household or member would otherwise be entitled to under the Social Security Act or any other Federal or federally assisted program.

Thus, such payments will not be considered as income or a resource for SSI benefit purposes. The amendments, in accordance with the statutory exclusion, will prevent SSI benefit reduction for eligible Grand River Band of Ottawa Indians and allow a limited number to become eligible for SSI benefits.

These amendments to the regulations are being published in final because they are substantive rules which grant an exclusion of certain income and resources as required by section 6 of Pub. L. 94-540. Thus, the Notice of Proposed Rule Making is being dispensed with because a delay in implementing these amendments would be impracticable, unnecessary, and contrary to the public interest (5 U.S.C. 553(b)(B)).

Accordingly, 20 CFR 416.1146(b) and 416.1236(a)(2) are being revised to reflect the exclusion in Pub. L. 94-540.

(Secs. 1102, 1611, 1612, 1613, 1631, Social Security Act, 49 Stat. 647, as amended, 86 Stat. 1466, 86 Stat. 1468, 86 Stat. 1470, and 86 Stat. 1475 (42 U.S.C. 1302, 1382, 1382a, 1382b, 1383); sec. 6, Pub. L. 94-540, 90 Stat. 2504)

(Catalog of Federal Domestic Assistance Program No. 13.807, Supplemental Security Income Program.)

NOTE.—The Social Security Administration has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

Dated: July 22, 1977.

DON WORTMAN,
Acting Commissioner of Social Security.

Approved: August 27, 1977.

HALE CHAMPION,
Acting Secretary of Health, Education, and Welfare.

Part 416 of Chapter III of Title 20 of the Code of Federal Regulations is amended as set forth below:

1. Section 416.1146 is amended by revising paragraph (b) to read as follows:

§ 416.1146 Exclusions from income; provided by other statutes.

For the purpose of § 416.1145(a), payments or benefits provided under a Federal statute other than title XVI of the Social Security Act where exclusion from income is required by such statute include:

* * * * * *

(b) Judgment payments to members of the Blackfeet and Gros Ventre Tribes of Indians under the provisions of Pub. L. 92-254 (86 Stat. 65, 25 U.S.C. 1264); and judgment payments distributed to members of the Grand River Band of Ottawa Indians in Indian Claims Commission docket numbered 40-K under the provisions of Pub. L. 94-540 (90 Stat. 2503).

* * * * * *

2. Section 416.1236 is amended by revising paragraph (a)(2) to read as follows:

§ 416.1236 Exclusions from resources; provided by other statutes.

(a) For the purpose of § 416.1210(j), payments or benefits provided under a Federal statute other than title XVI of the Social Security Act where exclusion from resources is required by such statute include:

* * * * * *

(2) Judgment payments to members of the Blackfeet and Gros Ventre Tribes of Indians under the provisions of Pub. L. 92-254 (86 Stat. 65, 25 U.S.C. 1264); and judgment payments distributed to, or held in trust for, members of the Grand River Band of Ottawa Indians in Indian Claims Commission docket numbered 40-K under the provisions of Pub. L. 94-540 (90 Stat. 2503).

Title 21—Food and Drugs

CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

SUBCHAPTER A—GENERAL

PART 5—DELEGATIONS OF AUTHORITY AND ORGANIZATION

Subpart B—Redelegations of Authority from the Commissioner of Food and Drugs

ELECTRONIC PRODUCTS

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: This document amends the regulations for delegations of authority regarding exemptions from performance standards and prohibited acts for certain classes of electronic products, and in addition, amends a regulation to correct a reference to the Public Health Service

UMI
V 42 171
SEP 2 77
UMI

Act. This regulation will provide for a more timely and orderly decisionmaking process.

EFFECTIVE DATE: September 2, 1977.

FOR FURTHER INFORMATION CONTACT:

Robert L. Miller, Office of Administration (HFA-340), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857 (301-443-4976).

SUPPLEMENTARY INFORMATION: The amendment to § 5.87 gives the Deputy Director of the Bureau of Radiological Health the same authorities as those granted to the Director of the Bureau of Radiological Health concerning exemptions from performance standards for electronic products and adds a new delegation of authority to the Director and Deputy Director of the Bureau relating to exemptions from prohibited acts. Section 5.91 is being revised to correct a typographical error in the reference to the Public Health Service Act.

Further redelegation of the authority delegated is not authorized. Authority delegated to a position by title may be exercised by a person officially designated to serve in such position in an acting capacity or on a temporary basis, unless prohibited by a restriction written into the document designating him as "acting," or unless it is not legally permissible.

Therefore, under the Public Health Service Act, as amended by the Radiation Control for Health and Safety Act of 1968 (secs. 354 through 360F, 82 Stat. 1173-1186 (42 U.S.C. 263b through 263n)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1), Part 5 is amended by revising §§ 5.87 and 5.91 to read as follows:

§ 5.87 Exemption of electronic products from performance standards and prohibited acts.

The Director and Deputy Director of the Bureau of Radiological Health are authorized to exempt from performance standards any electronic product intended for use by departments or agencies of the United States under section 358(a)(5) of the Public Health Service Act, and to exempt an electronic product or class of products from all or part of the provisions of section 360B(a) of the Public Health Service Act under section 360B(b) of that act.

§ 5.91 Dealer and distributor direction to provide data to manufacturers of electronic products.

The Director and Deputy Director of the Bureau of Radiological Health and the Director of the Division of Compliance of that Bureau are authorized to direct dealers and distributors of electronic products to furnish information on first purchasers of such products to the manufacturer of the product under section 360A(f) of the Public Health Service Act.

Effective date: This regulation shall be effective September 2, 1977.

(Secs. 354 through 360F, 82 Stat. 1173-1186 (42 U.S.C. 263b through 263n).)

Dated: August 25, 1977.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Compliance.

[FR Doc.77-25675 Filed 9-1-77;8:45 am]

SUBCHAPTER B—FOOD FOR HUMAN CONSUMPTION

[Docket No. 75F-0207]

PART 175—INDIRECT FOOD ADDITIVES: ADHESIVE COATINGS AND COMPONENTS

Subpart C—Substances for Use as Components of Coatings

RESINOUS AND POLYMERIC COATINGS

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The agency is amending the food additive regulations to provide for the use of a copolymer as a modifier of resinous and polymeric coatings for food-contact articles. This order is based on a petition proposing such a regulation.

DATES: Effective September 2, 1977. Objections by October 3, 1977.

FOR FURTHER INFORMATION CONTACT:

John J. McAuliffe, Bureau of Foods (HFF-334), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, D.C. 20204 (202-472-5690).

SUPPLEMENTARY INFORMATION: Notice was given in the FEDERAL REGISTER of September 3, 1975 (40 FR 40568), that a food additive petition (FAP 5B3059) had been filed by the law firm of Keller and Heckman, 1150 17th St. NW., Washington, D.C. 20036, on behalf of Monsanto Co., proposing that § 175.300 *Resinous and polymeric coatings* (21 CFR 175.300) (formerly § 121.2514, prior to recodification published in the FEDERAL REGISTER of March 15, 1977 (42 FR 14302)), be amended in paragraph (b)(3)(xx) to provide for the safe use of a copolymer of 2-ethylhexyl acrylate and ethyl acrylate as a component of resinous and polymeric coatings for food-contact articles.

The Commissioner of Food and Drugs, having evaluated data in the petition and other relevant material, concludes that § 175.300 should be amended as set forth below.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 409(c)(1), 72 Stat. 1786 (21 U.S.C. 348(c)(1))) and under authority delegated to the Commissioner (21 CFR 5.1), Part 175 is amended in § 175.300(b)(3)(xx) by alphabetically inserting a new item in the list of substances, to read as follows:

§ 175.300 Resinous and polymeric coatings.

* * * * * * *

(b) * * *

(3) * * *

(xx) Acrylics and their copolymers as the basic polymer:

* * * * * * *

2-Ethylhexyl acrylate-ethyl acrylate copolymers prepared by copolmerization of 2-thelhexyl acrylate and ethyl acrylate in a 7/3 weight ratio and having a number average molecular weight range of 5,800 to 6,500 and a refractive index, n_D^{25} (40 percent in 2,2,4-trimethyl pentane of 1.4130-1.4190; for use as a modifier for nylon resins complying with § 177.1500 of this chapter and for phenolic and epoxy resins listed in paragraph (b)(3)(vi) and (viii) of this section, respectively, at a level not to exceed 1.5 percent of the coating.

* * * * * * *

Any person who will be adversely affected by the foregoing regulation may at any time on or before October 3, 1977, file with the Hearing Clerk, Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written objections thereto. Objections shall show wherein the person filing will be adversely affected by the regulation, specify with particularity the provisions of the regulation deemed objectionable, and state the grounds for the objections. If a hearing is requested, the objections shall state the issues for the hearing, shall be supported by grounds factually and legally sufficient to justify the relief sought, and shall include a detailed description and analysis of the factual information intended to be presented in support of the objections in the event that a hearing is held. Five copies of all documents shall be filed and should be identified with the Hearing Clerk docket number found in brackets in the heading of this regulation. Received objections may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Effective date: This regulation shall become effective September 2, 1977.

(Sec. 409(c)(1), 72 Stat. 1786 (21 U.S.C. 348(c)(1)).)

Dated: August 26, 1977.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Compliance.

[FR Doc.77-25655 Filed 9-1-77;8:45 am]

[Docket No. 77F-0064]

PART 178—INDIRECT FOOD ADDITIVES: ADJUVANTS, PRODUCTION AIDS, AND SANITIZERS

Plasticizers in Polymeric Substances

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: Based on a petition by Dow Chemical U.S.A., the agency is amending the food additive regulations to provide for safe use of polypropylene glycol as a plasticizer for polystyrene plastics intended to contact food.

DATES: Effective September 2, 1977; objections by October 3, 1977.

ADDRESS: Written objections to the Hearing Clerk (HFC-20), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT:

John J. McAuliffe, Bureau of Foods (HFF-334), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, DC 20204 (202-472-5690).

SUPPLEMENTARY INFORMATION: Notice was given in the FEDERAL REGISTER of April 19, 1977 (42 FR 20347) that a petition (FAP 6B-3233) had been filed by Dow Chemical U.S.A., Midland, MI 48640, proposing that § 178.3740 *Plasticizers in polymeric substances* (21 CFR 178.3740) be amended to provide for safe use of polypropylene glycol as a plasticizer for polystyrene plastics intended to contact food.

The Commissioner of Food and Drugs, having evaluated the data in the food additive petition and other relevant material, concludes that the regulation should be amended as set forth below.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 409(c)(1), 72 Stat. 1786 (21 U.S.C. 348(c)(1)) and under authority delegated to the Commissioner (21 CFR 5.1), Part 178 is amended in § 178.3740 by alphabetically inserting a new item in paragraph (b), to read as follows:

§ 178.3740 Plasticizers in polymeric substances.

* * * * * * *

(b) List of substances:

Substances	*Limitations*
* * *	* * *
Polypropylene glycol (CAS registry No. 25322-69-4) (minimum mean molecular weight 1,200).	For use only in polystyrene plastics, identified in sec. 177.1640(a)(1), in an amount not to exceed 6 pct by weight of the finished food-contact article.
* * *	* * *

Any person who will be adversely affected by the foregoing regulation may at any time on or before October 3, 1977 submit to the Hearing Clerk (HFC-20), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written objections thereto and may make a written request for a public hearing on the stated objections. Each objection shall be separately numbered and each numbered objection shall specify with particularity the provision of the regulation to which objection is made. Each numbered objection on which a hearing is requested shall specifically so state; failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held; failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Four copies of all documents shall be submitted and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this regulation. Received objections may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Effective date: This regulation shall become effective September 2, 1977.

(Sec. 409(c)(1), 72 Stat. 1786 (21 U.S.C. 348(c)(1)).)

Dated: August 23, 1977.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Compliance.

[FR Doc.77-25424 Filed 9-1-77;8:45 am]

SUBCHAPTER D—DRUGS FOR HUMAN USE

[Docket No. 76N-0453]

ANTIBIOTIC DRUGS

Vidarabine Monohydrate; Vidarabine Monohydrate Ophthalmic Ointment

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: This document amends the antibiotic drug regulations to provide for the certification of vidarabine monohydrate ophthalmic ointment. Pursuant to section 507 of the Federal Food, Drug, and Cosmetic Act, the manufacturer has supplied sufficient data and information to establish the safety and efficacy of vidarabine monohydrate ophthalmic ointment.

EFFECTIVE DATE: September 2, 1977.

FOR FURTHER INFORMATION CONTACT:

Joan Eckert, Bureau of Drugs (HFD-140), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857 (301-443-4290).

SUPPLEMENTARY INFORMATION: The Commissioner of Food and Drugs, having evaluated data submitted in accordance with regulations promulgated under section 507 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 357), as amended, with respect to providing for the certification of vidarabine monohydrate ophthalmic ointment, concludes that the data supplied by the manufacturer concerning the subject antibiotic drug product are adequate to establish its safety and efficacy when used as directed in the labeling and that the regulations should be amended in Parts 430, 436, and 455 (21 CFR Parts 430, 436, and 455) to provide for its certification.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 507, 59 Stat. 463, as amended (21 U.S.C. 357)) and under authority delegated to the Commissioner (21 CFR 5.1), Subchapter D of Chapter I of Title 21 of the Code of Federal Regulations is amended as follows:

PART 430—ANTIBIOTIC DRUGS: GENERAL

1. Part 430 is amended:

a. In § 430.4 by adding new paragraph (a)(44), to read as follows:

§ 430.4 Definitions of antibiotic substances.

(a) * * *

(44) *Vidarabine.* Vidarabine is a purine glycoside antibiotic substance produced by the growth of *Streptomyces antibioticus*, and each of the same substances produced by any other means is a kind of vidarabine.

b. In § 430.5 by adding new paragraphs (a)(60) and (b)(60), to read as follows:

§ 430.5 Definitions of master and working standards.

(a) * * *

(60) *Vidarabine.* The term "vidarabine master standard" means a specific lot of vidarabine that is designated by the Commissioner as the standard of comparison in determining the potency of the vidarabine working standard.

* * * * * * *

(b) * * *

(60) *Vidarabine.* The term "vidarabine working standard" means a specific lot of a homogeneous preparation of vidarabine.

* * * * * * *

c. In § 430.6 by adding new paragraph (b)(62) to read as follows:

§ 430.6 Definitions of the terms "unit" and "microgram" as applied to antibiotic substances.

* * * * * * *

(b) * * *

(62) *Vidarabine.* The term "microgram" applied to vidarabine means the vidarabine activity (potency) contained in 1.0674 micrograms of the vidarabine master standard.

* * * * * * *

PART 436—TESTS AND METHODS OF ASSAY OF ANTIBIOTIC AND ANTIBIOTIC-CONTAINING DRUGS

2. Part 436 is amended in § 436.33(b) by alphabetically inserting a new item into the table to read as follows:

§ 436.33 Safety test.

* * * * * * *

(b) * * *

UMI V 42 171 SEP 2 77 UMI

Antibiotic drug	Diluent (diluent number as listed in sec. 436.31)	Test dose: Concentration in units or milligrams of activity per milliliter	Test dose: Volume in milliliters to be administered to each mouse	Route of administration as described in para (c) of this section
Vidarabine	5	40 mg	0.5	Intraperitoneal.

PART 455—CERTAIN OTHER ANTIBIOTIC DRUGS

3. Part 455 is amended:

a. In Subpart A by adding new § 455.90a to read as follows:

§ 455.90a Sterile vidarabine monohydrate.

(a) *Requirements for certification—(1) Standards of identity, strength, quality, and purity.* Vidarabine monohydrate is the monohydrate form of 9-β-D-arabinofuranosyl-9H-purin-6-amine. It is a white to off-white powder. It is so purified and dried that:

(i) Its vidarabine content is not less than 845 micrograms and not more than 985 micrograms of vidarabine per milligram.

(ii) It is sterile.

(iii) It passes the safety test.

(iv) Its loss on drying is not less than 5 percent and not more than 7 percent.

(v) Its specific rotation in dimethylformamide at 25° C is −60.5° ± 4.5°.

(vi) It passes the identity test for vidarabine.

(2) *Labeling.* In addition to the labeling requirements prescribed by § 432.5(b) of this chapter, this drug shall be labeled "vidarabine".

(3) *Requests for certification; samples.* In addition to complying with the requirements of § 431.1 of this chapter, each such request shall contain:

(i) Results of tests and assays on the batch for vidarabine content, sterility, safety, loss on drying, specific rotation, and identity.

(ii) Samples required:

(*a*) For all tests except sterility: 10 packages, each containing approximately 500 milligrams.

(*b*) For sterility testing: 20 packages, each containing approximately 200 milligrams.

(b) *Tests and methods of assay*—(1) *Vidarabine content*—(i) *Apparatus and reagents*—(*a*) Glass chromatographic column, 1.0 centimeter internal diameter and 30 centimeters long, with a coarse fritted glass disc in the bottom and fitted with a stopcock in the stem.

(*b*) Anion exchange resin: IRA 904 (Rohm & Haas) or equivalent.

(*c*) Borate buffer, pH 10: Dissolve 12.37 grams of boric acid in 900 milliliters of distilled water. Adjust the solution to pH 10 with 5*N* sodium hydroxide and dilute to 1,000 milliliters with distilled water.

(*d*) Propylene glycol—5 percent solution: Add sufficient distilled water to 50 milliliters of propylene glycol to make a volume of 1,000 milliliters.

(*e*) Resin column: Soak 3 grams of the anion exchange resin overnight in 50 milliliters of borate buffer, pH 10. Slurry the resin in the buffer and transfer mixture into the chromatographic column. Withdraw the buffer and wash the resin with an additional 25 milliliters of borate buffer, pH 10. Wash the buffer from the resin by passing 25 milliliters of distilled water through the chromatographic column. Place a small pledget of glass wool on top of the resin.

(ii) *Preparation of vidarabine sample and working standard solutions:* Accurately weigh approximately 30 milligrams of the vidarabine sample or working standard into a 100-milliliter volumetric flask. Add approximately 80 milliliters of distilled water and heat on a steam bath for 15 minutes. Shake until the powder is dissolved. Cool to room temperature and dilute to volume with distilled water.

(iii) *Procedure.* Support the resin column in a vertical position and place a 100-milliliter volumetric flask under the tip. Transfer 4.0 milliliters of the standard solution to the resin column. Open the stopcock and allow the standard solution to enter the resin. Elute the resin column with 5 percent propylene glycol solution at a rate of approximately 1 milliliter per minute. Continue to collect the eluate until volume reaches the 10-milliliter mark of the volumetric flask. Using a suitable spectrophotometer equipped with 1.0-centimeter cells and 5 percent propylene glycol solution as the blank, determine the absorbance of the eluted working standard solution at the absorbance peak at approximately 255 nanometers. Treat each sample solution in a similar manner. Calculate the vidarabine content as follows:

$$\text{Microgram per milligram} = \frac{A_1 \times \text{weight of standard in milligrams} \times \text{potency of standard in micrograms per milligram}}{A_2 \times \text{weight of sample in milligrams}}$$

where:

A_1 = Absorbance of the eluted sample solution at 255 nm;
A_2 = Absorbance of the eluted working standard solution at 255 nm.

(2) *Sterility.* Proceed as directed in § 436.20 of this chapter, using the method described in paragraph (e) (2) of that section, except use 100 milligrams in lieu of 300 milligrams.

(3) *Safety.* Proceed as directed in § 436.33 of this chapter, except observe the mice for 14 days.

(4) *Loss on drying.* Proceed as directed in § 436.200(e) of this chapter.

(5) *Specific rotation.* Using a solution containing 10 milligrams of vidarabine per milliliter in dimethylformamide and a polarimeter tube 1.0 decimeter in length, proceed as directed in § 436.210 of this chapter, except determine the specific rotation at 365 nanometers.

(6) *Identity.* Proceed as directed in § 436.211 of this chapter, using the 0.5 percent potassium bromide disc prepared as described in paragraph (b) (1) of that section.

b. In Subpart D by adding new § 455.390 to read as follows:

§ 455.390 Vidarabine monohydrate ophthalmic ointment.

(a) *Requirements for certification—(1) Standards of identity, strength, quality, and purity.* Vidarabine monohydrate ophthalmic ointment contains in each gram vidarabine monohydrate equivalent to 28.11 milligrams of vidarabine in a suitable and harmless base. Its potency is satisfactory if it is not less than 90 percent and not more than 120 percent of the number of milligrams of vidarabine that it is represented to contain. It is sterile. It passes the test for metal particles. The vidarabine monohydrate used conforms to the standards prescribed by § 455.90a(a)(1).

(2) *Labeling.* In addition to the labeling requirements prescribed by § 432.5 of this chapter, this drug shall be labeled "vidarabine ophthalmic ointment".

(3) *Requests for certification; samples.* In addition to complying with the requirements of § 431.1 of this chapter, each such request shall contain:

(i) Results of tests and assays on:

(*a*) The vidarabine monohydrate used in making the batch for vidarabine content, sterility, safety, loss on drying, specific rotation, and identity.

(*b*) The batch for vidarabine content, sterility, and metal particles.

(ii) Samples required:

(*a*) The vidarabine monohydrate used in making the batch: 10 packages, each containing approximately 500 milligrams.

(*b*) The batch:

(*1*) For all tests except sterility: A minimum of 16 immediate containers.

(*2*) For sterility testing: 20 immediate containers, collected at regular intervals throughout each filling operation.

(b) *Tests and methods of assay*—(1) *Vidarabine content.* Proceed as directed in § 455.90a(b)(1); except, prepare the sample as follow.: Accurately weigh approximately 1 gram of the ointment into a 100-milliliter volumetric flask. Add approximately 80 milliliters of distilled water and heat on a steam bath for 15 minutes. Shake to dissolve the vidarabine. While the ointment is still liquid, add 10 milliliters of heptane. Swirl gently to dissolve the ointment. Cool to room temperature and add sufficient distilled water to raise the heptane layer into the constricted portion of the flask. Aspirate off the heptane layer and discard it. Bring the water layer to mark with distilled water. Calculate the percent vidarabine content as follows:

$$\text{Percent vidarabine} = \frac{A_1 \times \text{weight of standard in milligrams} \times \text{potency of standard in micrograms per milligram}}{A_2 \times \text{weight of ointment in milligrams} \times 10}$$

where:

A_1 = Absorbance of the eluted sample solution at 255 nm;
A_2 = Absorbance of the eluted working standard solution at 255 nm.

(2) *Sterility.* Proceed as directed in § 436.20 of this chapter, using the method described in paragraph (e) (3) of that section.

(3) *Metal particles.* Proceed as directed in § 436.206 of this chapter.

Since the conditions prerequisite to providing for certification of this drug have been complied with and as the matter is noncontroversial, the Commissioner finds for good cause that prior notice and public procedure are impracticable and unnecessary, and that the amendment may become effective upon the day of publication. Interested persons may, on or before October 3, 1977 file with the Hearing Clerk (HFC–20), Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, Md. 20857, written comments, in quadruplicate and identified with the docket number found in brackets in the heading of this document. Comments received may be seen in the office of the Hearing Clerk between the hours of 9 a.m. and 4 p.m., Monday through Friday. Any changes in this regulation justified by such comments will be the subject of a further amendment.

Effective date. This regulation shall be effective September 2, 1977.

(Sec. 507, 59 Stat. 463, as amended (21 U.S.C. 357).)

Dated: August 26, 1977.

MARY A. MCENIRY,
Assistant Director for Regulatory Affairs, Bureau of Drugs.

[FR Doc.77-25422 Filed 9-1-77;8:45 am]

[Docket No. 76N-0337]

PART 432—PACKAGING AND LABELING OF ANTIBIOTIC DRUGS

Packaging of Antibiotic Drugs for Parenteral Use

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: This rule clarifies the packaging requirements for drugs intended for parenteral use. It provides for single-dose and light-resistant containers and use of container materials other than glass, in response to the need for additional kinds of containers.

EFFECTIVE DATE: October 3, 1977.

FOR FURTHER INFORMATION CONTACT:

Joan Eckert, Bureau of Drugs (HFD–140), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857 (301–443–4292).

SUPPLEMENTARY INFORMATION: The Commissioner of Food and Drugs proposed in the the FEDERAL REGISTER of September 15, 1976 (41 FR 39328), that § 432.1 (21 CFR 432.1) be amended to clarify the packaging requirements for drugs intended for parenteral use.

The present description of containers used for antibiotic drugs intended for parenteral use provides only for containers of colorless, transparent glass with closures through which hypodermic needles may be introduced. But the need for, or desirability of, additional kinds of containers has become apparent. In fact, some parenteral antibiotic drug products have been approved for marketing in ampules, prefilled syringes, and amber-colored glass vials. The proposal provided for such single-dose and amber-colored containers and it removed the restriction that excludes container materials other than glass.

Interested persons were given 60 days to submit written comments on the proposal.

One comment came from a glass manufacturer who felt that the term "light amber color" was ambiguous and that the container should conform to the United States Pharmacopeia (U.S.P.) light transmission standards for light-resistant containers.

The Commissioner considers this comment valid, but he finds that the terminology "light-resistant as defined by the U.S.P." is more appropriate than the wording suggested in the comment. This definition in the U.S.P. takes into account the light transmission standards suggested by the respondent. The Commissioner is revising the regulations accordingly.

A second comment concerned the addition of the words "labeled quantity" to the part of the regulations that requires each container to be filled with a sufficient excess of drug. The respondent interpreted these words to mean that each vial must be labeled with the number of doses contained therein.

The intent of the proposed regulation was not to require any labeling changes. The words "labeled quantity" were added merely to provide for vials containing the antibiotic drug as a dry powder in contrast with those containing a solution. All vials must be filled with a sufficient excess of drug to enable the withdrawal of the quantity the vial is labeled to contain. The Commissioner has considered this comment and has concluded that no change in the proposed regulation is necessary.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 507, 512 (n), 59 Stat. 463 as amended, 82 Stat. 350–351 (21 U.S.C. 357, 360b(n) and under authority delegated to the Commissioner (21 CFR 5.1), Part 432 is amended in § 432.1 by revising paragraph (b) to read as follows:

§ 432.1 Packaging requirements.

* * * * *

(b) If it is intended for parenteral use and the container is glass, it shall be transparent and colorless or light-resistant as defined by the U.S.P. The containers are closed either by fusion or by application of suitable closures, in such manner as to prevent contamination or loss of content. Multiple-dose containers are closed by a substance through which a hypodermic needle may be introduced and withdrawn without removing the closure or destroying its effectiveness. Each container shall be filled with a quantity or a volume in excess of that designated, which excess shall be sufficient to permit the withdrawal and administration of the labeled quantity or volume, whether administered in single or multiple doses.

* * * * *

Effective date: This amendment shall become effective October 3, 1977.

(Secs. 507, 512(n), 59 Stat. 463 as amended, 82 Stat. 350–351 (21 U.S.C. 357, 360b(n)).)

Dated: August 26, 1977.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Compliance.

[FR Doc.77-25412 Filed 9-1-77;8:45 am]

[Docket No. 76N-0171]

PART 510—NEW ANIMAL DRUGS

Chloroform as an Ingredient of Drugs for Animal Use; Final Order Establishing New Animal Drug Status

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The document establishes that animal drugs containing chloroform as an ingredient are new animal drugs and that they must be the subject of an approved new animal drug application for marketing. This action is taken because chloroform has been determined to be a carcinogen.

EFFECTIVE DATE: October 3, 1977.

FOR FURTHER INFORMATION CONTACT:

David N. Scarr, Bureau of Veterinary Medicine (HFV–214), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857 (301–443–3183).

UMI
V 42 171
SEP 2 77
UMI

SUPPLEMENTARY INFORMATION: In the FEDERAL REGISTER of November 30, 1976 (41 FR 52482), the agency issued a proposal that all animal drugs containing chloroform as an ingredient are new animal drugs within the meaning of section 201(w) of the Federal Food, Drug, and Cosmetic Act or misbranded under section 502 of the act (21 U.S.C. 321(w), 352). Interested persons were given till December 30, 1976, to submit comments. No comments were received in response to the proposal. Therefore, the Commissioner of Food and Drugs is establishing the regulation as proposed.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 301, 501, 502, 512, 701(a), 52 Stat. 1042–1043 as amended, 1049–1050 as amended, 1055, 82 Stat. 343–351 (21 U.S.C. 331, 351, 352, 360b, 371(a)) and under authority delegated to the Commissioner (21 CFR Part 5.1), Part 510 is amended to add § 510.413 to read as follows:

§ 510.413 Chloroform used as an ingredient (active or inactive) in animal drug products.

(a) Chloroform has been used as an ingredient in animal drug products such as cough preparations, liniments, and some pastes. Although considered safe for many years, recent information has become available associating chloroform with carcinogenic effects in animals. Studies conducted by the National Cancer Institute have demonstrated that the oral administration of chloroform to mice and rats induced hepatocellular carcinomas (liver cancer) in mice and renal tumors in male rats.

(b) Any drug product intended for use in or on animals and containing chloroform as an ingredient is deemed to be either (1) a new animal drug within the meaning of section 201(w) of the act, and unsafe within the meaning of section 512 of the act and adulterated under section 501 of the act and subject to regulatory action under sections 301, 501, and 512 of the act; or (2) misbranded under section 502 of the act, and therefore subject to regulatory action under sections 301 and 502 of the act. Any animal drug product containing chloroform in residual amounts from its use as a processing solvent during manufacture of the drug product, or from the synthesis of a drug ingredient, is not, for the purpose of this regulation, considered to contain chloroform as an ingredient.

(c) Any holder of an approved new animal drug application for a drug product containing chloroform as an ingredient shall submit to the Food and Drug Administration on or before October 3, 1977, a supplemental application providing for a revised formulation removing chloroform as an ingredient.

(1) The supplemental application shall contain:

(i) A full list of articles used as components and a full statement of the composition of the drug product.

(ii) The date that the composition of the drug product will be changed.

(iii) Data showing that the change in composition does not interfere with any assay or other control procedures used in manufacturing the drug product, or that the assay and other control procedures are revised to make them adequate.

(iv) Data available to establish the stability of the revised formulation and, if the data are too limited to support a conclusion that the drug will retain its declared potency for a reasonable marketing period, a commitment from the applicant:

(*a*) To test the stability of marketed batches at reasonable intervals;

(*b*) To submit the data as they become available; and

(*c*) To recall from the market any batch found to fall outside the approved specifications for the drug.

(v) Copies of the label and all other labeling to be used for the drug product—a total of nine copies if in final printed form, three copies if in draft form.

(2) If such drug product contains more than 1 percent chloroform, the revised formulation containing no chloroform shall not be marketed before the receipt of written notice of approval of the supplemental application by the Food and Drug Administration.

(3) If such drug product now contains 1 percent or less chloroform, the revised formulation containing no chloroform may be marketed after submission of the supplemental application but prior to the receipt of written notice of its approval by the Food and Drug Administration.

(d) Any sponsor of a "Notice of Claimed Investigational Exemption for a New Animal Drug" (INAD notice) for an animal drug product containing chloroform as an ingredient shall amend the INAD notice on or before October 3, 1977, to revise the formulation removing chloroform as an ingredient.

(e) The Commissioner will initiate action to withdraw approval of a new animal drug application or terminate an INAD notice in accordance with the applicable provisions of section 512 of the act and Parts 511 and 514 of this chapter upon failure of a holder of an approved new animal drug application or sponsor of an INAD notice to comply with the provisions of paragraph (c) or (d) of this section.

(f) Any drug product intended for animal use containing chloroform as an ingredient that is introduced or delivered for introduction into interstate commerce following the effective date of this regulation will be subject to regulatory action under sections 301, 501, 502, and 512 of the act.

Effective date: October 3, 1977.

(Secs. 301, 501, 502, 512, 701(a), 52 Stat. 1042–1043 as amended, 1049–1050 as amended, 1055, 82 Stat. 343–351 (21 U.S.C. 331, 351, 352, 360b, 371(a)).)

Dated: August 25, 1977.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Compliance.

[FR Doc.77-25413 Filed 9-1-77;8:45 am]

SUBCHAPTER E—ANIMAL DRUGS, FEEDS, AND RELATED PRODUCTS

PART 520—ORAL DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

Phenylbutazone Tablets and Boluses

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The animal drug regulations are amended to reflect approval of a new animal drug application filed by Western Research Labs, Inc., providing for the use of a 100 milligram phenylbutazone tablet for the relief of inflammatory conditions associated with a musculoskeletal system of dogs. This application reflects the National Academy of Sciences/National Research Council (NAS/NRC) evaluation of the product.

EFFECTIVE DATE: September 2, 1977.

FOR FURTHER INFORMATION CONTACT:

Henry C. Hewitt, Bureau of Veterinary Medicine (HFV–112), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857 (301–443–3430).

SUPPLEMENTARY INFORMATION: In accordance with section 512(i) of the act, Part 520 of the regulations is amended to reflect approval of a new animal drug application (NADA 102–824V) filed by Western Research Labs., Inc., 301 South Cherokee St., Denver, Colo. 80223.

This application concerns a product which is similar to those evaluated by the National Academy of Sciences/National Research Council (NAS/NRC), Drug Efficacy Study Group (see the FEDERAL REGISTER of August 12, 1970 (35 FR 12790)). The NAS/NRC report reviewed certain drug products containing phenylbutazone marketed by Jensen-Salsbery laboratories, specifically:

1. Jen-Sal Butazolidin Injectable, 20 percent (200 milligrams per milliliter).
2. Jen-Sal Butazolidin Bolus (horses only), 4 grams per bolus.
3. Jen-Sal Butazolidin Tablets (horses only), 1 gram per tablet.
4. Jen-Sal Butazolidin Tablets (dogs only), 100 milligrams per tablet.

The Academy evaluated these drugs as probably effective as a nonhormonal anti-inflammatory agent for use in horses and dogs. The Academy noted that:

1. The package insert implies the drug results in permanent cures for certain conditions. The Academy felt these statements are not supported by adequate documentation.
2. The analgesic activity of the drug has not been documented. The Academy notes this effect may be the result of the drug's anti-inflammatory properties.
3. No controlled experimental studies appear to have been performed in dogs or horses.
4. The drug's use in the treatment of otitis externa in dogs is doubtful.
5. Instructions for dosage in dogs could be improved.
6. Package label for the injectable drug does not state route of administration.
7. Evidence has not been supplied indicating the boluses and tablets disintegrate in the gastrointestinal tract to produce the desired effects.

The Food and Drug Administration concurred in the Academy's evaluation and concluded that additional labeling information was required on the dosage schedule to improve clarity, such as reference to frequency of administration and maximum daily dose. It further stated that veterinary drugs of this type are prescription drugs and should bear the veterinary prescription legend. Holders of NADA's were provided 6 months to submit adequate documentation in support of the labeling used.

Jensen-Salsbery Laboratories submitted supplemental NADA's providing for safe and effective use of phenylbutazone tablets, boluses, and injections in dogs and horses. Their applications were approved by a regulation in the FEDERAL REGISTER of May 26, 1972 (37 FR 10662). These products were approved for the relief of inflammatory conditions associated with the musculoskeletal system in dogs and horses. It is administered orally to dogs at a dosage level of 20 milligrams per pound of body weight in three divided doses daily with the maximum daily dosage of 800 milligrams. It is administered orally to horses at a dosage level of 1 to 2 grams per 500 pounds of body weight daily, not to exceed 4 grams per day. Use of the drug is limited to veterinary prescription use and for nonfood animals only. It is administered intravenously at one-half the oral dosage.

The current regulation for oral use of phenylbutazone tablets and boluses in dogs and horses is editorially revised to reflect that the drug has been NAS/NRC reviewed, that the existing approvals comply with the evaluation, and that submission of similar applications reflecting the same conditions of use and dosage regimen need not include data required by § 514.111 (21 CFR 514.111), but require submission of bioequivalency and safety data.

In accordance with the freedom of information regulations and § 514.11(e)(2)(ii) of the animal drug regulation (21 CFR 514.11(e)(2)(ii)), a summary of the safety data and information submitted to support approval of this application is released publicly. The summary is available for public examination at the office of the Hearing Clerk (HFC–20), Food and Drug Administration, Department of Health, Education, and Welfare, Rm. 4–65, 5600 Fishers Lane, Rockville, Md. 20857, between 9 a.m. and 4 p.m., Monday through Friday, except on Federal holidays.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1), Part 520 is amended by revising § 520.1720a, to read as follows:

§ 520.1720a Phenylbutazone tablets and boluses

(a) *Specifications.* Each tablet contains 100, 200, or 400 milligrams, or 1 gram of phenylbutazone. Each bolus contains 2 or 4 grams of phenylbutazone.

(b) *Sponsor.* See sponsor numbers in § 510.600(c) of this chapter, as follows:

(1) No. 017220 for use of 100- or 400-milligram or 1-gram tablets, or 2- or 4-gram boluses, in dogs and horses.

(2) No. 000010 for use of 100- or 200-milligram or 1-gram tablets in dogs and horses.

(3) Nos. 000031, 000591, 000856, 000864, 011519, and 012518 for use of 100-milligram or 1-gram tablets in dogs and horses.

(4) Nos. 000832 and 011519 for use of 100-milligram tablet in dogs.

(5) No. 011398 for use of 1-gram tablets in horses.

(c) *Conditions of use.*—(1) *Dogs.*—(i) *Amount.* Twenty milligrams per pound of body weight daily.[1]

(ii) *Indications for use.* The drug is used for the relief of inflammatory conditions associated with a musculoskeletal system.[1]

(iii) *Limitations.* Administer in three divided doses daily. Do not exceed a total daily dose of 800 milligrams regardless of body weight. Administer at a relatively high dosage level for the first 48 hours and then reduce gradually to a maintenance dosage level with the lowest dosage maintained at a level capable of producing the desired clinical response. Federal law restricts this drug to use by or on the order of a licensed veterinarian.[1]

(2) *Horses.*—(i) *Amount.* One to two grams per 500 pounds of body weight daily.[1]

(ii) *Indications for use.* The drug is used for the relief of inflammatory conditions associated with the musculoskeletal system.[1]

(iii) *Limitations.* Do not exceed a daily dosage of 4 grams per day. Administer at a relatively high dosage level for the first 48 hours and then reduce gradually to a maintenance dosage level with the lowest dosage maintained at the level capable of producing the desired clinical response. Not for use in animals intended for food purposes. Federal law restricts this drug to use by or on the order of a licensed veterinarian.[1]

Effective date. September 2, 1977.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)).)

Dated: August 25, 1977.

PHILIP D. CAZIER,
Acting Director, Bureau of Veterinary Medicine.

[FR Doc.77-25423 Filed 9-1-77;8:45 am]

[1] These conditions are NAS/NRC reviewed and deemed effective Applications for these uses need not include effectiveness data as specified by § 514.111 of this chapter.

PART 546—TETRACYCLINE ANTIBIOTIC DRUGS FOR ANIMAL USE

CFR Correction

In Title 21 (Parts 500–599) of the Code of Federal Regulations, revised as of April 1, 1977, Footnote 1 in § 546.110c beginning on page 305 and cited in paragraphs (c)(5)(iii)(*a*) and (*b*) and (iv)(*a*) and (*b*) was inadvertently omitted on page 307. It reads as set forth below:

[1] These claims are NAS/NRC reviewed and are deemed effective. Applications for these uses need not include the effectiveness data specified by § 514.111 of this chapter.

[Docket No. 77N–0186]

PART 570—FOOD ADDITIVES

Irradiation and Radiation Sources; Republication

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: This document republishes the authority for irradiation in the production, processing, and handling of animal feed and pet food. This authority was inadvertently omitted in the Food and Drug Administration recodification of regulations relating to animal feed and pet food.

EFFECTIVE DATE: September 2, 1977.

FOR FURTHER INFORMATION CONTACT:

Robert S. Brigham, Bureau of Veterinary Medicine (HFV–238), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, (301–443–6243).

SUPPLEMENTARY INFORMATION: In a document published in the FEDERAL REGISTER of March 15, 1977 (42 FR 14302), FDA recodified certain regulations relating to food for human consumption. Among the regulations recodified were those which concern irradiation in the production processing, and handling of food for human consumption. The regulations were transferred from former Part 121, which related to food for human consumption as well as, in certain instances, to animal feed and pet food. In a companion document in the same issue of the FEDERAL REGISTER (42 FR 14091), the recodified regulations that also pertained to animal feed and pet food were transferred to Part 570, which pertains to animal feed and related products. However, the regulations pertaining to authority for irradiation in the production, processing, and handling of animal feed and pet food were inadvertently omitted in the companion document.

Since this document merely republishes the authority for irradiation in the production, processing, and handling of animal feed and pet food, notice and public procedure are not required.

UMI
V 42 171
SEP 2 77
UMI

FEDERAL REGISTER, VOL. 42, NO. 171—FRIDAY, SEPTEMBER 2, 1977

Therefore, Part 570 is amended by adding new § 570.12 to read as follows:

§ 570.12 Irradiation in the production, processing, and handling of animal feed and pet food.

Regulations providing for irradiation in the production, processing and handling of food in Part 179 of this chapter are incorporated in Subchapter E as applicable to use in the production, processing, and handling of animal feed and pet food.

Effective date: This amendment shall be effective September 2, 1977.

Dated: August 26, 1977.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Compliance.

[FR Doc.77-25656 Filed 9-1-77;8:45 am]

SUBCHAPTER F—BIOLOGICS

[Docket No. 77N-0047]

PART 640—ADDITIONAL STANDARDS FOR HUMAN BLOOD AND BLOOD PRODUCTS

Normal Serum Albumin (Human) and Plasma Protein Fraction (Human); Extension of Effective Date

AGENCY: Food and Drug Administration.

ACTION: Extension of effective date.

SUMMARY: This document extends the time within which manufacturers must comply with §§ 640.82(d) and 640.92(d) concerning the sodium content of Normal Serum Albumin (Human) and Plasma Protein Fraction (Human). The Commissioner has concluded that a 6-month extension of the effective date will provide sufficient time for manufacturers to comply with the regulations and relieve any undue hardships in implementing the processing changes.

DATES: Effective September 2, 1977; compliance with §§ 640.82(d) and 640.92(d) by February 28, 1978.

FOR FURTHER INFORMATION CONTACT:

Al Rothschild, Bureau of Biologics (HFB-620), Food and Drug Administration, Department of Health, Education, and Welfare, 8800 Rockville Pike, Bethesda, Md. 20014, 301-443-1920.

SUPPLEMENTARY INFORMATION: The Commissioner of Food and Drugs issued in the FEDERAL REGISTER of May 31, 1977 (42 FR 27575) additional standards for Normal Serum Albumin (Human) and Plasma Protein Fraction (Human). Under §§ 640.82(d) and 640.92(d), the Commissioner required that the sodium content of the final Normal Serum Albumin (Human) and Plasma Protein Fraction (Human) products, respectively, shall be 130 to 160 millieuivalents per liter, regardless of protein concentration. Although these sodium requirements are more stringent than those originally proposed in the FEDERAL REGISTER of February 20, 1975 (40 FR 7456), the Commissioner concluded that the more stringent requirements would significantly improve the safe use of these products. (See 42 FR 27577, paragraph 22.) It was anticipated that the prescribed range for sodium content could be implemented at the same time as the other additional standards since most products currently on the market contain at least 130 milliequivalents sodium per liter. However, the Commissioner has received requests from manufacturers to extend the effective date for compliance with §§ 640.82(d) and 640.92(d). It has been noted that the establishment of an absolute minimum of 130 milliequivalents will require changes in processing from the methods that currently result in most, but not all, products achieving this level. These processing changes will have to be tested to assure that they do not adversely affect the product as it is approved in the license application and now in use. Verification will promote a safe transition to the new method and the continued quality of the product.

Accordingly, the Commissioner is granting a 6-month extension. Changes in processing methods, and the results of verification testing, must be submitted to the Director, Bureau of Biologics, in the form of a license amendment. Manufacturers should note that the labeling requirements remain effective November 28, 1977.

Therefore, in order to provide sufficient time for the manufacturers to comply with the regulations, the Commissioner extends the effective date for compliance with §§ 640.82(d) and 640.92(d) to February 28, 1978.

Dated: August 25, 1977.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Compliance.

[FR Doc.77-25674 Filed 9-1-77;8:45 am]

SUBCHAPTER J—RADIOLOGICAL HEALTH

[Docket No. 75N-0259]

PART 1010—PERFORMANCE STANDARDS FOR ELECTRONIC PRODUCTS: GENERAL

Exemptions From Performance Standards for Products Intended for United States Government Use

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: This rule provides for exemptions from radiation safety performance standards for electronic products that are intended for use by departments or agencies of the United States. The rule is made to facilitate Federal procurement or construction of needed electronic products, which generally differ in design and application from those used by the general public. The rule provides that either the manufacturer or procuring agency may request the exemption.

EFFECTIVE DATE: October 3, 1977.

FOR FURTHER INFORMATION CONTACT:

Melvyn R. Altman, Bureau of Radiological Health (HFX-460), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857 (301-443-3426.

SUPPLEMENTARY INFORMATION: In the FEDERAL REGISTER of September 30, 1975 (40 FR 44846), the Commissioner of Food and Drugs proposed to add new § 1010.5 (21 CFR 1010.5) to provide for exemptions from radiation safety standards for electronic products intended for use by departments or agencies of the United States.

In part, the proposal would have made the commercial manufacturer of an electronic product responsible for applying for any needed exemption from standards after procurement specifications had been finalized by the Federal agency.

In response to comments received concerning the proposal and those provided at a public meeting of January 29, 1976 (see meeting notice published in the FEDERAL REGISTER of December 19, 1975 (40 FR 58883)), the Commissioner withdrew the earlier proposal and issued a revised proposed rule in the FEDERAL REGISTER of October 1, 1976 (41 FR 43412).

The procedures in the October 1, 1976 proposal provided that products to be exempted under section 358(a)(5) of the Public Health Service Act, as amended by the Radiation Control for Health and Safety Act of 1968 (Pub. L. 90-602, 42 U.S.C. 263b et seq.) might be manufactured either by Federal agencies or by private concerns. It also provided that either the procuring agency or the manufacturer could apply for the exemption. In addition, it was broadened to include administrative procedures for exemption applications under section 360B(b) of the act for electronic products or classes of products intended for U.S. government research, investigations, studies, demonstrations, or training, or for reasons of national security.

Four comments were submitted in response to the reproposal: one a supplement to a letter that commented on the September 30, 1975 proposal, two from manufacturers of electronic products, one from a hospital, and the fourth from an association of physicians. A summary of the comments on the reproposal and the Commissioner's conclusions follow:

1. One comment suggested that a statement of assumption of liability should be required from the procuring agency and from the manufacturer and implied that the applicant for exemption should be required to specify, in its application; the mechanism that would be used in taking corrective action in case of nonadherance to radiation safety procurement specifications.

In paragraph 5 of the preamble to the October 1, 1976 reproposal, the Commissioner stated that the procuring agency, as a matter of course, will be responsible for assuring that acquired products meet the contract procurement specifications and that, if the procuring agency does not require that a manufacturer take corrective action in cases of nonadherence, FDA could withdraw the exemption from the agency. Similarly, if the manufacturer has obtained the exemption and does not adhere to its provisions, FDA could withdraw the exemption. No new evidence of the need for a statement of assumption of liability was presented by the comment, and the Commissioner still disagrees that such a statement is necessary. He also believes that it is not reasonable to require applicants to specify, in advance, plans for corrective action mechanisms. Corrective action procedures would depend on the nature and severity of the radiation safety problems associated with the products in question. Accordingly, no change is made in the final rule.

2. One manufacturer appeared to object to the proposed regulation because he assumed that exemptions for products intended for local and State government agencies could not be obtained. Another comment suggested that exemptions should be available to nongovernment manufacturers and assemblers of medical X-ray equipment.

The Commissioner notes that although § 1010.5 provides the administrative exemption procedures only for products intended for Federal agencies, section 360B (b) of the act authorizes exemption for any product or class of products intended for research, investigations, studies, demonstrations, or training, or for reasons of national security, regardless of whether the product or class is intended for Federal agency use. No procedural regulations for exempting products not intended for Federal agency use have been promulgated because, to date, there have been no requests for such exemptions. Because there exists authority under section 360B(b) of the act, requests for exemptions for products not intended for Federal use could be granted. Conditions may, however, be imposed on such exemptions as necessary to protect the public health and safety.

3. One comment requested that procurement specifications be required as part of all applications for exemptions.

The October 1, 1976 reproposal established two separate sets of criteria (§ 1010.5 (a)(1) and (a)(2)) for exemption eligibility, only one of which included a requirement that procurement specifications must provide for control of radiation emissions. The Commissioner advises that the two sets of criteria were established to include exemption authority under two separate provisions of the act. Section 358(a)(5) of the act requires that the procuring agency prescribe procurement specifications governing emissions of electronic product radiation, while section 360B(b) of the act contains no such requirement. The Commissioner therefore believes that to require procurement specifications for all exemption requests is beyond the intent of the act, and, in addition, would be an unnecessary burden in some cases.

4. One comment suggested that the procuring agency should be notified of exemptions granted, amended, or withdrawn.

The Commissioner agrees to provide such notification when so requested by the procuring agency. Section 1010.5(b) is amended accordingly.

5. One comment urged that § 1010.5 (e)(2) be revised so that the procuring agency would be solely responsible for compliance with modifications to an exemption imposed by the Director, Bureau of Radiological Health, under his authority to amend or withdraw an exemption.

The Commission believes that a change in this regulation is not needed. As stated in paragraph 2 of the preamble to the reproposal, the potential problems and additional expense resulting from modification of an exemption could be dealt with by appropriate contingency clauses written into the procurement contract or by mutual agreement between the procuring agency and the manufacturer on an amended contract.

6. One comment suggested that the regulation would be improved by certain word changes.

The Commissioner agrees. In response to the comment and on his own initiative, he is making the following changes where appropriate: the words "issue[d]" and "approve[d]" are changed to "grant-[ed]", and the word "inform" is changed to "notify". In addition, in the first sentence of § 1010.5(e)(1) the word "containing" is replaced with the phrase "including in the written notice of exemption"; and in § 1010.5(b) the words "this part" are replaced with "this subchapter.".

Therefore, under the Public Health Service Act, as amended by the Radiation Control for Health and Safety Act of 1968 (secs. 358 and 360B, 82 Stat. 1177-1179 (42 U.S.C. 263f and 263j) and under authority delegated to the Commissioner, (21 CFR 5.1) Part 1010 is amended by adding new § 1010.5 to Subpart A. to read as follows:

§ 1010.5 Exemptions for products intended for United States Government use.

(a) *Criteria for exemption.* Upon application by a manufacturer (including assembler) or by a United States department or agency, the Director, Bureau of Radiological Health, Food and Drug Administration, may grant an exemption from any performance standard under Subchapter J of this chapter for an electronic product, or class of products, otherwise subject to such standard when he determines that such electronic product or class is intended for use by departments or agencies of the United States and meets the criteria set forth in paragraphs (a) (1) or (2) of this section.

(1) The procuring agency shall prescribe procurement specifications for the product or class of products governing emissions of electronic product radiation, and the product or class shall be of a type used solely or predominantly by a department or agency of the United States.

(2) The product or class of products is intended for research, investigations, studies, demonstration, or training, or for reasons of national security.

(b) *Consultation between the procuring agency and the Food and Drug Administration.* The United States department or agency that intends to procure or manufacture a product or class of products subject to electronic product radiation safety standards contained in this subchapter should consult with the Bureau of Radiological Health, Food and Drug Administration, whenever it is anticipated that the specifications for the product or class must deviate from, or be in conflict with, such applicable standards. Such consultation should occur as early as possible during development of such specifications. The department or agency should include in the specifications all requirements of such standards that are not in conflict with, or are not inappropriate for, the special or unique uses for which the product is intended. The procuring agency should indicate to the Bureau of Radiological Health if it desires to be notified of the approval, amendment, or withdrawal of the exemption.

(c) *Application for exemption.* An application for exemption, or for amendment or extension thereof, shall be submitted in quintuplicate to the Hearing Clerk, Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20852. For an exemption pursuant to the criteria prescribed in paragraph (a)(1) of this section, the application shall include the information prescribed in paragraph (c)(1) through (12) of this section. For an exemption pursuant to the criteria prescribed in paragraph (a)(2) of this section, the application shall include the information prescribed in paragraph (c)(3) through (12) of this section. An application for exemption, or for amendment or extension thereof, and correspondence relating to such application shall be made available for public disclosure in the office of the Hearing Clerk, except for confidential or proprietary information submitted in accordance with Part 4 of this chapter. Information classified for reasons of national security shall not be included in the application. Except as indicated above, the application for exemption shall include the following:

(1) The procurement specifications for the product or class of products that govern emissions of electronic product radiation.

(2) Evidence that the product or class of products is of a type used solely or predominantly by departments or agencies of the United States.

UMI
V 42 171
SEP 2 77
UMI

FEDERAL REGISTER, VOL. 42, NO. 171—FRIDAY, SEPTEMBER 2, 1977

(3) Evidence that such product or class of products is intended for use by a department or agency of the United States.

(4) A description of the product or class of products and its intended use.

(5) An explanation of how compliance with the applicable standard would restrict or be inappropriate for this intended use.

(6) A description of the manner in which it is proposed that the product or class of products shall deviate from the requirements of the applicable standard.

(7) An explanation of the advantages to be derived from such deviation.

(8) An explanation of how means of radiation protection will be provided where the product or class of products deviates from the requirements of the applicable standard.

(9) The period of time it is desired that the exemption be in effect, and, if appropriate, the number of units to be manufactured under the exemption.

(10) The name, address, and telephone number of the manufacturer or his agent.

(11) The name, address, and telephone number of the appropriate office of the United States department or agency purchasing the product or class of products.

(12) Such other information required by regulation or by the Director, Bureau of Radiological Health, to evaluate and act on the application.

(d) *Amendment or extension of an exemption.* An exemption is granted on the basis of the information contained in the original application. Therefore, if changes are needed in the radiation safety specifications for the product, or its use, or related radiation control procedures such that the information in the original application would no longer be correct with respect to radiation safety, the applicant shall submit in advance of such changes a request for an amendment to the exemption. He also shall submit a request for extension of the exemption, if needed, at least 60 days before the expiration date. The application for amendment or extension of an exemption shall include the following information:

(1) The exemption number and expiration date.

(2) The amendment or extension requested and basis for the amendment or extension.

(3) If the radiation safety specifications for the product or class of products or the product's or class of products' use or related radiation control procedures differ from the description provided in the original application, a description of such changes.

(e) *Ruling on an exemption.* (1) The Director, Bureau of Radiological Health, may grant an exemption including in the written notice of exemption such conditions or terms as may be necessary to protect the public health and safety and shall notify the applicant in writing of his action. The conditions or terms of the exemption may include specifications concerning the manufacture, use, control, and disposal of the excess or surplus exempted product or class of products as provided in the Code of Federal Regulations, Title 41, Subtitle C. Each exemption will be assigned an identifying number.

(2) The Director, Bureau of Radiological Health, shall amend or withdraw an exemption whenever he determines that such action is necessary to protect the public health or otherwise is justified by provisions of the act or this subchapter. Such action shall become effective on the date specified in the written notice of the action sent to the applicant, except that it shall become effective immediately when the Director determines that it is necessary to prevent an imminent health hazard.

(f) *Identification of equipment covered by exemption.* The manufacturer of any product for which an exemption is granted shall provide the following identification in the form of a tag or label permanently affixed or inscribed on such product so as to be legible and readily accessible to view when the product is fully assembled for use or in such other manner as may be prescribed in the exemption:

CAUTION

This electronic product has been exempted from Food and Drug Administration radiation safety performance standards prescribed in the Code of Federal Regulations, Title 21, Chapter I, Subchapter J, pursuant to Exemption No. ------, granted on ----------

Effective date. This regulation shall become effective on October 3, 1977.

(Secs. 358 and 360B, 82 Stat. 1177-1179 (42 U.S.C. 263f, 263j))

Dated: August 25, 1977.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Compliance.

[FR Doc.77-25676 Filed 9-1-77;8:45 am]

[Docket No. 75N-0331]

PART 1020—PERFORMANCE STANDARDS FOR IONIZING RADIATION EMITTING PRODUCTS

Performance Standard for Diagnostic X-Ray Systems and Their Major Components

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: This rule amends the performance standard for diagnostic X-ray systems and their major components to: (1) change the applicability of the X-ray standard to include image receptor supports for mammographic X-ray systems and add a definition of these components, (2) revise the X-ray field limitation and alignment requirements for mammographic X-ray systems and attachments, (3) establish a limit on the transmission of the X-ray beam through the image receptor support on mammographic X-ray systems, (4) allow alternative means for limiting and aligning the X-ray field for certain special purpose X-ray systems, and (5) modify the test method for measuring exposure reproducibility.

EFFECTIVE DATES: November 1, 1977, except § 1020.31(b)(2) and (1), which will be effective September 5, 1978.

FOR FURTHER INFORMATION CONTACT:

Harvey Rudolph, Bureau of Radiological Health (HFX-460), Food and Drug Administration, 5600 Fishers Lane, Rockville, Md. 20857 (301-443-3426).

SUPPLEMENTARY INFORMATION: In the FEDERAL REGISTER of February 23, 1976 (41 FR 7957), the Commissioner of Food and Drugs proposed to amend § 1020.31 (21 CFR 1020.31) regarding X-ray field limitation and alignment, beam transmission, and exposure reproducibility. Fifteen comments were received on that proposal within the 60-day comment period. In response to several of the comments and a request by a manufacturers' association, a public meeting was held on July 21, 1976 (see the FEDERAL REGISTER of July 19, 1976 (41 FR 29739)) to discuss the reasonableness and technical and clinical feasibility of the proposal. As a result of that meeting and the comments on the original proposal, the Commissioner issued a second notice of proposed rulemaking, which was published in the FEDERAL REGISTER of March 4, 1977 (42 FR 12441), to add "image receptor support" to the list of definitions in § 1020.30(b) (21 CFR 1020.30(b)) and to the list of components that must be certified by the manufacturer in § 1020.30(a)(1) (21 CFR 1020.30(a)(1)). A 30-day public comment period was allowed for the second proposal, during which only one comment was received.

Of the 15 comments received in response to the February 23, 1976 proposal, 2 were submitted by medical practitioners, 1 by the Environmental Protection Agency, 1 by a State health agency, 10 by representatives of affected manufacturers, and 1 by a national manufacturers' association. The comment on the March 4, 1977, proposal was submitted by a manufacturer. The issues raised in these letters have been analyzed, and a summary of the Commissioner's analysis and final actions follows.

A. IMAGE RECEPTOR SUPPORTS

One comment expressed concern that the use of the phrase "in a horizontal plane" in the definition of image receptor support in § 1020.30(a)(54) might be misinterpreted to mean that the image receptor support could only be maintained in a horizontal orientation. The Commissioner recognizes that in most mammographic X-ray systems the image receptor support can be rotated out of a horizontal position so that different views of the breast may be recorded. The definition contained in § 1020.30(b)(54) does not prohibit such a design. The intent of the definition is to assure that the X-ray beam transmission limit contained in § 1020.31(l) will be applied to any image receptor support capable of holding the image receptor in the horizontal plane, whether the support is fixed or movable, such that any possible gonad dose is minimized. The definition does not place any restriction on an image receptor support that may be provided with the mammographic X-ray system. It merely describes the type of image receptor support that must be certified as meeting the requirements of the X-ray standard. Therefore, no change from the proposal is required.

B. REPRODUCIBILITY TESTING

Two comments stated that the proposed amendment to § 1020.31(b)(2) concerning exposure reproducibility would have little effect on retake rates and that very little dose savings would occur. In addition, two other comments claimed that the 0.05 coefficient of variation of radiation exposures specified in § 1020.31(b)(1) was too strict when combined with the proposed change in exposure reproducibility testing and suggested either an effective date of 2 years following publication of the final rule to allow for possible redesign or a 0.1 coefficient of variation.

Comments of this type were received at the time the diagnostic x-ray equipment performance standard, §§ 1020.30 through 1020.32 (21 CFR 1020.30 through 1020.32), was first proposed and published in the FEDERAL REGISTER of October 8, 1971 (36 FR 19607). The Commissioner determined then that the 0.05 coefficient of variation was necessary to eliminate inconsistency and the resultant need for retakes and to facilitate the establishment of optimum technique charts for minimizing patient exposure. For example, if the assumption is made that the exposure latitude for a diagnostically useful film is +20 percent and that the exposures follow a normal distribution, x-ray equipment which just meets a 0.1 coefficient of variation requirement would produce diagnostically unusable radiographs 5 percent of the time independently of the care exercised by the equipment operator. Under the same assumptions, equipment meeting a 0.05 coefficient of variation requirement, however, would reduce this contribution to the retake rate to less than 1 percent.

The proposed amendment requires that variable controls for technique factors be set to alternate values during reproducibility testing. The comments have interpreted this as being stricter than the current regulations. Before the promulgation of the x-ray standard, x-ray exposure reproducibility data were obtained from manufacturers using a protocol similar to the proposed testing procedure. A summary of this data is on file with the Hearing Clerk. At that time, it was found that most of the x-ray generators being sold could meet the reproducibility criteria. Although the Commissioner acknowledges that the revision in the test method may be a more stringent test than currently used by some manufacturers, adequate evidence has not been submitted to justify an effective date in excess of 1 year following publication of this final rule.

Several comments questioned the ability of certain existing x-ray systems to meet the reproducibility requirements. They claimed that equipment with continuously variable x-ray generator controls would have difficulty due to the poor response characteristics of electrically driven motors. It was also noted that parallax errors introduced by the reading of meters and dial settings could contribute significantly to poor reproducibility. The Commissioner agrees that these types of problems can occur and that for such x-ray systems the new compliance testing procedure may prove more stringent. However, in order to be useful, the reproducibility requirements must be met under clinical conditions. In diagnostic radiology, an x-ray system with variable technique factors will probably be subject to frequent changes in the setting of the x-ray controls. The proposed test method is intended to simulate the clinical environment to assure that the benefits of reproducible x-ray exposures will accrue in practical situations. Because appropriately designed meters and dials can correct errors such as parallax and because no data have been submitted to show that the requirements cannot be met by state-of-the-art designs, the Commissioner concludes that the proposed amendment concerning reproducibility testing will become final without change.

C. FIELD LIMITATION FOR EQUIPMENT USED WITH INTRAORAL IMAGE RECEPTORS

One comment on proposed § 1020.31(f)(1) stated that, considering the size of intraoral film packets and the level of current technology with regard to aligning the image receptor, field sizes ought to be limited to 5.0 and 6.0 centimeters (cm), respectively. For several commonly used film sizes in dental radiography, such a restriction would mean that full coverage of the film with the x-ray field would not always be obtained. When errors due to positioning of dental film packets are also considered, conecutting problems could become substantial. Further restriction of the x-ray field could lead to a higher incidence of nondiagnostic dental radiographs and possibly to more wasted radiation than would be saved by the added field restriction. The Commissioner rejects this comment because no data were presented to demonstrate that such a requirement would provide equivalent diagnostic information or would not lead to an increase in the retake rate.

In the preamble to the final order establishing the diagnostic x-ray equipment performance standard, published in the FEDERAL REGISTER of August 15, 1972 (37 FR 16461), the Commissioner responded to a comment concerning the precision of the numerical requirements of the standard in which he stated that normal roundoff procedures could be employed in determining compliance with such numerical requirements. It was, in part, problems with interpretation of this statement that led to the proposal to specify the field limitation requirements of § 1020.31(f)(1) more accurately. Since the proposal was published, it has been noted that similar problems can be foreseen in the interpretation of the accuracy implied by other numerical limits contained in the diagnostic x-ray equipment standard. Hence, the Commissioner has determined that an overall policy should be established regarding the accuracy of limits given in the x-ray standard and how roundoff procedures may or may not be applied in determining compliance.

While roundoff of measurement results might generally be permissible, section 360B(a)(5)(B) of the Public Health Service Act (42 U.S.C. 263i) states that it is prohibited for a manufacturer "to issue * * * a certification * * * when the issuer, in the exercise of due care, would have reason to know that such certification is false or misleading in a material respect." Therefore, manufacturers may not use roundoff precedures that result in the certification of a product known to exceed a limit imposed by a performance standard. The Commissioner has concluded that numerical limits contained in the x-ray standard should continue to be stated in absolute terms to avoid giving the erroneous impression that numerical roundoff could permit certification of a noncompliant product. Thus, if the standard limits the x-ray field to a 6 cm diameter circle, a measured maximum field dimension greater than 6 cm may not be a basis for certification of compliance. Under this policy, the proposal to amend § 1020.31(f)(1) is unnecessary and is withdrawn.

The Commissioner is aware that misinterpretations in the use of the numerical roundoff methods may have led to questionable certification of diagnostic x-ray components or systems. In this sense, such treatment of numerical limits as absolute limits may have the effect of an additional restriction on certification procedures. In order not to impose undue hardship, the Commissioner proposes to use his authority under section 360C(d) of the Public Health Service Act (42 U.S.C. 263k(d)) and may, if the deviation is insubstantial, consider as minor violations any certifications found to be invalid due to misapplication of numerical roundoff methods until September 5, 1978. After that date, it will be the obligation of all manufacturers to adjust rejection levels or any other quality control criteria such that they assure total compliance with the absolute limits set by the diagnostic x-ray equipment performance standard.

D. FIELD LIMITATION AND ALIGNMENT FOR MAMMOGRAPHIC AND OTHER SPECIAL PURPOSE X-RAY SYSTEMS

Several comments stated that the difficulty in patient positioning associated with mammography and the need to include the majority of the breast in the examination may not have been evalu-

UMI
V 42 171
SEP 2 77
UMI

ated sufficiently in proposing the requirement in § 1020.31(f)(3) that the x-ray beam be contained entirely within the image receptor. It was suggested that the x-ray beam be allowed to extend past the edge of the image receptor adjacent to the chest wall by up to 2 percent of the source-image receptor distance. In addition, during the July 21, 1976, meeting, it was demonstrated that if the beam were confined within the boundary of the image receptor, some loss of diagnostic information could occur. This is true for most image receptors and poses a significant problem for xeroradiography where the strong electric field gradient at the edge of the exposed area of the image receptor causes a loss of toner particles such that diagnostic information is lost. The overlap of the x-ray field with a small portion of the chest wall would allow the entire breast up to the chest wall to be visualized.

The Commissioner agrees with these arguments and notes that, due to the low energy x-rays used in mammography and the typical angle of incidence of the x-ray beam to the chest wall and the high attenuation of the x-ray beam in the boney structure of the chest wall, the allowed overlap will not cause a significant gonad dose. Therefore, § 1020.31(f)(3) in this final order reflects the suggested change.

The labeling requirements for mammographic x-ray systems and components proposed in § 1020.31(f)(4) caused confusion among several of those commenting on the proposal. One comment expressed the opinion that the proposal could only be applied to mammography systems where the beam-limiting device and image receptor support were marketed by the same manufacturer. Two other comments indicated that the proposal to change § 1020.31(f)(4)(ii) and (iii) appeared to specify compatibility of the beam-limiting device and image receptor support to a degree that would be commercially restrictive and might prohibit the use of general purpose x-ray systems for mammography. It was also argued that the regulation could be interpreted to require that the image receptor itself contain labeling information. This subject of labeling was also discussed at the July 21, 1976 open meeting.

The Commissioner concludes that the issues raised in the comments received on the original proposal and the discussion at the open meeting necessitate a revision of the proposed amendment. In addition, he has determined that it is necessary to have a more simple and concise statement of the labeling requirements for mammographic x-ray systems that use the beam-limiting device for compression of the breast. Thus, the proposed changes in § 1020.31(f)(4)(ii) and (iii) are set forth in § 1020.31(f)(3) in this final regulation and reworded to reflect the concerns expressed in the comments.

One additional comment pointed out an ambiguity in the original wording of proposed § 1020.31(f)(4). As written, it appeared that systems designed for use with extraoral as well as intraoral image receptors would be subjected to the field limitation and alignment requirements for either type of use rather than for only extraoral use. This was not the Commissioner's intent, and the final rule contains clarifying language on this point.

E. X-RAY BEAM TRANSMISSION LIMIT FOR MAMMOGRAPHIC X-RAY SYSTEMS

Two comments noted that although the transmission limit was intended for systems designed only for mammography, the proposal does not accurately reflect this and could be interpreted as applying to other types of x-ray systems that may use mammographic attachments. The Commissioner agrees and has clarified § 1020.31(l) in this final rule.

In the comments and the public meeting on the proposal, questions were raised over the usefulness and achievability of the transmission limit of 0.1 milliroentgen per tube activation. One consideration was the contribution of scatter radiation to the measurements made. The added weight and bulk of the image receptor support were additional concerns. In general, there was little disagreement on the utility of minimizing the magnitude of the transmitted X-Ray beam. However, there was some concern that the trend toward the use of higher peak kilovoltages (kVp) in mammography would make it difficult to achieve such a low transmission limit.

The transmission limit is intended to minimize that portion of the unused X-Ray beam which can be reduced by means of a performance standard. The Commissioner recognizes that the contribution to patient dose from scattered radiation would be difficult to control and notes that the proposal was designed only to minimize that portion of the beam which passes through the image receptor. The final rule clarifies this point. Even assuming a peak tube potential of 70 kVp (much higher than currently used for mammography) and the worst case exposure conditions, the added weight of lead or lead-equivalent material necessary to reduce the exposure beneath the image receptor supports on systems now manufactured is not significant. The Commissioner is aware that the trend toward the use of higher peak tube potentials makes the transmission limit more difficult to achieve. However, it is also true that the higher peak tube potentials generate X-Ray beams that also penetrate body tissues more readily and could contribute to a greater gonad dose. He has, therefore, determined that the transmission limit shall remain as 0.1 milliroentgen per tube activation.

There were two comments regarding the requirement that compliance be tested at the maximum peak tube potential. They noted that many systems use tubes rated at voltages higher than the maximum voltage allowed by other components of the system. The Commissioner recognizes that this problem could occur, and has concluded that the final rule must state that compliance be measured at the maximum rated peak tube potential for the system. For example, if the generator supplied with the system can operate only at or below 50 kilovolts and the X-Ray tube is rated at 75 kilovolts, compliance will be measured at 50 kilovolts and at the maximum rated product of tube current and time for that potential.

The Commissioner has carefully considered the environmental effects of the amendments and, because the action would not significantly affect the quality of the human environment, has concluded that an environmental impact statement is not required. Copies of the FDA environmental impact assessment and other pertinent background data on which the Commissioner relies in promulgating these amendments are on file and may be seen at the office of the Hearing Clerk (HFC-20), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, Md. 20857, between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Therefore, under the Public Health Service Act as amended by the Radiation Control for Health and Safety Act of 1968 (sec. 358, 82 Stat. 1177-1179 (42 U.S.C. 263f)) and under authority delegated to him (21 CFR 5.1), the Commissioner amends Part 1020 as follows:

1. In § 1020.30 by adding paragraphs (a)(1)(v) and (b)(54) to read as follows:

§ 1020.30 Diagnostic X-ray systems and their major components.

(a) • • •

(1) • • •

(v) Image receptor support devices for mammographic X-ray systems manufactured after September 5, 1978.

• • • • • •

(b) • • •

(54) "Image receptor support" means, for mammographic systems, that part of the system designed to support the image receptor in a horizontal plane during a mammographic examination.

• • • • • •

2. In § 1020.31 by revising paragraphs (b)(2), (d), (e), and (f)(2); by revising paragraph (f)(3) and redesignating it as (f)(4); and by adding new paragraphs (f)(3) and (l) to read as follows:

§ 1020.31 Radiographic equipment.

• • • • • •

(b) • • •

(2) *Measuring compliance.* Determination of compliance shall be based on 10 consecutive measurements taken within a time period of 1 hour. Equipment manufactured after September 5, 1978 shall be subject to the additional requirement that all variable controls for technique factors shall be adjusted to alternate settings and reset to the test setting after each measurement. The percent line-voltage regulation shall be determined for each measurement. All values for percent line-voltage regulation shall be within ±1 of the mean value for all measurements. For equipment having automatic exposure controls, compliance shall be determined with a sufficient thickness of attenuating material in the useful beam such that the technique factors can be adjusted to provide individual exposures of a minimum of 12 pulses on field emission equipment rated for pulsed operation or no less than one-tenth second per exposure on all other equipment.

• • • • • •

(d) *Field limitation and alignment for mobile and stationary general purpose x-ray systems.* Except when spot-film devices or special attachments for mammography are in service, mobile and stationary general purpose, radiographic x-ray systems shall meet the following requirements:

• • • • • •

(e) *Field limitation and alignment on stationary general purpose x-ray equipment.* Except when spot-film devices or special attachments for mammography are in service, stationary general purpose x-ray systems shall meet the following requirements in addition to those prescribed in paragraph (d) of this section:

• • • • • •

(f) • • •

(2) *X-ray systems designed for one image receptor size.* Radiographic equipment designed for only one image receptor size at a fixed SID shall be provided with means to limit the field at the plane of the image receptor to dimensions no greater than those of the image receptor, and to align the center of the x-ray field with the center of the image receptor to within 2 percent of the SID, or shall be provided with means to both size and align the x-ray field such that the x-ray field at the plane of the image receptor does not extend beyond any edge of the image receptor.

(3) *Systems designed for or provided with special attachments for mammography.* Radiographic systems designed only for mammography and general purpose radiographic systems, when special attachments for mammography are in service, shall be provided with means to limit the useful beam such that the x-ray field at the plane of the image receptor does not extend beyond any edge of the image receptor at any designated SID except the edge of the image receptor designed to be adjacent to the chest wall where the x-ray field may not extend beyond this edge by more than 2 percent of the SID. This requirement can be met with a system which performs as prescribed in paragraphs (f)(4)(i), (ii), and (iii) of this section. When the beam-limiting device and image receptor support device are designed to be used to immobilize the breast during a mammographic procedure and the SID may vary, the SID indication specified in paragraphs (f)(4)(ii) and (iii) of this section shall be the maximum SID for which the beam-limiting device or aperture is designed. In addition, each image receptor support intended for installation on a system designed only for mammography shall have clear and permanent markings to indicate the maximum image receptor size for which it is designed.

(4) *Other x-ray systems.* Radiographic systems not specifically covered in paragraphs (d), (e), (f)(2) and (3), and (g) of this section and systems covered in paragraph (f)(1) of this section, which also are designed for use with extraoral image receptors and when used with an extraoral image receptor, shall be provided with means to limit the x-ray field in the plane of the image receptor so that such field does not exceed each dimension of the image receptor by more than 2 percent of the SID, when the axis of the x-ray beam is perpendicular to the plane of the image receptor. In addition, means shall be provided to align the center of the x-ray field with the center of the image receptor to within 2 percent of the SID, or means shall be provided to both size and align the x-ray field such that the x-ray field at the plane of the image receptor does not extend beyond any edge of the image receptor. These requirements may be met with:

(i) A system which performs in accordance with paragraphs (d) and (e)(1) of this section; or, when alignment means are also provided, may be met with either:

(ii) An assortment of removable, fixed-aperture, beam-limiting devices sufficient to meet the requirement for each combination of image receptor size and SID for which the unit is designed. Each such device shall have clear and permanent markings to indicate the image receptor size and SID for which it is designed; or

(iii) A beam-limiting device having multiple fixed apertures sufficient to meet the requirement for each combination of image receptor size and SID for which the unit is designed. Permanent, clearly legible markings shall indicate the image receptor size and SID for which each aperture is designed and shall indicate which aperture is in position for use.

• • • • • •

(l) *Transmission limit for image receptor supporting devices used for mammography.* For x-ray systems manufactured after September 5, 1978 which are designed only for mammography, the transmission of the primary beam through any image receptor support provided with the system shall be limited such that the exposure 5 centimeters from any accessible surface beyond the plane of the image receptor supporting device does not exceed 0.1 milliroentgen for each activation of the tube. Exposure shall be measured with the system operated at the minimum SID for which it is designed. Compliance shall be determined at the maximum rated peak tube potential for the system and at the maximum rated product of tube current and exposure time (mAs) for that peak tube potential. Compliance shall be determined by measurements averaged over an area of 100 square centimeters with no linear dimension greater than 20 centimeters.

Effective date: The new paragraph (l) in § 1020.31 (21 CFR 1020.31) concerning the x-ray transmission limit for mammographic x-ray systems and the change to § 1020.31(b)(2) for reproducibility testing will be effective on September 8, 1978. All other amendments will be effective on November 1, 1977.

(Sec. 358, 82 Stat. 1177-1179 (42 U.S.C. 263f).)

Dated: August 22, 1977.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Compliance.

Title 5—Administrative Personnel

CHAPTER I—CIVIL SERVICE COMMISSION

PART 213—EXCEPTED SERVICE

Community Services Administration

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: The position of Staff Assistant, Office of Interagency and External Affairs, is excepted from the competitive service under Schedule C because it is confidential in nature.

EFFECTIVE DATE: September 2, 1977.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202-632-4533.

Accordingly, 5 CFR 213.3373(g)(2) is added as set out below:

§ 213.3373 Community Services Administration.

• • • • • •

(g) *Office of Interagency and External Affairs.* • • •

(2) One Staff Assistant.

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954-1958 Comp., p. 218.)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.77-25784 Filed 9-1-77;8:45 am]

PART 213—EXCEPTED SERVICE

Federal Energy Administration

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: This amendment excepts under Schedule C one position of Special Assistant to the Assistant Administrator for Regulatory Programs because the position is confidential in nature.

EFFECTIVE DATE: September 2, 1977.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202-632-4533.

Accordingly, 5 CFR 213.3388(o)(1) is amended as set out below:

Title 24—Housing and Urban Development

CHAPTER X—FEDERAL INSURANCE ADMINISTRATION, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

SUBCHAPTER B—NATIONAL FLOOD INSURANCE PROGRAM

[Docket No. 3323]

PART 1915—IDENTIFICATION AND MAPPING OF SPECIAL FLOOD HAZARD AREAS

Communities with Minimal Hazard Areas

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: The Federal Insurance Administrator, after consultation with local officials of the communities listed below, has determined, based upon analysis of existing conditions in the Special Flood Hazard areas, that it is appropriate at this time to convert the communities listed below to the Regular Program without determining base flood elevations.

EFFECTIVE DATE: Date of this notice.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard W. Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or toll free line 800–424–8872, Room 5270, 451 Seventh St. SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: In these areas, there is no reason not to make full limits of coverage available. The available limits of coverage for flood insurance in these communities is increased to $70,000 for 1–4 family residential structures, $200,000 for other residential and commercial structures, $20,000 for contents of residential structures, and $200,000 for contents of commercial structures. Flood insurance is available at Zone C rates throughout the entire community.

Flood insurance policies for property located in the communities listed can be obtained from any licensed property insurance agent or broker serving the eligible community, or from the National Flood Insurance Association servicing company for the State.

The effective date of conversion to the Regular Program will not appear in the Code of Federal Regulations except for the page number of this entry in the FEDERAL REGISTER.

Section 1915.7 is added; the entry reads as follows:

§ 1915.7 List of communities with minimal hazard areas.

State	County	Community name
Alabama	Butler	City of Georgiana.
Do.	Geneva	City of Hartford.
Do.	Coffee	Town of New Brockton.
Do.	Covington	Town of River Falls.
Idaho	Boundary	City of Bonners Ferry.
Iowa	Dubuque	City of Epworth.
Kansas	Harvey	City of Burrton.
Do.	Johnson and Wyandotte.	City of Lake Quivira.
Louisiana	Bossier	Town of Benton.
Do.	Tangipahoa.	Town of Independence.
Do.	Madison	Village of Mound.
New York	Wyoming	Village of Perry.
Do.	Lewis	Village of Turin.
North Carolina	Halifax	Town of Hobgood.
Ohio	Butler	City of Hamilton.
Oklahoma	Washington.	Town of Copan.
Pennsylvania	Lehigh	Township of Upper Saucon.
Washington	King	City of Seattle.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.)

Issued: August 16, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

[FR Doc.77-25558 Filed 9-1-77;8:45 am]

Title 28—Judicial Administration

CHAPTER I—DEPARTMENT OF JUSTICE

PART 2—PAROLE, RELEASE, SUPERVISION AND RECOMMITMENT OF PRISONERS, YOUTH OFFENDERS, AND JUVENILE DELINQUENTS

Paroling, Recommitting and Supervising Federal Prisoners; Correction

AGENCY: The United States Parole Commission.

ACTION: Correction.

SUMMARY: This document is to correct certain typographical errors in the publication of the Commission's rules which appeared on August 5, 1977, at 42 FR 39808.

EFFECTIVE DATE: August 29, 1977.

FOR FURTHER INFORMATION CONTACT:

Michael A. Stover, Office of the General Counsel, United States Parole Commission, 320 First Street NW., Washington, D.C. 20537, Telephone 202–724–3092.

SUPPLEMENTARY INFORMATION: The publication of the Commission's rules which appeared at 42 FR 39808, August 5, 1977 contained several typographical errors which require correction. These are as follows:

In § 2.14 *Subsequent proceedings.* In paragraph (b) (1), the words "presumptive parole dates" should read "presumptive parole date". (42 FR 39812) In (b) (2) (iii) "commence" should be substituted for the word "commerce". (42 FR 39812)

In § 2.17 *Original Jurisdiction Cases,* paragraph (b) (2) (ii) should read:

(b) * * *

(2) * * *

(i) * * * Was part of a large scale criminal conspiracy or a continuing criminal enterprise" instead of "was part of a large scale criminal conspiracy of a criminal enterprise." (42 FR 39812)

In § 2.20 *Paroling Policy Guidelines: statement of general policy.* In the offense severity table, the words "(in months)" should appear under the heading "Guidelines for decisionmaking" and not under the sub-heading "offender characteristics". (42 FR 39813, 39814 and 39815).

In § 2.23 *Delegation to hearing examiners.* In paragraph (b), first sentence, substitute the word "required" for the word "requested". (42 FR 39815)

In § 2.33 *Release of Plans.* Omit the word "of" in the title of this rule (42 FR 39817).

Accordingly, pursuant to the provisions of 18 U.S.C. 4203(a) (1) and 4204 (a) (6), 28 CFR Chapter I, Part 2, is amended as set forth above, effective August 29, 1977.

Dated: August 29, 1977.

CURTIS C. CRAWFORD,
Acting Chairman,
United States Parole Commission.

[FR Doc.77-25699 Filed 9-1-77;8:45 am]

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

[FRL 750-4]

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Alabama—Approval of Plan Revisions

AGENCY: Environmental Protection Agency.

ACTION: Final Rule.

SUMMARY: This rule includes the incorporation by reference of EPA's New Source Performance Standards (40 CFR Part 60), and the requirements for continuous monitoring of stationary sources (40 CFR 51.19).

ADDRESSES: Copies of the information submitted by Alabama and the Alabama plan itself may be examined by the public during normal hours at the following locations:

Air Programs Branch, Air & Hazardous Materials Division, Environmental Protection Agency, 345 Courtland Street NE., Atlanta, Ga. 30308.

Public Information Reference Unit, Library Systems Branch, Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460.

Alabama Air Pollution Control Commission, State of Alabama Department of Public Health, 645 South McDonough Street, Montgomery, Ala. 36104.

FOR FURTHER INFORMATION CONTACT:

Eliot Cooper, Environmental Protection Agency, 345 Courtland Street NE., Atlanta, Ga. 30308, 404–881–3286.

SUPPLEMENTARY INFORMATION: On October 28, 1976, the State of Alabama submitted for EPA's approval these revisions to the Alabama State Implementation Plan after proper notice and public hearing (October 4, 1976). Subsequently, EPA announced receipt of these revisions in the FEDERAL REGISTER on January 24, 1977. Comments were solicited and no comments were received.

No provision was made for the continuous monitoring of nitrogen oxide emissions from fossil fuel-fired steam generators and nitric acid plants since no Air Quality Control Regions in Alabama are required to develop a control strategy for nitrogen dioxide. Also, opacity monitoring for existing petroleum refinery fluid bed catalytic cracking unit catalyst regenerators is not required in the proposal since no units of greater than 20,000 barrels per day of fresh feed capacity exist in Alabama. Accordingly, 40 CFR Part 52 is amended as follows:

Subpart B—Alabama

1. In § 52.50, paragraph (c) is amended by adding subparagraph (17) as follows:

§ 52.50 Identification of Plan.

* * * * *

(c) * * *

(17) Regulations equivalent to EPA's New Source Performance Standards (40 CFR Part 60) and continuous monitoring of stationary sources (40 CFR 51.19).

(Sec. 110, Clean Air Act (42 U.S.C. 1857c-5))

Dated: June 23, 1977.

BARBARA BLUM,
Acting Administrator.

[FR Doc.77-25662 Filed 9-1-77;8:45 am]

SUBCHAPTER C—AIR PROGRAMS

[FRL 771-2]

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Massachusetts Revision

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: Ten large fossil fuel utilization facilities in the Southeastern Massachusetts Air Pollution Control District (SEMAPCD) are approved to burn 2.2 percent sulfur content residual fuel oil in accordance with revised Regulation 5.1, "Sulfur Content of Fuels and Control Thereof." Four fuel burning sources in the affected size category in the SEMAPCD are disapproved and must continue to burn 1.0 percent sulfur content fuel oil. Final action has not been taken for the three remaining sources in the affected size category.

EFFECTIVE DATE: September 2, 1977.

FOR FURTHER INFORMATION CONTACT:

Wallace Woo, Air Branch, EPA Region I, Room 2113, JFK Federal Building, Boston, Mass. 02203 (617–233–5609).

SUPPLEMENTARY INFORMATION: On May 31, 1972 (37 FR 10872) pursuant to section 110 of the Clear Air Act and 40 CFR Part 51, the Administrator approved, with exceptions, the Massachusetts Implementation Plan for the attainment of National Ambient Air Quality Standards (NAAQS).

On June 3, 1977 there was published in the FEDERAL REGISTER (42 FR 28554) a proposal for a change in the sulfur content of fuel burned by large fossil fuel burning sources in the (SEMAPCD). The SEMAPCD is the same geographic area as the Massachusetts portion of the Metropolitan Providence Interstate Air Quality Control Region (AQCR). The revision would allow fossil fuel utilization facilities in the SEMAPCD having an energy input capacity rated at one hundred million Btu per hour or greater to burn fossil fuel with a sulfur content not in excess of 1.21 pounds per million Btu heat release potential (approximately equivalent to 2.2 percent sulfur content residual fuel oil by weight) until May 1, 1978. All other sources would continue to burn fossil fuel with a sulfur content not in excess of 0.55 pounds per million Btu heat release potential (approximately equivalent to 1.0 percent sulfur content residual fuel oil by weight), in conformance with the originally-approved State Implementation Plan (SIPP).

The revision also requires that the use of the higher sulfur fuel by each source be approved and a permit be granted by the Massachusetts Department of Environmental Quality Engineering (the Massachusetts Department) prior to use, in order to insure that the NAAQS will not be violated. The Massachusetts Department has the authority to set conditions of approval, including requiring particulate stack testing and the establishment of a network of total suspended particulate (TSP) monitors and continuous ambient sulfur dioxide monitors at specified locations in the vicinity of the approved facility.

Exceedence of the NAAQS for SO_2 recorded by any monitor in the vicinity of the facility would be grounds for requiring an immediate and permanent return to the use of lower sufur fuel by the source involved. Further, no source will be permitted to continue burning higher sulfur fuel if the stack testing results show that the source has particulate emissions in excess of the emission limitation under the present SIP. All permits granted will be revocable if there is evidence of noncompliance with any other applicable SIP regulation.

On the basis of air quality dispersion modeling, the Regional Administrator listed in the proposed rulemaking notice ten sources which could be approved to burn the higher sulfur fuel without causing NAAQS violations for SO_2. He also listed four sources which were shown by the modeling to have the potential to violate the NAAQS for SO_2 if they were to burn the higher sulfur content fuel. He did not propose action on the three remaining sources in the applicable size category, pending further evaluation of their air quality impact. These sources will be temporarily excluded from implementing the provisions of the revision until final action is taken.

During the comment period, comments were received from the Federal Energy Administration (FEA) and Olin Corporation (Olin).

FEA recommended that temporary fuel switching be permitted when SO_2 levels are predicted to exceed the NAAQS. Fuel switching as a means of maintaining the NAAQS, also known as a "supplementary control system" (SCS), is an illegal control strategy in this situation. As set forth in the FEDERAL REGISTER of February 18, 1976 (41 FR 7452), SCS is only acceptable in very limited instances, none of which apply here. Consequently, EPA cannot consider such a recommendation.

FEA also expressed concern that an exceedence of the NAAQS for SO_2 would be grounds for an immediate and permanent return to the lower sulfur fuel by the source involved. A decision to revoke the permit at this point would be based upon an evaluation of the exceedence. However, as stipulated by the Massachusetts Department, a violation of the NAAQS for SO_2 will result in an automatic revocation of the approval to burn the higher sulfur fuel. A violation of the NAAQS is defined as two exceedences of the NAAQS, since each monitoring site is allowed one excursion above the standard per year. Violations of the NAAQS are not permitted by the Clean Air Act.

Both the primary and secondary NAAQS are considered in evaluating the approvability of the sources and in determining whether standards are violated.

Olin informed the Regional Administrator that they no longer operate the plant in Freetown, for which SO_2 primary and secondary standards violations were predicated. It has come to EPA's attention that the plant is now owned by Polaroid Corporation and is not presently in operation. However, in disapproving this plant, EPA is continuing to rely on the information and modeling provided in the Massachusetts Department's technical support documentation.

After evaluation of the State's submittal, the Administrator has determined that the Massachusetts revision meets the requirements of the Clean Air Act and 40 CFR Part 51. Accordingly, this revision is approved as a revision to the Massachusetts Implementation Plan.

SEP 2 7 7 UMI
V 42 171

FEDERAL REGISTER, VOL. 42, NO. 171—FRIDAY, SEPTEMBER 2, 1977

(Sec. 110(a), Clean Air Act, as amended, (42 U.S.C. 1857c-5(a)).)

Dated: August 29, 1977.

DOUGLAS M. COSTLE,
Administrator.

Part 52 of Chapter I, Title 40, Code of Federal Regulations, is amended as follows:

Subpart W—Massachusetts

1. Section 52.1120(c) is amended by adding a new paragraph (12) as follows:

§ 52.1120 Identification of plan.

* * * * *

(c) The plan revisions listed below were submitted on the dates specified.

* * * * *

(12) A revision to Regulation 5.1, Sulfur Content of Fuels and Control Thereof, for the Southeastern Massachusetts Air Pollution Control District, submitted on December 30, 1976 by the Secretary of Environmental Affairs.

2. Section 52.1126 is amended by adding a new paragraph (d) as follows:

§ 52.1126 Control strategy: Sulfur oxides.

* * * * *

(d) Massachusetts Regulation 5.1 for the Southeastern Massachusetts Air Pollution Control District is approved except as to the following sources which remain subject to the previously approved requirements of Regulation 5.1 which stipulates that sources are permitted to burn fossil fuel having a sulfur content not in excess of 0.55 pounds per million. Btu heat release potential (approximately equivalent to 1.0 percent sulfur content residual fuel oil by weight):

Facility formerly operated by Olin Chemicals and now owned by Polaroid Corp., Freetown, Mass.
Duro Finishing Co., Fall River, Mass.
Stevens Realty Co., Fall River, Mass.
Taunton Municipal Light, West Water Street plant, Taunton, Mass.
Harodite Finishing Co., Dighton, Mass.
Montaup Electric Co., Somerset Station, Somerset, Mass.
New England Power Co., Brayton Point Station, Somerset, Mass.

[FR Doc.77-25742 Filed 9-1-77;8:45 am]

Title 41—Public Contracts and Property Management

CHAPTER 4—DEPARTMENT OF AGRICULTURE

PART 4-4—SPECIAL TYPES AND METHODS OF PROCUREMENT

Architect-Engineer Services

AGENCY: Department of Agriculture.

ACTION: Final rule.

SUMMARY: This rule amends the Agriculture Procurement Regulations by adding new section covering architect-engineer (A-E) services which supplements coverage in the Federal Procurement Regulations.

DATE: This rule is effective on September 2, 1977.

FOR FURTHER INFORMATION CONTACT:

Douglas I. Metzger, Office of Operations, Procurement, Grants and Agreements Management Staff, United States Department of Agriculture, Washington, D.C. 20250 (202-447-7527).

SUPPLEMENTARY INFORMATION: This amendment involves matters relating to agency management and contracting and, while not subject by law to the notice and public procedure requirements for rule making under 5 U.S.C. 553, is subject to the Secretary's Statement of Policy (36 FR 13804). The amendment corrects or clarifies existing policy. No useful purpose would be served by public participation, and it is found upon good cause, in accordance with the Secretary's Policy Statement, that notice and other public procedures with respect to the amendment are impracticable and unnecessary.

1. The Table of Contents is amended by adding the following new subpart:

Subpart 4-4.10—Architect-Engineer Services

4-4.1001 General.
4-4.1004-1 Estatblishment of architect-engineer evaluation boards.
4-4.1004-4 Action by agency head or his authorized representative.

AUTHORITY: 5 U.S.C. 301, 40 U.S.C. 486(c).

Subpart 4-4.10—Architect-Engineer Services

2. New Subpart 4-4.10 is added as follows:

§ 4-4.1001 General.

Achitect-engineer sevices for projects which fall within the definition of a "public building" contained in section 13 of the Public Buildings Act of 1959 (40 U.S.S. 612) may be procued only after obtaining proper authorization from GSA in accordance with Subpart 101-19.4 of this title and Subpart 104-17.4 of the Agriculture Property Management Regulations.

§ 4-4.1004-1 Establishment of architect-engineer evaluation boards.

(a) Each agency headquarters and each field contracting office where architect-engineer (A-E) contracts are awarded shall establish an architect-engineer evaluation board in accordance with § 1-4.1004-1 of this title. The board shall be established in coordination with the contracting officer. It shall be composed of at least three members, one of which will serve as chairman. All members shall be selected from the technical program area and appointed in writing by an appropriate official. The contracting officer, while not a member of the board, will act in an advisory capacity in matters of procurement policies and procedures and should be intimately involved in the total evaluation process.

§ 4-4.1004-4 Action by agency head or his authorized representative.

(a) Review and final selection of qualified architect-engineer firms, as prescribed in § 1-4.1004-4 of this title, shall be made by an appropriate agency management official from the technical or administrative area who is not currently serving as a member of the evaluation board.

(5 U.S.C. 301, 40 U.S.C. 486(c).)

Done at Washington, D.C. this 29th day of August 1977.

E. ALVAREZ,
Director, Office of Operations.

[FR Doc.77-25686 Filed 9-1-77;8:45 am]

Title 49—Transportation

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER D—TARIFFS AND SCHEDULES

[Docket No. 35867 [1]]

PART 1307—FREIGHT RATE TARIFFS, SCHEDULES, AND CLASSIFICATIONS OF MOTOR CARRIERS

PART 1310—FREIGHT RATE TARIFFS AND CLASSIFICATIONS OF MOTOR COMMON CARRIERS

Construction, Filing, and Posting of Tariffs of Common Carriers of Property by Motor Vehicle and Tariffs of Certain Common Carriers by Water

AGENCY: Interstate Commerce Commission, Washington, D.C. 20423.

ACTION: Final rules.

SUMMARY: Regulations proposed in 1973 to govern the construction, posting, and filing of tariffs of motor common property carriers and certain water carriers are being further modified and adopted. This further modification is necessary to eliminate objectionable requirements brought to our attention by numerous parties. This action generally will grant additional relief to the carriers.

EFFECTIVE DATES: The effectiye date of the regulations is October 5, 1977. New tariffs filed on or after October 5, 1978 must conform to the new regulations. Tariffs on file on that date must conform 1 year later.

FOR FURTHER INFORMATION CONTACT:

William P. Geisenkotter, Chief, Section of Tariffs, Interstate Commerce Commission, Washington, D.C. 20423 Phone Phone No. 202-275-7739.

SUPPLEMENTARY INFORMATION: The Commission on July 5, 1973, instituted a rulemaking proceeding (38 FR 20852) under docket No. 35867 to consider the revision of regulations which govern the construction, filing, and posting of tariffs of common carriers of property by motor vehicle and tariffs of common carriers of property by water which contain joint motor-water rates or provisions governing such rates. Many substantial and important changes were proposed. It was indicated that the regulations needed revising for the purposes of, among other things, (1) updating; (2) clarifying; (3) incorporating the modifying provisions of general special permission authorities; (4) adding restrictions to eliminate or correct practices which have been the source of justifiable complaints; (5) canceling regulations no longer needed; and (6) accomplishing overall tariff simplification and improvement.

The Commission on July 16, 1974, instituted a related rulemaking proceeding (39 FR 4787) under docket No. 35867 (Sub-No. 1) to consider the amendment of the regulations which were proposed under docket No. 35867 for the purpose of including therein regulations for the prescription of standard headings and standard item numbers for assignment to the most commonly published rules in tariffs of Class I common carriers of property by motor vehicle and in tariffs of publishing agents of common carriers of property by motor vehicle.

The participation was substantial. Upon consideration of the entire record, the Commission decided to adopt, with modification, the regulations proposed in docket No. 35867 and to not adopt the regulations proposed in docket No. 35867 (Sub-No. 1). A report and order (41 FR 30591) was served July 9, 1976, ordering the modified rules into effect April 15, 1977, and discontinuing the proceedings.

Petitions for reconsideration of the modified rules have been filed. The petitioners request many changes, of which some have real merit. The Commission has therefore decided, through the instant document, to further modify the regulations proposed in docket No. 35867 and to adopt the regulations as further modified. The document also reflects a number of changes made on the Commission's own motion.

Part 1310 of this title will be amended to reflect the modifications. This part will replace Subpart B of Part 1307. The date on and after which new tariff publications must conform to the regulations is October 5, 1978. The date by which all publications must conform is October 5, 1979.

Issued at Washington, D.C.

H. G. HOMME, Jr.,
Acting Secretary.

In § 1310.0, paragraph (c) is amended to read as follows:

§ 1310.0 General Provisions.

* * * * *

(c) * * *

(1) Except as otherwise authorized, all tariff publications filed on or after October 5, 1977, but prior to October 5, 1978, shall conform either to the regulations in this part or to those in Subpart B of Part 1307. Once any original tariff or an amendment to a tariff is filed under the regulations in this part, any reissue of or subsequent amendment to that tariff shall also conform to the regulations in this part. Except as otherwise authorized by special tariff authority, all tariff publications filed on or after October 5, 1978, must conform to the regulations in this part. Except as otherwise authorized by special tariff authority or in §§ 1310.3(b)(3), 1310.4(a), 1310.4(e)(1), 1310.4(f)(3), 1310.4(h), and 1310.27(a) (rules 3, 4, and 27), all tariff publications filed prior to October 5, 1978, which do not conform to the regulations in this part shall be brought into conformity therewith on or before October 5, 1979.

(2) For reasons it considers to be sufficient, the Commission may direct the reissue of any tariff, power of attorney, or concurrence at any time. However, prior to October 5, 1983, the Commission will not strike from its files, nor direct the reissue of, powers of attorney and concurrences already on file on October 5, 1978, solely because they are on the old previously prescribed MFXA and MFXC forms.

* * * * *

In § 1310.1 paragraphs (e) and (g)(3) are amended to read as follows:

§ 1310.1 Filing tariffs (rule 1).

* * * * *

(e) *Tariff publications not consecutively numbered.* An original tariff, a supplement, or an original or revised page tendered for filing which is out of the sequence required by the regulations of this part must be accompanied by a separate letter affirming that a publication bearing the skipped over designation will be filed and indicating the approximate date of such filing.

* * * * *

(g) * * *

(3) Rates, charges, rules, or other provisions which have been filed with the Commission must be allowed to become effective and remain in effect for a period of at least 30 days before being changed, canceled, or withdrawn, unless otherwise authorized by the Commission. Check sheets (see § 1310.10(d)(13) of this part) in loose-leaf tariffs are not subject to the requirements of this subparagraph (3).

* * * * *

In § 1310.2, paragraph (d) is amended to read as follows:

§ 1310.2 Posting tariffs (rule 2).

* * * * *

(d) *Period of notice.* Except as otherwise authorized, each tariff publication must be posted continuously from a date at least 30 days prior to the effective date. When the Commission permits or requires a different period of notice for filing, the tariff publication shall be posted at least that number of days before the effective date.

* * * * *

In § 1310.4, paragraphs (a), (e)(1), (f)(3), (f)(4), and (h)(1) are amended to read as follows:

§ 1310.4 Form, size, and printing (rule 4).

(a) *Form, size, durability, and method of printing.* Except as otherwise provided in this part as to certain kinds of tariffs, all original tariffs filed on and after the conformity date of this part, and amendments, to such tariffs, shall be of size not less than 8 by 11 inches and not more than 8½ by 11 inches. If, prior to such date, a tariff on file is of a different size, amendments thereto must either be of the same dimensions as the original tariff or be of the prescribed size, except that once an amendment of the prescribed size is filed, all subsequent amendments thereto must also be of that size. Reissues of the tariff shall be of the prescribed size. All original tariffs and amendments thereto shall be in book, pamphlet, single sheet, or loose-leaf form, be in the English language, and printed or prepared by other process on paper of good quality providing durable copies. Copies filed with the Commission and posted shall be clearly and permanently legible in every respect, free from blurring or distortion of content, and free from smudged or darkened background. Typewritten sheets, handwritten material, carbon copies, or proof sheets shall not be used for filing or posting. All copies filed and posted must be identical. (Sec § 1310.9(g) (rule 9) blanket supplements.)

* * * * *

(e) * * *

(1) Pages of an original bound tariff or supplements thereto field on or after the conformity date of this part shall be consecutively numbered employing Arabic numerals. The title page shall not be numbered. If the reverse side of the title page is used for the publication of tariff matter, it shall bear the page number "2," the next page "3," and so on. If the reverse side of the title page is left blank, that side shall be unnumbered, the next page numbered "1," the next "2," and so on. Except for the title page, all pages containing tariff matter shall be numbered. Any numbered page intentionally left blank shall so state thereon. Both the inside and outside of a back cover to a bound tariff or supplement may contain printed matter. At the bottom of the last numbered page the following shall be shown: "(The End)." Original bound tariffs and supplements thereto (if any) on file prior to the conformity date need not be amended to revise the page numbering system of such publications, but all subsequent supplements shall comply.

* * * * *

(f) *Loose-leaf Tariffs.*

* * * * *

(3) Pages of an original loose-leaf tariff filed on or after the conformity date of this part shall be consecutively numbered employing Arabic numerals

[1] This proceeding is consolidated with Docket No. 35867 (Sub-No. 1), Standard Headings and Standard Item Numbers for Commonly Published Rules in Tariffs of Class I Motor Carriers of Property and of Agents.

UMI
V 42 171
SEP 2 77
UMI

only. Fractional or decimal numbers, or letter prefixes or suffixes, may not be used. The first page following the title page shall be designated as "Original Page 1," the next page designated as "Original Page 2," and so on. Omit the words "No." and "Number." Tariffs filed prior to the conformity date of this part which do not show page 1 (original or revised) on the first page following the title page need not be reissued provided the tariffs otherwise comply with the requirements of this part. See § 1310.10(d) (7) and (8) (rule 10) for number designations to be employed on original pages added subsequent to the filing of an original tariff.

(4) Each page shall show the page designation in the upper corner opposite the binding edge corner. When the tariff is one published on both sides of the sheet, this would be the upper right-hand corner on one page and the upper left-hand corner for the next higher numbered page published on the reverse side. The page designation of a tariff published on both sides of the sheet may be shown in both upper corners of each page. See § 1310.10(d) (rule 10) as to cancellation of prior issues of the same page, and § 1310.3(b)(2) (rule 3) for placement of the ICC number.

* * * * *

(h) *Items and numbering systems.*

(1) The Commission believes that simplicity would be better served by a reduction in the number of different categories of provisions, each with its own numbering system. Items, with item numbers, should be employed to the greatest extent possible. Rule numbers and index numbers may not be used for tariff provisions, except that tariffs filed prior to the conformity date of this part which contain such numbers shall continue the same system in subsequent amendments for the life of such tariffs. (Section numbers, class-rate table numbers, and note numbers, and numbers or letters within an item, may be used.) When arranging the contents, items should be relatively limited in size for convenience in handling amendments, but each essentially complete in itself. An original tariff should allow sufficient unused numbers within each numerical sequence used therein so that the use of other than whole numbers will be unnecessary when assigning numbers to future provisions. All numbering systems shall employ Arabic numerals.

* * * * *

In § 1310.5, paragraph (b) is amended to read as follows:

§ 1310.5 Title page of original tariffs (rule 5).

* * * * *

(b) *ICC number and cancellation notice.* In the upper righthand corner shall be shown the tariff's ICC number. Immediately thereunder shall be shown the ICC (MF-ICC) number of each tariff, if any, canceled thereby, except that if the cancellations are numerous, the ICC (MF-ICC) numbers of the tariffs canceled may be shown immediately preceding the table of contents, and a reference to that cancellation notice shown under the ICC number on the title page.

* * * * *

In § 1310.6 paragraphs (f)(3)(iii), and (h)(1) are hereby amended to read as follows:

§ 1310.6 Contents of tariff (rule 6).

(See §§ 1310.14, 1310.22, 1310.24, 1310.25, 1310.27, and 1310.28 (rules 14, 22, 24, 25, 27, and 28) for provisions which may be filed on less than 30 days' notice.)

* * * * *

(f) * * *

(3) * * *

(iii) If a tariff names a rate from or to a state or county without specifying the points in such state or county, a reference to the number of the item (or page) containing such rate shall be shown at the beginning of or in its proper alphabetical sequence in the appropriate index.

* * * * *

(h) * * *

(1) Except where the regulations in this part permit omission of reference to certain kinds of governing tariffs, each tariff governed in any way by others must provide a list of such tariffs, arranged in columnar form, the columns headed as follows:

Title or Kind of Tariff
Issuing Agent or Carrier
Tariff No.
ICC (MF-ICC) No.
For Special Provisions See_____

Each such governing tariff shall be separately listed, the information called for by the headings fully explained, and the table headed by a provision reading:

This tariff is governed, except as otherwise provided herein, by the following described tariffs, and by supplements or loose-leaf page amendments thereto or successive issues thereof:

If there are no separate items explaining or further qualifying the application of any such particular tariff, the last column should be omitted.

* * * * *

In § 1310.7, paragraphs (a)(9) and (p)(2) are amended to read and paragraph (r) is added as follows, and in paragraph (k) add the hyphenated word "One-factor" before the word "Through", in the caption; in the next line, after the word "joint", add the hyphenated word, "one-factor".

§ 1310.7 Statement of rates (rule 7).

(a) * * *

(9) Joint rates having intermodal application only over motor and water carriers, and rates restricted to apply only on shipments having a prior or subsequent movement by water carriers may be stated in cents, in dollars, or in dollars and cents per cubic foot or other space-occupied basis, provided it is clearly and explicitly stated how the determination is made.

* * * * *

(k) [Amended]

* * * * *

(p) * * *

(2) Any tariff naming class rates may provide for the application of such rates from or to unnamed points by including the rule set forth in subparagraph (4) of this paragraph. Before a tariff may include the rule, the tariff must provide, as a minimum, class rates for all points within the territorial coverage thereof which the carriers or carriers participating in the rule have authority to serve which are shown as points on the official state maps issued by the particular state authorities or on commercial maps equivalent thereto.

* * * * *

(r) *Statement required when classification basis exceeded.* It is a principle of longstanding that classification classes or ratings and rules, together with the class rates governed thereby, generally provide the highest rates and charges which an article should bear. It follows that any tariff provision (e.g. exceptions rating, commodity rate, charge, rule, et cetera) the application of which in any case would result in a higher charge than otherwise would result from application of the classification class or rating and rules to the class rates would require special justification. Therefore, accompanying the tender to the Commission of a tariff, supplement, or loose-leaf page which names such a tariff provision, there shall be a clear statement by the publishing motor common carrier or agent of the justification relied upon to warrant the higher charges. Any such publication not accompanied by a statement of justification shall be subject to rejection. This paragraph does not apply (1) in connection with minimum charges for small shipments (provided they are based on weights not over 500 pounds), (2) with respect to publication of rates and provisions for a special service which under the tariff the shipper has the option of using by requesting it in writing (e.g., expedited service, exclusive use of vehicle, et cetera), and (3) where no class rates are maintained by the carrier for whose account the class or rating, commodity rate or rule is published. Nor does this rule serve to prohibit publications of class rate arbitraries under authority of section 1310.7 (b) of this part. (See §§ 1310.7(h)(3) and 1310.13 for provisions governing the alternation of commodity rates with class rates, and see § 110.17(c) prohibiting alternation of exceptions with the classification.)

* * * * *

In § 1310.9, paragraphs (b)(1) and (d)(2) are amended to read as follows:

§ 1310.9 Supplements (rule 9).

(See §§ 1310.14, 1310.22, 1310.24, 1310.25, 1310.27, and 1310.28 (rules 14, 22, 24, 25, 27, and 28) for provisions which may be filed on less than 30 days' notice.)

* * * * *

(b) * * *

(1) Every supplement of ten or more pages issued to a bound tariff, except blanket supplements and general increase or reduction conversion table supplements, shall provide near the front of the supplement a cumulative list of all items and numbered units that have been added, canceled, or changed by supplement together with reference to the number of the supplement where each is last shown.

* * * * *

(d) * * *

(2) Except as otherwise authorized, the following is the maximum number of supplements to a tariff that may be in effect at any time and the maximum number of pages they may contain.

Number of pages in original tariff, including title page, inclusive	Number of effective supplements permitted	Maximum number of pages effective supplements may contain
1 to 2	None	None.
3 to 4	1[1]	2.
5 to 8	1	4.
9 to 16	2	8.
17 to 80	2, plus 2 additional supplements of not to exceed 4 pages each.	Not to exceed 50 pct of the number of pages in the original tariff.
81 to 200	3, plus 2 additional supplements of not to exceed 4 pages each.	Do.
201 to 500	4, plus 2 additional supplements of not to exceed 4 pages each.	Do.
501 to 800	5, plus 1 additional supplement of not to exceed 4 pages.	Do.
801 or more	6, plus 1 additional supplement of not to exceed 4 pages.	Do.

[1] The tariff of 3 or 4 pages, if supplemented hereunder, must be canceled within 180 days of the effective date of such supplement.

* * * * *

In § 1310.10, paragraphs (b)(3), (d)(9), (g)(2), and (h) are amended to read and paragraph (j)(13) is added as follows:

§ 1310.10 Amendments (rule 10).

(See §§ 1310.14, 1310.22, 1310.24, 1310.25, 1310.27, and 1310.28 (rules 14, 22, 24, 25, 27, and 28) for provisions which may be filed on less than 30 days' notice.)

* * * * *

(b) * * *

(3) The list of participating carriers published in a loose-leaf tariff may be amended only by republication of the page upon which it appears. Additions, cancellations, and changes shall be indicated as such. The names of canceled carriers shall be republished on a separate page or on pages at the end of the participating carrier list, indicating when the cancellation was first effective, until all provisions in the tariff referring specifically to the canceled carrier have been removed from the effective pages, after which the cancellation listing of the carrier may be omitted. Reference shall be made on the page or pages containing the participating carrier list to the page or pages containing the list of canceled carriers.

* * * * *

(d) * * *

(9) The number of sheets containing thereon pages (including check sheets) canceled from the tariff may not exceed six times the number of sheets containing effective tariff matter (including check sheets). Sheets containing only pages on which no tariff matter is printed except for notations such as "Intentionally left blank," "Tariff provisions canceled. This page series discontinued," or "Rates canceled," or except for provisions necessary to accommodate the format of the tariff such as the page designation, the ICC designation, the name of the carrier or agent, the name of the issuing party, and the address of the carrier or agent, are not included in the count of sheets containing effective matter within the meaning of this rule. The tariff must be canceled by the time this maximum ratio is reached.

* * * * *

(g) * * *

(2) The reissued matter shall be uniformly designated by a number within a square (or an authorized substitute—see § 1310.6(n)(7) (rule 6), the number corresponding to the number of the supplement from which the matter is reissued, and the explanation thereof must appear in the supplement in which the reference mark is used. The explanation must identify the matter as reissued and either (i) specify the date upon which the supplement became effective (for example, "[1] Reissued from Supplement No. 1, effective [here show effective date of supplement]" or (ii) be published in substantially the following manner:

□ (with number enclosed) Reissued from supplement bearing the number enclosed within the square. See item [here insert number of item referred to, explaining the method of denoting reissued matter in supplements].

If the latter method is used, the rules section of the tariff shall contain an item (the number of which will be inserted in the explanation of the reference mark denoting matter reissued from a prior supplement) reading substantially as follows:

METHOD OF DENOTING REISSUED MATTER IN SUPPLEMENTS

Matter brought forward without change from a supplement being canceled into another supplement will either be designated as reissued (i) by a complete statement to that effect in direct connection with the reissued matter, indicating the number of the supplement in which the reissued matter first appeared in its currently effective form, or (ii) by a reference mark [here show □, □ or □, which ever single type is adopted in the tariff] enclosing a number, the number being that of the supplement in which the reissued matter first appeared in its currently effective form. To determine its original effective date, consult the supplement in which the reissued matter first became effective.

* * * * *

(h) *Change in the explanation of reference marks and notes.* A change in the explanation of a general reference mark or general note (a reference mark or note adopted for general and continued use in the tariff—see §1310.6(n)(2) (rule 6)) governing tariff provisions published elsewhere in the tariff or prior supplement should not require the tariff user to conduct a search for its use in order to determine the effect. Therefore, any change in or cancellation of an explanation of such a reference mark or such a note, or change in or cancellation of an item or other provisions such explanation refers to in turn, shall be accompanied by

(1) A republication of all tariff provisions in the tariff as amended which employ the use of the reference mark or note;

(2) The publication of the number of each item or page (positioned with the changed or canceled explanation or changed or canceled tariff provision referred to in turn by the explanation), identifying the supplement, if any, containing tariff provisions which refer to the reference mark or note; or

(3) The publication of a notation (positioned with the changed or canceled explanation or changed or canceled tariff provision referred to in turn by the explanation) explaining the change and the general effect the change will have on the provisions employing the mark or note. Sufficient details must be published to clearly indicate the intent of the change. For example, if a reference explained as "minimum weight 40,000 pounds" is changed to "minimum weight 50,000 pounds," the notation would include information to the effect that the change results in increasing the minimum weight by 10,000 pounds for each truckload and therefore would substantially increase freight charges on all shipments which move under tariff provisions subject to the change.

Also, each page containing such a change or cancellation shall bear a notation at the top to the effect that the page contains a changed or canceled reference mark or note, or changed or canceled tariff provision referred to by the mark or note. This paragraph shall not apply to the explanation of the reference mark (E) or (*E*) used in referring to an item showing expiration dates.

* * * * *

(j) * * *

(13) Conversion supplements and companion supplements or loose-leaf pages forming part of the same general adjustment as the conversion supplements may change tariff matter which will not have been in effect for 30 days. Subsequent supplements or loose-leaf pages filed prior to the effective date of the conversion supplement may change or cancel on lawful notice matter changed by the conversion supplement

V 42 171 SEP 2 77 UMI

before the change in the conversion supplement has been in effect for 30 days.

In § 1310.11, paragraphs (a)(9) and (b)(5) are amended to read as follows:

§ 1310.11 Transfer or cancellation of provisions (rule 11).

(a) • • •

(9) Transfer of provisions from an agent's tariff to the tariff of a carrier. A carrier's tariff may not direct the cancellation of a tariff, either in whole or in part, of an agent. Transfer may only be effected by cancellation by the agent and publication by the carrier, each as to its own issue. A common effective date for both actions shall be arranged to prevent conflict in rates or absence of any effective rates. The tariffs shall refer to each other in the manner and to the extent provided in § 1310.11(b)(6) of this part.

(b) • • •

(5) Amend the tariff to be canceled in part in the regular manner (by supplement if a bound tariff, or by revised pages if a loose-leaf tariff), making specific cancellations of provisions. If a bound tariff, and the amount of tariff matter it would be necessary to publish to comply would require more than four complete pages (including the title page), or if a loose-leaf tariff, and the reissuance of more than one-fourth the effective pages would be required to comply, the cancellation may be effected by a statement for the purpose published in a special supplement issued to the tariff. The statement shall specifically identify the material canceled (numbers of the items, units, tables, sections, pages, etc.) and state what provisions in what tariffs will thereafter apply in the absence thereof. The supplement must be permitted to remain in effect for the life of the tariff, or in the case of loose-leaf tariffs until all the affected pages have been reissued (such reissued pages must refer to the supplement action). A supplement to a bound tariff may contain both cancellation in the regular manner and cancellation by statement. A supplement containing only matter necessary for the partial cancellation is exempt from supplemental limit provisions of this part. In bound tariffs, any reissue in a subsequent supplement of an item or unit affected by the statement form of cancellation shall specifically cancel the prior item or unit "as amended by" the canceling supplement.

• • • • •

In § 1310.14, paragraph (d) is amended to read as follows:

§ 1310.14 Suspended matter (rule 14).

• • • • •

(d) *Suspended matter reissued before supplement announcing suspension is issued.* If a bound tariff and if, prior to the filing of the supplement announcing suspension, a carrier or agent files a later supplement which contains as reissues the matter suspended in the previous supplement, the supplement announcing the suspension shall specifically by statement (not reissue) cancel from the later supplement such reissued matter. Such statement of cancellation must itself have an effective date, and such date must be the same as the date upon which the reissued matter is indicated to become effective in the later supplement, giving not less than 10 days' notice. As used in this paragraph, "reissued matter" means matter republished without change and designated or referenced as reissued matter in the manner required by § 1310.10(g) (rule 10). Items or other tariff provisions which direct the cancellation of a previous showing of such matter do not constitute reissued matter which the suspension supplement may cancel, even though no actual change in the provision is made. Tardiness in filing any supplement announcing a suspension may result in the rejection of the later supplement which cancels the suspended matter.

• • • • •

In § 1310.17, paragraph (d) is amended to read as follows:

§ 1310.17 Classification, exceptions, rules, and dangerous articles tariffs; precedence of class rates (rule 17).

• • • • •

(d) *Rules tariffs.* Governing rules and similar provisions may be published in a separate tariff filed in the name of an agent or a carrier. As to any one rate tariff published by a carrier as its own issue there may not be more than one governing rules tariff of its own issue and not more than one governing rules tariff of its agent's issue. As to any one rate tariff published by an agent there may not be more than one governing rules tariff, which must be the issue of that agent. A carrier may not publish in its own issue rules which cover the same service, practice, or privilege provided for its account in the tariff of its agent. Either the agent's tariff rule must indicate nonapplication for its account, or the carrier's tariff rule must be indicated as an exception to the rule of its agent and clearly identify what rule. An exception, when taken, must indicate it is to the complete rule, section, or other identifiable unit affected, and an exception must be a complete rule, section, or other identifiable unit in itself. Every effort should be made to republish entire rules that are relatively small or that name relatively few exceptions. For the purposes of this paragraph, the following tariffs shall not be considered rules tariffs.

1. Tariffs containing exclusively rules and charges applying to terminal and other services and other matters covered by § 1310.15 (rule 15).

2. Classification tariffs authorized by paragraph (a) of this section.

3. Classification exceptions tariffs authorized by paragraph (c) of this section, provided they do not contain rules or other provisions authorized to be included by § 1310.17(c)(4) (rule 17).

4. Rate basis books authorized by § 1310.18 (rule 18).

5. Tariffs containing rules and regulations governing the acceptance and transportation of dangerous articles (hazardous materials).

6. Substituted freight service directories authorized by § 1310.30 (rule 30).

7. Tariffs confined to providing basis numbers (by intersection of headline and sideline points) for determination of class rates or column commodity rates in other tariffs.

8. Tariffs authorized by § 1310.19 (rule 19) of this part listing carriers' operating authorities.

9. Tariffs containing exclusively rules and practices governing the investigation and disposition of loss and damage claims.

10. Distance guides authorized by § 1310.16 (rule 16).

• • • • •

In § 1310.26, paragraphs (g)(5) and (i) are amended to read as follows:

§ 1310.26 Applications for special tariff authority.

• • • • •

(g) • • •

(5) Except in connection with an application to correct clerical, typographical, or otherwise obvious errors in publication, the application shall state whether or not such carriers have been advised of the proposed provisions and whether or not they have been advised that it is proposed to file such provisions on less (or on not less) than 30 days' notice. If competitive carriers have expressed their views in regard to the proposed provisions, a brief statement of their views shall be given.

• • • • •

(i) *Confirmatory application.* When special tariff authority is requested by telegram because of an emergency which does not permit timely filing, the telegram must state all pertinent facts required in this section and include a statement that a written application and filing fee is being sent. An application (with the required fee) confirming the request shall be transmitted as soon as possible after the telegraphic request, and, in any event, not later than noon of the next working day. (The application and fee must be transmitted regardless of whether the request is granted or denied.)

• • • • •

In § 1310.27, paragraph (a) is amended to read as follows:

§ 1310.27 Concurrences or powers of attorney—transfer of agent (rule 27).

(a) *Different situations.* The construction, filing, cancellation or revocation of powers of attorney or concurrences, and the construction and filing of publications when one agent takes over another involve many different kinds of situations each of which requires different procedures to be followed. Below are summarized many kinds of situations together with a reference in each instance to the paragraph in this section that contains the regulations governing that situation.

(1) To authorize an individual to act as agent, see paragraphs (b)(1) and (b)(2) of this section.

(2) To authorize a corporation to act as agent, see paragraphs (b)(1) and (b)(3) of this section.

(3) To limit the authority of a power of attorney, see paragraphs (b)(4) and (b)(5) of this section.

(4) To give concurrence in a particular tariff of a carrier, see paragraphs (c)(1) and (c)(2) of this section.

(5) To give general concurrence to a carrier, see paragraphs (c)(1) and (c)(3) of this section.

(6) When the principal agent dies or is disabled, see paragraphs (j), (k)(2), (k)(3), and (l) of this section.

(7) When the alternate agent dies or is disabled, see paragraphs (k)(2), (k)(3), and (l) of this section.

(8) When an agent takes over another agent or a corporation as agent changes its name, see paragraphs (k)(1), (k)(3), and (l) of this section.

(9) To cancel a power of attorney or concurrence, see paragraph (o) of this section.

(10) To revoke a power of attorney or concurrence, see paragraph (p) of this section. Instruments already on file October 5, 1978, prepared on the previously prescribed MFXA and MFXC forms are not required to be reissued effective before October 5, 1983, solely to convert to the new forms. Nevertheless, carriers should act to replace them as soon as possible, but in any event before such date.

• • • • •

[FR Doc.77-25737 Filed 9-1-77;8:45 am]

Title 50—Wildlife and Fisheries

CHAPTER I—UNITED STATES FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 26—PUBLIC ENTRY AND USE

Use of Roads and Trails Within Charles M. Russell National Wildlife Range and UL Bend National Wildlife Refuge, Mont.

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that all vehicular traffic within the Charles M. Russell National Wildlife Range and the UL Bend National Wildlife Refuge will be restricted to established roads and trails not closed to the general public.

DATES: Year around (September 1, 1977 through August 31, 1978).

FOR FURTHER INFORMATION CONTACT:

Refuge Manager, Charles M. Russell National Wildlife Range, P.O. Box 110, Lewistown, Mont. 59457; telephone: 406–538–8707.

SUPPLEMENTARY INFORMATION:

§ 26.34 Special regulations concerning public access, use and recreation for individual wildlife refuges.

Entrance to, travel on, and the exit from the Charles M. Russell National Wildlife Range and the UL Bend National Wildlife Refuge is permitted only on well-established roads and trails not closed to the general public. All off-road vehicle use is prohibited including the retrieval of downed game.

1. An "established" road or trail should be regarded and identified as one which:

(a) Appears to be permanent; and

(b) Is wide enough to accommodate the vehicle being used upon it; and

(c) Is either a road or trail which has been excavated, graded or constructed or one which has been so habitually used by vehicular, animal or pedestrian traffic that the surface of the ground has been permanently displaced or eroded and is substantially free of grass or other vegetation.

2. Tracks or trails which have become overgrown with vegetation are not established roads or trails.

Boundaries of these wildlife refuge areas are delineated on maps available at the refuge headquarters at Lewistown, Mont. and from the office of the Area Manager, U.S. Fish and Wildlife Service, Federal Building, 316 North 26th Street, Billings, Mont. 59101.

The provisions of this special regulation supplement the regulations which govern use of roads and trails on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 26. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

LARRY L. CALVERT,
Refuge Manager, Charles M. Russell National Wildlife Range.

AUGUST 18, 1977.

[FR Doc.77-25610 Filed 9-1-77;8:45 am]

PART 26—PUBLIC ENTRY AND USE

Opening of Charles M. Russell National Wildlife Range and UL Bend National Wildlife Refuge, Mont., to Camping

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to camping within both the Charles M. Russell National Wildlife Range and the UL Bend National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide addition recreational opportunity to the public.

DATES: Year around (September 1, 1977 through August 31, 1978).

FOR FURTHER INFORMATION CONTACT:

Refuge Manager, Charles M. Russell National Wildlife Range, P.O. Box 110, Lewistown, Mont. 59457; telephone: 406–538–8707.

SUPPLEMENTARY INFORMATION:

§ 26.34 Special regulations concerning public access, use and recreation for individual national wildlife refuges.

Camping on the Charles M. Russell National Wildlife Range is permitted year-round. All forms of camping are limited to 14 days within any 30-day period, except in State parks where State regulations apply. These special regulation areas are delineated on maps available at refuge headquarters, Lewistown, Mont., and from the office of the Area Manager, U.S. Fish and Wildlife Service, Federal Building, 316 North 26th Street, Billings, Mont. 59101.

The provisions of this special regulation supplement the regulations which govern public access, use, and recreation on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 26. The Public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

LARRY L. CALVERT,
Refuge Manager, Charles M. Russell National Wildlife Range.

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Parts 948 and 980]

IRISH POTATOES GROWN IN COLORADO—AREA NO. 2, VEGETABLES: IMPORT REGULATIONS

Proposed Handling Regulation

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed regulation would require fresh market shipments of potatoes grown in Colorado—Area No. 2 to be inspected and meet minimum grade, size and maturity requirements. The regulation should promote orderly marketing of such potatoes by keeping less desirable qualities and sizes from being shipped to consumers.

DATE: Comments due September 19, 1977.

ADDRESSES: Comments should be sent to: Hearing Clerk, Room 1077, South Building, U.S. Department of Agriculture, Washington, D.C. 20250. Two copies of all written comments shall be submitted, and they will be made available for public inspection at the office of the Hearing Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, AMS, U.S. Department of Agriculture, Washington, D.C. 20250. Telephone: (202) 447-3545.

SUPPLEMENTARY INFORMATION: Marketing Agreement No. 97 and Order No. 948, both as amended, regulate the handling of potatoes grown in designated counties of Colorado Area No. 2. It is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674). The Colorado Area No. 2 Potato Committee, established under the order, is responsible for its local administration.

This notice is based upon recommendations made by the committee at its public meeting in Monte Vista, Colo., on August 18, 1977.

The grade, size, maturity and inspection requirements recommended herein are similar to those which have been issued during past seasons. They are necessary to prevent potatoes of low quality or undesirable sizes from being distributed in fresh market channels. They will also provide consumers with good quality potatoes consistent with the overall quality of the crop and standardize the quality of the potatoes shipped from the production area in order to provide the consumer with a more acceptable product.

The proposed requirements this year would be U.S. No. 2 or better grade, with a minimum size of 2 inches for round varieties, 1⅞ inches for long varieties and 1½ inches for export. Size B may be shipped if U.S. No. 1, or better grade. Maturity requirements would be "moderately skinned" for all varieties, except that for the Russet Burbank and Red McClure varieties, any grade better than U.S. No. 2 must be no more than "slightly skinned." These maturity requirements would terminate on October 31, 1977.

Exceptions would be provided to certain of these requirements to recognize special situations in which such requirements would be inappropriate or unreasonable.

Shipments would be permitted to certain special purpose outlets without regard to the grade, size, maturity and inspection requirements, provided that safeguards are met to prevent such potatoes from reaching unauthorized outlets. Seed would be exempted because requirements for this outlet differ greatly from those for fresh market. Shipments for use as livestock feed would likewise be exempt. Since no purpose would be served by regulating potatoes used for charity purposes, such shipments would be exempt. Also potatoes for most processing uses are exempt under the legislative authority for this part.

Requirements for export shipments differ from those for domestic markets. While the standard quality requirements are desired in foreign markets, smaller sizes are more acceptable. Therefore, different requirements for export shipments are proposed.

The proposal is as follows:

§ 948.378 Handling regulation.

During the period September 26, 1977, through June 30, 1978, no person shall handle any lot of potatoes grown in Area No. 2 unless such potatoes meet the requirements of paragraphs (a), (b), and (c) of this section, or unless such potatoes are handled in accordance with paragraphs (d), (e), or (f) of this section. The maturity requirements specified in paragraph (b) shall terminate October 31, 1977, at 1977, at 11:59 p.m. M.S.T.

(a) *Minimum grade and size requirements.* (1) *Round varieties.* U.S. No. 2, or better grade, 2 inches minimum diameter.

(2) *Long varieties.* U.S. No. 2, or better grade, 1⅞ inches minimum diameter.

(3) *All varieties.* Size B, if U.S. No. 1, or better grade.

(4) *All varieties for export.* 1½ inches minimum diameter.

(b) *Maturity (skinning) requirements.* (1) *Russet Burbank and Red McClure varieties.* For U.S. No. 2 grade not more than "moderately skinned" and for other grades not more than "slightly skinned."

(2) *All other varieties.* Not more than "moderately skinned."

(c) *Inspection.* (1) No handler shall handle any potatoes for which inspection is required unless an appropriate inspection certificate has been issued with respect thereto and the certificate is valid at the time of shipment. For purposes of operation under this part it is hereby determined pursuant to paragraph (d) of § 948.40, that each inspection certificate shall be valid for a period not to exceed 5 days following the date of inspection as shown on the inspection certificate.

(2) No handler may transport or cause the transportation by motor vehicle of any shipment of potatoes for which an inspection certificate is required unless each shipment is accompanied by a copy of the inspection certificate applicable thereto and the copy is made available for examination at any time upon request.

(d) *Special purpose shipments.* (1) The grade, size, maturity and inspection requirements of paragraphs (a), (b) and (c) of this section and the assessment requirements of this part shall not be applicable to shipments of potatoes for:

(i) Livestock feed;

(ii) Relief or charity; or

(iii) Canning, freezing, and "other processing" as hereinafter defined.

(2) The grade, size, maturity and inspection requirements of paragraphs (a), (b) and (c) of this section shall not be applicable to shipments of seed pursuant to § 948.6 but such shipments shall be subject to assessments.

(e) *Safeguards.* Each handler of potatoes which do not meet the grade, size, and maturity requirements of paragraphs (a) and (b) of this section and which are handled pursuant to paragraph (d) for any of the special purposes set forth therein shall:

(1) Prior to handling, apply for and obtain a Certificate of Privilege from the committee;

(2) Furnish the committee such reports and documents as requested, including certification by the buyer or receiver as to the use of such potatoes; and

(3) Bill each shipment directly to the applicable processor or receiver.

(f) *Minimum quantity.* For purposes of regulation under this part, each person may handle up to but not to exceed 1,000 pounds of potatoes without

regard to the requirements of paragraphs (a), (b) and (c) of this section, but this exception shall not apply to any shipment which exceeds 1,000 pounds of potatoes.

(g) *Definitions.* The terms "U.S. No. 1," "U.S. No. 2," "Size B," "slightly skinned," and "moderately skinned" shall have the same meaning as when used in the U.S. Standards for Potatoes (7 CFR 51.1540-51.1566), including the tolerances set forth therein. The term "other processing" has the same meaning as the term appearing in the act and includes, but is not restricted to, potatoes for dehydration, chips, shoestrings, starch, and flour. It includes only that preparation of potatoes for market which involves the application of heat or cold to such an extent that the natural form of stability of the commodity undergoes a substantial change. The act of peeling, cooling, slicing, dicing, or applying material to prevent oxidation does not constitute "other processing." Other terms used in this section shall have the same meaning as when used in Marketing Agreement No. 97, as amended, and this part.

(h) *Applicability to imports.* Pursuant to § 8e of the act and § 980.1. Import regulations (7 CFR 980.1), Irish potatoes of the red skinned round type, except certified seed potatoes, imported into the United States during the period September 26, 1977, through June 30, 1978, shall meet the grade, size, and quality requirements specified in paragraph (a) of this section, and during the period September 26 through October 31, 1977, shall be not more than "moderately skinned."

Dated: August 30, 1977.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[7 CFR Part 1133]

MILK IN THE INLAND EMPIRE MARKETING AREA

Termination of Proceeding on Proposed Suspension of Certain Provisions of the Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Termination of proceeding on proposed suspension of rules.

SUMMARY: This action terminates a proceeding on a proposal to suspend certain provisions of the Inland Empire milk marketing order. The provisions relate to how much milk not needed for fluid (bottling) use may be moved directly from farms to manufacturing plants and still be priced under the order. Suspension of the provision, for the months of September, October and November 1977, was requested by a cooperative association to help it continue the association of members' milk with the order.

Several cooperative associations and a number of dairy farmers filed comments opposing the proposed suspension. Because of the conflicting viewpoints by interested parties, no action to change the order is being taken until the matter can be explored in depth at a public hearing.

FOR FURTHER INFORMATION CONTACT:

Maurice M. Martin, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C., 20250 (202-447-7183).

SUPPLEMENTARY INFORMATION: Prior document in this proceeding: Notice of Proposed Suspension of Certain Provisions, issued August 4, 1977; published August 9, 1977 (42 FR 40216).

Notice is hereby given pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), of the termination of the proceeding as set forth in a notice of a proposal to suspend certain provisions of the order regulating the handling of milk in the Inland Empire marketing area. The aforesaid notice of proposed suspension was issued August 4, 1977 (42 FR 40216). Interested persons were invited to submit views, data or arguments to the Hearing Clerk not later than August 18, 1977.

The provisions that were proposed to be suspended for the months of September, October and November 1977 are as follows:

In § 1133.13(c) (1) and (2), the words "50 percent in any of the months of September through March, and", and the words "in any of the months of April through August".

STATEMENT OF CONSIDERATION

The proposed suspension would have increased the limit on the amount of producer milk that a cooperative association or other handlers may divert from pool plants to nonpool plants during the months of September through November 1977. In the case of a cooperative, the limit would be increased from 50 percent to 70 percent of its total member milk received at all pool plants or diverted therefrom. For the operator of a pool plant, the higher 70 percent limit would apply to the milk received at or diverted from such pool plant from producers who are not members of a cooperative that has diverted milk. The suspension was requested by a cooperative association that supplies the market with a substantial part of its fluid needs and handles much of the market's reserve milk supplies.

The cooperative contends that a substantial increase in milk production by producers supplying the market coupled with a decline in fluid milk sales make it necessary for the cooperative to divert to nonpool plants more reserve milk supplies beginning in September than normally. Without the suspension, the cooperative expects that some milk of its member producers who have regularly supplied the fluid market will be excluded from the pool in September. The cooperative asked for the suspension on an interim basis pending an opportunity to review the diversion provisions at a hearing.

A number of dairy farmers individually and several cooperative associations representing a substantial number of producers on the market submitted written views opposing the proposed suspension.

The principal objection to the proposed relaxation of allowable diversions for the three-month period was the concern that additional unneeded Grade A milk supplies would be pooled that would further depress producer returns. It was pointed out by some dairy farmers who filed views on this matter that because of recent drought conditions in the area, producers have been faced with higher feed costs. In this connection, it was contended that the additional milk that would be pooled through a relaxation of the diversion allowance would be from areas generally outside of the market's normal supply area and from dairy farmers who have been unaffected by drought conditions. This situation, they suggest, would impose additional hardships on producers regularly associated with the fluid market.

In view of the conflicting viewpoints among interested parties, it is concluded that the requested suspension should not be implemented on the basis of this proceeding. Instead, the matter should be considered at a public hearing where the issue may be explored in depth: Accordingly, the proceeding begun in this matter on August 4, 1977, is hereby terminated.

A notice of hearing is being issued concurrently with this termination of proceeding.

Signed at Washington, D.C., on August 29, 1977.

WILLIAM T. MANLEY,
Deputy Administrator, Program Operations.

[Docket No. AO-275-A29]

MILK IN INLAND EMPIRE MARKETING AREA

Hearing on Proposed Amendments To Tentative Marketing Agreement and Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Public hearing on proposed rulemaking.

SUMMARY: The hearing is being held to consider a dairy farmer cooperative's proposal to temporarily amend certain provisions of the Inland Empire milk marketing order. The provisions proposed to be amended relate to how much milk not needed for fluid (bottling) use may be moved directly from farms to manufacturing plants and still be priced under the order. The cooperative association contends that the requested order changes are needed to help it continue the association of member milk with the

UMI

FEDERAL REGISTER, VOL. 42, NO. 171—FRIDAY, SEPTEMBER 2, 1977

order during the next several months. The proposed changes would apply September, October and November 1977.

DATE: September 15, 1977,

ADDRESS: Ramada Inn, Spokane International Airport, Spokane, Wash.

FOR FURTHER INFORMATION CONTACT:

Maurice M. Martin, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250 (202–447–7183).

SUPPLEMENTAL INFORMATION: Notice is hereby given of a public hearing to be held at the Ramada Inn, Spokane International Airport, Spokane, Wash., beginning at 9:30 a.m., local time, on September 15, 1977, with respect to proposed amendments to the tentative marketing agreement and to the order, regulating the handling of milk in the Inland Empire marketing area.

The hearing is called pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900).

The purpose of the hearing is to receive evidence with respect to the economic and marketing conditions which relate to the proposed amendments, hereinafter set forth, and any appropriate modifications thereof, to the tentative marketing agreement and to the order.

Evidence will be taken to determine whether emergency marketing conditions exist that would warrant omission of a recommended decision under the rules of practice and procedure (7 CFR Part 900.12(d)) with respect to proposal No. 1. Evidence also will be taken to determine whether, in the alternative, any such emergency conditions would warrant the use of a temporary suspension procedure to effectuate prompt implementation of any action found, on the basis of the testimony and evidence, to be imperative.

The proposed amendments, set forth below, have not received the approval of the Secretary of Agriculture.

PROPOSED BY NORTHWEST DAIRYMEN'S ASSOCIATION

PROPOSAL 1

Amend § 1133.13(c)(1) and (2) by deleting the words "50 percent in any of the months of September through March, and", and the words "in any of the months of April through August,", to be applicable only for the months of September through November 1977.

PROPOSED BY THE DAIRY DIVISION, AGRICULTURAL MARKETING SERVICE

PROPOSAL 2

Make such changes as may be necessary to make the entire marketing agreement and the order conform with any amendments thereto that may result from this hearing.

Copies of this notice of hearing and the order may be procured from the Market Administrator, James A. Burger, West 1028 Rosewood Avenue, P.O. Box 7504, Spokane, Wash., 99208; or from the Hearing Clerk, Room 1077–South, United States Department of Agriculture, Washington, D.C. 20250 or may be there inspected.

Signed at Washington, D.C., on August 29, 1977.

WILLIAM T. MANLEY,
Deputy Administrator,
Program Operations.

FEDERAL ENERGY ADMINISTRATION

[10 CFR Part 205]

OIL IMPORT REGULATIONS

Amendments to Guidelines for Granting Exception Relief

AGENCY: Federal Energy Administration.

ACTION: Proposed rulemaking.

SUMMARY: The Federal Energy Administration (FEA) hereby gives notice of a proposal to amend the Guidelines for granting exception relief from Part 213 (Oil Import Regulations). Under this proposal, persons authorized to import residual fuel oil into District I on a fee-exempt basis pursuant to an historical allocation, will be exempt from fees with respect to all of their projected requirements for the current allocation period. This amendment is intended to alleviate dislocations in the distribution of fee-exempt licenses which could impair competition among residual fuel oil marketers, and increase costs to consumers during the upcoming heating season. In addition, in order that the present exclusion of nonhistorical importers from the program not be exacerbated by this action, and thereby lead to economic hardship, FEA is also proposing to authorize all other persons desiring to import residual fuel oil into District I during the current allocation period to do so on a fee-exempt basis.

Written comments will be received and a public hearing will be held with respect to this proposal:

DATES: Comments by September 22, 1977, 4:30 p.m.; requests to speak by September 19, 1977, 4:30 p.m.; hearing date: September 28, 1977, 9:30 a.m.

ADDRESSES: Comments and requests to speak to: Executive Communications, Room 3317, Federal Energy Administration, Box OY, Washington, D.C. 20461; Hearing location: Room 2105, 2000 M Street NW., Washington, D.C. 20461.

FOR FURTHER INFORMATION CONTACT:

Sandra Sherman (Office of General Counsel), 12th & Pennsylvania Avenue NW., Room 5119, Washington, D.C. 20461 (202–566–9380).

SUPPLEMENTARY INFORMATION:

I. Background.
II. Proposed Amendment.
III. Comment Procedure.

I. BACKGROUND

Under Proclamation No. 3279, as amended, as implemented by § 213.15 of the Mandatory Oil Import Regulations, 1,450,000 barrels per day of residual fuel oil may be allocated, fee-exempt, during the curernt allocation period (May 1, 1977–April 30, 1978) to deepwater terminal operators in PAD District I who participated in the Mandatory Oil Import Program in 1973. Under the scheduled phase-out of fee exemptions in the Proclamation, this figure represents fifty percent (50%) of the level in effect on April 1, 1973, i.e., 2,900,000 barrels per day. This latter figure was the amount of residual fuel oil for which companies requested import authority under the quota system, which exempted imports of residual fuel oil from any limitation, and authorized firms to import amounts necessary to satisfy their contractual obligations. When the fee system replaced the quota system on May 1, 1973, this figure was carried over, subject to the scheduled phase-out, and initial fee-exempt allocations were distributed by reference to the amounts that firms had previously certified were required for their needs during the period from April 1, 1973, through March 31, 1974.

Thus, under the terms of the transition from the quota to the fee, the requirements of all terminal operators were initially satisfied, and they were in the same relative competitive position, as far as exemption from the fee was concerned. However, because some firms had substantially overestimated their needs and in light of changes in marketing patterns and expansions subsequent to 1973, and notwithstanding the uniform phase-out of the fee, the relative competitive position of these operators no longer bears any relation to their initial position, with some firms having much larger fee-exempt allocations than others in relation to their total needs. Thus, some firms have a surplus of fee-exempt licenses in the current allocation period, while other firms will be required to purchase varying amounts of fee-paid licenses at $0.63 per barrel in order to meet contractual obligations. FEA has calculated that for the current allocation period, the ratio of imports to allocations made pursuant to § 213.15 ranges from 0 percent to 130 percent. Similarly the ratio of projected 1977 imports to 1973 actual imports ranges from 0 percent to

366 percent. Hence, the maldistribution of fee-exempt licenses among District I importers is exceptionally severe. Thus, notwithstanding that there are sufficient fee-exempt allocations to meet all projected import requirements for the current allocation period (1.3 million barrels per day), the intention of the Program that fees begin to take effect when demand exceeds exemptions will be thwarted. In addition, since certain firms will be required to purchase licenses, it is probable that the cost to consumers will be increased, notwithstanding the availability of sufficient fee-exempt licenses, since the market price of residual fuel oil would be determined to a large extent by the highest-cost supplies. Under this assumption, of course, holders of fee-exempt licenses would realize a significantly higher return on their sales of residual fuel oil than those firms required to purchase licenses. Under any assumption as to residual fuel oil prices, holders of fee-exempt licenses would possess a real competitive advantage.

In order to alleviate the dislocation in fee exemptions which has developed since the fee system was established, FEA is proposing to amend its regulations as described below. This amendment also reflects FEA's concern that any remedial action taken by it not create inequities with respect to nonhistorical importers currently excluded from § 213.15, who would be ineligible for any benefits conferred on participating importers.

II. PROPOSED AMENDMENTS

Under the proposal, the "Guidelines for the Disposition of Requests for Exceptions from Part 213", Appendix II of Subpart D of Part 205, would be amended by adding Special Guideline I. This special guideline would provide that for the allocation period of May 1, 1977, through April 30, 1978, any person desiring to import residual fuel into District I would be deemed to be experiencing extreme hardship to the extent that his available fee-exempt licenses, if any, are less than his contractual obligations or other projected needs for that period. In order to meet those obligations and needs, such persons will be authorized to obtain additional fee-exempt licenses by certifying the amount of their incremental requirements to the Director of Oil Imports. The Director would issue the additional licenses except where he determines that issuance thereof would not be in accordance with the objectives of the Proclamation. Once issued, such licenses would be subject to the applicable provisions of Part 213, including the prohibition on sale or transfer of product licenses at § 213.22. Any licenses remaining unused at the end of the allocation period would expire. In order to facilitate this procedure, FEA is also proposing to amend § 205.52 to provide an excepton to the general rule that applications for relief from Part 213 be filed with the Office of Exceptions and Appeals. Applications for an allocation would, rather, be filed directly with the Director of Oil Imports.

Under the proposal, firms not currently eligible for allocations under § 213.15 will be able to receive allocations under Special Guideline I. This is intended to prevent any economic hardship that could result with respect to such persons if FEA's proposed remedial action were limited to historical importers.

It should be noted that FEA is continuing to evaluate the Mandatory Oil Import Program and may adopt further changes in the future. Thus, any allocations granted pursuant to the Guideline proposed in this notice, would be subject to future revocation or change.

III. COMMENT PROCEDURES

1. WRITTEN COMMENTS

Interested persons are invited to participate in this rulemaking by submitting data, views or arguments with respect to the proposal set forth in this notice. Comments should be identified on the outside envelope and on documents submitted with the designation "Special Guideline I: Residual Fuel Oil," Box OY. Fifteen copies should be submitted. All comments received by FEA will be available for public inspection in the FEA Reading Room, Room 2106, Federal Building, 12th and Pennsylvania Avenue NW., between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in writing, one copy only. The FEA reserves the right to determine the confidential status of the information or data and to treat it according to its determination.

2. PUBLIC HEARINGS

a. *Request procedure.* The times and places for the hearings are indicated in the dates section of this preamble. If necessary to present all testimony, the hearing will be continued to 9:30 a.m. of the next business day following the date of the hearing.

Any person who has an interest in the proposed amendments issued today, or who is a representative of a group or class of persons that has an interest in today's proposed amendments, may make a written request for an opportunity to make an oral presentation. The person making the request should be prepared to describe the interest concerned, if appropriate, to state why he or she is a proper representative of a group or class of persons that has such an interest, and to give a concise summary of the proposed oral presentation and a phone number where he or she may be contacted through the day before the hearing.

Each person selected to be heard will be so notified by the FEA before 4:30 p.m., e.d.s.t., September 21, 1977, and must submit 100 copies of his or her statement to Regulations Management, Room 2214, 2000 M Street, NW., Washington, D.C., before 4:30 p.m., e.d.s.t., September 27, 1977.

b. *Conduct of the hearings.* The FEA reserves the right to select the persons to be heard at these hearings, to schedule their respective presentations, and to establish the procedures governing the conduct of the hearings. The length of each presentation may be limited, based on the number of persons requesting to be heard.

An FEA official will be designated to preside at the hearings. These will not be judicial or evidentiary-type hearings. Questions may be asked only by those conducting the hearings, and there will be no cross-examination of persons presenting statements. Any decision made by the FEA with respect to the subject matter of the hearings will be based on all information available to the FEA. At the conclusion of all initial oral statements, each person who has made an oral statement will be given the opportunity, if he so desires, to make a rebuttal statement. The rebuttal statements will be given in the order in which the initial statements were made and will be subject to time limitations.

Any interested person may submit questions to be asked of any person making a statement at the hearings, to Executive Communications, FEA, before 4:30 p.m., e.d.s.t., September 22, 1977. Any person who wishes to ask a question at the hearings may submit the question, in writing, to the presiding officer. The FEA or the presiding officer, if the question is submitted at the hearing, will determine whether the question is relevant, and whether the time limitations permit it to be presented for answer.

Any further procedural rules needed for the proper conduct of the hearings will be announced by the presiding officer.

A transcript of the hearings will be made and the entire record of the hearings, including the transcript, will be retained by the FEA and made available for inspection at the Freedom of Information Office, Room 2107, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C., between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays. Any person may purchase a copy of the transcript from the reporter.

In the event that it become necessary for the FEA to cancel a hearing, FEA will make every effort to publish advance notice in the FEDERAL REGISTER of such cancellation. Moreover, FEA will notify all persons scheduled to testify at the hearing. However, it is not possible for FEA to give actual notice of cancellations or changes to persons not identified to FEA as participants. Accordingly, persons desiring to attend a hearing are advised to contact FEA on the last working day preceding the date of the hearing to confirm that it will be held as scheduled.

As required by section 7(c)(2) of the Federal Energy Administration Act of 1974, Pub. L. 93–275, a copy of this notice has been submitted to the Administrator of the Environmental Protection Agency for his comments concerning the impact of this proposal on the quality

UMI
V 42 171

UMI

FEDERAL REGISTER, VOL. 42, NO. 171—FRIDAY, SEPTEMBER 2, 1977

of the environment. The Administrator had no comments on this proposal.

NOTE.—The FEA has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

(Federal Energy Administration Act of 1974, Pub. L. 93-275, as amended, Pub. L. 94-163, as amended, Pub. L. 94-385; E.O. 11790, 39 FR 23185. Trade Expansion Act of 1962, Pub. L. 87-794, as amended; Proclamation No. 3279, as amended.)

In consideration of the foregoing, it is proposed to amend Part 205 of Chapter II of Title 10 of the Code of Federal Regulations as set forth below.

Issued in Washington, D.C., August 29, 1977.

ERIC J. FYGI,
Acting General Counsel,
Federal Energy Administration.

1. Section 205.52 is amended in paragraph (b) by adding a new subparagraph (3) to read as follows:

§ 205.52 Where to file.

* * * * * * *

(b) * * *

(3) All applications for exemption to § 213.15 by persons seeking to import residual fuel oil into District I in order to satisfy contractual obligations or other projected needs for the allocation period May 1, 1977, through April 30, 1978, shall be filed with the Director of Oil Imports in accordance with Special Guideline I in Appendix II of this subpart.

2. Appendix II of Subpart D of Part 205 is amended by adding a new Special Guideline I to read as follows:

SPECIAL GUIDELINES I

For the allocation period May 1, 1977 through April 30, 1978, any person desiring to import residual fuel oil into District I shall be deemed to be experiencing an exceptional hardship to the extent that his available fee-exempt licenses, if any, are less than his contractual obligations or other projected needs for that period. Any person so deemed may receive additional fee-exempt licenses in the amount required to meet such obligations or needs by certifying his additional requirements to the Director of Oil Imports. The Director shall issue a license for the amount certified, except where he determines that issuance thereof would not be in accordance with the objectives of Proclamation No. 3279, as amended.

Any license issued pursuant to this Special Guideline shall be subject to the limitations contained in § 213.15(e). Licenses which remain unused at the end of the allocation period shall expire at that time.

[10 CFR Part 430]

ENERGY CONSERVATION PROGRAM FOR APPLIANCES

Notice of Opportunity for Comment

AGENCY: Federal Energy Administration.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Energy Administration gives notice that it intends to develop test procedures for heat pumps and that interested persons may submit written data, views, and arguments with respect to the development of test procedures for heat pumps.

DATES: Comments by September 15, 1977, 4:30 p.m., e.d.t.

ADDRESSES: Comments to Room 3309, Federal Energy Administration, Box OI, Washington, D.C. 20461.

FOR FURTHER INFORMATION CONTACT:

James A. Smith, (Program Office), Room 207—Old Post Office Building, 12th & Pennsylvania Avenue NW., Washington, D.C. 20461 (202-566-4635).

Elliott D. Light, (Office of the General Counsel), Room 7150—Federal Building, 12th & Pennsylvania Avenue NW., Washington, D.C. 20461 (202-566-9750).

SUPPLEMENTARY INFORMATION: The Energy Policy and Conservation Act (Act) (Pub. L. 94-163), as amended by section 161 of the Energy Conservation and Production Act (Pub. L. 94-385), requires the implementation of an energy conservation program for consumer products other than automobiles. Section 323 of the Act requires the Federal Energy Administration (FEA) to prescribe test procedures for covered products. Among their uses, the test procedures will be used in monitoring the progress of manufacturers toward meeting the energy efficiency improvement targets prescribed in accordance with section 325 of the Act and by the Federal Trade Commission in developing labeling rules under section 324 of the Act. Labeling rules are intended to provide consumers with energy information which will assist them in making purchasing decisions concerning appliances.

FEA intends to request that the National Bureau of Standards develop test procedures for heat pumps pursuant to section 323 of the Act. At this time, FEA is interested in comments from interested persons on the design of test procedures to serve both the labeling and targets elements of the appliance program.

Interested persons are invited to submit comments with respect to the development of test procedures for heat pumps. Comments are especially desired on the following: the technical aspects of testing heat pumps; the cost and time required to perform such testing; any data concerning the number of heat pumps in use, the number of hours of operation of heat pumps in both their cooling and heating modes and the geographical distribution of heat pumps. Comments should be sent to Executive Communications, Room 3309, Box OI, Federal Energy Administration, Washington, D.C. 20461. Comments should be identified on the outside of the envelope and on documents submitted to FEA with the designation "Heat Pumps—Development of Test Procedures." Fifteen copies should be submitted. All comments received by September 15, 1977, before 4:30 p.m., e.d.t., will be considered.

Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in writing, one copy only. FEA reserves the right to determine the confidential status of that information or data and to treat it accordingly.

Issued in Washington, D.C., August 29, 1977.

ERIC J. FYGI,
Acting General Counsel,
Federal Energy Administration.

DEPARTMENT OF THE TREASURY

Customs Service

[19 CFR Part 134]

COUNTRY OF ORIGIN MARKING

Extension of Time for Comments Concerning Proposed Change of Position Relating to Country of Origin Marking of Radios, Stereo Systems, Television Sets, and Other Similar Consumer Electronic Products

AGENCY: United States Customs Service, Department of the Treasury.

ACTION: Notice of extension of time for comments.

SUMMARY: This notice extends the period of time permitted for the submission of comments in response to the Custom Service's proposal to change its position with respect to the acceptable country of origin marking of radios, stereo systems, television sets, and other similar consumer electronic products. This extension will permit the preparation and submission of more detailed comments by interested members of the public.

DATES: Comments must be recived on or before October 3, 1977.

ADDRESS: Comments should be addressed to the Commissioner of Customs, Attention: Regulations and Legal Publications Division, 1301 Constitution Avenue NW., Washington, D.C. 20229.

FOR FURTHER INFORMATION CONTACT:

John T. Roth, Attorney, Regulations and Legal Publications Division, United States Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229 (202-566-8237).

SUPPLEMENTARY INFORMATION: On August 3, 1977, the Customs Service published in the FEDERAL REGISTER (42 FR 39227) a notice of its intention to change its position with respect to the acceptable country of origin marking of radios, stereo systems, television sets, and other similar consumer electronic products. This change is being considered because many such articles of foreign origin carry a brand name which does not suggest foreign origin and, when offered for sale, are displayed in such a manner that a prospective purchaser is unable to examine the merchandise to determine the country of origin until the article has been purchased and unpacked at home. The Customs Service has determined that its current practice of permitting these articles to be marked as to country of origin on the back of the article, where labels showing the model number and other technical data are normally affixed, may no longer result in the articles being conspicuously marked in a manner that will indicate to the ultimate purchaser the country of origin.

The Customs Service proposes to require that radios, stereo systems, television sets, and similar consumer electronic products be marked with the country of origin on the front, top, or sides of the article in a manner which would ensure the visibility of the marking when the article is on display. The Customs Service continues to invite written comments from the public regarding this proposed rule, but all comments must be received on or before October 3, 1977.

LEONARD LEHMAN,
Assistant Commssioner,
Regulations and Rulings.

[Docket No. 77N-0065]

SACCHARIN AND ITS SALTS

Proposed Rule Making; Extension of Comment Period

AGENCY: Food and Drug Administration.

ACTION: Extension of time for comment on proposed rule.

SUMMARY: This document extends to October 3, 1977, the comment period on the Commissioner of Food and Drugs' proposal to restrict the use of saccharin, published in the FEDERAL REGISTER of April 15, 1977 (42 FR 19996). The comment period on that proposal expired on August 31, 1977.

DATE: Written comments by October 3, 1977.

ADDRESS: Written comments (preferably four copies) to the Hearing Clerk (HFC-20), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

GENERAL

Ronald J. Wylie, Compliance Regulations Policy Staff (HFC-10), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857 (301-443-3480).

FOODS

John J. McAuliffe, Bureau of Foods (HFF-334), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, D.C. 20204 (202-472-5690).

HUMAN DRUGS

Paul Fehnel, Bureau of Drugs (HFD-30), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857 (301-443-3640).

COSMETICS

Heinz Eiermann, Bureau of Foods (HFF-440), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, D.C. 20204 (202-245-1530).

VETERINARY DRUGS

Edward Ballitch, Bureau of Veterinary Medicine (HFV-231), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857 (301-443-3363).

SUPPLEMENTARY INFORMATION: In the FEDERAL REGISTER of April 15, 1977 (42 FR 19996), the Commissioner issued a proposal to revoke the interim food additive regulation (21 CFR 180.37) permitting the use of saccharin in certain types of human food; to establish a regulation prohibiting the use of saccharin in food for animals; to eliminate saccharin from all cosmetics and most human drugs and all animal drugs; and to permit the marketing of saccharin as a single-ingredient drug sold over the counter pending the submission and final action on new drug applications (NDA's) for such products.

In the FEDERAL REGISTER of July 1, 1977 (42 FR 33768), the Commissioner extended the comment period until August 31, 1977, to permit comments to be submitted on two recent epidemiological studies that relate to the effects of saccharin consumption on humans.

On August 18, 1977, the Calorie Control Council filed suit in the United States District Court for the Northern District of Georgia under the Freedom of Information Act (5 U.S.C. 552) seeking documents from the Food and Drug Administration (FDA) related to saccharin (*Calorie Control Council et al.* v. *Food and Drug Administration*, N.D. Ga., Civil Action No. C-77-1374A). The Council's suit seeks an order compelling FDA to comply with its requests under the Freedom of Information Act and to keep the comment period open for 60 days thereafter. By letter dated August 19, 1977, the Council was advised that the comment period would be kept open until October 3, 1977, in order to provide time to ascertain the status of the various requests under the Freedom of Information Act filed by the Council and to discuss disposition of these requests. The letter also stated that a request for a further extension of the comment period would be entertained once the status of those requests is determined.

The Commissioner has decided that the extension of the comment period already granted to the Calorie Control Council should apply to all interested persons.

Accordingly, interested persons may, on or before October 3, 1977, submit to the Hearing Clerk (HFC-20), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, Md. 20857, written comments preferably in quadruplicate and identified with the Hearing Clerk docket number found in brackets in the heading of this document) regarding the Commissioner's proposal. The envelope containing the comments should be prominently marked "Saccharin." Received comments may be seen in the agove office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: August 29, 1977.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner
for Compliance.

[Docket RM77-7]

NONDRAMATIC LITERARY OR MUSICAL WORKS

Objection to Noncommercial Performances

AGENCY: Library of Congress, Copyright Office.

ACTION: Proposed rule.

SUMMARY: The purpose of this notice of proposed rulemaking is to inform the public that the Copyright Office of the Library of Congress is considering the adoption of a new regulation designed to implement clause (4) of section 110 of the Act for General Revision of the Copyright Law. This clause provides for the service of notices of objection for the purpose of preventing certain noncommercial performances of nondramatic literary and musical works. The proposed regulation would establish requirements governing the content and manner of service of the notices.

We invite interested persons to participate in the making of the new regulation by submitting relevant written views, arguments, or other comments.

DATES: Initial comments should be received on or before September 23, 1977. Reply comments should be received on or before October 3, 1977.

ADDRESS: Five copies of all written comments should be submitted, if by mail, to: Office of the General Counsel, Copyright Office, Library of Congress, Caller Number 2999, Arlington, Va. 22202; or, if by hand, to: Office of the General Counsel, Copyright Office, Room 519, Crystal Mall, Bldg. No. 2, 1921 Jefferson Davis Highway, Arlington, Va.

FOR FURTHER INFORMATION CONTACT:

Jon Baumgarten, General Counsel, Copyright Office, Library of Congress, Washington, D.C. 20559 (703–557–8731).

SUPPLEMENTARY INFORMATION: Section 110(4) of the first section of Pub. L. 94–553 (90 Stat. 2541) deals with the performance of nondramtic literary or musical works otherwise than in transmissions to the public. It provides generally that such a performance, even if carried out before an audience, is exempt from copyright liability if two basic conditions are both met: (1) The performance must be "without any purpose of direct or indirect commercial advantage"; and (2) there must not be "payment of any fee or other compensation for the performance to any of its performers, promotors, or organizers."

Assuming these conditions are met, the exemption applies if there is "no direct or indirect admission charge" or, alternatively, if "the proceeds, after deducting the reasonable costs of producing the performance, are used exclusively for educational, religious, or charitable purposes. * * *" In cases where proceeds are to be derived from an admission charge, the statute also provides a procedure under which a copyright owner can prevent the performance by serving an advance notice of objection.

Under the statute, this notice must be in writing and signed by the copyright owner or the owner's authorized agent. It must be served on the person responsible for the performance at least seven days before the date of the performance, and it must state the reasons for the objection. The Act also provides that notices of objection must "comply in form, content, and manner of service with requirements that the Register of Copyrights shall prescribe by regulation."

We propose that these matters be covered by the addition of a new § 201.13 to the regulations of the Copyright Office. Proposed § 201.13 assumes that, at the time when he or she serves the notice, the copyright owner has already acquired some advance knowledge or report of a planned performance. Since the proposed regulation does not of itself impose any obligation on the person responsible for the performance to give the copyright owner advance notice of it,[1] the chances are that, at the time the copyright owner serves a notice of objection, some information about the performance will be lacking. For example, the copyright owner may not know the precise time when the performance is to be given, or its exact place, or the particular works to be performed, or whether or not an admission fee is to be charged. For these reasons, we are proposing certain alternatives concerning the information to be included in a notice. Also, since a notice of objection can be effective only if there is an admission charge, we are proposing to require the copyright owner to make clear that, if no admission fee is charged, the notice will have no legal effect and can be disregarded.

In setting forth alternatives concerning the contents of the notice, we have tried not only to take into account the difficulties faced by copyright owners lacking specific information, but also to judge these difficulties in the light of the legislative history of section 110(4). This history suggests that notices of objection were not intended to consist of general or blanket prohibitions, but were intended to be the result of individual copyright owners' decisions based on personal objections to having their works used without permission for "educational, religious, or charitable" fund-raising activities with which they were not in sympathy.[2] The proposed regulation attempts to strike a reasonable balance between the statute's intention to tie the objection to the cirumstances of a particular performance and the practical problems facing a copyright owner if information required in the notice is too detailed.

Accordigly, proposed § 201.13(c)(1)(ii) does not require that the notice include the exact date or place of performance where either fact is not known to the copyright owner. However, the notice must be directed to a specific performance, and not merely to any future performance for which the recipient might be responsible. The proposed rule would require the copyright owner, as an alternative to identifying a particular time and place, to state all of the information available to the owner about the plans for the performance, and the source of that information. This alternative is not intended to waive or otherwise affect the seven-day requirement for advance service imposed by the Act.

Proposed § 201.13(c)(1)(iii) requires, as a general rule, that the notice of objection specify the title and at least one author of each work covered by the copyright owner's notice of objection. However, since the owner may not know precisely which works are planned to be included in the performance, no limit is placed on the number of works that can be covered by a particular owner's notice. Moreover, recognizing that some copyright owners may object to a particular performance of any and all of their works, and that the total number of works involved may be too large to permit separate identification, § 201.13(c)(2) proposes to permit the serving of a notice of objection covering a group of works without separate identification under certain carefully defined conditions.

In addition to comments on the foregoing and the proposed regulation general, we invite specific comments on the following:

(1) Section 102 of the Transitional and Supplementary Provisions of Pub. L. 94–553 states: "This Act becomes effective on January 1, 1978, except as otherwise expressly provided by this Act. * * *" Since section 110(4) requires the service of notice "at least seven days before the date of the performance," and performances may take place during the first seven days of 1978, what should be the effective date of the regulation?

(2) In view of the short time period provided for notice, should the regulation provide for service by telegram, or similar means of communication, as alternatives to personal service or service by first-class mail?

Copies of all comments will be available for inspection and copying between the hours of 8 a.m. and 4 p.m., Monday through Friday, in the Public Information Office of the Copyright Office, Room No. 101, Crystal Mall, Building 2, 1921 Jefferson Davis Highway, Arlington, Va.

Proposed Regulation. We propose to amend Part 201 of 37 CFR Chapter II by adding a new § 201.13 to read as follows:

§ 201.13 Notices of objection to certain noncommercial performances of nondramatic literary or musical works.

(a) *Definitions.* (1) A "Notice of Objection" is a notice, as required by section 110(4) of title 17 of the United States Code as amended by Pub. L. 94–553, to be served as a condition of preventing the noncommercial performance of a nondramatic literary or musical work under certain circumstances.

(2) A "performing rights society" is an organization coming within the definition provided by section 116(e)(3) of title 17 of the United States Code as amended by Pub. L. 94–553.

(b) *Form.* The Copyright Office does not provide printed forms for the use of persons serving Notices of Objection.

(c) *Contents.* (1) A Notice of Objection must clearly state that the copyright owner objects to the performance, and must include all of the following:

(i) Reference to 17 U.S.C. § 110(4) as the statutory authority on which the Notice of Objection is based;

(ii) The date and place of the performance to which an objection is being made; however, if the exact date or place of a particular performance, or both, are not known to the copyright owner, it is sufficient if the Notice describes all of the information the copyright owner has about the plans for a particular performance and the source of that information.

(iii) Clear identification, by title and at least one author, of the particular nondramatic literary or musical work or works, to the performance of which the copyright owner thereof is lodging objection. A Notice may cover any number of separately identified copyrighted works owned by the copyright owner serving the objection. A blanket notice without separate identification of copyrighted works, and purporting to cover all or a part of the works written by, owned by, or capable of being licensed by a particular individual or organization, shall have no legal effect except under the conditions specified in clause (2) of this paragraph (c).

(iv) A concise statement of the reasons for the objection.

(2) A blanket notice lacking separate identification of the particular copyrighted works covered by the objection shall be valid only if all of the following conditions are met and the Notice so states:

(i) Among the owners of copyrights in the works covered by the Notice, there shall be at least one owner who is common to all such copyrights, and the Notice shall clearly identify that owner and shall be served by or with the authority of such owner.

(ii) The copyright owner serving or authorizing service of the Notice: (A) lacks complete knowledge of the particular works to be performed; and (B) wishes to lodge objection to a particular performance of any or all works of which he or she is copyright owner.

(iii) The total number of nondramatic literary or musical works covered by the Notice must be more than one hundred, making it impracticable to identify them separately.

(iv) If the Notice is served on behalf of the copyright owner by an agent or performing rights society, such owner must have expressly authorized the agent or society to object to the particular performance and to include within the scope of the objection all of the works covered by the Notice.

(v) The Notice shall identify, by name, address, and telephone number, a particular individual whom the person responsible for the performance can contact to determine whether a particular work planned for performance is in fact covered by the Notice.

(3) A Notice of Objection must also include clear and prominent statements explaining that:

(i) A failure to exclude the works identified in the Notice from the performance in question may subject the person responsible for the performance to liability for copyright infringement; and

(ii) The objection is without legal effect if there is no direct or indirect admission charge for the performance, and if the other conditions of 17 U.S.C. § 110(4) are met.

(d) *Signature and Identification.* A Notice of Objection shall bear the actual handwritten signature of the copyright owner or the owner's duly authorized agent, accompanied by the full name, address, and telephone number of that person, typewritten or printed legibly by hand. A Notice signed on behalf of a copyright owner by an agent or performing rights society shall clearly identify the copyright owner whom the agent or society represents.

(e) *Service.* A Notice of Objection shall be served on the person responsible for the performance by personal service, or by first-class mail.

(17 U.S.C. 207, and under the following sections of Title 17 of the United States Code as amended by Pub. L. 94–553; §§ 110(4); 702.)

Dated: August 26, 1977.

BARBARA RINGER,
Register of Copyrights.

Approved by:

DANIEL J. BOORSTIN,
Librarian of Congress.

[FR Doc.77-25713 Filed 9-1-77;8:45 am]

[1] In dealing only with the notice of objection to be served by the copyright owner, we have followed the literal text of the Act. It has been argued that "it appears to have been Congress' intention that those responsible for the performance would notify the copyright owner or his duly authorized agent of the details of the planned performance. . . ." Korman, *Performance Rights in Music Under Sections 110 and 118 of the 1976 Copyright Act*, 22 N.Y.L.S.L. Rev. 521, 527, (1977). The proposed regulation is not intended in any way to prejudge or affect the validity or invalidity of this argument.

INTERSTATE COMMERCE COMMISSION

(49 CFR Part 1003)

[EX PARTE NO. 55 (Sub-No. 25)]

LIST OF FORMS

Revision of Application Procedures

AGENCY: Interstate Commerce Commission.

ACTION: Proposed rules.

SUMMARY: The Interstate Commerce Commission (Commission) is proposing to revise the application forms for permanent motor carrier, broker, water carrier and freight forwarder authority, by requiring the inclusion of certain additional material by applicants and witnesses through which minimal prerequisites for a grant of operating authority could be established. The Commission also proposes an internal restructuring of its case processing procedure. These revisions would expedite the issuance of certificates, permits and licenses in those proceedings where no opposition is encountered.

DATES: Written comments should be filed with the Commission on or before October 3, 1977.

ADDRESSES: Send comments to: Office of Proceedings, Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT:

Michael Erenberg, Assistant Deputy Director, Office of Proceedings, Interstate Commerce Commission, Washington, D.C. 20423. Phone: (202–275–7292).

SUPPLEMENTARY INFORMATION: On June 2, 1977, a Staff Task Force was established for the purpose of investigating the Commission's present-day administration of the Interstate Commerce Act, particularly as it relates to motor carriers, and recommending improvements in motor carrier regulation. In its report, issued July 6, 1977, the Staff Task Force, after concluding that the increase in motor carrier application filings during the current (1977) fiscal year necessitated the easing and streamlining of entry controls, made 39 specific recommendations for improving motor carrier regulation. The proposed revisions contemplated in this rulemaking are an outgrowth of Recommendation No. 1 contained in the Staff Task Force report.

OVERVIEW OF CURRENT APPLICATION AND CASE PROCESSING PROCEDURES AND NEED FOR IMPROVEMENT

Current Commission application and case processing procedures are multifaceted processes, the first (or initiating) part of which involves the filing by applicant of a standarized form which essentially calls for (1) the identity of applicant, (2) the authority sought, (3) a caption or summary of the authority sought suitable for publication in the Federal Register (4) the authority held, (5) the statutory impediments (common control or dual operations), if any, to authorization of the proposed service, and (6) a certification of support from a supporting witness indicating a willingness to appear and testify concerning the need for a proposed service. After the application is received at the Commission, it is examined by clerical staff for completeness and accuracy but not for legal sufficiency and compliance with current policy relative to commodity and territorial descriptions. Thereafter a caption is sent to the Federal Register for publication to afford notice to competititors and other interested persons. A 30-day protest period is allowed following publication in the Federal Register, after which time the proceeding is either designated for handling under the modified procedure or assigned to an oral hearing. The order designating the proceeding for handling under the modified procedure also will fix the date on or before which an applicant must submit to the Commission and serve upon protestants, if any, its verified statements in support of the application (case-in-chief).

After an applicant's verified statements in support of the application have been filed, if the application is unopposed (or if, following submission by applicant of its verified statements in support of the application, protestants withdraw their protests), the application proceeding is referred immediately to a decisionmaker for disposition. Following decision, an order is prepared and served upon applicant which, in the event the sought authority is granted, is then required to comply with applicable provisions of the Interstate Commerce Act and the Commission's rules and regulations before an appropriate certificate, permit, or license finally may be issued.

While current case processing procedure may appear to be suitable in opposed application proceedings, it is unnecessarily time-consuming where applications are unopposed. Over 8 months is now required to process the average unopposed application proceeding. Although the proposed revisions would affect all application proceedings, whether

FEDERAL REGISTER, VOL. 42, NO. 171—FRIDAY, SEPTEMBER 2, 1977

opposed or unopposed, substantial savings would be realized by applicants, their supporting witnesses, and the Commission only in unopposed application proceedings. This represents, however, a significant number of proceedings. During the 6-month period ending June 30, 1977, an average of 145 unopposed application proceedings, or approximately 25 percent of all (opposed and unopposed) application proceedings decided on their merits, were processed each month.

DISCUSSION OF PROPOSED REVISIONS

A substantial portion of the delay and expense inherent in the application and case processing procedures outlined above could be eliminated, at least insofar as unopposed application proceedings are concerned, by the simple expedient of requiring applicants and their supporting witnesses to supply enough information with their applications to enable the Commission lawfully to authorize the proposed service where the application is unopposed. As a necessary adjunct to revision of the application forms, the Commission coincidentally would restructure its internal case processing procedure.

Under the proposed revisions, applicants would be required to append to their application forms (1) a current balance sheet and income statement, (2) a list describing their equipment and their pertinent terminal locations, (3) a brief statement concerning the feasibiiyt of the proposed operation, and (4) a certification of familiarity with applicable safety regulations. Applicants' supporting witnesses would be required to include in their certifications of support (1) a brief description of the transportation services currently employed, and (2) the extent to which the proposed service, if authorized, would be used.

For its part, the Commission, in restructuring its internal case processing procedure, would restaff its existing captions unit with qualified paralegal personnel who, upon receipt of applications conforming to the revised standards, would review the applications for completeness, accuracy, and legal sufficiency and, if necessary would modify descriptions to conform to the current Commission policy or simplifying grants of authority. The applications would then be referred through an appropriate decisionmaker to the FEDERAL REGISTER as a short-form order. Each short-form order so published would (1) recite the authority sought, (2) make other necessary and appropriate findings, and (3) indicate that in the absence of legally sufficient and timely filed protests, or other legal impediments which would require consideration on a more fully developed record, a certificate, permit, or license will be issued to applicant upon compliance with applicable statutory and regulatory prescriptions. The order-notice would be, in effect, an initial decision which would become effective automatically in the absence of a valid protest.

Aside from the obvious savings of time and expense for applicants and their supporting witnesses, the Commission, upon implementation of this proposal, would experience a substantial and continuous reduction in the overall amount of time that must be spent on processing pending application proceedings, thereby freeing staff and decisionmaking bodies alike to concentrate efforts upon reducing the backlog of opposed application proceedings. Additionally, in those proceedings where opposition is encountered, the application would be in proper form for easier processing either at a hearing or under the modified procedure.

The proposed revisions would not increase the overall burden upon applicants and their supporting witnesses; they merely require that easily accessible information be submitted at an earlier stage in the proceeding. The proposal affects neither the substantive law nor the procedural integrity of the Commission's decisionmaking process; nor is it intended to straightjacket applicants and their supporting witnesses whose ability to develop information contained in the revised application forms will not be forfeited subsequently either under the modified procedure or at oral hearing should opposition surface.

Interested persons are invited to submit written comments concerning the proposed revisions. It is not anticipated, at this time, that oral hearings will be held. The Commission intends to issue a final decision in this regard within 60 days from the last day during which written comments may be filed.

DATES: Written comments should be filed with the Commission on or before October 3, 1977.

ADDRESSES: Send comments to: Office of Proceedings, Interstate Commerce Commission, Washington, D.C. 20423.

Accordingly, the Commission proposes to revise application forms OP–OR–9, OP–OR–11, OP–WC–20, and OP–FF–10 for operating authority (1) by including in the instructions of each application form an unnumbered paragraph to read as follows:

In addition to the other information required in this form, applicant also is required to append to the form the following information:

(a) a current balance sheet and income statement;

(b) a list describing its equipment and its pertinent terminal locations;

(c) a brief statement concerning the feasibility of the proposed operation; and

(d) a certification of familiarity with applicable safety regulations; and (2) by inserting in the certification of support to each application form immediately preceeding the words "The undersigned shipper supports the following applications for authority similar to that sought in this application. (If none, so state)", the following unnumbered paragraphs:

Described briefly the transportation services currently employed:

Indicate the extent to which applicant's proposed service, if authorized, would be utilized by you (i.e., volume to be tendered applicant).

This notice of proposed rulemaking is promulgated under the authority contained in 49 U.S.C. §§ 304, 904, and 1003; and 5 U.S.C. § 553, and was adopted formally at a General Session of the Interstate Commerce Commission held at its office in Washington, D.C., on the 16th day of August, 1977.

By the Commission (Commissioner Hardin not participating).

H. G. HOMME, Jr.,
Acting Secretary.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[50 CFR Part 26]

RUBY LAKE NATIONAL WILDLIFE REFUGE, NEVADA

Public Entry and Use; Proposed Special Regulations; Correction

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special Regulations, correction.

SUMMARY: This document clarifies the proposed special regulations for Ruby Lake National Wildlife Refuge, Nev., published on August 25, 1977 (42 FR 42883).

Because of an inadvertent omission, the proposed regulations did not make it known that Ruby Lake National Wildlife Refuge is in the state of Nevada. This omission caused an error to appear in the table of contents for that day's issue of the FEDERAL REGISTER. The proposed regulations did not specifically state that the refuge is in Nevada, and the table of contents erroneously indicated that this refuge was in Oregon. This clarification is necesary to ensure that any interested parties are not confused.

DATES: Comments regarding the proposed special regulations must (still) be submitted by September 25, 1977.

FOR FURTHER INFORMATION CONTACT:

Lawrence G. Kline, Division of National Wildlife Refuges, U.S. Fish and Wildlife Service, Washington, D.C. 20420; telephone 202–343–4305.

Dated: August 26, 1977.

HARVEY K. NELSON,
Director, U.S. Fish and Wildlife Service.

notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

FOOD STAMP PROGRAM

Public Hearings

Notice is hereby given of the intent of the Department of Agriculture to hold public hearings on the Food Stamp Program. The purpose of the hearings will be to consider public comments and concerns about the operations and procedures of the Food Stamp Program prior to the preparation of regulatory changes which will be necessitated by the proposed legislative reforms of the Food Stamp Act of 1977.

The authorizing legislation for the Food Stamp Program expires September 30, 1977. Extension and reform of the program is being considered as part of the Food and Agriculture Act of 1977.

The Food Stamp Program provides low-income households with an opportunity to obtain a nutritionally adequate diet by increasing their food purchasing power through the issuance of a food coupon allotment. The food coupon allotment differs by household size and represents the cash equivalent of what a family of that size needs to purchase the Department's "thrifty food plan." The household must pay cash for the allotment based on its income level, but in no event will the household have to pay more than 30 percent of its net income after certain expenses are deducted. The coupons are used by the household to purchase food at local authorized retail stores.

The Food Stamp Program is operative in all 50 States, the District of Columbia, Guam, Puerto Rico, and the Virgin Islands. Approximately 16 million persons participate in the program monthly. Over $661 million in coupons are issued monthly of which $399 million represent benefits to participating households in the form of bonus coupons (bonus coupons are the difference between the amount of the coupon allotment and what the household has to pay for the allotment and is 100 percent federally subsidized).

Among the major reforms in the proposed Food Stamp Act of 1977 are elimination of the purchase requirement so that eligible households receive only the bonus amount of coupons, a standard deduction in lieu of some itemized deductions, and other measures to simplify administration, make the program more accessible to eligible households, and reduce fraud and abuse.

The Department of Agriculture intends to hold a public hearing in each of the seven Regions of the Food and Nutrition Service, prior to the preparation of regulatory changes. All hearings will be held from 9 a.m. to 5 p.m. and from 7 p.m. to 9 pm on the dates listed below. The hearings may be continued on the following day if public demand warrants. The locations and dates for the hearings are:

OCTOBER 4—BOSTON, MASS.

Morse Auditorium, Museum of Science, Science Park

OCTOBER 11—LOS ANGELES, CALIF.

Music Room, The Biltmore Hotel, 515 South Olive Street

OCTOBER 11—ATLANTA, GA.

Georgia Ballroom, Sheraton-Atlanta Hotel, West Peachtree Street, near North Avenue.

OCTOBER 13—DENVER, COLO.

Room 269, 1823 Stout Street.

OCTOBER 13—CHICAGO, ILL.

Hearing Room No. 2, 17th Floor, Illinois Department of Registration and Education, 55 East Jackson Boulevard.

OCTOBER 18—DALLAS, TEX.

First Presbyterian Church, Harwood and Wood Streets.

OCTOBER 18—BALTIMORE, MD.

War Memorial Hall, Lexington and Gay Streets.

The FNS Regional Offices will also hold public hearings in selected rural locations during the month of October. For times, dates and locations, please contact the Regional Information Directors listed at the end of this Notice.

Persons interested in participating in the hearings should contact the Regional Information Director for Food and Nutrition Service listed at the end of this Notice. Toll-free or collect call telephone numbers are provided for the Regional Offices. Information on the legislative changes in the proposed Food Stamp Act of 1977, and a description of issues on which the Department is especially interested in comment at the hearings, will be available from the Regional Offices. Please indicate which hearing you will attend, who will be speaking on your behalf, and approximately how long your testimony will be. Written comments may be submitted before October 21 for those that wish to comment but are unable to attend one of the hearings in person.

The appropriate Regional Information Director and toll-free number to contact for your State are:

NEW ENGLAND REGIONAL OFFICE

Catherine Jensen, 34 Third Avenue, Burlington, Mass. 01803.
From Massachusetts, call toll-free: 1–800–842–1343.
From Connecticut, Maine, New Hampshire, Rhode Island, or Vermont, call toll-free: 1–800–225–1127.

MID-ATLANTIC REGIONAL OFFICE

Joseph H. Dunphy, 1 Vahlsing Center, Route 526, Robbinsville, N.J. 08691
From New Jersey, call toll-free: 1–800–792–6808.
From Delaware, District of Columbia, Maryland, New York, Pennsylvania, or West Virginia, call toll-free: 1–800–257–9111.
From Puerto Rico or the Virgin Islands, call collect: 809–753–4487.

SOUTHEAST REGIONAL OFFICE

Ted Hightower, 1100 Spring Street NW., Atlanta, Ga. 30309.
From Georgia, call toll-free: 1–800–282–0414.
From Alabama, Florida, Kentucky, Mississippi, North Carolina, South Carolina, or Tennessee, call toll-free: 1–800–241–1755.

MIDWEST REGIONAL OFFICE

Russell T. Forte, 536 South Clark Street, Chicago, Ill. 60605.
From Illinois, call toll-free: 800–972–3188.
From Indiana, Michigan, Minnesota, Ohio, or Wisconsin, call toll-free: 800–621–3199.

SOUTHWEST REGIONAL OFFICE

Ronald J. Rhodes, 1100 Commerce Street, Dallas, Tex. 75242.
From Texas, call toll-free: 1–800–492–9720.
From Arkansas, Louisiana, New Mexico, or Oklahoma, call toll-free: 1–800–527–7223.

MOUNTAIN PLAINS REGIONAL OFFICE

Craig Foreman, 1823 Stout Street, Room 219, Denver, Colo. 80202.
From Colorado, Iowa, Kansas, Missouri, Montana, Nebraska, North Dakota, South Dakota, Utah, or Wyoming, call toll-free: 1–800–525–8222.

WESTERN REGIONAL OFFICE

Benedicto Montoya, 550 Kearney Street, Room 400, San Francisco, Calif. 94108.
From California, call toll-free: 1–800–652–1875.
From Arizona, Idaho, Nevada, Oregon, or Washington, call toll-free: 1–800–227–4982.
From Alaska, call collect: 415–556–7391.
From Guam, call: 246–5333.
From Hawaii, call collect: 546–3144.

Dated: August 30, 1977.

CAROL TUCKER FOREMAN,
Assistant Secretary.

Food Safety and Quality Service

EXPERT PANEL ON NITRITES AND NITROSAMINES

Meeting and Agenda

Notice is hereby given of a meeting of the Expert Panel on Nitrites and Nitrosamines to be held in Room 1G042, For-

UMI
V 42 171
SEP 2 77
UMI

restal Building, 10th and Independence Avenue SW., Washington, D.C., September 19, 1977, at 9:30 a.m.

The agenda of the meeting will consist of: (1) Discussion of topics pertinent to decisions on nitrite use in meat and poultry, and (2) the adoption of recommendations to be present in the Panel's final report.

The meeting will be open to the public and under the direction of the Panel Chairperson or her designee. Written statements may be filed with the Panel before or after the meeting. Any member of the public who has further questions should contact the Issuance Coordination Staff, Technical Services, Food Safety and Quality Service, U.S. Department of Agriculture, Room 4905, South Agriculture Building, Washington, D.C. 20250, Area Code (202) 447-6189. Any person who wishes to file a statement may send such statement to the Issuance Coordination Staff at the above address.

Done at Washington, D.C., on August 31, 1977.

ROBERT ANGELOTTI,
Administrator,
Food Safety and Quality Service.

Forest Service

CENTRAL NEVADA PLANNING UNIT

Availability of Amendment to Final Environmental Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared an amendment to the final environmental statement for the Central Nevada Planning Unit, Toiyabe National Forest, Nev. The Forest Service report number is USDA-FS-FES (Adm) R4-75-16.

As a result of a request for reconsideration of the decision to implement the land management plan, the Forest Supervisor agreed to reinventory and to reevaluate the wilderness characteristics of roadless areas. After completing the reinventory and reevaluation on the roadless area situation, two additional wilderness study areas, totaling 12,355 acres, were identified. They are adjacent to the Arc Dome and Arc Dome Extension wilderness study areas. Also, additional roadless study areas not identified in the previous study are evaluated in the amendment.

This amendment to the final environmental statement was transmitted to CEQ on August 26, 1977.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service, South Agriculture Bldg., Room 3230, 12th St. and Independence Ave. SW., Washington, D.C. 20250.

Regional Planning Office, USDA, Forest Service, Federal Building, Room 4120, 324-25th Street, Ogden, Utah 84401.

Forest Supervisor, Toiyabe National Forest, 111 North Virginia Street, Room 601, Reno, Nev. 89501.

District Forest Ranger, Austin Ranger District, Austin, Nev. 89310.

District Forest Ranger, Tonopah Ranger District, P.O. Box 939, Tonopah, Nev. 89049.

A limited number of single copies are available upon request to Forest Supervisor John J. Lavin, Toiyabe National Forest, 111 North Virginia Street, Room 601, Reno, Nev. 89501.

Copies of the amendment to the final environmental statement have been sent to various Federal, State, and local agencies as outlined in the CEQ Guidelines.

Dated: August 25, 1977.

EINAR L. ROGET,
Deputy Chief.

[FR Doc.77-25661 Filed 9-1-77;8:45 am]

Rural Electrification Administration

INDIANA STATEWIDE RURAL ELECTRIC COOPERATIVE, INC., HOOSIER ENERGY DIVISION

Final Environmental Impact Statement

Notice is hereby given that the Rural Electrification Administration has prepared a Final Environmental Impact Statement in occardance with section 102 (2)(C) of the National Environmental Policy Act of 1969, in connection with a request for a loan guarantee commitment from the Rural Electrification Administration for Hoosier Energy Division, P.O. Box 908, Indiana Statewide R.E.C., Inc., of Bloomington, Ind. 47401. This loan guarantee commitment will assist in obtaining financing for the construction of two 490 MW coal-fired steam generating units near Merom, Ind., and associated transmission facilities.

Additional information may be secured on request, submitted to Mr. Richard F. Richter, Assistant Administrator—Electric, Rural Electrification Administration, U.S. Department of Agriculture, Washington, D.C. 20250. The Final Environmental Impact Statement may be examined during regular business hours at the offices of REA in the South Agriculture Building, 12th Street and Independence Avenue SW., Washington, D.C., Room 4043 or at the borrower address indicated above.

Final REA action wtih respect to this matter (including any release of funds) may be taken after October 3, 1977, but only after REA has reached satisfactory conclusions with respect to its environmental effects and after procedural requirements set forth in the National Environmental Policy Act of 1969 have been met.

Dated at Washington, D.C., this 1st day of September 1977.

JOSEPH VELLONE,
Acting Administrator, Rural Electrification Administration.

DEPARTMENT OF COMMERCE

Domestic and International Business Administration

NATIONAL CANCER INSTITUTE

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 77-00154. Applicant: National Cancer Institute, Building 10, Room 8B14, Bethesda, Md. 20014. Article: Electron Microscope, Model EM 400 HMG, Water chiller and accessories. Manufacturer: Philips Electronics Instruments NVD, The Netherlands. Intended use of article: The article is intended to be used to examine human tissues, animal tissues, tissue culture cells, and molecules and replicas derived therefrom. Investigations will be conducted to compare malignant cells and their normal counterparts, in order to understand basic phenomena such as membrane structure and its relationship to known unique functional properties of various human tumors, such as antibody and lectin molecule binding. Further, the lineage, clinical evolution and molecular identity of related tumors, such as the lymphomas and childhood sarcomas may be determined by characterizing and studying isolated membrane molecules by immunoelectron microscopy.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, was being manufactured in the United States at the time the article was ordered (June 23, 1976).

Reasons: The description of the applicant's research and/or educational purposes establishes the fact that a conventional transmission electron microscope comparable to the foreign article is pertinent to the purposes for which the article is intended to be used. We are advised by the National Bureau of Standards (NBS) in its memorandum dated July 15, 1977, that it knows of no conventional transmission electron microscope which was being manufactured in the United States at the time the foreign article was ordered. ("Conventional transmission electron microscopes" are not to be confused with "scanning electron microscopes" which were manufactured domestically at the time the article was ordered and are still being manufactured in the United States.)

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which was being manufactured in the United States at the time the article was ordered.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials.)

RICHARD M. SEPPA,
Director, Special Import Programs Division.

[FR Doc.77-25638 Filed 9-1-77;8:45 am]

NATIONAL, INSTITUTES OF HEALTH

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 77-00208. Applicant: National Institutes of Health, National Eye Institute, Bldg. 6, Rm. 213, 9000 Rockville Pike, Bethesda, Md. 20014. Article: Ultrotome IV Ultramicrotome, Model LKB 2128-010 and accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used for studies of eye tissues of the human in both normal and pathological conditions. Experiments on the visual system will include: (1) fine structural study of the photosensitive lamellar membranes of the photoreceptor cells following light exposure in various conditions; (2) phagocytic activity of the pigment epithelium of the retina; (3) fine structural study of the retina and cornea of vitamin A deficient animals; (4) cytologic study of the cataractous lenses; and (5) experimentally induced eye diseases in animals. Materials will be embedded in the epoxy resin appropriate for the material being studied before sectioning.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The foreign article has a cutting speed range of 0.1 to 50 millimeters/second (mm/sec). The most closely comparable domestic instrument is the Model MT-2B ultramicrotome manufactured by Ivan Sorvall, Inc. (Sorvall). The Sorvall Model MT-2B ultramicrotome has a cutting speed range of 0.09 to 3.2 mm/sec. We are advised by the National Bureau of Standards (NBS) in its memorandum dated June 29, 1977, that (1) cutting speeds in the excess of 4mm/sec are pertinent to the applicant's research studies and (2) the domestic instrument does not provide the pertinent feature. We, therefore, find that the Model MT-2B ultramicrotome is not of equivalent scientific value to the foreign article for such purposes as this article is intended to be used.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials.)

Application for Duty-Free Entry of of Scientific Articles

The following are notices of the receipt of applications for duty-free entry of scientific articles pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89-651; 80 Stat. 897). Interested persons may present their views with respect to the question of whether an instrument or apparatus of equivalent scientific value for the purposes for which the article is intended to be used is being manufactured in the United

SEP 2 7 V 42 171 UMI

States. Such comments must be filed in triplicate with the Director, Special Import Programs Division, Office of Import Programs, Washington, D.C. 20230, within 20 calendar days after the date on which this notice of application is published in the FEDERAL REGISTER. Amended regulations issued under cited Act, (15 CFR 301) prescribe the requirements applicable to comments.

A copy of each application is on file, and may be examined during ordinary Commerce Department business hours at the Special Import Programs Division, Department of Commerce, Washington, D.C. 20230.

Docket Number: 77–00282. Applicant: Rush-Presbyterian-St. Luke's Medical Center, Dept. of Pathology, 1753 West Congress Parkway, Chicago, Illinois 60612. Article: Ultramicrotome, Model LKB 8800A. Manufacturer: LKB Produktor AB, Sweden. Intended use of Article: The article will be used for thin sectioning of biological materials including animal and human speciments, which will be studied in several research projects using electron microscopy. The research projects will include ultrastructural changes in normal and pathological animal tissues and cells. Cytochemical studies on enzyme and subcellular organelle localization in cells will be done for morphometric studies of red blood cell membranes. In addition, the article will be used for instruction given in electron microscopy techniques and the ultrastructure of tissues which includes tissue processing, thin-sectioning on an ultramicrotome, and studying the ultrastructure with an electron microscope. Application received by Commissioner of Customs: July 22, 1977.

Docket Number: 77–00283. Applicant: New Jersey Medical School, Dept of Anatomy, College of Medicine & Dentistry of N.J., 100 Bergen Street, Newark, New Jersey 07103. Article: Electron Microscope, Model EM 201. Manufacturer: Philips Electronics Instruments NVD, The Netherlands. Intended use of Article: The article is intended to be used for the following research projects: (1) Studies of developmental aspects of ovarian follicles of the teleost Oryzias latipes by morphologic, histochemical and isotope autoradiographic techniques at the ultrastructural level.

(2) Studies of ionic, protein and bulk fluid transport across membranes of the isolated perfused lung, (3) Investigation of how hypoxia, imposed during the prenatal and neonatal periods, affects the development of the brain, (4) Localization of sites of pulmonary fat embolism and investigation to determine specifically the extent of lipoprotein lipase accumulation at the sites of injury as well as lipases in general, (5) Studies of nerve regeneration and r elation of glia to neurons in *Fundulus majalis*, (6) Studies of the cellular movement and establishment of synaptic communication in the cerebellum of frog during metamorphosis, and (7) Studies of various organs and tissues of the grey lethal mouse and its phenotypically normal littermates.

In addition, the article will be used for educational purposes in the courses Electron Microscopy, Experimental Electron Microscopy and Ultrastructural Research. Application received by Commissioner of Customs: August 1, 1977.

Docket Number: 77–00310. Applicant: National Institute of Environmental Health Sciences, NIH, DHEW, Laboratory of Environmental Biophysics, NIEHS, P.O. Box 12233, Research Triangle Park, N.C. 27709. Article: Automatic Recording Spectropolarimeter, Model J–40A. Manufacturer: Japan Spectroscopic Co., Ltd., Japan. Intended use of article: The article is intended to be used for the investigation of the circular dichroism spectra of proteins and nucleic acids and their complexes with noncovalently bound small molecules (drugs, xenobiotics, environmental agents, etc.). The objectives of the investigations are to relate the circular dichroism spectra to the arrangement of molecular groups in three-dimensional space. The three-dimensional arrangements of molecular groups will in turn be used to derive the basic molecular forces which stabilize the structure of proteins and nucleic acids and their complexes with small molecules. Application received by Commissioner of Customs: July 21, 1977.

Docket Number: 77–00311. Applicant: The University of Texas Health Science Center at Houston, Medical School, P.O. Box 20708, Houston, Texas 77025. Article: Isotope Ratio Mass Spectrometer, Model 602C and Accessories. Manufacturer: VG Micromass Ltd., United Kingdom. Intended use of article: The article is intended to be used in the following research areas: (1) Investigation of mechanisms of action of aldolases—to provide an understanding into the metabolism of living cells and the intricate mechanisms of their enzyme catalysts. (2) Studies of stable isotopes in metabolism in man. (3) Study of nutrition in man using ^{15}N—to provide a detailed insight into the various processes which govern the uptake and utilization of one of the major constitutents of man's diet, protein.

In addition, the article will be used to teach the techniques of utilizing these tracers and will include extensive use by students not familiar with sophisticated instrumentation which will involve a special course, "Instrumental Methods in Medical Research." Application received by Commissioner of Customs: July 22, 1977.

Docket Number: 77–00312. Applicant: Children's Hospital Medical Center, 300 Longwood Avenue, Boston, Massachusetts 02155. Article: Electron Microscope, Model JEM–100S, Haskris Water Recirculator and Accessories. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is intended to be used for the study of ultrastructure of biological materials and single brain neurons in experiments to be conducted involving characterization of brain cell development. The instrument will also be used for graduate instruction in ultra technique. Application received by Commissioner of Customs: July 22, 1977.

Docket Number: 77–00313. Applicant: University of Wisconsin, The McArdle Laboratory, Madison, Wis. 53706. Article: Electron Microscope, Model H–500–5 and Accessory. Manufacturer: Hitachi Perkin-Elmer, Japan. Intended use of article: The article is intended to be used in experimental oncology (cancer research) in studies of biological ultrastructure. The principal projects in which the article will be used are:

(1) Ultrastructure and mapping of the genomes of oncogenic DNA viruses—studies involving a structural analysis and map location of SV40 virus-specific RNAs using the "R loop" method and that of chemically coupling ferritin to the ends of RNA molecules as well as direct visualization of RNA molecules with the extremely high resolution capable with this microscope;

(2) Mapping and regulation of transcription of bacterial virus genomes—molecular mapping of many deletions and other arrangements in the genome, using the heteroduplex mapping technique by electron microscopy,

(3) Ultrastructure of junctional complexes of primary cultures of hepatocytes—investigation of the ultrastructure of junctional complexes formed between two hepatocytes in cell culture, and

(4) Ultrastructure of ribosomal precursor RNA molecules—studies to visualize with the electron microscope the ribosomal precursor RNAs (45s, 41s 32s, etc.) taken from cells treated with base analogues including 5-azacytidine, 5-fluorouracil, 8-azaguanine, and 6-thioguanine.

Application received by Commissioner of Customs: July 22, 1977.

Docket Number: 77–00314. Applicant: The University of Michigan, 5419 Medical Science Bldg. I, Department of Biology Chemistry, Ann Arbor, Mich. 48109. Article: Spectropolarimeter, Model J–40C with Alternate Measurement Accessory. Manufacturer: Japan Spectroscopic Co., Ltd., Japan. Intended use of article: The article is intended to be used for the investigation of circular dichroism and magnetic circular dichroism (MCD) spectra of the peptides, proteins and metalloproteins and their complexes with non-covalently bonded molecules. The objectives of the investigations are to relate the circular dichroism spectra to the arrangement of molecular groups in three-dimensional space. In turn, the three-dimensional arrangement of molecular groups will be used to derive the basic molecular forces which stabilize the arrangement and the relationships between molecular arrangement and effect of the molecules on biological systems. Application received by Commissioner of Customs: July 22, 1977.

Docket Number: 77–00315. Applicant: Rutgers, The State University Nuclear Physics Laboratory, Frelinghuysen Road, Piscataway, N.J. 08854. Article: Compressor Sextupole and Accessories. Manufacturer: ANAC Inc., New Zealand. Intended use of article: The article is intended to be used to investigate spins, parities, energy levels, and energy-level gross structure in atomic nucleic being studied. Elastic and inelastic proton and deuteron scattering experiments will be carried out with angular distributions, angular correlations, and excitation functions being measured. The experiments will be conducted to study the spin-dependent effects of nuclear forces and those properties of nuclear states which require the use of atomic beams. The article will also be used in a research program by graduate students working for the Ph. D. degree and will be used to meet the dissertation requirement for that degree. Application received by Commissioner of Customs: July 26, 1977.

FEDERAL REGISTER, VOL. 42, NO. 171—FRIDAY, SEPTEMBER 2, 1977

Docket Number: 77–00316. Applicant: Veterans Administration Hospital, 11201 Benton Street, Loma Linda, Calif. 92354. Article: Electron Microscope, Model EM 10A. Manufacturer: Carl Zeiss, West Germany. Intended use of article: The article is intended to be used for examination of tissue specimens including kidney biopsy, liver biopsy, and many muscle biopsy from VA patients as part of a routine anatomical pathology service. Specific application includes the study of red cell shape at the magnification of 30,000 times. The article will also be used for the training of pathology residents and postdoctoral fellows. Medical technician trainees, as well as a wide variety of students in order health related professions will have access to the article. Application received by Commissioner of Customs: July 26, 1977.

Docket Number: 77–00317. Applicant: University of California, Los Alamos Scientific Laboratory, P.O. Box 990, Los Alamos, N. Mex. 87545. Article: (6) each; Kits, Preamplifier, CO_2 Laser, Consisting of Main Discharge Electrodes and Accessories. Manufacturer: Lumonics Research Ltd., Canada. Intended use of article: The article is intended to be used to amplify the short-pulses produced in the oscillator-switch out section to an energy level capable of efficiently extracting the stored energy in the large power amplifier modules of the eight-beam system. This eight-beam system will play an important role in determining the feasibility of producing useful fusion energy from pulsed, hige power CO_2 laser systems. Application received by Commissioner of Customs: July 26, 1977.

Docket Number: 77–00318. Applicant: Worcester Polytechnic Institute/Alden Research Laboratory, 30 Shrewsbury Street, Holden, Mass. 01520. Article: Miniature Propeller Flowmeter. Manufacturer: Delft Hydraulics Laboratory, Netherlands. Intended use of article: The article is intended to be used for measurement of current patterns specifically, investigations of spatial and temporal velocity variations of water flow having poor water quality. Typical experiments concern the influence of water currents on sediment transport, thermal plumes, fish behavior, coastal engineering and the design of various types of hydraulic structures. The article will be used by undergraduate students for special projects, thesis, and for research as part of graduates research assistantships. Application received by Commissioner of Customs: July 27, 1977.

Docket Number: 77–00319. Applicant: University of California School of Medicine, Dermatology Section (111G), 4150 Clement Street, San Francisco, Calif. 94121. Article: Electron Microscope, Model EM 10A and Accessories. Manufacturer: Carl Zeiss, West Germany. Intended use of article: The article is intended to be in the study of the cell biology of skin, particularly of the epidermis. Investigations will be conducted with the following objectives:

(1) To define membrane and cellular structures of the epidermis which subserve the barrier function,

(2) To characterize and localize major depots of lipids, of presumed importance for barrier function, within the epidermis, and

(3) To elucidate major pathways of percutaneous absorption, i.e., to determine which classes of polar vs. non-polar substances utilize intercellular vs. transcellular routes.

Application received by Commissioner of Customs: August 1, 1977.

Docket Number: 77–00320. Applicant: University of Miami, Rosenstiel School of Marine and Atmospheric Science, 4600 Rickenbacker Causeway, Miami, Fla. 33149. Article: Thermometer and Accessories. Manufacturer: Watanabe Keiki Manufacturing Co., Japan. Intended use of article: The article is intended to be used for educational purposes in MSC-101, Survey of Oceanography, a course concerning introduction to oceanography, methods, and techniques. Application received by Commissioner of Customs: August 1, 1977.

Docket Number: 77–00321. Applicant: University of North Carolina, Wilmington, P.O. Box 3725, Azalea Station, Wilmington, N.C. 28401. Article: CD-4 Parkinson-Cowan Dry Gasometer and Accessories. Manufacturer: Barchard Engineering, Ltd., Canada. Intended use of article: The article is intended to be used in the course PED 316 Exercise Physiology which is concerned with human physiological response to exercise and training. The course objectives are to enable students to:

(1) Accurately describe the processes of exercise metabolism relative to a basic understanding of work physiology.

(2) Demonstrate a satisfactory level of knowledge concerning physiological adaptation to exercise and training specific to the circulatory and respiratory systems in both normal and abnormal environments,

(3) Demonstrate skill in techniques of determining circulorespiratory fitness including the interpretation of results,

(4) Construct individual and/or group training regimens based on sound physiological training principles in terms of progressive increases in workload and desired outcome,

(5) Demonstrate knowledge of human thermal regulation as it relates to prevention of heat exhaustion and heat stroke during adverse working conditions, and

(6) Identify several sources for keeping up-to-date through reading in reputable journals which report scientific research in exercise physiology.

Application received by Commissioner of Customs: August 1, 1977.

Docket Number: 77–00322. Applicant: Albert Einstein College of Medicine, 1300 Morris Park Avenue, Bronx, N.Y. 10461. Article: Microcalorimetry System, Model LKB 10700. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used in the investigation of the pre-polymerization phase of the gelation of Hemoglobin S which will help to understand the mechanism of the polymerization process. Application received by Commissioner of Customs: August 3, 1977.

Docket Number: 77–00324. Applicant: Purdue University, Purchasing Department, ADMS Building, West Lafayette, Ind. 47907. Article: DDV–11–C Rheovibron Dynamic Viscoelastometer, DDV–LFS Low Frequency Sweep System, and DDV–SF Set Grips for testing Shear Modulus. Manufacturer: Toyo Baldwin Co., Ltd., Japan. Intended use of article: The article will be used for studies of a range of glassy and crystalline materials, primarily inorganic in character, which are of interest in materials science. The experiment will consist of determinations of the temperatures at which small fibers of these glasses, or small crystals of B-alumina type materials, dissipate mechanical energy at fixed frequency of mechanical stressing, and of the frequency range over which mechanical energy is dissipated at fixed temperatures. The objectives of this experiment are (1) to characterize the shape of the mechanical loss spectrum to permit comparison with the shape of the electrical loss spectrum at the same temperature and pressure for superionic conducting crystalline materials with this object of understanding the material characteristics necessary to produce superionic conducting ability and (ii) to study the shape and temperature dependence of the mechanical loss spectrum in both primary and secondary relaxation regions in glassy materials to permit comparisons with electrical relaxation and magnetic relaxation characteristics. Application received by Commissioner of Customs: August 3, 1977.

Docket Number: 77–00325. Applicant: United States Energy Research and Development Administration, P.O. Box 550, Richland, Wash. 99325. Article: Camera, Image Converter Imacon Model 790/520 and accessories. Manufacturer: Hadland Photonics Ltd., United Kingdom. Intended use of article: The article is intended to be used for the investigation of recording photographic images of transient events in experiments to see if laser heated solenoid will provide energy. The article and accessories will be attached to the laser beam tube in such a way as to allow them to be used to photograph the events which occur during the experiments. Application received by Commissioner of Customs: August 3, 1977.

FEDERAL REGISTER, VOL. 42, NO. 171—FRIDAY, SEPTEMBER 2, 1977

SEP 2 7 7 V 42 171 UMI

FEDERAL REGISTER, VOL. 42, NO. 171—FRIDAY, SEPTEMBER 2, 1977

Docket number: 77-00326. Applicant: Sandia Laboratories, Kirtland AFB, East Albuquerque, N. Mex. 87115. Article: Transistorized Power Source—For Tungsten Inert Gas Welding. Manufacturer: The Welding Institute, United Kingdom. Intended use of article: The article is intended to be used in a wide range of applications including but not limited to the following materials: (a) austenitic stainless steel; (b) Fe-Ni-Co alloys; (c) molybdenum and its alloys; (d) tungsten and its alloys; (e) high strength alloy steel; and (f) aluminum alloys. Experimentation will involve study of a wide range of pulse forms in order to manipulate weld pool solidification and dendritic spacing. In particular, the dependence of the fracture toughness of welds on the microstructures will be investigated. Also, the control of solidification to avoid hot cracking will be studied. Application received by Commissioner of Customs: August 3, 1977.

Docket number: 77-00327. Applicant: Duke University, Durham, N.C. 27710. Article: LKB 2127-001 and 2127-021 Tachophor complete with TachoFrac complete, with Power Supply Unit equipped with Accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used for studies of spinal fluid samples from patients with neurological diseases, especially multiple sclerosis. Proposed studies will attempt to: (1) define further the specificity of the nucleotide-rich material (NRM); (2) determine whether the NRM contains DNA, RNA or nucleoprotein; (3) determine whether the NRM exists in the cerebrospinal fluid free or complexed to IgG; and (4) isolate the NRM from CSF or tissues. The major objective of the studies will be to determine whether the NRM is derived from host tissues or from foreign elements, such as a virus. Application received by Commissioner of Customs: August 3, 1977.

ST. FRANCIS HOSPITAL, ET AL.

Consolidated Decision on Applications for Duty-Free Entry of Ultramicrotomes

The following is a consolidated decision on applications for duty-free entry of ultramicrotomes pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301). (See especially Section 301.11(e).)

A copy of the record pertaining to each of the applications in this consolidated decision is available for public review during ordinary business hours of the Department of Commerce, at the Special Import Programs Division, Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 77-00187. Applicant: St. Francis Hospital, 929 North St. Francis, Wichita, Kans. 67214. Article: Ultramicrotome, Model LKB 2128-010 and accessories. Manufacturer: LKB-Produkter AB, Sweden. Intended use of article: The article will be used to section human kidney, liver and neoplasmas (tumors) which will vary in density and fragility. Investigations will include ultrastructural studies on normal and pathologic human tissue to establish the exact nature of the disease process in order that the right modality of treatment will be given to the patient. Identification of virus particles by electron microscopy is a part of clinical virus research which includes viral hepatitis and other virus-related diseases. The article will also be used for the training of pathology residents in pathologic anatomy which will involve a study of general principles on technique and the use of the electron microscope to study the fine structure of cells and various subcellular organelles in different disease processes. Application received by Commissioner of Customs: April 1, 1977. Advice submitted by the Department of Health, Education, and Welfare on: June 24, 1977.

Docket number: 77-00190. Applicant: US Army Environmental Hygiene Agency, Aberdeen Proving Ground, Md. 21010. Article: Ultramicrotome, Model LKB 8800A Ultrotome III. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article will be used to study biological materials including animal, plant and particulate specimens. Materials will vary in density and fragility. Investigations will include ultrastructural studies on normal and pathologic animal and plant tissues, identification and counting of particulate specimens, cyto and histochemical studies on enzyme and subcellular organelle localization in cells and tissues, membrane interactions at host-parasite interfaces, and subcellular changes in cells induced by changes in their biochemical and physical environments. The objectives pursued in the course of these investigations are to understand early pathological alterations in tissues (as induced in animal models) and to correlate these changes with clinical alterations seen in human diseased tissues. By understanding early alterations, we may begin to formulate preventive treatments in human diseases. Application received by Commissioner of Customs: April 1, 1977. Advice submitted by the Department of Health, Education, and Welfare on: June 24, 1977.

Docket number: 77-00198. Applicant: Oklahoma Children's Memorial Hospital, 940 NE. 13th Street, Oklahoma City, Okla. 73126. Article: (Ultramicrotome) Ultratome, Model UM IV 2128-010 LKB and accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used for the examination and investigation of biological materials related primarily to effects of disease or experimental conditions on living systems. Experiments to be conducted will include: (i) Studies of viral infestations as possible etiological explanations for various diseases in children, (ii) Studies of role of platelets and plasma clotting proteins in the formation of clots both in vivo and in model systems, (iii) Studies of specific labeling of membrane constituents to map topography of membranes and changes which alter when parameters are altered. In addition, the article will be used for educational purposes in a course in electron microscopy to train people in fields other than morphological sciences how to use electron microscopy to acquire information about the molecular structure of their experimental systems to augment their own particular expertise. Application received by Commissioner of Customs: April 21, 1977. Advice submitted by the Department of Health, Education, and Welfare on: June 24, 1977.

Docket number: 77-00199. Applicant: Massachusetts General Hospital, Department of Pathology, Fruit Street, Boston, Mass. 02114. Article: LKB 8800A Ultrotome III Ultromicrotome. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used to study biological, mainly mammalian tissues, and culture systems derived form experimental animals and man, and exhibit both normal and pathologic structure. Properties of materials and phenomenon to be studied are those necessary for the understanding of cellular interactions in culture systems including tumor destruction, and those necessary for the understanding of vesicular transport of macromolecules into and out of individual cells under varying experimental conditions. The experiments to be conducted are designed to elucidate the function of basophils and mast cells in cell-mediated hypersensitivity reactions, particularly with regard to an understanding of the role of these cells in immunologic tumor rejection. The objectives to be pursued in the course of the investigation are to reveal at the ultrastructural level the structural basis and accurate quantitation of transport of macromolecules into and from cells under physiological and pathologic conditions. Application received by Commissioner of Customs: April 21, 1977. Advice submitted by the Department of Health, Education, and Welfare on: June 24, 1977.

Docket number: 77-00214. Applicant: Birth Defects Institute, Embryology Laboratory, Albany Medical Center Receiving Dock, 12 New Scotland Ave., Albany, N.Y. 12208. Article: Ultramicrotome, Model LKB 8800A and accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used to section animal tissues that have been embedded in hardened epoxy resins. These specimens will be used for ultrastructural studies on tissues and cells, cyto and histochemical studies on enzyme and subcellular organelle localization in cells induced by changes in their biochemical and physical environments. Application received by Commissioner of customs: April 25, 1977. Advice submitted by the Department of Health, Education, and Welfare on: July 11, 1977.

Comments: No comments have been received with respect to any of the foregoing applications. Decision: Applications approved. No instrument or apparatus of equivalent scientific value to the foreign articles for such purposes as these articles are intended to be used, is being manufactured in the United States. Reasons: Each of the foreign articles provides a range of cutting speeds equal to or better than 0.1 to 20 millimeters per second. The most closely comparable domestic instrument is the Model MT-2B ultramicrotome which is manufactured by Ivan Sorvall, Inc. (Sorvall). The Model MT-2B has a range of cutting speeds from 0.09 to 3.2 millimeters per second. The conditions for obtaining high-quality sections that are uniform in thickness, depend to a large extent on the hardness, consistency, toughness and other properties of the specimen materials, the properties of the embedding materials, and geometry of the block. In connection with a prior application (Docket Number 69-00665-33-46500), which relates to the duty-free entry of an article that is identical to those to which the foregoing applications relate, the Department of Health, Education, and Welfare (HEW) advised that "Smooth cuts are obtained when the speed of cutting, (among such [other] factors as knife edge condition and angle), is adjusted to the characteristics of the material being sectioned. The range of cutting speeds and a capability for the higher cutting speeds is, therefore, a pertinent characteristic of the ultramicrotome to be used for sectioning materials that experience has shown difficult to section." In connection with another prior application (Docket Number 70-00077-33-46500) which also relates to an article that is identical to those described above, HEW advised that "ultrathin sectioning of a variety of tissues having a wide range in density, hardness etc." requires a maximum range in cutting speed and, further, that the "production of ultrathin serial sections of specimens that have a great variation in physical properties is very difficult." Accordingly, HEW advises in its respectively cited memoranda, that cutting speeds in excess of 4 millimeters per second are pertinent to the satisfactory sectioning of the specimen materials and the relevant embedding materials that will be used by the applicants in their respective experiments.

For these reasons, we find that the Sorvall Model MT-2B ultramicrotome is not of equivalent scientific value to the foreign articles to which the foregoing applications relate, for such purpose as these articles are intended to be used.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to any of the foreign articles to which the foregoing applications relate, for such purposes as these articles are intended to be used, which is being manufactured in the United States.

TELECOMMUNICATIONS EQUIPMENT TECHNICAL ADVISORY COMMITTEE

Partially Closed Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. I (Supp. V, 1975), notice is hereby given that a meeting of the Telecommunications Equipment Technical Advisory Committee will be held on Tuesday, September 20, 1977, at 10:00 a.m. in Room 4833, Main Commerce Building, 14th and Constitution Avenue NW., Washington, D.C.

The Telecommunications Equipment Technical Advisory Committee was initially established on April 5, 1973. On March 12, 1975 and March 16, 1977, the Acting Assistant Secretary for Administration approved the recharter and extension of the Committee for two additional years, pursuant to Section 5(c)(1) of the Export Administration Act of 1969, as amended, 50 U.S.C. App. Sec. 2404(c)(1) and the Federal Advisory Committee Act.

The Committee advises the Office of Export Administration, Bureau of East-West Trade, with respect to questions involving (A) technical matters, (B) worldwide availability and actual utilization of production technology, (C) licensing procedures which affect the level of export controls applicable to telecommunications equipment, including technical data or other information related thereto, and (D) exports of the aforementioned commodities and technical data subject to multilateral controls in which the United States participates including proposed revisions of any such multilateral controls.

The Committee meeting agenda has five parts:

GENERAL SESSION

(1) Opening remarks by the Chairman.

(2) Presentation of papers or comments by the public.

(3) Discussion on draft sections of Findings—Volume I of the annual report.

(4) Review of export control regulations with a view towards their simplification and clarification.

EXECUTIVE SESSION

(5) Discussion of matters properly classified under Executive Order 11652, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

The General Session of the meeting is open to the public, at which a limited number of seats will be available. To the extent time permits members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting.

With respect to agenda item (5), the Acting Assistant Secretary of Commerce for Administration, with the concurrence of the delegate of the General Counsel, formally determined on April 22, 1977, pursuant to Section 10(d) of the Federal Advisory Committee Act, as amended by Section 5(c) of the Government In The Sunshine Act, Pub. L. 94-409, that the matters to be discussed in the Executive Session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552b(c)(1). Such matters are specifically authorized under criteria established by an Executive Order to be kept secret in the interests of the national defense or foreign policy. All materials to be reviewed and discussed by the Committee during the Executive Session of the meetting have been properly classified under the Executive Order. All Committee members have appropriate security clearances.

Copies of the minutes of the open portion of the meeting will be available upon written request addressed to the Freedom of Information Officer, Domestic and International Business Administration, Room 3012, U.S. Department of Commerce, Washington, D.C. 20230.

For further information, contact Mr. Charles C. Swanson, Director, Operations Division, Office of Export Administration, Domestic and International Business Administration, Room 1617M, U.S. Department of Commerce, Washington, D.C. 20230, telephone: A/C 202-377-4196.

The complete Notice of Determination to close a series of meetings or portions of meetings of the Telecommunications Equipment Technical Advisory Committee and of any subcommittees thereof, was published in the FEDERAL REGISTER on May 25, 1977, (42 FR 26682).

Dated: August 29, 1977.

RAUER H. MEYER,
Director, Office of Export Administration, Bureau of East-West Trade, U.S. Department of Commerce.

Consolidated Decision on Applications for Duty-Free Entry of Accessories for Foreign Instruments

The following is a consolidated decision on applications for duty-free entry of accessories for foreign instruments pursuant to Section 6(c) of the Educational Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301). (See especially Section 301.11(e).)

A copy of the record pertaining to each of the applications in this consoli-

V 42 171 SEP 2 77 UMI

dated decision is available for public review during ordinary business hours of the Department of Commerce, at the Special Import Programs Division, Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 77-00180. Applicant: University of California, San Diego, Dept. of Neurosciences, School of Medicine, La Jolla, Calif. 92093. Article: JEOL JEM-100C-ASID-4D High Resolution Scanning Attachment. Manufacturer: JEOL Ltd., Japan. Intended us of article: The article is an accessory designed for use with the JEM-100C transmission electron microscope. Both will be used in a wide variety of research and teaching projects; in particular, the article will permit the transmission electron microscope to be used as an ultra high resolution scanning microscope for the study of the structure of biological cells and tissues. Induced among these will be nerve tissues and phenomena associated with neurological diseases; the supramolecular structure of excitable membranes; and serial sections of subcellular regions of neurons, suitable for computer reconstruction. Experiments will be highly varied in nature but all will concentrate on studies of cell surface morphology. In addition, the article will be used primarily in a course: "Workshop in Electron Microscopy" which introduces studies to standard preparative techniques for both scanning and transmission electron microscopy. Application received by Commissioner of Customs: March 28, 1977. Advice submitted by the Department of Health, Education, and Welfare on: July 11, 1977.

Docket Number: 77-00189. Applicant: Washington University School of Medicine, 660 South Euclid, St. Louis, Mo. 63110. Article: ASID-4D Scanning System for JEM 100C Electron Microscope. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is an accessory for an electron microscope which is intended to be used to study native and reconstituted liproproteins, vascular tissues, endocrine tissues, cell membranes, etc. The ultrastructural as well as immunological and biological activity of native and synthetic liproproteins will be characterized and compared in studies designed to elucidate the structure and function of apoproteins and lipid constituents of liproproteins and their role in the pathogenesis of atherosclerotic vascular disease. The permeability of capillaries and venules of the heart to electron dense markers including ferritin and peroxidase type markers will be examined in a variety of pathophysiological conditions including diabetes mellitus and ischemic injury in studies designed to investigate the pathogensis of diabetic microangiopathy and ischemic injury to vessels. Experiments will also be performed to demonstrate and characterize insulin receptor sites on fat cell membranes using ferritin labeled insulin conjugates. Application received by Commissioner of Customs: April 1, 1977. Advice submitted by the Department of Health, Education, and Welfare on: June 24, 1977.

Docket Number: 77-00192. Applicant: The Pennsylvania State University, University Park, Pa. 16802. Article: Goniometer stage assembly and scanning attachments for EM 300. Manufacturer: Philips Electronics Instruments NVD, The Netherlands. Intended use of article: The articles are accessories to an existing electron microscope which allows the electron microscope to be used to analyze suitably prepared thin sections of biological samples for a large array of chemical elements. Some of the tissue and cells to be studied are bone (cells and matrix), avian oviduct mucosa, intestinal mucosa, and enamel organ. Experiments will be conducted to obtain an accurate description of the pathway of several physiologically important elements during their translocation across cells, to identify the cellular sites of localization of these elements and to ascertain quantitatively and qualitatively the changes in the subcellular distribution of their elements in certain pathological conditions. In addition, the article will be used for educational purposes in the courses: Biophysics 585—to develop an understanding of the structure and function of cells by observing them at the ultrastructural level and to learn how to prepare and interpret electron micrographs and Biophysics 600—in which students perform research for a graduate degree. Application received by Commissioner of Customs: April 4, 1977. Advice submitted by the Department of Health, Education, and Welfare on: June 24, 1977.

Docket Number: 77-00197. Applicant: William Paterson College, 300 Pompton Road, Wayne, N.J. 07470. Article: Cryokit for Cryo-ultramicrotomy, Model LKB 14800-1 and accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article will be used to study the effects of cryo-protectants on animal tissues, e.g., heart, spleen, and liver tissues of rats. The experiments to be conducted include the use of cryoprotectants, such as fluorocarbon compounds, as a media for storing frozen tissues for extended periods of time. Enzyme activity levels will be measured and the tissue will be examined under the electron microscope for structural damage. The objectives pursued in the course of the investigations include the development of a suitable media for storing frozen organs so that when the tissue is thawed there is negligible damage to the structure and the biochemical activities of the organ. In addition, the article will be used in the courses: Electron Microscopy and Independent Study to prepare undergraduate students for jobs as electron microscopy technicans and graduate students for conducting research and for preparation for thesis work for their doctorate in other institutions. Application received by Commissioner of Customs: April 21, 1977. Advice submitted by the Department of Health, Education, and Welfare on: June 24, 1977.

Comments: No comments have been received with respect to any of the foregoing applications.

Decision: Applications approved. No instrument or apparatus of equivalent scientific value to the foreign articles, for the purposes for which the articles are intended to be used, is being manufactured in the United States.

Reasons: The applications relate to compatible accessories for instruments that have been previously imported for the use of the applicant institutions. The articles are being manufactured by the manufacturers which produced the instruments with which they are intended to be used. We are advised by the Department of Health, Education, and Welfare (HEW) in the respectively cited memoranda that the accessories are pertinent to the applicants' intended uses and that it knows of no comparable domestic articles.

The Department of Commerce knows of no similar accessories manufactured in the United States which are interchangeable with or can be readily adapted to the instruments with which the foreign articles are intended to be used.

UNIVERSITY OF CHICAGO

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket number: 77-00249. Applicant: University of Chicago, Operator of Argonne National Lab., 9700 South Cass Avenue, Argonne, Ill. 60439. Article: Backward-wave millimeter microwave oscillator and accessories. Manufacturer: Thomson-CSF, France. Intended use of article: The article is intended to be used in proton polarized target (PPT) facilities which are used to conduct high energy physics (HEP) research on the scattering produced by high energy K's and π's, etc., on a proton polarized target, i.e., material which has a large fraction of its protons pointing in the same direction. There are certain HEP experiments such as the measurement of A and R, the scattering amplitudes and phases of weak resonance which can only effectively be measured with PPT targets.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States. Reasons: The foreign article provides a 68.85 to 71.00 gigahertz frequency range. The National Bureau of Standards (NBS) advises in its memorandum dated July 14, 1977 that (1) the capability of the article described above is pertinent to the applicant's research purposes and (2) it knows of no domestic instrument of equivalent scientific value to the foreign article for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

UNIVERSITY OF FLORIDA

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 77-00222. Applicant: University of Florida, College of Engineering, Chemical Engineering, 227 CHE, Gainesville, Fla. 32611. Article: NMR Spectrometer, Model JNM-C-60-HL. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is intended to be used by staff members and students for studies of biological materials such as lipids, proteins, hormones, vitamins, and membranes, as well as engineering materials such as asphalt, crude oils, surfactants, pigments, and various colloids by means of nuclear magnetic resonance spectroscopy. The following are the major projects which will be carried out with the article: (a) The structure of water in microemulsions. (b) The mechanisms of phase inversion of micro- and macro-emulsions. (c) Molecular motions in liquid-crystalline structures. (d) The equilibrium rate of exchange of molecules at the air-liquid interface. (e) Micelle formation and solubilization in surfactant solutions. (f) Molecular interactions in biological membranes. (g) The structure of absorbed phases on solids. (h) The structure of fluid mixtures and electrolyte solutions. (i) NMR spectroscopy for fluorocarbon studies. (j) Applications of NMR spectroscopy in asphalt research. (k) Mechanisms, reactions, and activity of thiosulfonates and disulfides. (l) Synthesis of new polymers for use in extreme environments. (m) Donor-acceptor complexes of fluorine compounds. (n) Nonclassical aromaticity in hydrogen-bonded systems. (o) The effect of metal ions of unsaturated hydrocarbons in relation to boundary lubrication. (p) Interaction of oxygen with fluorocarbons. (q) NMR spectroscopic studies of polymeric fluids. In addition, the article will be used for teaching purposes in chemical engineering courses.

Comments: Comments dated June 14, 1977 were received from Varian Associates (Varian). Varian alleged inter alia that its Model XL-100 Nuclear Magnetic Resonance (NMR) spectrometer is of equivalent scientific value to the foreign article for such purposes as the article is intended to be used. Varian also alleged that, as early as September 1969, "ease of operation" was felt to be a key feature of the XL-100. Sole support for Varian's allegations was a copy of the introductory ad for the XL-100, which described this instrument as a "high resolution research system" and as "the easiest to use research NMR spectrometer on the market".

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, was being manufactured in the United States at the time the foreign article was ordered (June 24, 1971).

Reasons: This application is a resubmission of Docket Numbers 72-00063-01-77030, 73-00262-01-77030, 76-00026-01-77030, and 77-00002 which were denied without prejudice to resubmission on August 30, 1972, April 3, 1975, July 9, 1976 and February 1, 1977, respectively for informational deficiencies. Although the foreign article can be equipped with a variety of accessories to increase its versatility as well as its complexity, the foreign article as ordered by the applicant is a relatively unsophisticated instrument which is amenable to use by large numbers of relatively inexperienced individuals with moderate supervision. The most closely comparable domestic instrument available at the time the foreign article was ordered was the Model XL-100 NMR spectrometer manufactured by Varian. Through the years the Model XL-100 has undergone steady improvement and now, due to added automation, is considered much simpler than the XL-100 initially produced. However, at the time of order the XL-100, which was designed to be a research instrument with a great deal of versatility (especially in the study of a number of nuclei and in the employment of various double resonance experiments), had (even without added accessories) the unavoidable complexity that usually accompanies such a degree of sophistication. Although the XL-100 in existence at the time of order could probably be used for teaching under certain restrictive conditions, freedom of use by a large number of relative neophytes was not advisable. (In this connection, it is noted that Varian's introductory ad for the XL-100 did not indicate that this instrument was receptive for use in any kind of training program). The applicant provided evidence to show that inexperienced individuals including a very large number of undergraduate students will be using the foreign article in research and training. The National Bureau of Standards (NBS) and the Department of Health, Education, and Welfare (HEW) advised in their memoranda dated July 25, 1977 and July 5, 1977, respectively that the relatively lower degree of complexity of the foreign article compared to the XL-100 is pertinent to the purposes for which the foreign article is intended to be used. Both of these agencies also advise that the Model XL-100 NMR spectrometer was not of equivalent scientific value to the foreign article for such educational purposes as this article is intended to be used at the time the foreign article was ordered.

Thus, based on advice of NBS and HEW, our review of the application and factual information in our possession (specifications, textbooks, etc.), we find that the Model XL-100 NMR spectrometer was not of equivalent scientific value to the foreign article for such purposes as this article is intended to be used at the time the foreign article was ordered.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which was being manufactured in the United States at the time the foreign article was ordered.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials.)

RICHARD M. SEPPA,
Director, Special Import Programs Division.

National Bureau of Standards

CHARACTER SETS FOR OPTICAL CHARACTER RECOGNITION

Proposed Revision of Federal Information Processing Standard

Under the provisions of Public Law 89-306 and Executive Order 11717, the Secretary of Commerce is authorized to establish uniform Federal Automatic Data Processing (ADP) Standards. A revised standard for Character Sets for Optical Character Recognition is being recommended for use by Federal agencies in their Optical Character Recognition (OCR) data entry systems.

Prior to the submission of this proposed revision to the Secretary of Commerce for approval, it is essential to assure that proper consideration is given to the needs and views of manufacturers,

UMI
V 42 171
SEP 2 77
UMI

the public, and state and local governments. The purpose of this notice is to solicit such views.

This revised Federal Information Processing Standard contains two basic sections: (1) An announcement section which provides information concerning the applicability and implementation of the standard, and (2) a specification section which defines the technical parameters of the standard. Both sections are provided with this notice.

Interested parties may obtain copies of the referenced voluntary standards, ANSI X3.49–1975—Character Set for Optical Character Recognition (OCR-B), and X3.2–1976—Print Specifications for Magnetic Ink Character Recognition (MICR), from the American National Standards Institute, 1430 Broadway, New York, N.Y. 10018. Copies of X3.17–197X, Character Set and Print Quality for Optical Character Recognition (OCR-A), are available from the NBS Office of ADP Standards Management.

Comments should be submitted to the Associate Director for ADP Standards, Institute for Computer Sciences and Technology, National Bureau of Standards, Washington, D.C. 20234. Comments to be considered must be submitted within 90 days of the date of this notice.

Date: August 29, 1977.

ARTHUR O. McCOUBREY,
Acting Director.

National Oceanic and Atmospheric Administration

WEATHER MODIFICATION ADVISORY BOARD

Public Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C., App. 1 (Supp. V, 1975), notice is hereby given of the fourth meeting of the Weather Modification Advisory Board.

The Weather Modification Advisory Board will meet from 2 p.m. to 6:15 p.m. on September 23, 1977, and from 9 a.m. to 6:30 p.m. on September 24, 25 and 26, 1977, in Boulder, Colo., at locations indicated in the agenda. Evening sessions will be scheduled when necessary.

The Board was established in January 1977 (42 FR 4512, 1–25–77), to advise the Secretary of Commerce on matters of a national policy, a national research and development program, and other aspects of weather modification as outlined in the National Weather Modification Policy Act of 1976 (Pub. L. 94–490), enacted on October 13, 1976. The Board consists of 17 members, with a balanced representation selected from scientific, academic, commercial, consumer, legal, and environmental groups, who are appointed by the Secretary of Commerce.

The purpose of this meeting is to discuss reports of consultant working groups, consolidate various weather modification issues, assign study tasks, begin drafting parts of the Board's report and plan future meetings. The Board will also hear from local and State officials concerned with the Colorado Weather Modification Program and from opponents of weather modification activity.

The agenda for the meeting is:

SEPTEMBER 23 (FRIDAY)

2–2:15 p.m.—Introductory remarks (Conference Room Fleischman Building, National Center for Atmospheric Research, Boulder, Colo.).
2:15–6:15 p.m.—Presentation and discussion of working group report, "The Case for Weather Modification: Science, Technology, Economic Benefits and Obstacles."

SEPTEMBER 24 (SATURDAY)

9 a.m.–12:30 p.m.—(Conference Room, Rodeway Inn, Boulder, Colo.). Discussion with Local and State Officials on Colorado's regulatory and operational programs. Opponents of weather modification activity will also present their views.
12:30–2 p.m.—Recess for lunch with speaker covering Utah's weather modification program.
2–6:30 p.m.—Presentation and discussion of working group report on international, institutional and legal aspects of weather modification.

SEPTEMBER 25 (SUNDAY)

9 a.m.–12:30 p.m.—(Rodeway Inn conference room). Presentation and discussion of working group report on weather modification research, operations, demonstration, and funding.
12:30–2 p.m.—Recess for lunch.
2–4 p.m.—Continuation of discussion.
4–6:30 p.m.—Presentation and discussion of working group report on possible weather modification techniques.

SEPTEMBER 26 (MONDAY)

9 a.m.–12:30 p.m.—(Fleischman Building, National Center for Atmospheric Research, Boulder, Col.). Discussion and resolution of weather modification issues, assignment of study tasks and planning for future meetings.
12:30–1:30 p.m.—Recess for lunch.
1:30–6:30 p.m.—Writing session for initial drafts of sections of the Board's report.
6:30 p.m.—Adjournment.

The meeting will be open to the public and a period will be set aside at the discretion of the Chairman for oral comments or questions by the public which do not exceed 10 minutes each. More extensive questions or comments should be submitted in writing before September 20. Other public statements regarding Board affairs may be submitted at any time before or after the meeting. Seating will be available for the public on a first-come first-served basis at the Fleischman Building and the Rodeway Inn conference rooms.

Copies of the minutes will be available on request 30 days after the meeting.

Inquiries may be addressed to Dr. Ronald L. Lavoie, Director, Environmental Modification Office, National Oceanic and Atmospheric Administration, Rockville, Md. 20852, phone: 301–443–8721.

Dated: August 31, 1977.

T. P. GLEITER,
Assistant Administrator for Administration.

[FR Doc.77-25870 Filed 9-1-77;8:46 am]

Office of the Secretary

ADVISORY COMMITTEES

Termination

Notice is hereby given of the termination of five advisory committees as a result of the recent Annual Comprehensive Review of Advisory Committees.

The committees and their respective termination dates are as follows:

Census Advisory Committee on State and Local Area Statistics (June 30, 1977).
Commerce Technical Advisory Board's Panel on Energy Policy (March 2, 1977).
Federal Information Processing Standards Task Group 15 (May 31, 1977).
Industry Advisory Committee on Metal Scrap Problems (June 30, 1977).
Secretary's Advisory Council (March 25, 1977).

Dated: August 26, 1977.

ELSA A. PORTER,
Assistant Secretary for Administration.

[FR Doc.77-25684 Filed 9-1-77;8:45 am]

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

PROCUREMENT LIST 1977

Proposed Addition

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Proposed Addition to Procurement List.

SUMMARY: The Committe has received a proposal to add to Procurement List a commodity to be produced by workshops for the blind or other severely handicapped.

COMMENTS MUST BE RECEIVED ON OR BEFORE: October 6, 1977.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, 2009 14th Street North, Suite 610, Arlington, Va. 22201.

FOR FURTHER INFORMATION CONTACT:

C. W. Fletcher, 703–557–1145.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2), 85 Stat. 77.

If the Committee approves the proposed addition, all entities of the Federal Government will be required to procure the commodity listed below from workshops for the blind or other severely handicapped.

This notice supersedes the notice of proposed addition of this commodity which was published in the FEDERAL REGISTER on August 30, 1977 (42 FR 43659).

It is proposed to add the following commodity to Procurement List 1977, November 18, 1976 (41 F.R. 50975):

Class 6645

Clock, Wall, 6645–01–046–8849.

C. W. FLETCHER,
Executive Director.

[FR Doc.77-25749 Filed 9-1-77;8:45 am]

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

PROCUREMENT LIST 1977

Proposed Additions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Proposed Additions to Procurement List.

SUMMARY: The Committee has received proposals to add to Procurement List 1977 commodities to be produced by workshops for the blind or other severely handicapped.

COMMENTS MUST BE RECEIVED ON OR BEFORE: October 6, 1977.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, 2009 14th Street North, Suite 610, Arlington, Va. 22201.

FOR FURTHER INFORMATION CONTACT:

C. W. Fletcher, 703–557–1145.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2), 85 Stat. 77. If the Committee approves the proposed additions, all entities of the Federal Government will be required to procure the commodities listed below from workshops for the blind or other severely handicapped.

It is proposed to add the following commodities to Procurement List 1977, November 18, 1976 (41 FR 50975):

Class 7330

Pad, Bakery 7330–00–379–4439. (The above for GSA Supply Distribution facilities in Regions 3 and 6 only.)

Class 8115

Box, Wood, 8115–00–935–6528.

Class 8465

Clipboard, Pilot's, 8465–01–012–9174.

C. W. FLETCHER,
Executive Director.

[FR Doc.77-25707 Filed 9-1-77;8:45 am]

COUNCIL ON ENVIRONMENTAL QUALITY

ENVIRONMENTAL IMPACT STATEMENTS

Availability

The following is a list of environmental impact statements received by the Council on Environmental Quality from August 22 through August 26, 1977. The date of receipt for each statement is noted in the statement summary. Under Council Guidelines the minimum period for public review and comment on draft environmental impact statements is forty-five (45) days from this FEDERAL REGISTER notice of availability (October 17, 1977). The thirty (30) day period for each final statement begins on the day the statement is made available to the Council and to commenting parties.

Copies of individual statements are available for review from the originating agency. Back copies are also available at 10 cents per page from the Environmental Law Institute, 1346 Connecticut Avenue, Washington, D.C. 20036.

DEPARTMENT OF AGRICULTURE

Contact: Mr. Errett Deck, Coordinator, Environmental Quality Activities, U.S. Department of Agriculture, Room 307A, Washington, D.C. 20250 (202–447–6827).

FOREST SERVICE

Draft

Klamath Basin Working Circle, Timber Plan, Lake and Klamath Counties, Oreg., August 26: Proposed is a revision of the 10-year Timber Resource Plan for the Klamath Basin Working Circle of the Fremont and Winema National Forests. The Working Circle is located in Lake and Klamath Counties, South Central Oregon. Five alternatives are presently under consideration. The preferred alternative proposes a potential yield of 234 MMBF/year. This is based on the sustained yield and even flow concept. Intensive timber management practices are proposed that will enable a greater harvest during the plan period. Roads will be constructed, skid trails opened up and a general disturbance of portions of the forest floor will occur. (ELR Order No. 71046.)

SOIL CONSERVATION SERVICE

Final

Furnace Brook Watershed, Warren County, N.J., August 23: The proposed channel improvement is a component of the Furnace Brook Watershed Project, which is designed to reduce floodwater damages in the village of Oxford, New Jersey. The planned work involves the enlargement and deepening of a 1530 foot reach of Furnace Brook. This work will complement the previously installed upstream floodwater retarding structure to provide a 100-year level of flood protection to the village. Short term biological impacts will result. Comments made by: USDA, DOD, HEW, DOI, EPA, AHP, State and local agencies. (ELR Order No. 71030.)

CANAL ZONE GOVERNMENT

Draft

White Amur Introduction, Canal Zone Waters, August 23: Proposed is the introduction of 250,000 white amur (Ctenopharyngodon idella) into Gatun Lake as a biological control for the submerged aquatic weed Hydrilla verticillata. Although present in the lake for at least fifty years, hydrilla has grown rapidly in recent years until an estimated 12 percent of the lake is densely infested. Current management techniques employing copper sulfate have not been successful in limiting the spread of this species of aquatic weed. The Panama Canal Company proposes to transport 125,000 fingerling white amur a year for two consecutive years and place them into two small lakes that are confluent with Gatun Lake. (ELR Order No. 71032.)

DEPARTMENT OF DEFENSE

ARMY CORPS

Contact: Dr. C. Grant Ash, Office of Environmental Policy Department, Attn: DAEN-CWR-P, Office of the Chief of Engineers, U.S. Army Corps of Engineers, 1000 Independence Avenue, SW., Washington, D.C., 20314 (202–693–6795).

Final

Mississippi R. Flood Control, Prairie du Chien, Crawford County, Wis., August 23: The proposed action is a mixture of floodplain evacuation, flood proofing, and continued floodplain regulations within the 100-year floodplain at Prairie du Chien, located on the Mississippi River. The plan recommends that Praire du Chien designate a somewhat larger floodplain and that all residential homeowners with houses at ground elevations between 625 and 630.5 feet have the option of partially flood proofing their homes at project expense. (St. Paul District) Comments made by: EPA, AHP, USDA, DOC, DOI, DOT, State agencies. (ELR Order No. 71033.)

Supplement

Gulf ICW, Texas, Channel to Arkansas Pass (S–1), Texas, August 22: This statement supplements a final EIS filed with CEQ in May 1974 and relates to the Gulf Intracoastal Waterway, Texas, tributary channel to Arkansas Pass. The proposed action involves designation of a former residential area located within the city of Arkansas Pass for disposal of dredged material in connection with new work dredging and future maintenance of the project. This supplement addresses designating Disposal Area No. 7, a former residential area, to be used as a disposal site in association with new work, and maintenance dredging of the Tributary Channel to Arkansas Pass. (Galveston District.) (ELR Order No. 71021.)

DEPARTMENT OF DEFENSE

U.S. NAVY

Contact: Office of the Chief of Naval Operations, (OP-941D), Navy Department, Washington, D.C. 20350.

Supplement

Project Seafarer, Electric and Magnetic Fields (S–1), August 18: This statement supplements a draft EIS filed with CEQ and relates to the biologic effects of electric and magnetic fields associated with proposed Project Seafarer. This report has been prepared by the Committee on Biosphere Effects of Extremely-Low-Frequency Radiation in response to a request from the U.S. Navy for a study of the possibility that plants, people, and other animals would be harmed by the electric and magnetic fields associated with operation of the transmitter of the Seafarer communication system proposed by the Navy. (ELR Order No. 71051.)[1]

ENVIRONMENTAL PROTECTION AGENCY

Contact: Please refer to the separate notice published by EPA in this issue of the FEDERAL REGISTER for the appropriate EPA contact.

Draft

Boulder Wastewater Treatment Facilities, Boulder County, Colo., August 23: Proposed are the design and construction of additional wastewater treatment facilities for the city of Boulder, Colorado. This statement identifies alternatives for providing Boulder with improved wastewater facilities to meet the needs of its residents. The projected service area contains approximately 140 square miles and is bounded by the foothills to the west, Davison Mesa to the south and Gunbarrel Hill to the north. The population of the planning area is projected to be 129,000. (Region VIII.) (ELR Order No. 71025.)

Final

N. Monterey County Facilities Plan, Monterey County, Calif., August 23: The pro-

[1] Due to administrative oversight, the notice of receipt of the supplemental EIS prepared by the Department of the Navy concerning Biologic Effects of Electric and Magnetic Fields Associated with Proposed Project Seafarer was omitted from the last CEQ FEDERAL REGISTER listing. The statement was received by the Council on August 18, 1977.

UMI
SEP 2 7 V 42 171

posed Facilities Plan is designed to improve water quality by improving wastewater treatment service to residents in the southern Monterey Bay-lower Salinas Valley region of Monterey County, Calif. The major objective of the project is to eliminate public health hazards and water quality problems being caused by existing wastewater discharges to Monterey Bay, the Salinas River, Tembladero Slough, and Elkhorn Slough. In addition, the plan seeks to supply the additional wastewater treatment capacity needed to accommodate anticipated growth in the area. (Region IX.) Comments made by: COE, USCG, DOI, USDA, EPA, HEW, DOT, FPC, AHP, State and local agencies, groups and individuals. (ELR Order No. 71034.)

Steamboat Springs, 201 Wastewater Facilities, Routt County, Colo., August 26: Proposed is the provision of federal matching funds for regional wastewater treatment in the Steamboat Springs region through the authority of the Water Pollution Control Act. The principal river drainage is the Yampa River which is in poor condition. This project is intended to consolidate the five existing point sources of sewage effluent into one plant designed to achieve stated water quality goals. Plant site options include use of the existing city lagoon site or a new location three miles west of the city lagoons. (Region VIII.) Comments made by: EPA, FEA, USDA, DOI, DOT, State and local agencies. (ELR No. 71050.)

Albuquerque Wastewater Treatment Facilities, New Mexico, August 25: Proposed is the construction of 105 miles of new interceptor and collector sewer lines for the City of Albuquerque. Also, relief interceptors will be constructed parallel to overloaded lines and lift and odor control stations will be upgraded. It is proposed that 1 mgd of effluent be sold to the Public Service Company of New Mexico for use as cooling water. All other effluent will be discharged to the Rio Grande as at present. Adverse impacts include consumption of energy, materials, chemicals and financial resources; generation of small amounts of non-recycled wastes; and continued discharge to the River. (Region VI) Comments made by: COE, DOT, AHP, USDA, State and local agencies. (ELR Order No. 71041.)

Supplement

W. Contra Costa Co. Wastewater Program (S-2), Contra Costa County, Calif., August 26: This statement supplements a final EIS filed with CEQ in January 1977, and relates to the West Contra Costa County Wastewater Management Program (Wet Weather Flow Treatment, Plant Rehabilitation and Regional Sludge Handling at the San Pablo Sanitary District). The project proposes to provide wastewater treatment for wet weather infiltration-inflow flows to the San Pablo Sanitary District (SPSD) treatment plant, rehabilitate or replace some treatment facilities at the SPSD, and provide a sludge transport pipeline from the Richmond treatment plant to the SPSD. (ELR Order No. 71048.)

FEDERAL ENERGY ADMINISTRATION

Contact: Mr. Robert Stern, Director, Office of Environmental Programs, Federal Energy Administration, New Post Office Building, Room 7119, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461 (202-566-9760).

Draft

Crude Oil Price Incentive Rulemakings Effects, August 26: Proposed is the implementation of a new set of price regulations by the Federal Energy Administration. These regulations, pursuant to the Energy Policy and Conservation Act (EPCA) and the Energy Conservation and production Act (EPCA), are intended to ameliorate the impact of inflation and provide additional price incentives for crude oil production. Execution of the EPCA is to be a 3-state process; this EIS analyzes the effect of State II of the crude oil price regulations. The proposed regulations provide for monthly upward adjustments of the composite price, beginning in March 1976, to take into account the effects of inflation and to provide additional production incentives. (ELR Order No. 71049.)

GENERAL SERVICES ADMINISTRATION

Contact: Mr. Andrew E. Kauders, Executive Director, Environmental Affairs Division, General Services Administration, 18th and F Streets NW., Washington, D.C. 20405 (202-566-0405).

Final

Metallurgy Research Center, Salt Lake City, Salt Lake County, Utah, August 24: The proposed action is the construction of a new Metallurgy Research Center for the Bureau of Mines, Department of Interior. The Center will replace the current building in Salt Lake City and will house approximately 120 full- and 20 part-time employees. The project will require the commitment of 34 acres of land and will have an impact upon the cultural and historic resources of the area. Comments made by: AHP, COE, HEW, DOI, EPA, NRC, State and local agencies, interest groups. (ELR Order No. 71040.)

DEPARTMENT OF HUD

Contact: Mr. Richard H. Broun, Director, Office of Environmental Quality, Department of Housing and Urban Development, 451 7th Street, S.W., Washington, D.C. 20410 (202-755-6308).

Draft

Taylor Ranch Community, Bernalillo County, N. Mex., August 23: Proposed is the acceptance of the Taylor Ranch Planned Community in Albuquerque, New Mexico for mortgage insurance purposes. The development of the 1093.6-acre area calls for single family homes, multi-family homes, apartments, schools, a civic center, shopping and commercial areas, and park and recreation facilities. Major adverse impacts of the proposed project would include removal of the archaeological resources of the site, and creation of significant traffic congestion and safety hazard on Coors Road unless transportation alternatives are implemented. (ELR Order No. 71028.)

Heritage Hills Subdivision, New Mexico, August 23: Proposed is the acceptance of the Heritage Hills Subdivision in Albuquerque, N. Mex. for mortgage insurance purposes. The 306-acre development will be composed of single family homes, a park, an elementary school site and an area reserved for future development. Adverse effects include short term crowding in existing middle and high school facilities and an associated impetus for construction of new facilities. (ELR Order No. 71029.)

Country Colony Subdivision, Montgomery County, Tex., August 23: Proposed is FHA approval for mortgage insurance for Superior Homes, Inc.'s 300.22 acre Country Colony Subdivision in southeastern Montgomery County, Texas. This request for mortgage insurance reflects the fact that the development will exceed the 500-lot threshold, thus requiring an EIS. Adverse effects of the development include increased air and noise pollution, and increased demand upon community services. (ELR Order No. 71023.)

Westpoint Development, Tarrant County, Tex., August 23: Proposed is the acceptance of the 1,311-acre Westpoint Development for mortgage insurance purposes. The development, located on I-30 and West Loop 820 approximately 10 miles west of the Forth Worth Central Business District, is designed to accommodate a 1985 population of 13,300 persons with a housing supply of 4,600 units. Of these housing units, 3,650 are single-family homes and 950 units are apartments, cluster, condominiums, townhomes, duplexes and other multi-family units. The proposed development also provides for schools, parks, commercial and shopping centers and other community facilities. (ELR Order No. 71024.)

Camden Park Subdivision, Harris County, Tex., August 23: Proposed is the acceptance of the 316-acre Camden Park Subdivision for mortgage insurance purposes. Project plans call for the development of single-family homes, with some commercial reserves in Harris County, Texas. Adverse effects include the loss of agricultural land and an increased demand for fossil fuels through heavy dependence on the automobile for transportation. (ELR Order No. 71031.)

North Spring Subdivision, Harris County, Tex., August 24: Proposed is the acceptance of North Spring Joint Venture's 1125-acre North Spring Subdivision in the northern part of Harris County, Texas for mortgage insurance purposes. The proposed development plan calls for the construction of approximately 3300 housing units with additional acreage reserved for commercial, open space and recreational use. Adverse effects include increased automobile traffic, vehicle emissions, and noise levels. (ELR Order No. 71036.)

Greensbrook and Lake Forest Subdivisions, Harris County, Tex., August 26: The proposed action is for the Department of HUD to accept for HUD-FHA mortgage insurance purposes the Greensbrook and Kings Lake Forest Subdivisions located in the northeast section of Harris County, Texas. When completed in approximately ten years, the subdivisions will contain approximately 2,628 single family homes plus recreational facilities to serve the subdivisions. Adverse effects include the removal of potential forestland and livestock grazing land from production. (ELR Order No. 71047).

Final

Oak Tower, Oak Park, Cook County, Ill., August 24: Proposed is the provision of FHA mortgage insurance for 472 residential units in a structure with two nineteen-story towers located at Lake Street and Forest Avenue in Oak Park, Illinois. Adverse effects include construction related pollution, increased traffic, potential for alteration of the existing setting of an historically significant district, and potential to stimulate a trend of high intensity development which could overload some components of the physical infrastructure. Comments made by: EPA, FPC, DOI, DOT, State and local agencies, and concerned groups. (ELR Order No. 71037.)

Sangaree Planned Community, Berkeley County, S.C., August 26: Proposed is the development of the Sangaree Planned Community on a 1,200 acre tract in Berkeley County, South Carolina, 70% of which will be single family residential. Other long range land uses include multifamily, offices, light commercial, light industrial, and public and quasi-public buildings. Sangaree is proposed to be totally developed over a 6-15 year period. Adverse effects include the conversion of open and wooded land to urban use. Comments made by: EPA, COE, USAF, FPC, GSA, HEW, ERDA, DOI, USDA, State and local agencies, and interest groups. (ELR Order No. 71045.)

Section 104(h)

The following are Community Development Block Grant statements prepared and circulated directly by applicants pursuant to section 104(h) of the 1974 Housing and Community Development Act. Copies may be obtained from the office of the appropriate local chief executive. (Copies are not available from HUD).

Draft

Bulloch Co., Ala.—Rural Water System Improvement, Bulloch County, Ala., August 24: Proposed is the provision of a new rural water service to the Cornerstone, Thompson and Fitzpatrick communities in northwestern Bulloch County, Alabama. Also, existing service in the Greenwood community will be upgraded and interconnected to the Union Springs water system and the South Bulloch water system. The proposed improvements will service approximately 222 rural households. Adverse effects include short-term minor sedimentation of streams and an existing potential for limited erosion. (ELR Order No. 71035.)

Rock Hall, S.C.—Johnson Street Extension, York County, S.C., August 25: Proposed is the construction of the Johnson Street Extension, a one mile, five-lane road passing to the west of the downtown center of Rock Hall, South Carolina and connecting to a 1.3 mile, three-lane road which connects with S.C. 274 at the Village Plaza Shopping Center. The project would also involve the clearance of about 25 acres in census tract 5, near the City Post Office, which would be redeveloped for commercial, wholesale and light manufacturing uses. Adverse effects include short term relocation of displaced residents and increased levels of air and noise pollution. (ELR Order No. 71044.)

Final

Santa Rosa, S. Park Neighborhood Development, Sonoma County, Calif., August 23: This statement provides a comprehensive analysis of the environmental consequences of full implementation of the South Park Neighborhood Development Program in Santa Rosa, California. Redevelopment activities have been underway in the neighborhood for over three years and are anticipated to continue for another ten. Specific features of the plan are the rezoning of a seven-block area to be totally commercial, the expansion of a neighborhood park, and the construction of a new roadway completing a beltway around the neighborhood. Alternatives include cessation of redevelopment, and reduced funding. Comments made by: USDA, AHP, DOI, DOT, EPA, DOD, and State agencies. (ELR Order No. 71026.)

Norfolk, Va.—Downtown West Conservation Projects, August 22: Proposed is the revitalization of the Central Business District of Norfolk, Virginia through the Downtown-West Conservation Project. Three main types of action will take place in the 101-acre area: clearance of structures which are sources of blight for adjacent properties or which cannot be rehabilitated; reworking and upgrading of worn-out public improvements; and rehabilitation of all other properties to meet project standards. The project is expected to ameliorate adverse environmental conditions. Comments made by: EPA, USDA, DOT, DOI, COE, AHP, DOC, USN, and State and local agencies. (ELR Order No. 71001.)

DEPARTMENT OF INTERIOR

Contact: Mr. Bruce Blanchard, Director, Environmental Project Review, Room 4256 Interior Bldg., Department of the Interior, Washington, D.C. 20240, 202-343-3891.

BUREAU OF OUTDOOR RECREATION

Final

Proposed Oregon National Historic Trail, August 25: The statement concerns Federal legislation that would designate the historic route of the Oregon Trail from Independence, Missouri to Oregon City, Oregon as a component of the National Trails System, within the new category of National Historic Trails and Travelways, and establish trail segments and a travelway for public use. Increased public use would result in increased damage to soils, vegetation, historic remnants, and artifacts. Acquisition along high-potential route segments will ultimately total approximately 4,000 acres. Comments made by: AHP, USDA, DOC, COE, DOT, FPC, EPA, HEW, HUD, DOI, State agencies, and private organizations. (ELR Order No. 71042.)

BUREAU OF RECLAMATION

Final

Coronado Project, Maricopa County, Ariz., August 25: Proposed is a joint project, involving the Department of Interior and the Department of Agriculture, associated with the Salt River Project's proposed electrical generating plant at St. John's, Arizona. The facilities are intended to meet the future needs of Maricopa County and of the "Eastern Mining Area." The generating plant, wellfields, pipelines, limestone source, and railroad would occupy 3,516 acres of land and the transmission line would occupy 526 acres. Negative effects include the impact of access roads, tower sites and staging areas on soils, forage, vegetation, and archeological resources. Comments made by: DOI, USDA, HEW, FPC, DOT, ICC, State and local agencies, and groups and individuals. (ELR Order No. 71043.)

GEOLOGICAL SURVEY

Final

Eagle Butte Mine, Amax Coal Co., Lease, Campbell County, Wyo., August 23: Proposed is approval of the surface mining and reclamation plan for Amax Coal Company's Eagle Butte mine in Campbell County, Wyoming. The project calls for mining of 566.2 million tons of coal over a 39-year period, at a rate of 16 million tons per year, on a total of 3,520 acres of Federal coal land and 640 acres of State coal land. The mining will result in the destruction of a total of 3,446 acres of land, degradation of water and open space quality, loss of wildlife habitat, and increased burden on social and economic institutions. Comments made by: HEW, EPA, ICC, DOI, State and local agencies, and concerned groups and individuals. (ELR Order No. 71027.)

DEPARTMENT OF STATE

BUREAU OF OCEANS AND INTERNATIONAL, ENVIRONMENTAL, AND SCIENTIFIC AFFAIRS

Contact: Mr. William Mansfield, III, Office of Environmental Affairs, Department of State, Washington, D.C. 20520.

Draft

New Panama Canal Treaty, August 26: Proposed is the conclusion of a new Panama Canal Treaty with the Republic of Panama concerning the operation and defense of the Panama Canal. The statement examines the alternatives of taking no action on the proposed Treaty, postponing further action on the Treaty, implementing the Treaty's provisions, and the possibility of a new treaty with stronger environmental safeguards. Other elements discussed in the EIS are a proposed Treaty Concerning the Permanent Neutrality and Operation of the Panama Canal and an AID loan for watershed management, which has been proposed in connection with the Canal Treaty. (ELR Order No. 71057).[2]

[2] The period for comment on this draft has been reduced from the usual 45 days to 30 days.

DEPARTMENT OF TRANSPORTATION

Contact: Mr. Martin Convisser, Director, Office of Environmental Affairs, U.S. Department of Transportation, 400 7th Street, S.W., Washington, D.C. 20590, 202-426-4357.

FEDERAL AVIATION ADMINISTRATION

Final

William P. Hobby Airport, Houston, Tex., August 23: The statement refers to the construction of two runways parallel to two existing runways at the William P. Hobby Airport for use by light aircraft. The new runways will be marked and lighting will be installed. Associated taxiways, a new fire and rescue station, and extended drainage and sewer systems will also be installed. Adverse impacts include increased levels of air and noise pollution. Comments made by: EPA, DOI, HEW, HUD, COE, State and local agencies, and concerned interest groups. (ELR Order No. 71022.)

FEDERAL HIGHWAY ADMINISTRATION

Final

Bailey Ave., Peter-Neatum Streets, Hinds County, Miss., August 24: The proposed construction project is located within the city limits of Jackson, Mississippi. The project is approximately 1,876 feet in length and extends in a northerly direction from Peter to Neatum Streets. Construction is to take place on existing right of way where feasible; however, approximately 2.2 acres of right-of-way will be required. The completed project will provide a basic four-lane facility meeting criteria for an arterial (Region 4). Comments made by: EPA, DOI, USDA, HUD, and State agencies. (ELR Order No. 71038.)

Forest Highway 13 (U.S. Rte. 2), Montana, August 24: The statement refers to the proposed construction of 3.6 miles of Forest Highway Rte. 13 (U.S. Rte. 2), from the Essex Bridge easterly to just east of the Burlington Northern R.R. underpass. Stream pollution will increase during construction. A 4(f) determination is necessary because the project is almost entirely within Glacier National Park. Comments made by: DOI USDA, EPA, FPC, DOT, State agencies, and concerned groups and persons. (ELR Order No. 71039.)

NICHOLAS C. YOST,
Acting General Counsel.

M-X BURIED TRENCH CONSTRUCTION AND TEST PROJECT

Public Hearing and Availability of Draft Environmental Impact Statement

An informal public hearing will be held for the purpose of soliciting comments from the public on the Draft Environmental Impact Statement (EIS) on the M-X Buried Trench Construction and Test Project proposed in the San Cristobal Valley on the Luke Air Force Base Range in Yuma County, AZ. The hearing is scheduled to be conducted on September 19, 1977 at 7:30 pm at the Antelope Union High School, Box 26, Route 1, Wellton, AZ 85356. Any changes to this schedule will be publicized in the local news media.

The project includes the construction of two sections of underground tunnel totaling approximately 21,500 feet in length. The proposed construction project will provide essential cost and con-

SEP 2 7 1977 V 42 171 UMI

struction data to analyze conceptual protective structures for the mobile, land-based Intercontinental Ballistic Missile (ICBM) System known as the MX. The construction will also serve as a test bed for mechanisms designed to punch through the tunnel roof and erect a dummy missile to simulate launch position. The Draft EIS on the proposed project was filed with the Council on Environmental Quality (CEQ) on August 5, 1977. Limited copies of the Draft EIS are available from:

Civil Engineering Division, SAMSO/MNND Norton AFB, CA 92409.

In addition, copies of the Draft EIS have been placed in the following libraries for public reference:

Arizona Collection, University Library, Arizona State University, Temple, AZ 85281.
University Library, Documents Section, University of Arizona, Tucson, AZ 85721.
Arizona Department of Library and Archives, 3rd Floor, State Capitol, Phoenix, AZ 85007.
Library Arizona Western College, Yuma, AZ 85364.
Library, Maricopa County, Community College District, P.O. Box 13349, Phoenix, AZ.
Library, Pima College, 2202 West Anklam Rd., Tucson, AZ 85709.
Miss Gertrude Thayer, Librarian, Maricopa County Free Library, Regional Headquarters, 125 West Washington, Phoenix, AZ 85003.
Mr. Clarence M. Dial, Librarian, Mesa Public Library, Maricopa County System, 59 East First St., Mesa, AZ 85203.
Phoenix Public Library, 12 East McDowell, Phoenix, AZ 85004.
Mrs. Frances E. Thomas, Librarian, Yuma City County Library, Regional Headquarters 350 South 3rd St., Yuma, AZ 85364.
Tempe Public Library, Maricopa County System, 3300 South Mill Ave., Tempe, AZ 85281.
Tucson Public Library, Regional Headquarters, 200 South 6th Ave., Tucson, AZ 85701.

The Presiding Officer at the Hearing will be Colonel Allan C. Smith, Chief Circuit Judge, 5th Judiciary Circuit, USAF Trial Judge, Travis Air Force Base, CA 94535.

The following procedures will be followed during the informal public hearing. Individual speakers will be limited to five minutes, with ten minutes for a group spokesman. There will be no relinquishing of time by one speaker to another. Written statements, in addition to or in lieu of oral presentations will be accepted. The closing date for including written communications in the hearing record is five days after date of puublic hearing. Submit written communications to the presiding officer or as directed at the public hearing.

Other persons not able to participate in the public hearing have until September 26, 1977 to submit their written comments to the Deputy for Environment and Safety, Office of the Secretary of the Air Force (SAF/MIQ), Washington, D.C. 20330.

For further information, contact Mr. Wayne Hudson, Environmental Planning Division, Headquarters U.S. Air Force, 202-695-1422.

FRANKIE S. ESTEP,
Federal Register Liaison, Directorate of Administration.

DEPARTMENT OF DEFENSE

Office of the Secretary

DEFENSE SCIENCE BOARD TASK FORCE ON CRUISE MISSILES

Advisory Committee Meeting

The Defense Science Board Task Force on Cruise Missiles will meet in closed session on September 19 and 20, 1977, in the Pentagon, Washington, D.C.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Director of Defense Research and Engineering on overall research and engineering policy and to provide long-range guidance to the Department of Defense in these areas.

The Task Force will provide an analysis of the major issues concerning strategic cruise missile employment, theater cruise missile employment and potential defenses to the U.S. deployment of cruise missile systems.

In accordance with Section 10(d) of Appendix I, Title 5, United States Code, it has been determined that this Task Force meeting concerns matters listed in Section 552b(c) of Title 5 of the United States Code, specifically subparagraph (1) thereof, and that accordingly this meeting will be closed to the public.

MAURICE W. ROCHE,
Director, Correspondence and Directives, OASD (Comptroller).

ENVIRONMENTAL PROTECTION AGENCY

[FRL 786-1]

AMBIENT AIR MONITORING EQUIVALENT METHOD DESIGNATION

ASARCO Model 500 SO_2 Monitor

Notice is hereby given that the EPA, in accordance with 40 CFR Part 53 (40 FR 7044, February 18, 1975), has designated another equivalent method for the measurement of ambient concentrations of sulfur dioxide. The new equivalent method is an automated method (analyzer) which utilizes a measurement principle based on the increase in the electrolytic conductance of a chemical solution from absorption of sulfur dioxide. The method is: EQSA-0877-024, "ASARCO Model 500 Sulfur Dioxide Monitor," operated on a 0-0.5 ppm range.

The application for an equivalent method determination for this method was submitted by ASARCO Inc., 3422 South 700 West, Salt Lake City, Utah 84119. A notice of receipt of the application appeared in the FEDERAL REGISTER, Vol. 41, June 9, 1976, page 23225.

A test analyzer representative of this method has been tested by a representative of the applicant, in accordance with the test procedures specified in 40 CFR Part 53. After reviewing the results of these tests and other information submitted by the applicant, EPA has determined, in accordance with Part 53, that this method should be designated as an equivalent method. The information submitted by the applicant will be kept on file at the address shown below and will be available for inspection to the extent consistent with 40 CFR Part 2 (EPA's regulations implementing the Freedom of Information Act).

As an equivalent method, this method is acceptable for use by States and other control agencies for purposes of § 51.-17(a) of 40 CFR Part 51 ("Requirements for Preparation, Adoption, and Submittal of Implementation Plans") as amended on February 18, 1975 (40 FR 7042). For such use, the method must be used in strict accordance with the operation or instruction manual provided with the method and subject to any limitations (e.g., operating range) specified in the applicable designation (see description of the method above). Vendor modifications of a designated method used for purposes of § 51.17(a) are permitted only with prior approval of EPA, as provided in Part 53. Provisions concerning modification of such methods by users were promulgated on March 17, 1976 (41 FR 11255).

In general, the designation applies to any analyzer which is identical to the analyzer described in the designation. In many cases, similar analyzers manufactured prior to the designation may be upgraded (e.g., by minor modification or by substitution of a new operation or instruction manual) so as to be identical to the designated method and thus achieve designated status at modest cost. The manufacturer should be consulted to determine the feasibility of such upgrading.

Part 53 requires that sellers of designated methods comply with certain conditions. These conditions are given in 40 CFR 53.9 and are summarized below:

(1) A copy of the approved operation or instruction manual must accompany the analyzer when it is delivered to the ultimate purchaser.

(2) The analyzer must not generate any unreasonable hazard to operators or to the environment.

(3) The analyzer must function within the limits of the performance specifications given in Table B-1 of Part 53 for at least 1 year after delivery when maintained and operated in accordance with the operation manual.

(4) Any analyzer offered for sale as a reference or equivalent method must bear a label or sticker indicating that it has been designated as a reference or equivalent method in accordance with Part 53.

(5) If such an analyzer has one or more selectable ranges, the label or sticker must be placed in close proximity to the range selector and indicate which range or ranges have been designated as reference or equivalent methods.

(6) An applicant who offers analyzers for sale as reference or equivalent methods is required to maintain a list of ultimate purchasers of such analyzers and to notify them within 30 days if a reference or equivalent method designation

applicable to the analyzer has been cancelled or if adjustment of the analyzers is necessary under 40 CFR 53.11(b) to avoid a cancellation.

(7) An applicant who modifies an analyzer previously designated as a reference or equivalent method is not permitted to sell the analyzer (as modified) as a reference or equivalent method (although he may choose to sell it without such representations), nor to attach a label or sticker to the analyzer (as modified) under the provisions described above, until he has received notice under 40 CFR 53.14(c) that the original designation or a new designation applies to the method as modified or until he has applied for and received notice of a new reference or equivalent method determination for the analyzer as modified.

Aside from occasional breakdowns or malfunctions, consistent or repeated non-compliance with any of these conditions should be reported to: Director, Environmental Monitoring and Support Laboratory, Department E (MD-76), U.S. Environmental Protection Agency, Research Triangle Park, N.C. 27711.

Designation of this equivalent method will provide assistance to the States in establishing and operating their air quality surveillance systems under 40 CFR 51.17(a). Additional information concerning this action may be obtained by writing to the address given above.

STEPHEN J. GAGE,
Assistant Administrator for Research and Development.

AUGUST 26, 1977.

[FR Doc.77-25743 Filed 9-1-77;8:45 am]

[FRL 785-7; OPP-180140]

MARYLAND DEPARTMENT OF AGRICULTURE

Issuance of a Specific Exemption To Use Terramycin To Control Bacterial Spot on Peaches, Nectarines, and Plums

The Environmental Protection Agency (EPA) has granted a specific exemption to the Maryland Department of Agriculture (hereafter referred to as the "Applicant") to use no more than 17,830 pounds of Terramycin to control bacterial spot on peaches, nectarines, and plums involving approximately 900 acres in Maryland. This exemption was granted in accordance with, and is subject to, the provisions of 40 CFR Part 166, which prescribes requirements for exemption of Federal and State agencies for use of pesticides under emergency conditions.

This notice contains a summary of certain information required by regulation to be included in the notice. For more detailed information, interested parties are referred to the application on file with the Registration Division (WH-567), Office of Pesticide Programs, EPA, 401 M Street S.W., Room E-315, Washington, D.C. 20460.

According to the Aplicant, bacterial spot is caused by the bacterium *Xanthomonas pruni;* bacterial spot affects leaves, fruit, and tender growing shoots. Growers consider bacterial spot a very destructive disease. If infection occurs early in the season, constant defoliation causes the trees to lose vigor and consequently, to evoke smaller total crop yield and smaller fruit. Infected fruit develop cracks and a mottled appearance; both of these render the fruit unmarketable. The Aplicant stated that the future crop yields also tend to be smaller. Wet weather conditions favor development of the disease. The Applicant stated that bacterial spot symptoms usually appear early in June in Maryland.

According to the Applicant, registered pesticides have proven ineffective in the past to control bacterial spot in the State. Cyprex-captan mixes have been used but were not efficacious and copper hydroxide has demonstrated phytotoxicity.

The Applicant proposed to use the product Myco Shield Agricultural Terramycin, manufactured by Pfizer Chemical Division, at the rate of 45.32 ounces of Terramycin/acre (11.33 ounces of Terramycin/100 gallons of water) per application by ground spray. There will be a maximum of 7 applications. Application will be made by growers.

The Applicant stated that the annual peach, nectarine, and plum crop yield in Maryland is approximately 500,000 bushels valued at about $3 million. One-fifth (⅕) of this crop is of the susceptible varieties. The Applicant estimated that damage to susceptible varieties by bacterial spot may be approximately 5%-25%, eliciting an economic loss of about $30,000-$150,000 annually.

EPA has determined that, under heavy inoculum pressure, Terramycin (the calcium complex of oxytetracycline) would be needed to prevent large scale losses of peaches, nectarines, and plums infected with bacterial spot. Tolerances for oxytetracycline hydrochloride were previously established at 0.35 ppm on pears; currently, a tolerance of 0.1 ppm in or on pears for the calcium complex of oxytetracycline has been proposed. Tolerances for peaches are pending. The use of this pesticide for this exemption is not expected to have any adverse effects to either man or the environment. Therefore, a residue level not exceeding 0.1 ppm has been determined by EPA to be adequate to protect the public health.

After reviewing the application and other available information, EPA has determined that (a) a pest outbreak of bacterial spot on peaches, nectarines, and plums has or is about to occur; (b) there is no pesticide presently registered and available for use to control the bacterial spot in Maryland; (c) there are no alternative means of control, taking into account the efficacy and hazard; (d) significant economic problems may result if the bacterial spot is not controlled; and (e) the time available for action to mitigate the problems posed is insufficient for a pesticide to be registered for this use. Accordingly, the Applicant has been granted a specific exemption to use the pesticide noted above until August 15, 1977, to the extent and in the manner set forth in the application. The specific exemption is also subject to the following conditions:

1. Myco Shield Agricultural Terramycin (containing the calcium complex of oxytetracycline), manufactured by Pfizer Chemical Division, is authorized;

2. Application rate shall be 45.32 ounces of Terramycin/acre (11.33 ounces of Terramycin/100 gallons of water) per application by ground spray;

3. A maximum of 7 applications of Terramycin may be made;

4. A maximum of 17,830 pounds of Terramycin may be applied;

5. The duration of the application period shall be from June 10, 1977, until August 15, 1977;

6. A maximum of 900 acres in Maryland may be treated;

7. Application of Terramycin shall be by growers;

8. Workers shall not enter orchards after Terramycin application until foliage is dry;

9. There shall be a 21-day preharvest interval;

10. The Applicant shall notify Niagara (a subsidiary of FMC), sole distributor of this material, that records of the sale of this material shall be kept and made available. These records shall include the name and address of the purchaser, and the quantity of material purchased;

11. An Extension Plant Pathologist at the University of Maryland shall coordinate the program; he shall make all initial recommendations of Terramycin application, based on observation of disease, past history of the disease, and local weather conditions. County agricultural agents will assist the Pathologist in monitoring the program. A newsletter or agricultural bulletin shall be promulgated informing growers about program criteria;

12. A residue level of oxytetracycline not exceeding 0.1 ppm has been deemed adequate to protect the public health. The Food and Drug Administration, U.S. Department of Health, Education, and Welfare, has been advised of this action;

13. All label precautions shall be followed;

14. A final report shall be submitted to EPA by the end of 1977, summarizing the results of this program; and

15. The Applicant shall inform EPA immediately of any adverse effects resulting from this program and shall be responsible for the performance of all provisions of this exemption.

(Sec. 18, Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 89 Stat. 751; 7 U.S.C. 136(a) et seq.).)

Dated: August 29, 1977.

EDWIN L. JOHNSON,
Deputy Assistant Administrator for Pesticide Programs.

PENNWALT CORP.

Issuance of Experimental Use Permits

The Environmental Protection Agency (EPA) has issued experimental use permits to the following applicants. Such permits are in accordance with, and subject to, the provisions of 40 CFR Part 172, which defines EPA procedures with respect to the use of pesticides for experimental purposes.

No. 4581-EUP-24. Pennwalt Corporation, Tacoma, Washington 98401. This experimental use permit allows the use of 2,510 pounds of the insecticide methyl parathion on almonds, cabbage, conifers, cranberries, cucumbers, melons, peanuts, peppers, potatoes, squash, strawberries, sugar beets, turf, and turnips to evaluate control of various insects. A total of 2,884 acres is involved; the program is authorized only in the States of California, Maine, Michigan, Minnesota, Nebraska, New York, North Dakota, Oregon, Texas, Virginia, Washington, and Wisconsin. The experimental use permit is effective from July 15, 1977, to July 15, 1978. Permanent tolerances for residues of the active ingredient in or on almonds, cabbage, cranberries, cucumbers, melons, peanuts, peppers, potatoes, squash, strawberries, sugar beets, and turnips have been established (40 CFR 180.121).

No. 40285-EUP-:. Degesch America, Inc., Vienna, Virginia 22180. This experimental use permit allows the use of 235 pounds of the insecticide magnesium phosphide on cereal grains on board cargo ships to evaluate control of insects which infest cereal grains. A total of 1,440,000 bushels of cereal grain is involved; the program is authorized only in the States of Alabama, Louisiana, Mississippi, South Carolina, Texas, and Virginia. The experimental use permit is effective from July 20, 1977, to July 20, 1978. This permit is being issued under the condition that all treated grain will be exported.

No. 27586-EUP-19. U.S. Department of Agriculture, Washington, D.C. 20250. This experimental use permit allows the use of an insecticide which is a mixture of 575 pounds of technical malathion, and 1,700 pounds of methyl eugenol on undeveloped grassland, scrub, and areas where there is no permanent human habitation, and no bodies of water or permanent streams to attract and kill Oriental fruit fly males. A total of 9,600 acres is involved; the program is authorized only in the State of Hawaii. The experimental use permit is effective from July 13, 1977, to July 13, 1978.

Interested parties wishing to review the experimental use permits are referred to Room E-315, Registration Division (WH-567), Office of Pesticide Programs, EPA, 401 M St., SW., Washington, D.C. 20460. It is suggested that such interested persons call 202/755-4851 before visiting the EPA Headquarters Office, so that the appropriate permits may be made conveniently available for review purposes. These files will be available for inspection from 8:30 a.m. to 4:00 p.m. Monday through Friday.

(Sec. 5, Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 89 Stat. 751; (7 U.S.C. 136(a) *et seq.*)).)

Dated: August 26, 1977.

DOUGLAS D. CAMPT,
Acting Director,
Registration Division.

SCIENCE ADVISORY BOARD EXECUTIVE COMMITTEE, SUBCOMMITTEE ON SCIENTIFIC CRITERIA FOR ENVIRONMENTAL LEAD

Meeting

Under Pub. L. 92-463, notice is hereby given that a meeting of the Subcommittee on Scientific Criteria for Environmental Lead of the Science Advisory Board will be held at 9:00 a.m. on October 7, 1977 in Conference Room A (Room 1112), Crystal Mall Building No. 2, 1921 Jefferson Davis Highway, Arlington, Va.

The purpose of the meeting will be to provide advice and consultation on air quality criteria for atmospheric lead and, specifically, to review and comment on a draft document entitled, "Air Quality Criteria for Lead," External Review Draft No. 3, August 1977, prepared by the Agency's Office of Research and Development.

The meeting will be open to the public. Any member of the public wishing to attend or submit a paper should contact the Secretariat, Science Advisory Board (A-101), U.S. Environmental Protection Agency, Washington, D.C. 20460, by c.o.b. September 30, 1977. Please ask for Ms. Barbara Robinson or Mrs. Ilene F. Stein.

The telephone number is 703-557-7720.

RICHARD M. DOWD,
Staff Director,
Science Advisory Board.

[FRL 786-3; OPP-50326]

STAUFFER CHEMICAL CO. AND CHEVRON CHEMICAL CO.

Issuance of Experimental Use Permits

The Environmental Protection Agency (EPA) has issued experimental use permits to the following applicants. Such permits are in accordance with, and subject to, the provisions of 40 CFR Part 172, which defines EPA procedures with respect to the use of pesticides for experimental purposes.

No. 476-EUP-85. Stauffer Chemical Co., Richmond, Calif. 94804. This experimental use permit allows the use of 280 pounds of the herbicide S-ethyl dipropylthiocarbamate and 40 pounds of the herbicide trifluralin on sugarbeets to evaluate control of pigweed, lambsquarters, nightshade, Russian thistle, barnyard grass, and a variety of annual grasses, annual broadleaf and perennial weeds. A total of 120 acres is involved; the program is authorized in the State of Idaho and Washington. The experimental use permit is effective from November 11, 1977, to November 11, 1978. Permanent tolerances for residues of S-ethyl dipropylthiocarbamate and trifluralin in or on sugarbeets have been established (40 CFR 180.117 and 40 CFR 180.207).

No. 239-EUP-73. Chevron Chemical Co., Richmond, Calif. 94804. This experimental use permit allows the use of the remaining supply of approximately 1,000 pounds of the resin soaking-herbicide paraquat dichloride remaining from last year's experimental program on conifers. A total of approximately 3,000 acres is involved; the program is authorized only in the States of Alabama, Arkansas, California, Florida, Georgia, Kentucky, Louisiana, Mississippi, Missouri, New York, North Carolina, Oklahoma, Oregon, Pennsylvania, South Carolina, Tennessee, Texas, Virginia, and Washington. The experimental use permit is effective from July 20, 1977, to July 20, 1978.

Interested parties wishing to review the experimental use permits are referred to Room E-315, Registration Division (WH-567), Office of Pesticide Programs, EPA, 401 M St. SW., Washington, D.C. 20460. It is suggested that such interested persons call 202-755-4851 before visiting the EPA Headquarters Office, so that the appropriate permits may be made conveniently available for review purposes. These files will be available for inspection from 8:30 a.m. to 4:00 p.m. Monday through Friday.

(Sec. 5, Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 89 Stat. 751 (7 U.S.C. 136(a) *et seq.*))

Dated: August 30, 1977.

DOUGLAS D. CAMPT,
Acting Director,
Registration Division.

FEDERAL ENERGY ADMINISTRATION

FOURTH ANTHRACITE COAL CONFERENCE

Conference

Notice is hereby given that the fourth Anthracite Coal Conference will be held on September 15, 1977, from 1 p.m. to 4 p.m. at the Gus Genetti Motor Lodge, Route 309, Hazelton, Pa. This meeting is a follow-up to the third Anthracite Coal Conference held on August 18, 1977, at the Reading Motor Inn in Wyomissing, Pa. Notice is also given that the five subgroups to the Conference, appointed at the first meeting on June 28, 1977, will hold meetings before the fourth conference.

The urgency of convening both the subgroup meetings and fourth conference results from FEA's responsibility to study ways of improving the production of anthracite coal. Analysis and recommendations to this end must be completed by mid-October. It is therefore essential to call these meetings immediately, thereby reducing the customary advance period of notice normally given.

The schedule of subgroup meetings is as follows:

UTILIZATION SUBGROUP

September 9, 1977, 10 a.m. Pennsylvania Power and Light Co. Building Two, North Ninth St., Allentown, Pa.
Agenda: Preliminary conclusions and recommendations on progress for assistance/report.

ENVIRONMENTAL SUBGROUP

September 1, 1977, 10 a.m. Main Capital Building, Room 225, Harrisburg, Pa.
Agenda: Final report of study on environmental issues concerning land use conflicts, water quality, refuse disposal, restoration/rehabilitation.

MARKETING (TRANSPORTATION) SUBGROUP

September 7, 1977, 10 a.m. ConRail, 214 Six Penn Center Plaza, Philadelphia, Pa.
Agenda: Preliminary policy recommendations on the structure and economics of rail transportation in the anthracite region.

The agenda for the September 15 conference will be an assessment of the preliminary recommendations by the Task Force, in conjunction with presentations by individual members on major issues previously identified at the August 18 conference.

These meetings will be open to the public. The Chairman is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement will be permitted to do so, either before or after the meeting.

Further information concerning this meeting may be obtained from Stephen T. Minihan, Room 3502, FEA Headquarters, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461 202-566-6230.

Transcripts of the conference will be available for public review and copying at the Freedom of Information Public Reading Room, Room 217, FEA Headquarters, 12th and Pennsylvania Avenue NW., Washington, D.C. between the hours of 8 a.m. and 4:30 p.m. Monday through Friday except Federal holidays. Any person may purchase a copy of the transcript from the reporter.

Issued at Washington, D.C., on August 29, 1977.

ERIC J. FYGI,
Acting General Counsel.

SOUTH DAKOTA ENERGY CONSERVATION PLAN

Negative Determination of Environmental Impact

Pursuant to 10 CFR 208.4, the Federal Energy Administration hereby gives notice that it has performed an analysis and review of the environmental impacts associated with the provision of Federal financial assistance for the implementation, by the State of South Dakota, of its State Energy Conservation Plan. Federal funding is authorized by Part C of Title III of the Energy Policy and Conservation Act, 42 U.S.C. 6321, et seq.

Based upon assessment of environmental impacts that are expected to result from implementation of this plan, the FEA has determined that Federal financial assistance will not be a "major Federal action significantly affecting the quality of the human environment" within the meaning of section 102(2)(C) of the National Environmental Policy Act of 1969, 42 U.S.C. 4332(2)(C). Therefore, pursuant to 10 CFR 208.4(c), the Federal Energy Administration has determined that an environmental impact statement is not required for this plan.

Single copies of the environmental assessment of the State Plan for South Dakota are available upon request from the FEA National Energy Information Center, Room 1406; 12th and Pennsylvania Avenue, NW., Washington, D.C. 20461.

Copies of the environmental assessment will also be available for public review in the Federal Energy Administration Information Access Reading Room, Room 2107, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

A copy of the State Plan is available for public review in the Office of State Energy Conservation Programs, Room 6437, 12th and Pennsylvania Avenue, NW., Washington, D.C. 20461.

Interested persons are invited to submit data, views or arguments with respect to the environmental assessments to Executive Communications, Box PB, Room 3317, Federal Energy Administration, Washington, D.C. 20461.

Comments should be identified on the outside of the envelope and on documents submitted to FEA Executive Communications with the designation, "Environmental Assessment—South Dakota Energy Conservation Plan." Fifteen copies should be submitted. All comments should be received by FEA by 4:30 p.m. e.d.s.t., September 9, 1977, in order to receive full consideration.

Any information or data considered by the person submitting it to be confidential must be so identified and submitted in one copy only. The FEA reserves the right to determine the confidential status of the information or data and to treat it according to that determination.

Issued in Washington, D.C., August 29, 1977.

ERIC J. FYGI,
Acting General Counsel,
Federal Energy Administration.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Alcohol, Drug Abuse, and Mental Health Administration

ADVISORY COMMITTEES

Meetings

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. Appendix I), announcement is made of the following National Advisory bodies scheduled to assemble during the month of September 1977:

DRUG ABUSE TRAINING REVIEW COMMITTEE

Date and time: September 27-28, 8:30 a.m. to 5:00 p.m.

Place: 8th Floor Conference Room, One Central Plaza, 11300 Rockville Pike, Rockville, Maryland 20852.

Type of Meeting: Open—September 27, 8:30 a.m. to 9:30 a.m.

Closed—Otherwise

Contact—Mr. James F. Callahan, Rockwall Building, Room 640, 11400 Rockville Pike, Rockville, Maryland 20852, 301-443-4922.

Purpose: The Committee is charged with the initial review of grant applications for Federal assistance in the program areas administered by the National Institute on Drug Abuse relating to Drug Abuse Training Activities and makes recommendations to the National Advisory Council on Drug Abuse for final review.

Agenda: From 8:30 a.m. to 9:30 a.m. September 27, the meeting will be open for discussion of administrative announcements and program developments. Otherwise, the Committee will be performing initial review of grant applications for Federal assistance and will not be open to the public, in accordance with the determination by the Acting Administrator, Alcohol, Drug Abuse and Mental Health Administration, pursuant to the provisions of Title 5, U.S. Code 552b(c)(6) and Section 10(d) of Pub. L. 92-463 (5 U.S.C. Appendix I).

DRUG ABUSE PREVENTION REVIEW COMMITTEE

Date and time: September 30, 9 a.m.

Place: 9th Floor Conference Room, SW., One Central Plaza Building, 11300 Rockville Pike, Rockville, Maryland 20852.

Type of meeting: Open—September 30, 9 to 11 a.m.

Closed—Otherwise

Contact: Mrs. Linda S. Jackson, Rockwall Building, Room 752, 11400 Rockville Pike, Rockville, Maryland 20852, 301-443-2450.

Purpose: The Committee is charged with the initial review of grant applications for Federal assistance in the program areas administered by the National Institute on Drug Abuse relating to prevention activities and makes recommendations to the National Advisory Council on Drug Abuse for final review.

Agenda: From 9 a.m. to 10 a.m. September 30 the meeting will be open for discussion of administrative announcements and program developments. Otherwise, the Committee will be performing initial review of grant applications for Federal assistance and will not be open to the public in accordance with the determination by the Acting Administrator, Alcohol, Drug Abuse and Mental Health Administration, pursuant to the provisions of Section 552b(c)(6), Title 5 U.S. Code and Section 10(d) of Pub. L. 92-463 (5 U.S.C. Appendix I).

Substantive program information may be obtained from the contact person listed above. The NIDA Information Officer who will furnish upon request summaries of the meeting and rosters of the committee members is Mr. Ken Howard, Director, Office of Communications and Public Affairs, NIDA, Room 110, Rockwall Building, 11400 Rockville Pike, Rockville, Md. 20852, 301-443-6500.

Dated: August 26, 1977.

CAROLYN T. EVANS,
Committee Management Officer, Alcohol, Drug Abuse, and Mental Health Administration.

Agenda: From 9 a.m. to 10 a.m., October 16, the meeting will be open for discussion of administrative announcements and program developments. Otherwise, the Committee will be performing initial review of grant applications for Federal assistance and will not be open to the public in accordance with the determination by the Acting Administrator, Alcohol, Drug Abuse, and Mental Health Administration, pursuant to the provisions of Section 552b(c)(6), Title 5 U.S. Code and Section 10(d) of Pub. L. 92-463 (5 U.S.C. Appendix I).

ALCOHOL RESEARCH REVIEW COMMITTEE

Date and Time: October 26-28, 9 a.m.

Place: Maryland Room, Holiday Inn, Bethesda, Maryland 20014

Type of meeting: Open—October 26, 9 to 10 a.m.

Closed—Otherwise

Contact: Dr. James C. Teegarden, Parklawn Building, Room 16C-26, 5600 Fishers Lane, Rockville, Maryland 20857, 301-443-4223.

Purpose: The Committee is charged with the initial review of grant applications for Federal assistance in the program areas administered by the National Institute on Alcohol Abuse and Alcoholism relating to research activities and makes recommendations to the National Advisory Council on Alcohol Abuse and Alcoholism for final review.

Agenda: From 9 a.m. to 10 a.m., October 26, the meeting will be open for discussion of administrative announcements and program developments. Otherwise, the Committee will be performing initial review of grant applications for Federal assistance and will not be open to the public in accordance with the determination by the Acting Administrator, Alcohol, Drug Abuse, and Mental Health Administration, pursuant to the provisions of Section 552b(c)(6) Title 5 U.S. Code and Section 10(d) of Pub. L. 92-463 (5 U.S.C. Appendix I).

BOARD OF SCIENTIFIC COUNSELORS, NIMH

Date and time: October 27-28, 9 a.m. (Oct. 27), 9:30 a.m. (Oct 28).

Place: Building 36, Conference Room 1B-07, National Institutes of Health, Bethesda, Maryland 20014

Type of meeting: Open—October 27, 9:30 to 10 a.m.

Closed—Otherwise

Contact: Dr. John C. Eberhart, Building 36, Room 1A-05, National Institutes of Health, Bethesda, Maryland 20014, 301-496-3501.

Purpose: The Board of Scientific Counselors provides expert advice to the Director, NIMH, on the mental health intramural research program through periodic visits to the laboratories for assessment of the research in progress and evaluation of productivity and performance of staff scientists.

Agenda: The Board will meet in Building 36, Room 1B-07, Bethesda, Maryland, for approximately 30 minutes for a report by the Director and Deputy Director of Intramural Research, NIMH, on recent administrative developments. The remainder of the two-day session will be devoted to the review of intramural research projects from the Laboratory of Developmental Psychology, and the evaluation of individual scientific programs, and will not be open to the public in accordance with the determination by the Acting Administrator, Alcohol, Drug Abuse, and Mental Health Administration, pursuant to the provisions of Sec. 552b(c)(6), Title 5 U.S. Code and Section 10(d) of Pub. L. 92-463 (5 U.S.C. Appendix I).

PRECLINICAL PSYCHOPHARMACOLOGY RESEARCH REVIEW COMMITTEE

Date and time: October 27-28; 9 a.m.

Place: Sheraton-Park Hotel, Suite G-100 and G-101, 2600 Woodley Road, N.W., Washington, D.C.

Type of meeting: Open—October 27, 9 to 9:30 a.m.

Closed—Otherwise.

Contact: Nina Young, Parklawn Building, Room 9-97, 5600 Fishers Lane, Rockville, Maryland 20857, 301-443-3454.

Purpose: The Committee is charged with the initial review of grant applications for Federal assistance in the program areas administered by the National Institute of Mental Health relating to preclinical psychopharmacology research and makes recommendations to the National Advisory Mental Health Council for final review.

Agenda: From 9 a.m. to 9:30 a.m. October 27, the meeting will be open for discussion of administrative announcements and program developments. Otherwise, the Committee will be performing initial review of grant applications for Federal assistance and will not be open to the public in accordance with the determination by the Acting Administrator, Alcohol, Drug Abuse, and Mental Health Administration, pursuant to the provisions of Section 552b(c)(6), Title 5 U.S. Code and Section 10(d) of Pub. L. 92-463 (5 U.S.C. Appendix I).

CLINICAL PROJECTS RESEARCH REVIEW COMMITTEE

Date and Time: October 27-29, 9 a.m.

Place: Twin Bridges Marriott Hotel, 3300 Jefferson Davis Highway, Arlington, Va. 22202 20001

Type of meeting: Open—October 27, 9 a.m.

Closed—Otherwise

CONTACT: Harriet German, Parklawn Building, Room 10C-5, 5600 Fishers Lane, Rockville, Maryland 20857, 301-443-3367

Purpose: The Committee is charged with the initial review of grant applications for Federal assistance in the program areas administered by the National Institute of Mental Health relating to clinical research and makes recommendations to the National Advisory Mental Health Council for final review.

Agenda: From 9 a.m. to 10 a.m., October 27, the meeting will be open for discussion of administrative announcements and program developments. Otherwise, the Committee will be performing initial review of grant applications for Federal assistance and will not be open to the public in accordance with the determination by the Acting Administrator, Alcohol, Drug Abuse, and Mental Health Administration, pursuant to the provisions of Section 552b(c)(6), Title 5 U.S. Code and Section 10(d) of Pub. L. 92-463 (5 U.S.C. Appendix I).

Substantive program information may be obtained from the contact person listed above. The NIMH Information Officer who will furnish upon request summaries of the meeting and rosters of the committee members is Mr. Edwin Lord, Deputy Director, Division of Scientific and Public Information, NIMH, Room 15-105, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, 301-443-36600. The NIAAA Information Officer who will furnish summaries of the meeting and rosters of the committee members is Mr. Harry Bell, Associate Director for Public Affairs, National Institute on Alcohol Abuse and Alcoholism, Room 11A-17, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, 301-4493-3306.

Dated: August 26, 1977.

Office of Education

FULBRIGHT-HAYS TRAINING GRANTS

Closing Date for Receipt of Applications

Notice is hereby given that pursuant to the authority contained in section 102 (b)(6) of the Mutual Educational and Cultural Exchange Act of 1961 (22 U.S.C. 2452(b)(6)), applications are being accepted from eligible institutions for Fulbright-Hays training grants.

Eligible applicants for Fulbright-Hays training grants are as follows:

A For the Faculty Research Abroad program, accredited institutions of higher education.

B For the Doctoral Dissertation Research Abroad program, accredited institutions of higher education which offer doctoral programs in the fields of foreign languages and area studies.

C. For the Group Projects Abroad program, accredited institutions of higher education, State departments of education, private non-profit educational organizations, and consortiums of such entities.

D For the Foreign Curriculum Consultants program, accredited institutions of higher education, State departments of education, local public school systems, private non-profit educational organizations, and consortiums of such entities.

Applications must be received by the U.S. Office of Education Application Control Center on or before November 4, 1977.

A. *Applications sent by mail.* An application sent by mail should be addressed as follows: U.S. Office of Education, Application Control Center, Washington, D.C. 20202, Attention (as applicable): 13.438A Faculty Research Abroad; 13.439A Foreign Curriculum Consultants; 13.440A Group Projects Abroad; or 13.441A Doctoral Dissertation Research Abroad. An application sent by mail will be considered to be received on time by the Application Control Center if:

(1) The application was sent by registered or certified mail no later than October 31, 1977 as evidenced, by the U.S. Postal Service postmark on the wrapper or envelope, or on the original receipt from the U.S. Postal Service; or

(2) The application is received on or before the closing date by either the Department of Health, Education, and Welfare, or the U.S. Office of Education mail rooms in Washington, D.C. (In establishing the date of receipt, the Commissioner will rely on the time-date stamp of such mail rooms or other documentary evidence of receipt maintained by the Department of Health, Education, and Welfare, or the U.S. Office of Education.)

B. *Hand delivered applications.* An application to be hand delivered must be taken to the U.S. Office of Education Application Control Center, Room 5673, Regional Office Building Three, 7th and D Streets SW., Washington, D.C. Hand delivered applications will be accepted daily between the hours of 8:00 a.m. and 4:00 p.m. Washington, D.C. time except Saturdays, Sundays, or Federal holidays. Applications will not be accepted after 4:00 p.m. on the closing date.

C. *Program information and forms.* Information and application forms may be obtained from the International Studies Branch, Division of International Education, Bureau of Higher and Continuing Education, Office of Education, Regional Office Building Three, 7th and D Streets SW., Washington, D.C. 20202.

D. *Estimated Distribution of Program Funds.* The amount of funds available for the Fulbright-Hays Training programs for Fiscal Year 1978 will be approximatley $3,000,000 in addition to the equivalent of $1,830,000 in special foreign currencies. The tentative number of awards for each program and their estimated average costs are as follows: Faculty Research Abroad—90 fellowships at an average cost of approximately $10,400; Doctoral Dissertation Research Abroad—125 fellowships at an average cost of approximately $9,300; Group Projects Abroad—45 grants at an average cost of approximately $52,600; and Foreign Consultants—25 grants at an average cost of $13,000.

The above statement with regard to the expected distribution of funds is an estimate and is for information purposes only; it does not bind the Office of Education except as may be required by applicable statute and regulation.

E. *Applicable regulations.* Awards made pursuant to this notice will be subject to the Office of Education General Provisions Regulations (45 CFR Part 100a) and the regulations for Modern Foreign Language Training and Area Studies (45 CFR Part 148).

(22 U.S.C. 2452(b)(6).)

(Catalog of Federal Domestic Assistance Programs: 13.438A Fulbright-Hays Training Grants—Faculty Research Abroad; 13.439A Fulbright-Hays Training Grants—Foreign Curriculum Consultants; 13.440A Fulbright-Hays Training Grants—Group Projects Abroad; 13.441A Fulbright-Hays Training Grants Doctoral Dissertation Research Abroad.)

Dated: August 30, 1977.

JOHN ELLIS,
Acting U.S. Commissioner of Education.

GIFTED AND TALENTED MODEL PROJECTS

Closing Date for Receipt of Applications for Programs for Gifted and Talented Competitive Continuation Assistance Contracts

Notice is hereby given that pursuant to the authority contained in Section 404(g) of Pub. L. 93-380 (20 U.S.C. 1863(g)), applications are being accepted for continuation contracts of assistance from public and private agencies to continue and operate model projects. Applications for continuation awards are competitive with other applications for continuation awards in the same year (45 CFR 160b.4 (c)(2)). Funds are available for contracts to continue the operation of model projects presently in operation pursuant to an approved project period in excess of one year. Continuation applications must be received by the U.S. Office of Education Application Control Center on or before November 21, 1977.

A *Application sent by mail.* An application sent by mail should be addressed as follows: U.S. Office of Education, Application Control Center, Washington, D.C. 20202, Attention: 13.562C. Applications sent by mail will be considered to be received on time by the Application Control Center if:

(1) The application was sent by registered or certified mail not later than November 16, 1977 as evidenced by the U.S. Postal Service Postmark on the wrapper or envelope, or on the original receipt from the U.S. Postal Service; or

(2) The application is received on or before the closing date by either the Department of Health, Education, and Welfare, or the U.S. Office of Education mail rooms in Washington, D.C. In establishing the date of receipt, the Commissioner will rely on the time-date stamp of such mail rooms or other documentary evidence of receipt maintained by the Department of Health, Education, and Welfare, or the U.S. Office of Education.

B *Hand delivered applications.* An application to be hand delivered must be taken to the U.S. Office of Education, Application Control Center, Room 5673, Regional Office Building Three, 7th and D Streets SW., Washington, D.C. Hand delivered applications will be accepted daily between the hours of 8:00 a.m. and 4:00 p.m. Washington, D.C. time except Saturdays, Sundays, or Federal holidays. Applications will not be accepted after 4:00 p.m. on the closing date.

C. *Program information and forms.* The amount of funds which is expected to be available in Fiscal Year 1978 for the continuation of Gifted and Talented programs is $1,328,360, out of which $210,000 is projected for Model Projects. The anticipated number of continuation assistance contracts for Gifted and Talented Model Projects is five. The funding level of multi-year Model Projects has been in the approximate range of $40,000 in the past operational year. It is projected that many of these continuation projects may be funded at the same level this Fiscal Year.

This statement on the availability of funds is only an estimate and does not bind the Office of Education to any pattern of distribution, except as required by the applicable provisions of the Gifted and Talented regulations, and appropriation acts.

Further information and application forms may be obtained from the Office of Gifted and Talented, U.S. Office of Education, 400 Maryland Avenue SW., Washington, D.C. 20202.

D. *Applicable regulations.* Assistance contract awards made pursuant to this notice are subject to the Regulations published in the FEDERAL REGISTER on May 6, 1976 (41 FR 18660, 45 CFR Part 160b, Subpart F) and the Office of Education General Provisions Regulations (45 CFR Part 100a).

(20 U.S.C. 1863(g))

(Catalog of Federal Domestic Assistance Number 13.562, Gifted and Talented.)

Dated: August 29, 1977.

JOHN ELLIS,
Acting U.S. Commissioner of Education.

HANDICAPPED CHILDREN'S EARLY EDUCATION PROGRAM

Closing Date for Receipt of Initial Applications

Notice is hereby given that pursuant to the authority contained in sections 623 and 624 of the Education of the Handicapped Act (20 U.S.C. 1423, 1424), the U.S. Commissioner of Education has established a final closing date of November 9, 1977 for receipt of applications. Applications for New Model Demonstration Projects (13.444A) must be received on or before the above date. The notice of closing for non-competing continuations will be published separately.

The funding level of the Handicapped Children's Early Education Program in Fiscal Year 1978 is expected to be $22,000,000. These funds will be made available for new and non-competing continuation demonstration projects, technical assistance support activities, and outreach projects. The approximate number of new demonstration awards is 70. During previous years of the program, funding for new demonstration projects has averaged between $60,000 and $70,000.

Projects approved for funding under this program will be for a three-year period with annual review of progress. The funding level and distribution of project funds are predicated upon the allotment of funds and may vary according to the final appropriation made available during a specific fiscal year.

Applications must be received by the U.S. Office of Education Application Control Center on or before

A. *Applications sent by mail.* An application sent by mail should be addressed as follows: U.S. Office of Education, Application Control Center, Washington, D.C. 20202, Attention: 13.444A. An application sent by mail will be considered to be received on time by the Application Control Center if:

(1) The application was sent by registered or certified mail no later than November 4, 1977 as evidenced by the U.S. Postal Service postmark on the wrapper or envelope, or on the original receipt from the U.S. Postal Service; or

(2) The application is received on or before the closing date by either the Department of Health, Education, and Welfare, or the U.S. Office of Education mail rooms in Washington, D.C. In establishing the date of receipt, the Commissioner will rely on the time-date stamp of such mail rooms or other documentary evidence of receipt maintained by the Department of Health, Education, and Welfare, or the U.S. Office of Education.

B. *Hand delivered applications.* An application to be hand delivered must be delivered to the U.S. Office of Education, Application Control Center, Room 5673 Regional Office Building Three, 7th and D Streets, SW., Washington, D.C. Hand delivered applications will be accepted daily between the hours of 8:00 a.m. and 4:00 p.m. Washington, D.C. time except Saturdays, Sundays, or Federal holidays. Applications for new awards will not be accepted by the Application Control Center after 4:00 p.m., Washington, D.C. time, on the closing date.

C. *Program Information and forms.* Information and applications may be obtained from the Division of Innovation and Development, Bureau of Education for the Handicapped, U.S. Office of Education, Rm. 3100 Donohue Building, 400 Maryland Avenue SW., Washington, D.C. 20202. Applications will be available on or about September 12, 1977.

D. *Applicable regulations.* The regulations applicable to this program include the Office of Education General Provisions Regulations (45 CFR Parts 100 and 100a) and the applicable program regulations (45 CFR Parts 121, 121d).

(20 U.S.C. 1423, 1424.)

Dated: August 29, 1977.

JOHN ELLIS,
Acting U.S. Commissioner of Education.

[FR Doc 77-25669 Filed 9-1-77; 8:45 am]

HANDICAPPED RESEARCH AND DEMONSTRATION

Closing Date for Receipt of Applications

Notice is hereby given that, pursuant to the authority contained in sections 641 and 642 of Part E of the Education of the Handicapped Act (20 U.S.C. 1441, 1442), applications are being accepted for support for research and related purposes related to education of the handicapped. This announcement covers applications for new awards only for the Field Initiated Studies program. Under this program, the Office of Education is interested in a broad range of research-related projects focusing on the education of handicapped children.

Applications must be received by the U.S. Office of Education Application Control Center on or before December 7, 1977.

A. *Availability of funds and estimated number and amount of awards.* The estimated total amount of funds available for support of new Field Initiated Studies projects is $3,000,000. Based on a mean grant amount in recent years of approximately $90,000, we anticipate that about 33 new grants will be awarded. The range of funding for 1977 projects was from $8,496 to $286,231 per year. However, the large majority of awards have been for under $100,000 per year.

B. *Multiple year awards.* While there is no legal limit on the duration of projects, the vast majority of Field Initiated projects are for one to three years. In the event that assistance is provided for multiple year projects, grant awards will be made for a budget period of a single year's duration with continuation awards made on a non-competitive basis subject to satisfactory performance as determined pursuant to 45 CFR 121h.4 (b) and the availability of funds in future fiscal years.

C. *Applications sent by mail.* An application sent by mail should be addressed as follows: U.S. Office of Education, Application Control Center, Washington, D.C. 20202, Attention: 13.44C. An application sent by mail will be considered to be received on time by the Application Control Center if:

(1) The application was sent by registered or certified mail not later than December 2, 1977, as evidenced by the U.S. Postal Service postmark on the wrapper or envelope, or on the original receipt from the U.S. Postal Service; or

(2) The application is received on or before the closing date by either the Department of Health, Education, and Welfare, or the U.S. Office of Education mailrooms in Washington, D.C. (In establishing the date of receipt, the Commissioner will rely on the time-date of such mailrooms or other documentary evidence or receipt maintained by the Department of Health, Education, and Welfare, or the U.S. Office of Education.)

D. *Hand delivered applications.* An application to be hand delivered must be taken to the U.S. Office of Education Application Control Center, Room 5673, Regional Office Building Three, 7th and D Streets, SW., Washington, D.C. Hand delivered applications will be accepted daily between the hours of 8:00 a.m. and 4:00 p.m., Washington, D.C. time except Saturdays, Sundays, or Federal holidays. Applications will not be accepted by the Application Control Center after 4:00 p.m., Washington, D.C. time, on the closing date.

E. *Program information and forms.* Further information and application forms may be obtained from the Research Projects Branch, Bureau of Education for the Handicapped, Office of Education, 400 Maryland Avenue SW., (Donohue, 3165), Washington, D.C. 20202.

F. *Applicable regulations.* The regulations applicable the this program include the Office of Education General Provisions Regulations (45 CFR Parts 100 and 100a) and the applicable program regulations. (45 CFR Parts 121 and 121h).

Office of Education

NATIONAL ADVISORY COUNCIL ON INDIAN EDUCATION

Amendment to Notice of Meeting

AGENCY: National Advisory Council on Indian Education.

ACTION: Amendment to the FEDERAL REGISTER Notice, Wednesday, August 17, 1977, page 41479.

DATES: Full Council Meeting: September 17, 1977, from 9:00 a.m. to 10:30 a.m., closed.

ADDRESS: Hotel Adolphus, 1321 Commerce Street, Dallas, Tex. The meeting on September 17, 1977, from 9:00 a.m. to 10:30 a.m. will be closed to the public. During that time the Council will discuss its annual evaluation of personnel performance on an individual basis. This discussion will include consideration of the qualifications and fitness of individual staff members, and will touch upon many matters which would constitute a serious invasion of privacy if conducted in an open session. Such matters are protected under the authority of Section 10(d) of the Federal Advisory Committee Act (Pub. L. 92-463) and under the exemptions contained in the Government in the Sunshine Act, Section 552b(c) (2) and (6) of Title 5 U.S.C., (Pub. L. 94-409), 45 CFR § 5.71 (a) and (c).

Signed at Washington, D.C. on August 17, 1977.

STUART A. TONEMAH,
Executive Director, National Advisory Council on Indian Education.

NATIONAL ADVISORY COUNCIL ON WOMEN'S EDUCATIONAL PROGRAMS

Meeting

AGENCY: Office of Education National Advisory Council on Women's Educational Programs.

ACTION: Notice.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming meeting of the National Advisory Council on Women's Educational Programs and its Executive, Federal Policy and Practices, Legislation, Program and Public Information Committees. It also describes the functions of the Council. Notice of the meeting is required pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463). This document is intended to notify the general public of their opportunity to attend.

DATE: September 18, 2:30 to 5:30 p.m.; September 19, 8:30 a.m. to 5:00 p.m.; September 20, 1977 from 8:30 a.m. to 4:30 p.m.

ADDRESS: 1832 M Street, NW., No. 821, Washington, DC.

FOR FURTHER INFORMATION CONTACT:

Kathleen Maurer, National Advisory Council on Women's Educational Programs, 1832 M St. NW., No. 821, Washington, DC. 20036 (202-653-5848).

The National Advisory Council on Women's Educational Programs is established pursuant to Pub. L. 93-380, Section 408 (f) (1). The Council is mandated to (a) advise the Commissioner with respect to general policy matters relating to the administration of the Women's Educational Equity Act of 1974; (b) advise and make recommendations to the Assistant Secretary concerning the improvement of educational equity for women; (c) make recommendations to the Commissioner with respect to the allocation of any funds pursuant to Section 408 of Pub. L. 93-380, including criteria developed to insure an appropriate distribution of approved programs and projects throughout the Nation; (d) make such reports to the President and the Congress on the activities of the Council as it determines appropriate; (e) develop criteria for the establishment of program priorities; and (f) disseminate information concerning its activities under Section 408 of Pub. L. 93-380.

The meeting of the Executive Committee will take place on September 18 from 2:30 p.m. to 5:30 p.m. The agenda will include preparation for the Council meeting. The meetings of the Federal Policies and Practices Committee, the Legislation Committee and the Program Committee will take place on September 19 from 8:30 a.m. to 4:00 p.m. The agenda for the Federal Policy and Practices Committee will include discussion of FY 78 plans for Committee investigation of how Federal policies and programs affect women. The agenda for the Legislation Committee will include discussion of Title IX and pending legislation and regulations as they affect women. The agenda for the Program Committee will include discussion of monitoring and evaluation efforts directed toward the WEEA Program. The meeting of the Public Information Committee will take place from 12:00 p.m. to 2:00 p.m. on September 19. The agenda for that Committee will include discussion of FY 78 criteria for Committee operation, dissemination of Council reports and Council participation in the November National Women's Conference.

The Meeting of the National Advisory Council on Women's Educational Programs will take place from 4:00 to 5:00 p.m. on September 19 and from 8:30 a.m. to 4:30 p.m. on September 20. The agenda will include (1) report of the Executive Director; (2) report of the Women's Program Staff; (3) discussion of the FY 78 budget proposal; (4) personnel procedures; (5) action on committee reports; (6) discussion of athletics for women; and (7) plans for future activities.

All of the Council and committee and Council meetings will be open to the public. Records will be kept of all Council proceedings and will be available for public inspection at the Council offices at Suite 821, 1832 M Street NW., Washington, D.C.

Signed at Washington, DC on August 29, 1977.

JOY R. SIMONSON,
Executive Director.

TITLE I AUDIT APPEAL

Acceptance of Application for Appeal

Notice is hereby given that, pursuant to the notice establishing the Title I Audit Hearing Board (37 FR 23002, October 27, 1972), an application for an appeal before the Board has been received from the State of North Carolina and it has met the jurisdictional requirements of section 5 of the notice establishing the Board. The appeal involves the allowability of specified expenditures of funds under Title I of the ESEA during the period of July 1, 1967, through June 30, 1971. The amount sought for recovery from the State is $25,516, of which $19,339 deals with State-wide eligibility questions, $5,656 with allegedly improper use of audio-visual equipment, and $521

with salaries at the Pitt County local education agency. The Audit Control Number is ACN: 20159-04.

The Prehearing Conference will be held at 10:30 a.m. on October 20, 1977, in Room 4173, 400 Maryland Avenue SW., Washington, D.C.

Section 7(c) of the Notice setting up the Board provides:

(c) *Intervention by third parties.* (1) Interested third parties may, upon application to the Board Chairman, intervene in proceedings conducted under this notice. Such application must indicate to the satisfaction of the Board Chairman that the intervener has information relative to the specific issues raised by the final audit determination and that such information will be useful to the Hearing Panel in resolving those issues.

(2) When third parties are given leave to intervene in accordance with subparagraph (1) above, such parties shall be afforded the same opportunities as other parties to present written materials, to participate in informal conferences, to call witnesses, to cross-examine other witnesses, and to be represented by counsel.

All such applications for intervention will be considered if received on or before October 6, 1977.

(20 U.S.C. 241a, 1232c)

Dated: August 29, 1977.

JOHN ELLIS,
Acting United States Commissioner of Education.

[Docket No. 76N-0402; DESI 7937]

CERTAIN ANTIHISTAMANIC DRUGS USED IN ALLERGY

Drugs for Human Use; Drug Efficacy Study Implementation; Followup Notice and Opportunity for Hearing

AGENCY: Food and Drug Administration (FDA).

ACTION: Notice.

SUMMARY: The Food and Drug Administration announces the conditions for marketing certain antihistamine drugs for the indications for which they continue to be regarded as effective and offers an opportunity for a hearing concerning those indications reclassified as lacking substantial evidence of effectiveness.

DATES: Hearing requests due on or before October 3, 1977.

ADDRESSES: Communications forwarded in response to this notice should be identified with the reference number DESI 7937, directed to the attention of the appropriate office named below, and addressed to the Food and Drug Administration, 5600 Fishers Lane, Rockville, Md. 20857.

Supplements (identify with NDA number): Division of Surgical-Dental Drug Products (HFD-160), Rm. 18B-08, Bureau of Drugs.

Original abbreviated new drug applications and supplements thereto (identify as such): Division of Generic Drug Monographs (HFD-530), Bureau of Drugs.

Request for Hearing (identify with Docket number appearing in the heading of this notice): Hearing Clerk, Food and Drug Administration (HFC-20), Rm. 4-65.

Requests for the report of the National Academy of Sciences-National Research Council: Public Records and Document Center (HFC-18), Rm. 4-62.

Requests for opinion of the applicability of this notice to a specific product: Division of Drug Labeling Compliance (HFD-310), Bureau of Drugs.

Other communications regarding this notice: Drug Efficacy Study Implementation Project Manager (HFD-501), Bureau of Drugs.

FOR FURTHER INFORMATION CONTACT:

Ronald L. Wilson, Bureau of Drugs (HFD-32), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857 (301-443-3650).

SUPPLEMENTARY INFORMATION: In a notice (DESI 7937) published in the FEDERAL REGISTER of June 6, 1972 (37 FR 11277), the Food and Drug Administration classified the antihistaminic drug products described below as less than effective for their labeled indications (possibly effective and lacking substantial evidence of effectiveness). A subsequent notice was published in the FEDERAL REGISTER of February 6, 1974 (39 FR 4679) (Docket No. FDC-D-683 (now Docket No. 764N-0402)), and corrected by a notice published on March 27, 1974 (39 FR 11323), reclassifying the products to effective for the treatment of seasonal and perennial allergic rhinitis, and vasomotor rhinitis. Other indications related to the relief of symptoms of cough, cold, or allergy remained as possibly effective The notice classified all other indications as lacking substantial evidence of effectiveness. The notice stated that the labeling of these particular products could continue to include the possibly effective indications related to the relief of symptoms of cough, cold, or allergy as provided for in a notice published in the FEDERAL REGISTER of December 14, 1973 (38 FR 34481), which granted a temporary exemption from the time limits established for completing certain phases of the drug efficacy study (DESI) program, for certain oral prescription drugs offered for relief of cough, cold, allergy, and related symptoms. That exemption included antihistamines and, therefore, covered the drugs that are the subject of this notice. The exemption was granted because of the close relationship between, and the similarities in, drugs sold over-the-counter (OTC) and thus subject to review in the ongoing OTC study (21 CFR Part 330), and prescription drugs offered for relief of cough, cold, allergies, and related symptoms, and the active ingredients common to both. Postponement of final evaluations on the DESI prescription products enabled the agency to consider the recommendations of the OTC review panel in addition to any evidence submitted by NDA holders in response to various DESI notices covering antihistamine-containing products. Those recommendations and a proposed monograph for over-the-counter cold, cough, allergy, bronchodilator, and antiasthmatic (CCABA) drugs were published in the FEDERAL REGISTER on September 9, 1976 (41 FR 38312). No person has submitted additional data in response to the DESI notice of February 6, 1974. Therefore, the Director of the Bureau of Drugs has reclassified the drug products described below as lacking substantial evidence of effectiveness for the indications previously classified as possibly effective. He concludes that these evaluations are not inconsistent with the recommendations of the OTC review panel. This notice offers an opportunity for hearing concerning the possibly effective indications, which are now reclassified to lacking substantial evidence of effectiveness, and states the conditions for marketing the drugs for the indications for which they continue to be regarded as effective. Persons who wish to request a hearing may do so on or before October 3, 1977.

The notice that follows does not pertain to the indications classified in the February 6, 1974, notice as lacking substantial evidence of effectiveness. No person requested a hearing concerning them, and they are no longer allowable in labeling. Any such product labeled for those indications is subject to regulatory action.

1. NDA 8-305; Pyronil Tablets containing pyrrobutamine phosphate; Eli Lilly & Co., Box 618, Indianapolis, Ind. 46206.

2. NDA 10-897; Theruhistin Tablets containing isothipendyl hydrochloride; Ayerst Laboratories, Division of American Home Products Corp., 685 Third Ave., New York, N.Y. 10017.

3. NDA 11-078; Theruhistin Syrup containing isothipendyl hydrochloride; Ayerst Laboratories.

4. NDA 7-937; Neohetramine Hydrochloride Tablets containing thonzylamine hydrochloride; Warner-Chilcott Laboratories, Division Warner-Lambert Co., 201 Tabor Rd., Morris Plains, N.J. 07950.

(NDA 10-395, which was included in the June 6, 1972 and February 6, 1974 notices will be the subject of a future FEDERAL REGISTER notice.)

Such drugs are regarded as new drugs (21 U.S.C. 321(p)). The Director recognizes that thonzylamine hydrochloride at specific dosage levels is included in the proposed monograph published on September 9, 1976, for CCABA drugs that are generally recognized as safe and effective for OTC use (Category I). The proposed monograph would permit the OTC marketing of this product at dosage levels previously limited to prescription dispensing and reviewed as prescription drugs in the drug efficacy study (DESI). The Food and Drug Administration's position with respect to the marketing

V 42 1 171 SEP 2 77 UMI

of such drug products is set forth in 21 CFR 330.13. That regulation states that certain Category I drugs may be marketed over-the-counter after the date of publication of a proposed monograph and prior to the effective date of a final monograph, subject to the risk that the Commissioner of Food and Drugs may not accept the panel's recommendation and may instead adopt a different position that may require relabeling, recall, or other regulatory action. A tentative decision not to accept a panel's recommendation may be published in the FEDERAL REGISTER at any time. Thus, although, thonzylamine hydrochloride which is covered by this DESI notice may now be marketed OTC, since there has been no final decision on this matter, this notice sets forth the conditions for approval and marketing this drug as a prescription drug. Supplemental new drug applications are required to revise the labeling in and to update previously approved applications providing for the above drugs except in the case of thonzylamine hydrochloride when marketed OTC in conformance with the proposed monograph for CCABA drugs. An approved new drug drug application is a requirement for marketing such drug products, except for thonzylamine hydrochloride when marketed in conformance with the proposed monograph for OTC CCABA drugs.

In addition to the holder(s) of the new drug application(s) specifically named above, this notice applies to all persons who manufacture or distribute a drug product, not the subject of an approved new drug application, that is identical, related, or similar to a drug product named above, as defined in 21 CFR 310.6. It is the responsibility of every drug manufacturer or distributor to review this notice to determine whether it covers any drug product he manufactures or distributes. Any person may request an opinion of the applicability of this notice to a specific drug product he manufactures or distributes that may be identical, related, or similar to a drug product named in this notice by writing to the Division of Drug Labeling Compliance (address given above).

A. *Effectiveness classification.* The Food and Drug Administration has reviewed all available evidence and concludes that the drugs are effective for the indications listed in the labeling conditions below. The drugs now lack substantial evidence of effectiveness for the indications evaluated as possibly effective in the February 6, 1974, notice.

B. *Conditions for approval and marketing.* The Food and Drug Administration is prepared to approve abbreviated new drug applications and abbreviated supplements to previously approved new drug applications under conditions described herein. If any drug product in this notice is included in the final order that establishes a monograph for OTC cold, cough, allergy, bronchodilator and antiasthmatic products, the marketing of such drug product will thereafter comply with the conditions of the final order establishing the monograph. In the interim period the drug product must comply with the following conditions for approval and marketing unless the manufacturer or distributor markets the drug in compliance with the proposed monograph and the drug has not been designated by the Commissioner as one for which he has made a tentative decision not to accept the panel's recommendation.

1. *Form of drug.* The drugs are in tablet form suitable for oral administration. Isothipendyl hydrochloride may also be in syrup dosage form.

2. *Labeling conditions.* a. The label bears the statement, "Caution: Federal law prohibits dispensing without prescription."

b. The drug is labeled to comply with all requirements of the act and regulations and the labeling bears adequate information for safe and effective use of the drug. The indications are as follows:

For treatment of seasonal and perennial allergic rhinitis, and vasomotor rhinitis.

3. *Marketing status.* a. Marketing of such drug products that are now the subject of an approved or effective new drug application may be continued provided that, on or before November 1, 1977, the holder of the application submits, if he has not previously done so, (i) a supplement for revised labeling as needed to be in accord with labeling conditions described in this notice, and complete container labeling if current container labeling has not been submitted, and (ii) a supplement to provide updating information with respect to items 6 (components), 7 (composition), and 8 (methods, facilities, and controls) of new drug application form FD-356H (21 CFR 314.1(c)) to the extent required in abbreviated applications (21 CFR 314.1(f)).

b. Approval of an abbreviated new drug application (21 CFR 314.1(f)) must be obtained prior to marketing such product. Marketing prior to approval of a new drug application will subject such products, and those persons who caused the products to be marketed, to regulatory action.

C. *Notice of opportunity for hearing.* On the basis of all the data and information available to him, the Director of the Bureau of Drugs is unaware of any adequate and well-controlled clinical investigation, conducted by experts qualified by scientific training and experience, meeting the requirements of section 505 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355) and 21 CFR 314.111(a)(5), demonstrating the effectiveness of the drug(s) for the indication(s) lacking substantial evidence of effectiveness referred to in paragraph A. of this notice.

Notice is given to the holder(s) of the new drug application(s) and to all other interested persons, that the Director of the Bureau of Drugs proposes to issue an order under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)), withdrawing approval of the new drug application(s) and all amendments and supplements thereto providing for the indication(s) lacking substantial evidence of effectiveness referred to in paragraph A. of this notice on the ground that new information before him with respect to the drug product(s), evaluated together with the evidence available to him at the time of approval of the application(s), shows there is a lack of substantial evidence that the drug product(s) will have all the effects it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in the labeling. An order withdrawing approval will not issue with respect to any application(s) supplemented, in accord with this notice, to delete the claim(s) lacking substantial evidence of effectiveness.

In addition to the ground for the proposed withdrawal of approval stated above, this notice of opportunity for hearing encompasses all issues relating to the legal status of the drug products subject to it (including identical, related, or similar drug products as defined in 21 CFR 310.6), e.g., any contention that any such product is not a new drug because it is generally recognized as safe and effective within the meaning of section 201(p) of the act or because it is exempt from part or all of the new drug provisions of the act pursuant to the exemption for products marketed prior to June 25, 1938, contained in section 201(p) of the act, or pursuant to section 107(c) of the Drug Amendments of 1962; or for any other reason.

In accordance with the provisions of section 505 of the act (21 U.S.C. 355) and the regulations promulgated thereunder (21 CFR Parts 310, 314), the applicant(s) and all other persons who manufacture or distribute a drug product which is identical, related, or similar to a drug product named above (21 CFR 310.6), are hereby given an opportunity for a hearing to show why approval of the new drug application(s) providing for the claim(s) involved should not be withdrawn and an opportunity to raise, for administrative determination, all issues relating to the legal status of a drug product named above and all identical, related, or similar drug products.

If an applicant or any person subject to this notice pursuant to 21 CFR 310.6 elects to avail himself of the opportunity for a hearing, he shall file (1) on or before October 3, 1977, a written notice of appearance and request for hearing, and (2) on or before November 1, 1977, the data, information, and analyses on which he relies to justify a hearing, as specified in 21 CFR 314.200. Any other interested person may also submit comments on this proposal to withdraw approval. The procedures and requirements governing this notice of opportunity for hearing, a notice of appearance and request for hearing, a submission of data, information, and analyses to justify a hearing, other comments, and a grant or denial of hearing, are contained in 21 CFR 314.200.

The failure of an applicant or any other person subject to this notice pursuant to 21 CFR 310.6 to file timely written appearance and request for hearing as required by 21 CFR 314.200 constitutes an election by such person not to avail himself of the opportunity for a hearing concerning the action proposed with respect to such drug product and a waiver of any contentions concerning the legal status of such drug product. Any such drug product labeled for the indication(s) lacking substantial evidence of effectiveness referred to in paragraph A. of this notice may not thereafter lawfully be marketed, and the Food and Drug Administration will initiate appropriate regulatory action to remove such drug products from the market. Any new drug product marketed without an approved NDA is subject to regulatory action at any time.

A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that there is a genuine and substantial issue of fact that requires a hearing. If it conclusively appears from the face of the data, information, and factual analyses in the request for the hearing that there is no genuine and substantial issue of fact which precludes the withdrawal of approval of the application, or when a request for hearing is not made in the required format or with the required analyses, the Commissioner will enter summary judgment against the person(s) who requests the hearing, making findings and conclusions, denying a hearing.

All submissions pursuant to this notice of opportunity for hearing shall be filed in quintuplicate. Such submissions, except for data and information prohibited from public disclosure pursuant to 21 U.S.C. 333(j) or 18 U.S.C. 1905, may be seen in the office of the Hearing Clerk (address given above) between the hours of 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 502, 505, 52 Stat. 1050–1053, as amended (21 U.S.C. 352, 355)) and under the authority delegated to the Director of the Bureau of Drugs (21 CFR 5.82).

Dated: July 20, 1977.

J. RICHARD CROUT,
Director, Bureau of Drugs.

[FR Doc.77-25650 Filed 9-1-77;8:45 am]

[Docket No. 77N-0089; DESI 6290]

CERTAIN ANTIHISTAMINIC PREPARATIONS FOR ORAL OR RECTAL ADMINISTRATION

Drugs for Human Use: Drug Efficacy Study Implementation; Followup Notice and Opportunity for Hearing

AGENCY: Food and Drug Administration (FDA).

ACTION: Notice.

SUMMARY: The Food and Drug Administration announces the conditions for marketing certain antihistamine drugs for the indications for which they continue to be regarded as effective and offers an opportunity for a hearing concerning those indications reclassified as lacking substantial evidence of effectiveness.

DATE: Hearing requests due on or before October 3, 1977.

ADDRESSES: Communications forwarded in response to this notice should be identified with the reference number DESI 6290, directed to the attention of the appropriate office named below, and addressed to the Food and Drug Administration, 5600 Fishers Lane, Rockville, Md. 20857.

Supplements (identify with NDA number): Division of Surgical-Dental Drug Products (HFD-160), Rm. 18B-08, Bureau of Drugs.
Original abbreviated new drug applications and supplements thereto (identify as such): Division of Generic Drug Monographs (HFD-530), Bureau of Drugs.
Request for Hearing (identify with Docket number appearing in the heading of this notice): Hearing Clerk, Food and Drug Administration (HFC-20), Rm. 4-65.
Requests for the report of the National Academy of Sciences-National Research Council: Public Records and Document Center (HFC-18), Rm. 4-62.
Requests for opinion of the applicability of this notice to a specific product: Division of Drug Labeling Compliance (HFD-310), Bureau of Drugs.
Other communications regarding this notice: Drug Efficacy Study Implementation Project Manager (HFD-501), Bureau of Drugs.

FOR FURTHER INFORMATION CONTACT:

Ronald L. Wilson, Bureau of Drugs (HFD-32), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, (301-443-3650).

SUPPLEMENTARY INFORMATION: In a notice (DESI 6290; Docket No. FDC-D-324 (now Docket No. 77N-0089)) published in the FEDERAL REGISTER of June 18, 1971 (36 FR 11758), the Food and Drug Administration classified the antihistaminic drug products described below as effective for certain indications and less than effective for other labeled indications (probably effective, possibly effective and lacking substantial evidence of effectiveness). The notice provided an opportunity for a hearing on the indications concluded at that time to lack substantial evidence of effectiveness. The notice also provided opportunity for manufacturers of such products to present evidence in support of the probably effective and possibly effective indications.

Subsequently, a notice published in the FEDERAL REGISTER on December 14, 1973 (38 FR 34481) granted a temporary exemption from the time limit established for completing certain phases of the drug efficacy study (DESI) program, for certain oral prescription drugs offered for relief of cough, cold, allergy, and related symptoms. That exemption included antihistamines and, therefore, covered the drugs that are the subject of this notice. The exemption was granted because of the close relationship between, and the similarities in, drugs sold over-the-counter (OTC) and thus subject to review in the ongoing OTC study (21 CFR Part 330), and prescription drugs offered for relief of cough, cold, allergies, and related symptoms, and the active ingredients common to both. Postponement of final evaluations on the DESI prescription products enabled the agency to consider the recommendations of the OTC review panel in addition to any evidence submitted by NDA holders in response to various DESI notices covering antihistamine-containing products. Those recommendations and a proposed monograph for over-the-counter cold, cough, allergy, bronchodilator, and antiasthmatic (CCABA) drugs were published in the FEDERAL REGISTER on September 9, 1976 (41 FR 38312). Since no person has submitted additional data in response to the DESI notice of June 18, 1971 for the drug products described below, the Director of the Bureau of Drugs has reclassified them as lacking substantial evidence of effectiveness for the indications previously classified as probably effective or possibly effective. He concludes that these evaluations are not inconsistent with the recommendations of the OTC review panel.

The temporary exemption granted by the December 14, 1973 notice, as it pertains to these drugs, is revoked in a separate notice appearing elsewhere in this issue of the FEDERAL REGISTER. The notice herein offers an opportunity for hearing concerning the indications now reclassified to lacking substantial evidence of effectiveness, and states the conditions for marketing the drugs for the indications for which they continue to be regarded as effective. Persons who wish to request a hearing may do so on or before October 3, 1977.

The notice that follows does not pertain to the indications stated in the June 18, 1971 notice to lack substantial evidence of effectiveness. No person requested a hearing concerning them, and they are no longer allowable in labeling. Any such product labeled for those indications is subject to regulatory action.

1. Preparations containing bromodiphenhydramine hydrochloride:
   a. Ambodryl Kapseals (NDA 7-984);
   b. Ambodryl Elixir (NDA 8-476); and
   c. Ambodryl Syrup (NDA 8-745); Parke, Davis & Co., Joseph Campau at the River, Detroit, MI 48232.
2. Preparation containing chlorpheniramine maleate: Chlor-Trimeton Tablets and Syrup (NDA 6-921); Schering Corp., Galloping Hill Rd., Kenilworth, NJ 07033
3. Preparation containing diphenylpyraline hydrochloride: Diafen Tablets (NDA 9-970); Riker Laboratories, Inc., Subsidiary of 3M Co., 19901 Nordhoff St., Northridge, CA 91324.
4. Preparations containing promethazine hydrochloride:
   a. Phenergan Tablets (NDA 7-935);
   b. Phenergan Syrup (NDA 8-381); and
   c. Phenergan Rectal Suppositories (NDA 10-926 and NDA 11-689); Wyeth Laboratories, Division, American Home Products Corp., P.O. Box 8299, Philadelphia, PA 19101.
5. Preparation containing pheniramine maleate: Trimeton Tablets (NDA 6-461); Schering Corp.
6. Preparation containing pyrilamine maleate: Diaminide Maleate Tablets (NDA 7-

V 42 171 SEP 2 77 UMI

119): Merck Sharp & Dohme, Division Merck & Co., Inc., West Point, PA 19486. (Although the initial notice listed Neo-Antergen Maleate as the name of the product marketed under NDA 7-119, the correct name is Diamine Maleate.)

7. Preparations containing tripelennamine hydrochloride or tripelennamine citrate:

a. Pyribenzame Tablets (NDA 5-914);

b Pyribenzamine Elixir (NDA 5-914); Ciba Pharmaceuticals Co., Division of Ciba-Geigy Corp., 556 Morris Ave., Summit, NJ 07901.

The following drug product was neither submitted for review by the National Academy of Sciences-National Research Council nor included in the June 18, 1971 notice, but the conclusions described in this notice apply to it:

Pyraline Hydrochloride Tablets (NDA 9-132); containing diphenylpyraline hydrochloride, Nopco Chemical Co., Division Diamond Shamrock Chemical Co., 350 Mt. Kemble Ave., Morristown, NJ 07960.

NDA's 5-845, 7-638, 10-533, 12-649, and 13-220, which were included in the June 18, 1971 notice, will be the subjects of future FEDERAL REGISTER notices. NDA 6-290, which was also included in the June 18, 1971 notice, was deferred to the OTC review in a notice published in the FEDERAL REGISTER of May 23, 1972 (37 FR 10457).

In a notice published in the FEDERAL REGISTER of February 8, 1972 (37 FR 2851), the approval of NDA 7-119 was withdrawn on the ground of failure to submit required reports under section 505(j) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(j)). At the time that notice was published, no final conclusions concerning the less-than-effective indications (probably effective and possibly effective) had been reached. Those conclusions have now been reached and the purpose of including NDA 7-119 in this notice is to inform all interested persons of the conclusions and offer them the opportunity to request a hearing concerning all issues relating to its legal status.

Such drugs are regarded as new drugs (21 U.S.C. 321(p)). The Director recognizes that chlorpheniramine maleate, pheniramine maleate, and pyrilamine maleate, at specific dosage levels, are included in the proposed monograph published on September 9, 1976, for CCABA drugs that are generally recognized as safe and effective for OTC use (Category I). The proposed monograph would permit the OTC marketing of those products at dosage levels previously limited to prescription dispensing and reviewed as prescription drugs in the drug efficacy study (DESI). The Food and Drug Administration's position with respect to the marketing of such drug products is set forth in 21 CFR 330.13. That regulation states that certain Category I drugs may be marketed over-the-counter after the date of publication of a proposed monograph and prior to the effective date of a final monograph, subject to the risk that the Commissioner of Food and Drugs may not accept the panel's recommendation and may instead adopt a different position that may require relabeling, recall, or other regulatory action. A tentative decision not to accept a panel's recommendation may be published in the FEDERAL REGISTER at any time. Thus, although some products covered by this DESI notice may now be marketed OTC, since there has been no final decision on this matter, this notice sets forth the conditions for approval and marketing of those drugs as prescription drugs. Supplemental new drug applications are required to revise the labeling in and to update approved applications providing for such drugs except in the case of those drug products mentioned above now marketed OTC in conformance with the proposed monograph for CCABA drugs. An approved new drug application is a requirement for marketing such drug products, except those marketed in conformance with the proposed monograph for OTC CCABA drugs. Although promethazine hydrochloride also was included in the proposed OTC monograph, the Commissioner has tentatively decided not to accept that panel recommendation, as stated in the preamble to the proposed monograph (41 CFR 38312). An approved new drug application is required for all dosage levels of this drug.

In addition to the holder(s) of the new drug application(s) specifically named above, this notice applies to all persons who manufacture or distribute a drug product, not the subject of an approved new drug application, that is identical, related, or similar to a drug product named above, as defined in 21 CFR 310.6. It is the responsibility of every drug manufacturer or distributor to review this notice to determine whether it covers any drug product he manufactures or distributes. Any person any request an opinion of the applicability of this notice to a specific drug he manufactures or distributes that may be identical, related, or similar to a drug product named in this notice by writing to the Division of Drug Labeling Compliance (address given above).

A. *Effectiveness classification.* The Food and Drug Administration has reviewed all available evidence and concludes that the drugs are effective for the indications listed in the labeling conditions below. The drugs now lack substantial evidence of effectiveness for the other indications evaluated as probably or possibly effective in the June 18, 1971 notice.

B. *Conditions for approval and marketing.* The Food and Drug Administration is prepared to approve abbreviated new drug applications and abbreviated supplements to previously approved new drug applications under conditions described herein. If any drug product in this notice is included in the final order that establishes a monograph for OTC cold, cough, allergy, bronchodilator and antiasthmatic products, the marketing of such drug product will thereafter comply with the conditions of the final order establishing the monograph. In the interim period the drug product must comply with the following conditions for approval and marketing unless the manufacturer or distributor markets the drug in compliance with the proposed monograph and the drug has not been designated by the Commissioner as one for which he has made a tentative decision not to accept the panel's recommendation.

1. *Form of drug.* a. The drugs are in a conventional dosage form suitable for oral administration.

b. Promethazine hydrochloride may also be in a suppository form suitable for rectal administration.

2. *Labeling conditions.* a. The label bears the statement, "Caution: Federal law prohibits dispensing without prescription."

b. The drug is labeled to comply with all requirements of the act and regulations, and the labeling bears adequate information for safe and effective use of the drug. The Indications are as follows:

BROMODIPHENHYDRAMINE HYDROCHLORIDE

Perennial and seasonal allergic rhinitis.
Vasomotor rhinitis.
Allergic conjunctivitis due to inhalant allergens and foods.
Mild, uncomplicated allergic skin manifestations of urticaria and angioedema.
Amelioration of allergic reactions to blood or plasma.
Dermographism.
As therapy for anaphylactic reactions adjunctive to epinephrine and other standard measures after the acute manifestations have been controlled.

CHLORPHENIRAMINE MALEATE

Perennial and seasonal allergic rhinitis.
Vasomotor rhinitis.
Allergic conjunctivitis due to inhalant allergens and foods.
Mild, uncomplicated allergic skin manifestations of urticaria and angioedema.
Amelioration of allergic reactions to blood or plasma.
Dermographism.
As therapy for anaphylactic reactions adjunctive to epinephrine and other standard measures after the acute manifestations have been controlled.

DIPHENYLPYRALINE HYDROCHLORIDE

Perennial and seasonal allergic rhinitis.
Vasomotor rhinitis.
Allergic conjunctivitis due to inhalant allergens and foods.
Mild, uncomplicated allergic skin manifestations of urticaria and angioedema.
Amelioration of allergic reactions to blood or plasma.
Dermographism.
As therapy for anaphylactic reactions adjunctive to epinephrine and other standard measures after the acute manifestations have been controlled.

PROMETHAZINE HYDROCHLORIDE

Perennial and seasonal allergic rhinitis.
Vasomotor rhinitis.
Allergic conjunctivitis due to inhalant allergens and foods.
Mild, uncomplicated allergic skin manifestations of urticaria and angioedema.
Amelioration of allergic reactions to blood or plasma.
Dermographism.
As therapy for anaphylactic reactions adjunctive to epinephrine and other standard measures after the acute manifestations have been controlled.
Preoperative, postoperative, or obstetric sedation.

Prevention and control of nausea and vomiting associated with certain types of anesthesia and surgery.
Therapy adjunctive to meperidine or other analgesics for control of postoperative pain.
Sedation in both children and adults as well as relief of apprehension and production of light sleep from which the patient can be easily aroused.
Active and prophylactic treatment of motion sickness.
Antiemetic effect in postoperative patients.

PHENIRAMINE MALEATE

Perennial and seasonal allergic rhinitis.
Vasomotor rhinitis.
Allergic conjunctivitis due to inhalant allergens and foods.
Mild, uncomplicated allergic skin manifestations of urticaria and angioedema.
Amelioration of allergic reactions to blood or plasma.
Dermographism.
As therapy for anaphylactic reactions adjunctive to epinephrine and other standard measures after the acute manifestations have been controlled.

PYRILAMINE MALEATE

Perennial and seasonal allergic rhinitis.
Vasomotor rhinitis.
Allergic conjunctivitis due to inhalant allergens and foods.
Mild, uncomplicated allergic skin manifestations of urticaria and angioedema.
Amelioration of allergic reactions to blood or plasma.
Dermographism.
As therapy for anaphylactic reactions adjunctive to epinephrine and other standard measures after the acute manifestations have been controlled.

TRIPLENNAMINE HYDROCHLORIDE AND CITRATE

Perennial and seasonal allergic rhinitis.
Vasomotor rhinitis.
Allergic conjunctivitis due to inhalant allergens and foods.
Mild, uncomplicated allergic skin manifestations of urticaria and angioedema.
Amelioration of allergic reactions to blood or plasma.
Dermographism.
As therapy for anaphylactic reactions adjunctive to epinephrine and other standard measures after the acute manifestations have been controlled.

3. *Marketing status.* a. Marketing of such drug products that are now the subject of an approved or effective new drug application may be continued provided that, on or before November 1, 1977, the holder of the application submits, if he has not previously done so, (i) a supplement for revised labeling as needed to be in accord with the labeling conditions described in this notice, and complete container labeling if current container labeling has not been submitted, and (ii) a supplement to provide updating information with respect to items 6 (components), 7 (composition), and 8 (methods, facilities, and controls) of new drug application form FD-356H (21 CFR 314.1(c)) to the extent required in abbreviated applications (21 CFR 314.1(f)).

b. Approval of an abbreviated new drug application (ANDA) (21 CFR 314.-1(f)) must be obtained prior to marketing such product. Marketing prior to approval of a new drug application will subject such products, and those persons who caused the products to be marketed, to regulatory action.

C. *Notice of opportunity for hearing.* On the basis of all the data and information available to him, the Director of the Bureau of Drugs is unaware of any adequate and well-controlled clinical investigation, conducted by experts qualified by scientific training and experience, meeting the requirements of section 505 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355) and 21 CFR 314.111(a)(5), demonstrating the effectiveness of the drug(s) for the indication(s) lacking substantial evidence of effectiveness referred to in paragraph A. of this notice.

Notice is given to the holder(s) of the new drug application(s), and to all other interested persons, that the Director of the Bureau of Drugs proposes to issue an order under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)), withdrawing approval of the new drug application(s) and all amendments and supplements thereto providing for the indication(s) lacking substantial evidence of effectiveness referred to in paragraph A. of this notice on the ground that new information before him with respect to the drug product(s), evaluated together with the evidence available to him at the time of approval of the application(s), shows there is a lack of substantial evidence that the drug product(s) will have all the effects it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in the labeling. An order withdrawing approval will not issue with respect to any application(s) supplemented, in accord with this notice, to delete the claim(s) lacking substantial evidence of effectiveness.

In addition to the ground for the proposed withdrawal of approval stated above, this notice of opportunity for hearing encompasses all issues relating to the legal status of the drug products subject to it (including identical, related, or similar drug products as defined in 21 CFR 310.6), e.g., any contention that any such product is not a new drug because it is generally recognized as safe and effective within the meaning of section 201(p) of the act or because it is exempt from part or all of the new drug provisions of the act pursuant to the exemption for products marketed prior to June 25, 1938, contained in section 201(p) of the act, or pursuant to section 107(c) of the Drug Amendments of 1962; or for any other reason.

In accordance with the provisions of section 505 of the act (21 U.S.C. 355) and the regulations promulgated thereunder (21 CFR Parts 310, 314), the applicant(s) and all other persons who manufacture or distribute a drug product which is identical, related, or similar to a drug product named above (21 CFR 310.6), are hereby given an opportunity for a hearing to show why approval of the new drug application(s) providing for the claim(s) involved should not be withdrawn and an opportunity to raise, for administrative determination, all issues relating to the legal status of a drug project named above and all identical, related, or similar drug products.

If an applicant or any person subject to this notice pursuant to 21 CFR 310.6 elects to avail himself of the opportunity for a hearing, he shall file (1) on or before October 3, 1977, a written notice of appearance and request for hearing, and (2) on or before November 1, 1977, the data, information, and analyses on which he relies to justify a hearing, as specified in 21 CFR 314.200. Any other interested person may also submit comments on this proposal to withdraw approval. The procedures and requirements governing this notice of opportunity for hearing, a notice of appearance and request for hearing, a submission of data, information, and analyses to justify a hearing, other comments, and a grant or denial of hearing, are contained in 21 CFR 314.200.

The failure of an applicant or any other person subject to this notice pursuant to 21 CFR 310.6 to file timely written appearance and request for hearing as required by 21 CFR 314.200 constitutes an election by such person not to avail himself of the opportunity for a hearing concerning the action proposed with respect to such drug product and a waiver of any contentions concerning the legal status of such drug product. Any such drug product labeled for the indication(s) lacking substantial evidence of effectiveness referred to in paragraph A. of this notice may not thereafter lawfully be marketed, and the Food and Drug Administration will initiate appropriate regulatory action to remove such drug products from the market. Any new drug product marketed without an approved NDA is subject to regulatory action at any time.

A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that there is a genuine and substantial issue of fact that requires a hearing. If it conclusively appears from the face of the data, information, and factual analyses in the request for the hearing that there is no genuine and substantial issue of fact which precludes the withdrawal of approval of the application, or when a request for hearing is not made in the required format or with the required analyses, the Commissioner will enter summary judgment against the person(s) who requests the hearing, making findings and conclusions, denying a hearing.

All submissions pursuant to this notice of opportunity for hearing shall be filed in quintuplicate. Such submissions, except for data and information prohibited from public disclosure pursuant to 21 U.S.C. 331(j) or 18 U.S.C. 1905, may be seen in the office of the Hearing Clerk between the hours of 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 502, 505, 52 Stat. 1050-1053, as amended (21

V 42 171 SEP 2 77 UMI

U.S.C. 352, 355)) and under the authority delegated to the Director of the Bureau of Drugs (21 CFR 5.82).

Dated: July 20, 1977.

J. RICHARD CROUT,
Director, Bureau of Drugs.

Food and Drug Administration

[Docket No. 76N-0353; DESI 9760 and 12180]

CERTAIN ANTILIPEMIC DRUGS

Drugs for Human Use; Drug Efficacy Study Implementation; Followup Notice and Opportunity for Hearing

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This notice sets forth the conditions for marketing the drug products described below for the indication for which they continue to be regarded as effective and offers an opportunity for a hearing concerning the indications reclassified as lacking substantial evidence of effectiveness. The drugs are antilipemic agents.

DATES: Hearing requests due on or before October 3, 1977. Supplements to approved NDA's due on or before November 1, 1977.

ADDRESSES: Communications forwarded in response to this notice should be identified with the reference number DESI 9760 and 12180, directed to the attention of the appropriate office named below, and addressed to the Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857. Supplements (identify with NDA number): Division of Metabolic and Endocrine Drug Products (HFD-130), Rm. 14B-03, Bureau of Drugs.

Original abbreviated new drug applications and supplements thereto (identify as such): Division of Generic Drug Monographs (HFD-530), Bureau of Drugs.

Request for Hearing (identify with Docket number appearing in the heading of this notice): Hearing Clerk, Food and Drug Administration (HFC-20), Rm. 4-65.

Requests for the report of the National Academy of Sciences-National Research Council: Public Records and Document Center (HFC-18), Rm. 4-62.

Requests for opinion of the applicability of this notice to a specific product: Division of Drug Labeling Compliance (HFD-310), Bureau of Drugs.

Other communications regarding this notice: Drug Efficacy Study Implementation Project Manager (HFD-501), Bureau of Drugs.

FOR FURTHER INFORMATION CONTACT:

Herbert Gerstenzang, Bureau of Drugs (HFD-32), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857. (301-443-3650).

SUPPLEMENTARY INFORMATION: In notices (DESI 9760) published in the FEDERAL REGISTER of April 15, 1972 (37 FR 7535) as amended on March 19, 1973 (38 FR 7270); and (DESI 12180) published in the FEDERAL REGISTER of August 12, 1972 (37 FR 16421), the Food and Drug Administration announced its conclusions that the drugs described below are (1) effective as adjunctive therapy in addition to diet and other measures in the treatment of hypercholesterolemia and hyperbetalipoproteinemia; and possibly effective for all their other labeled indications. The manufacturers have deleted the possibly effective indications from the labeling of the drugs. No person has submitted any data in support of the possibly effective indications, and those indications are now reclassified as lacking substantial evidence of effectiveness.

In order to clarify when these drugs are to be used FDA has reworded the effective indication to read as follows: as adjunctive therapy in the treatment of patients with hypercholesterolemia and hyperbetalipoproteinemia who do not respond adequately to diet and other measures.

1. NDA 12-180; Nicalex Tablets containing 625 mg aluminum nicotinate; merrell-National Laboratories, Division Richardson-Merrell Inc., P.O. Box 15260, Cincinnati, OH 45215.

2. NDA 11-313; Nicotinic Acid Tablets containing 500 mg niacin; formerly marketed by Merrell-National Laboratories.

3. NDA 11-578; Efacin Tablets containing 500 mg niacin; Person & Covey Inc., 616 Allen Ave., Glendale, CA 91201.

4. NDA 9-760; Cytellin Suspension containing 3 grams sitosterols per 15 cubic centimeters; Eli Lilly & Co., P.O. Box 618, Indianapolis, IN 46206.

The following drug not included in the above notices, but dealt with as a reformulated product in a notice of September 25, 1973 (38 FR 26752), is being included in this notice.

NDA 11-073; Wampocap Capsules containing 500 mg niacin; Wampole Laboratories, Division Carter-Wallace, Inc. Half Acre Rd., Cranbury, NJ 08512.

Such drugs are regarded as new drugs (21 U.S.C. 321(p)). Supplemental new drug applications are required to revise the labeling in and to update previously approved applications providing for such drugs. An approved new drug application is a requirement for marketing such drug products.

In addition to the holder(s) of the new drug application(s) specifically named above, this notice applies to all persons who manufacture or distribute a drug product, not the subject of an approved new drug application, that is identical, related, or similar to a drug product named above, as defined in 21 CFR 310.6. It is the responsibility of every drug manufacturer or distributor to review this notice to determine whether it covers any drug product he manufactures or distributes. Any person may request an opinion of the applicability of this notice to a specific drug product he manufactures or distributes that may be identical, related, or similar to a drug product named in this notice by writing to Division of Drug Labeling Compliance (address given above).

A. *Effectiveness classification.* The Food and Drug Administration has reviewed all available evidence and concludes that the drugs are effective for the indication in the labeling conditions below. The drugs now lack substantial evidence of effectiveness for the indications evaluated as possibly effective in the April 15, 1972 and August 12, 1972 notices.

B. *Conditions for approval and marketing.* The Food and Drug Administration is prepared to approve abbreviated new drug applications and abbreviated supplements to previously approved new drug applications under conditions described herein.

1. *Form of drug.* Aluminum nicotinate and niacin are in tablet or capsule form and sitosterols are in suspension form, suitable for oral administration.

2. *Labeling conditions.* a. The labels bear the statement, "Caution: Federal law prohibits dispensing without prescription."

b. The drugs are labeled to comply with all requirements of the act and regulations, and the labeling bears adequate information for safe and effective use of the drug. The Indication is as follows for aluminum nicotinate, sitosterols, and niacin (given at a dosage rate of 1 to 2 grams a day):

As adjunctive therapy in the treatment of patients with hypercholesterolemia and hyperbetalipoproteinemia who do not respond adequately to diet and other measures.

c. The following statement is to follow the "Indications" section either enclosed in a block or in italics:

Notice: It has not been established whether the drug-induced lowering of serum cholesterol or triglyceride levels has a beneficial effect, no effect, or a detrimental effect on the morbidity or mortality due to atherosclerosis including coronary heart disease. Investigations now in progress may yield an answer to this question.

3. *Marketing status.* a. Marketing of such drug products that are now the subject of an approved or effective new drug application may be continued provided that, on or before (insert date 60 days after date of publication in the FEDERAL REGISTER), the holder of the application submits, if he has not previously done so, (i) a supplement for revised labeling as needed to be in accord with the labeling conditions described in this notice, and complete container labeling if current container labeling has not been submitted, and (ii) a supplement to provide updating information with respect to items 6 (components), 7 (composition), and 8 (methods, facilities, and controls) of new drug application form FD-356H (21 CFR 314.1(c)) to the extent required in abbreviated applications (21 CFR 314.1(f)).

b. Approval of an abbreviated new drug application (21 CFR 314.1(f)) must be obtained prior to marketing such product. Marketing prior to approval of a new drug application will subject such products, and those persons who caused the products to be marketed, to regulatory action.

c. *Notice of opportunity for hearing.* On the basis of all the data and information available to him, the Director of the Bureau of Drugs is unaware of any adequate and well-controlled clinical investigation, conducted by experts qualified by scientific training and experience, meeting the requirements of section 505 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355) and 21 CFR 314.111 (a) (5), demonstrating the effectiveness of the drug(s) for the indication(s) lacking substantial evidence of effectiveness referred to in paragraph A. of this notice.

Notice is given to the holder(s) of the new drug application(s), and to all other interested persons, that the Director of the Bureau of Drugs proposes to issue an order under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)), withdrawing approval of the new drug application(s) and all amendments and supplements thereto providing for the indication(s) lacking substantial evidence of effectiveness referred to in paragraph A. of this notice on the ground that new information before him with respect to the drug product(s), evaluated together with the evidence available to him at the time of approval of the application(s), shows there is a lack of substantial evidence that the drug product(s) will have all the effects it purports or is represented to have under the conditions of use prescribed, recommendd, or suggested in the labeling. An order withdrawing approval will not issue with respect to any application(s) supplemented, in accord with this notice, to delete the claim(s) lacking substantial evidence of effectiveness.

In addition to the ground for the proposed withdrawal of approval stated above, this notice of opportunity for hearing encompasses all issues relating to the legal status of the drug products subject to it (including identical, related, or similar drug products as defined in 21 CFR 310.6), e.g., any contention that any such product is not a new drug because it is generally recognized as safe and effective within the meaning of section 201(p) of the act or because it is exempt from part or all of the new drug provisions of the act pursuant to the exemption for products marketed prior to June 25, 1938, contained in section 201 (p) of the act, or pursuant to section 107(c) of the Drug Amendments of 1962; or for any other reason.

In accordance with the provisions of section 505 of the act (21 U.S.C. 355) and the regulations promulgated thereunder (21 CFR Parts 310, 314), the applicant(s) and all other persons who manufacture or distribute a drug product which is identical, related, or similar to a drug product named above (21 CFR 310.6), are hereby given an opportunity for a hearing to show why approval of the new drug application(s) providing for the claim(s) involved should not be withdrawn and an opportunity to raise, for administrative determination, all issues relating to the legal status of a drug product named above and all identical, related, or similar drug products.

If an applicant or any person subject to this notice pursuant to 21 CFR 310.6 elects to avail himself of the opportunity for a hearing, he shall file (1) on or before October 3, 1977, a written notice of appearance and request for hearing, and (2) on or before November 1, 1977, the data, information, and analyses on which he relies to justify a hearing, as specified in 21 CFR 314.200. Any other interested person may also submit comments on this proposal to withdraw approval. The procedures and requirements governing this notice of opportunity for hearing, a notice of appearance and request for hearing, a submission of data, information, and analyses to justify a hearing, other comments, and a grant or denial of hearing, are contained in 21 CFR 314.200.

The failure of an applicant or any other person subject to this notice pursuant to 21 CFR 310.6 to file timely written appearance and request for hearing is required by 21 CFR 314.200 constitutes an election by such person not to avail himself of the opportunity for a hearing concerning the action proposed with respect to such drug product and a waiver of any contentions concerning the legal status of such drug product. Any such drug product labeled for the indication(s) lacking substantial evidence of effectiveness referred to in paragraph A. of this notice may not thereafter lawfully be marketed, and the Food and Drug Administration will initiate appropriate regulatory action to remove such drug products from the market. Any new drug product marketed without an approved NDA is subject to regulatory action at any time.

A request for a hearing may not rest upon mere allegations or denials, but mut set forth specific facts showing that there is a genuine and substantial issue of fact that requires a hearing. If it conclusively appears from the face of the data, information, and factual analyses in the request for the hearing that there is no genuine and substantial issue of fact which precludes the withdrawal of approval of the application, or when a request for hearing is not made in the required format or with the required analyses, the Commissioner will enter summary judgment against the person(s) who requests the hearing, making findings and conclusions, denying a hearing.

All submissions pursuant to this notice of opportunity for hearing shall be filed in quintuplicate. Such submissions, except for data and information prohibited from public disclosure pursuant to 21 U.S.C. 331(j) or 18 U.S.C. 1905, may be seen in the office of the Hearing Clerk between the hours of 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 502, 505, 52 Stat. 1050-1053, as amended (21 U.S.C. 352, 355)) and under the authority delegated to the Director of the Bureau of Drugs (21 CFR 5.82).

Dated: August 23, 1977.

RICHARD A. TERSELIC,
Acting Director, Bureau of Drugs.

[FR Doc.77-25409 Filed 9-1-77;8:45 am]

[Docket No. 77N-0244; DESI 12101]

COMBINATION DRUG CONTAINING SYROSINGOPINE AND HYDROCHLOROTHIAZIDE

Opportunity for Hearing on Proposal To Withdraw Approval of New Drug Application

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This notice reclassifies the combination drug syrosingopine and hydrochlorothiazide to lacking substantial evidence of effectiveness, proposes withdrawal of approval of the new drug application, and offers an opportunity for a hearing on the proposal.

DATES: Hearing requests due on or before October 3, 1977.

ADDRESSES: Communications forward in response to this notice should be identified with the reference number DESI 12101 and the docket number appearing in the heading of this notice, and addressed to the Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857. Request for Hearing: Hearing Clerk, Food and Drug Administration (HFC-20), Rm. 4-65. Request for opinion of the applicability of this notice to a specific product: Division of Drug Labeling Compliance (HFD-310), Bureau of Drugs, Food and Drug Administration.

FOR FURTHER INFORMATION CONTACT:

Herbert Gerstenzang, Bureau of Drugs (HFD-32), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, (301-443-3650).

SUPPLEMENTARY INFORMATION: In a notice (DESI 12101) published in the FEDERAL REGISTER of February 12, 1973 (38 FR 4281), the Food and Drug Administration (FDA) announced its conclusion that the combination drug product described below is less than effective (possibly effective) for its labeled indications. The drug has been used as an antihypertensive agent.

NDA 12-101; Singoserp-Esidrix Tablets (2 strengths) containing syrosingopine and hydrochlorothiazide; Ciba Phamaceutical Co., Division of Ciba-Geigy Corp., 556 Morris Ave., Summit, NJ 07901.

Pursuant to the notice of February 12, 1973, Ciba submitted data from six clinical studies of similar design to support its claims for effectiveness of the

V 42 171 SEP 2 77 S UMI

Singoserp-Esidrix combination. The studies were conducted under double-blind conditions. Following a 6-week placebo lead-in period, patients were randomly assigned to one of four treatment groups and were given one tablet three times a day for 8 weeks of either placebo, hydrochlorothiazide 25 milligrams, syrosingopine 1 milligram, or the combination syrosingopine-hydrochlorothiazide. Patients were seen at 2-week intervals and effectiveness was measured by comparing systolic and diastolic blood pressures in the sitting, standing, and lying positions (a total of 6 blood pressure comparisons) during the treatment period with the baseline blood pressures for each position. The baseline was the average of the pressures at the last two visits of the placebo lead-in period. The changes in blood pressure were then compared for the various treatments. Ciba also defined a "satisfactory response". This was considered to be a decrease in blood pressure by more than 20 percent of the control or a reduction of diastolic pressure to 90 millimeters of mercury or below.

In this review of the submitted data, only the comparison between the Esidrix and the Esidrix-Singoserp treatment groups need be considered, as the contribution of Singoserp to the combination, not the effectiveness of Esidrix, is in question.

The individual studies were conducted by Drs. Adams, Atkins, Cristofori, Hollander, Nolan, and Willson. The Hollander study was not subjected to separate statistical analysis because too few patients were involved. In the Willson study, which included only 10 patients, the comparisons between the two treatments revealed only slight differences (favoring the combination), that were not considered significant. The Atkins study, which involved 48 patients, slightly favored Esidrix for all six blood pressure comparisons (systolic and diastolic in each of the three positions), although not at statistically significant levels. Only the Nolan study showed a substantial advantage for the combination over Esidrix, with differences of from 6 to 9 millimeters of mercury in the sitting, standing, and lying diastolic pressure. These differences were statistically significant. The Adams study, which was of comparable size to the Nolan study, produced results that favored the single ingredient Esidrix over the combination Esidrix-Singoserp, and for several blood pressure comparisons at a statistically significant level. The Cristofori study tended to favor the combination, although only for certain blood pressure comparisons. Perhaps more important, however, the largest average difference Cristofori found between any blood pressure measurement during combination treatment and the same measurement on Esidrix was 2.8 millimeters of mercury.

The results of the individual studies comparing Esidrix to Esidrix-Singoserp can therefore be summarized as follows: (1) Two studies (Nolan, Cristofori) favored the combination over the single drug; however, only one of these (Nolan) showed a clinically meaningful difference between the two groups; (2) one study (Adams) favored the single drug over the combination; and (3) two studies (Atkins, Willson) did not show significant differences between the two treatments; one of these favored the single drug, while the other favored the combination. Although these results could suggest that Singoserp contributes somewhat to the effect of the Singoserp-Esidrix combination, the data are inconsistent and none of the studies demonstrated a satisfactory response as defined by Ciba.

In addition to its analysis of the individual studies, Ciba submitted an analysis of the results of pooling the data from all six studies. It was reasonable for Ciba to have combined these results because in all six studies patient populations were essentially similar and the protocol used was identical. In combining these data, however, Ciba excluded the largest group of patients, those studied by Dr. Atkins. Ciba excluded Dr. Atkin's data because some of his results differred significantly from the results of the other five studies. Specifically, the placebo in Atkins study showed a fall in sitting blood pressure during the 8-week treatment period, even though these patients already had been on a placebo for the 6 weeks prior to treatment. This unexpected fall in blood pressure was not seen in patients receiving placebos in the other five studies. The credibility of any study from which data have been excluded in this way, however, must be considered in doubt, particularly when the exclusion improves the apparent performance of the drug.

The pooled data for all 6 studies (including Atkins) reveals there was no significant difference between the combination and Esidrix in lying or sitting diastolic blood pressure. There was a significant difference in supine diastolic pressure, but the mean difference was only 2 millimeters of mercury. The systolic blood pressures in all three positions were significantly lower with the combination than with Esidrix alone. In each case, however, the difference was only 2 to 3 millimeters of mercury. The lack of effect on diastolic pressure is more apparent when the Atkins study is included—an important observation, as it is the change in diastolic pressure that most physicians rely upon in following antihypertensive therapy. It should be noted that despite the unusual response of the placebo group in the Atkins study, the blood pressure response of patients on active drugs was similar to that seen in the other studies. These responses favored the single ingredient Esidrix group, although not at a statistically significant level.

The analysis of the pooled data excluding the Atkins study is still unimpressive. The mean difference in diastolic blood pressure ranges from 1.11 millimeters of mercury in the supine position to 3.59 millimeters of mercury in the standing position. Only in the standing position is the difference statistically significant. The changes in systolic pressure range from 3.95 to 5 millimeters of mercury.

The submitted data thus fail to demonstrate a consistent difference among treatments favoring the combination drug in these blood pressure comparisons. The results of the six individual studies are inconsistent in that some favor the combination Singoserp-Esidrix while others favor the single drug Esidrix. In only one case is the difference favoring the combination more than a few millimeters of mercury. The pooled analysis, including the Atkins study (which should be included as no satisfactory reason has been given to exclude it), shows even smaller differences. In this analysis the largest difference in diastolic pressures seen is just 2 millimeters of mercury. The largest difference in systolic pressures seen is somewhat over 2.5 millimeters of mercury. Although these data provide a suggestion that Singoserp contributes minimally to the effect of an Esidrix-Singoserp combination, the data fall far short of the requirements of substantial evidence.

A notice published in the FEDERAL REGISTER of July 12, 1977 (42 FR 35897) withdrew approval of NDA 11-565 for Singoserp Tablets containing syrosingopine, one of the components of Singoserp-Esidrix. The withdrawal was based on a lack of substantial evidence of effectiveness for its use as an antihypertensive agent.

On the basis of all of the data and information available to him, the Director of the Bureau of Drugs is unaware of any adequate and well-controlled clinical investigation, conducted by experts qualified by scientific training and experience, meeting the requirements of section 505 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355) and 21 CFR 314.111(a)(5) and 21 CFR 300.50, demonstrating the effectiveness of the drug.

Therefore, notice is given to the holder(s) of the new drug application(s) and to all other interested persons that the Director of the Bureau of Drugs proposes to issue an order under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)), withdrawing approval of the new drug application(s) (or if indicated above, those parts of the application(s) providing for the drug product(s) listed above) and all amendments and supplements thereto on the ground that new information before him with respect to the drug product(s), evaluated together with the evidence available to him at the time of approval of the application(s), shows there is a lack of substantial evidence that the drug product(s) will have the effect it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in the labeling.

In addition to the holder(s) of the new drug application(s) specifically named above, this notice of opportunity for

hearing applies to all persons who manufacture or distribute a drug product which is identical, related, or similar to a drug product named above, as defined in 21 CFR 310.6. It is the responsibility of every drug manufacturer or distributor to review this notice of opportunity for hearing to determine whether it covers any drug product he manufactures or distributes. Any person may request an opinion of the applicability of this notice to a specific drug product he manufactures or distributes that may be identical, related, or similar to a drug product named in this notice by writing to the Food and Drug Administration, Bureau of Drugs, Division of Drug Labeling Compliance (address given above).

In addition to the ground(s) for the proposed withdrawal of approval stated above, this notice of opportunity for hearing encompasses all issues relating to the legal status of the drug products subject to it (including identical, related, or similar drug products as defined in 21 CFR 310.6) e.g., any contention that any such product is not a new drug because it is generally recognized as safe and effective within the meaning of section 201(p) of the act or because it is exempt from part or all of the new drug provisions of the act pursuant to the exemption for products marketed prior to June 25, 1938, contained in section 201(p) of the act, or pursuant to section 107(c) of the Drug Amendments of 1962; or for any other reason.

In accordance with the provisions of section 505 of the act (21 U.S.C. 355) and the regulations promulgated thereunder (21 CFR Parts 310, 314), the applicant(s) and all other persons subject to this notice pursuant to 21 CFR 310.6 are hereby given an opportunity for a hearing to show why approval of the new drug application(s) should not be withdrawn and an opportunity to raise, for administrative determination, all issues relating to the legal status of a drug product named above and of all identical, related, or similar drug products.

If an applicant or any other person subject to this notice pursuant to 21 CFR 310.6 elects to avail himself of the opportunity for a hearing, he shall file (1) on or before October 3, 1977, a written notice of appearance and request for hearing, and (2) on or before November 1, 1977, the data, information, and analyses on which he relies to justify a hearing, as specified in 21 CFR 314.200. Any other interested person may also submit comments on this notice. The procedures and requirements governing this notice of opportunity for hearing, a notice of appearance and request for hearing, a submission of data, information, and analyses to justify a hearing, other comments, and a grant or denial of hearing, are contained in 21 CFR 314.200.

The failure of an applicant or any other person subject to this notice pursuant to 21 CFR 310.6 to file timely written appearance and request for hearing as required by 21 CFR 314.200 constitutes an election by such person not to avail himself of the opportunity for a hearing concerning the action proposed with respect to such drug product and a waiver of any contentions concerning the legal status of any such drug product. Any such drug product may not thereafter lawfully be marketed, and the Food and Drug Administration will initiate appropriate regulatory action to remove such drug products from the market. Any new drug product marketed without an approved DNA is subject to regulatory action at any time.

A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that there is genuine and substantial issue of fact that requires a hearing. If it conclusively appears from the face of the data, information, and factual analyses in the request for the hearing that there is no genuine and substantial issue of fact which precludes the withdrawal of approval of the application, or when a request for hearing is not made in the required format or with the required analyses, the Commissioner will enter summary judgment against the person(s) who requests the hearing, making findings and conclusions, denying a hearing.

All submissions pursuant to this notice shall be filed in quintuplicate. Such submissions except for data and information prohibited from public disclosure pursuant to 21 U.S.C. 331(j) or 18 U.S.C. 1905, may be seen in the office of the Hearing Clerk between the hours of 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052–1053, as amended (21 U.S.C. 355)), and under authority delegated to the Director of the Bureau of Drugs (21 CFR 5.82).

Dated: August 25, 1977.

RICHARD A. TERSELIC,
Acting Director,
Bureau of Drugs.

[FR Doc.77-25408 Filed 9-1-77;8:45 am]

[Docket No. 76N-0402]

DRUGS FOR HUMAN USE

Drug Efficacy Study Implementation; Revocation of Exemption

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The temporary exemption for certain antihistamine drug products, which permitted them to remain on the market beyond the time limit scheduled for implementation of the drug efficiency study, is revoked.

EFFECTIVE DATE: September 2, 1977.

FOR FURTHER INFORMATION CONTACT:

Ronald L. Wilson, Bureau of Drugs (HFD-32), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857 (301-43-3650).

SUPPLEMENTARY INFORMATION: In a notice appearing elsewhere in this issue of the FEDERAL REGISTER, the Food and Drug Administration is reclassifying the possibly effective indications for the antihistamine drugs described below (DESI 7937); the drugs are now deemed as lacking substantial evidence of effectiveness. These products have been allowed to remain on the market labeled for their possibly effective indications because of their close relationship to drugs sold over-the-counter (OTC) and thus subject to review in the ongoing OTC study (21 CFR Part 330). The temporary exemption was announced in notices published in the FEDERAL REGISTER of December 14, 1973 (38 FR 34481) and February 6, 1974 (39 FR 4679) (corrected by a notice published in the FEDERAL REGISTER of March 27, 1974 (39 FR 11323)). A proposed monograph for OTC cold, cough, allergy, bronchodilator, and antiasthmatic drugs was published in the FEDERAL REGISTER of September 9, 1976 (41 FR 38312). Because the recommendations of the proposed monograph are not inconsistent with the evaluations of the drugs described below, which were announced in the February 6, 1974, notice, and as no person has submitted additional data, or expressed an intent to perform additional studies for the exempted possibility effective indications of that notice, the temporary exemption granted by the December 14, 1973, and February 6, 1974, notices, as it pertains to these drugs, is hereby revoked. These drugs include the following:

1. NDA 8-305; Pyronil Tablets, containing pyrrobutamine phosphate; Eli Lilly & Co., Box 618, Indianapolis, Ind. 46206.

2. NDA 10-897; Theruhistin Tablets, containing isothipendyl hydrochloride; Ayerst Laboratories, Division of American Home Products Corp., 685 Third Ave., New York, N.Y. 10017.

3. NDA 11-078; Theruhistin Syrup, containing isothipendyl hydrochloride; Ayerst Laboratories.

4. NDA 7-937; Neohetramine Hydrochloride Tablets, containing thonzylamine hydrochloride; Warner-Chilcott Laboratories, Division Warner-Lambert Co., 201 Tabor Rd., Morris Plains, N.J. 07950.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 502, 505, 52 Stat. 1050–1053, as amended (21 U.S.C. 352, 355)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1).

Dated: August 26, 1977.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner
for Compliance.

[FR Doc.77-25649 Filed 9-1-77;8:45 am]

[Docket No. 77N-0089]

DRUGS FOR HUMAN USE

Drug Efficacy Study Implementation; Revocation of Exemption

AGENCY: Food and Drug Administration.

V 42 171 SEP 2 77 UMI

ACTION: Notice.

SUMMARY: The temporary exemption for certain antihistamine drug products, which permitted them to remain on the market beyond the time limit scheduled for implementation of the drug efficacy study, is revoked.

EFFECTIVE DATE: September 2, 1977.

FOR FURTHER INFORMATION CONTACT:

Ronald L. Wilson, Bureau of Drugs (HFD–32), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857 (301–443–3650).

SUPPLEMENTARY INFORMATION:

In a notice appearing elsewhere in this issue of the FEDERAL REGISTER, the Food and Drug Administration is reclassifying the probably and possibly effective indications for the antihistamine drugs described below (DESI 6290); the drugs are now deemed as lacking substantial evidence of effectiveness. A temporary exemption, in a notice published in the FEDERAL REGISTER of December 14, 1973 (38 FR 33481), we granted for these drug products, allowing them to remain on the market as labeled for their probably and possibly effective indications because of their close relationship to drugs sold over-the-counter (OTC) and thus subject to review in the ongoing OTC study (OTC procedures are described in 21 CFR Part 330). A proposed monograph for OTC cold, cough, allergy bronchodilator, and antiasthmatic drugs was published in the FEDERAL REGISTER of September 9, 1976 (41 FR 38312). Because the recommendations of the proposed monograph are not inconsistent with the evaluations of the drugs described below, which were announced in a notice published in the FEDERAL REGISTER of June 18, 1971 (36 FR 11758), and as no person has submitted additional data, or expressed an intent to perform additional studies for the exempted probably and possibly effective indications of that notice, the temporary exemption granted by the December 14, 1973, notice, as it pertains to these drugs, is hereby revoked. These drugs include the following:

(1) Preparations containing bromodiphenhydramine hydrochloride:
(a) Ambodryl Kapseals (NDA 7–984);
(b) Ambodryl Elixir (NDA 8–476); and
(c) Ambodryl Syrup (NDA 8–745); Parke, Davis & Co., Joseph Campau at the River, Detroit, Mich. 48232.

(2) Preparations containing chlorpheniramine maleate: Chlor-Trimeton Tablets and Syrup (NDA 6–921); Schering Corp., Galloping Hill Rd., Kenilworth, N.J. 07033.

(3) Preparation containing diphenylpyraline hydrochloride: Diafen Tablets (NDA 9–970); Riker Laboratories, Inc., Subsidiary of 3M Co., 19901 Nordhoff St., Northridge, Calif. 91324.

(4) Preparations containing promethazine hydrochloride:
(a) Phenergan Tablets (NDA 7–935);
(b) Phenergan Syrup (NDA 8–381); and
(c) Phenergan Rectal Suppositories (NDA 10–926 and NDA 11–689); Wyeth Laboratories, Division, American Home Products Corp., P.O. Box 8299, Philadelphia, Pa. 19101.

(5) Preparation containing pheniramine maleate: Trimeton Tablets (NDA 6–461); Schering Corp.

(6) Preparation containing pyrilamine maleate: Diaminide Maleate Tablets (NDA 7–119); Merck Sharp & Dohme, Division Merck & Co., Inc., West Point, Pa. 19486. (Although the June 18, 1971 notice listed Neo-Antergan Maleate as the name of the product marketed under NDA 7–119, the correct name is Diaminide Maleate.)

(7) Preparations containing tripelennamine hydrochloride or tripelennamine citrate:
(a) Pyribenzamine Tablets (NDA 5–914); and
(b) Pyribenzamine Elixir (NDA 5–914); Ciba Pharmaceutical Co., Division of Ciba-Geigy Corp., 556 Morris Ave., Summit, N.J. 07901.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 502, 505, 52 Stat. 1050–1053, as amended (21 U.S.C. 352, 355)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1).

Dated: August 26, 1977.

[Docket No. 76N–0305]

GRAS SAFETY REVIEW OF BUTYLATED HYDROXYANISOLE

Public Hearing

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration is announcing that a public hearing will be held for butylated hydroxyanisole so that data, information, and views can be presented orally to determine if that category of food ingredients is generally recognized as safe (GRAS) or subject to a prior sanction.

DATES: Hearing, September 26, 1977.

ADDRESS: The hearing will be held in the Holiday Inn, 8120 Wisconsin Ave., Bethesda, MD 20014.

FOR FURTHER INFORMATION CONTACT:

Corbin I. Miles, Bureau of Foods (HFF–335), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, D.C. 20204, (202–472–4750). George W. Irving, Jr., Life Sciences Research Office, Federation of American Societies for Experimental Biology, 9650 Rockville Pike, Bethesda, MD 20014, (301–530–7033).

SUPPLEMENTARY INFORMATION: In the FEDERAL REGISTER of June 7, 1977 (42 FR 29105), the Commissioner of Food and Drugs issued a notice advising the public that an opportunity would be provided for the oral presentation of data, information, and views at public hearings to be conducted by the Select Committee on GRAS Substances of the Life Sciences Research Office, Federation of American Societies for Experimental Biology (hereinafter referred to as the Select Committee), concerning the safety of the following four categories of food ingredients—butylated hydroxyanisole, hypophosphites, rennet, and vegetable oils—and the Select Committee's tentative determination of whether or not they are GRAS or subject to a prior sanction. No requests were received for a hearing on hypophosphites, rennet, or vegetable oils. Accordingly, no hearing will be held on these food ingredients.

The Select Committee received requests from the Food Research Institute, University of Wisconsin, Madison, Wis. 53706, and Eastman Chemical Products, Inc., Kingsport, Tenn. 37662, asking for an opportunity to appear at a public hearing on butylated hydroxyanisole to make an oral presentation.

The request for a hearing on butylated hydroxyanisole from Northwest Food Processors Association, Cascade Plaza, Protland, OR 97223, was later withdrawn. No other requests for a hearing on butylated hydroxyanisole were received.

In accordance with the procedures set forth in the June 7, 1977, FEDERAL REGISTER notice, announcemtnt is hereby made that a hearing on butylated hydroxyanisole will be held 2 p.m., September 26, 1977, in the Holiday Inn, 8120 Wisconsin Ave., Bethesda, MD 20014. Those who have requested an opportunity to make oral presentations will be expected to complete their presentations within the periods indicated and in accordance with the following schedule: September 26, 1977, 2 p.m. to 3:45 p.m. J. R. Allen, et al., Food Research Institute, University of Wisconsin—20 minutes; B. D. Astill, Eastman Kodak Company, Kingsport, TN—45 minutes.

Dated: August 25, 1977.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Compliance.

[Docket No. 77N–0196]

REVIEW PANEL ON NEW DRUG REGULATION FINAL REPORT

Hearing

[Docket No. 77N–0196]

AGENCY: Food and Drug Administration.

ACTION: Notice of public hearing.

SUMMARY: The Commissioner of Food and Drugs announces that a public hearing will be held on September 29, 1977, to receive information and views from interested persons on recommendations contained in the Final Report of the Review Panel on New Drug Regulation.

DATES: Public hearing on September 29, 1977, at 9 a.m.; written notice of participation must be filed by September 16, 1977.

ADDRESSES: Written notice of participation to the Hearing Clerk (HFC–20), Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, Md. 20857. Copies of the Final Report and copies of the Interim Reports of the Panel referred to in the Final Report may be obtained by writing to the Public Health Service Forms and Publications Distribution Center, 12100 Parklawn Drive, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

Bruce Brown, Office of the Executive Secretariat (HF–1), Food and Drug Administration, 5600 Fishers Lane, Rockville, Md. 20857 (301–443–3380).

SUPPLEMENTARY INFORMATION: In 1975 the Secretary of Health, Education, and Welfare appointed a Review Panel on New Drug Regulation to review current policies and procedures of the Food and Drug Administration (FDA) relating to the approval and disapproval of drugs for marketing in the United States; to evaluate the implementation of these policies and procedures by FDA; to ascertain the nature, extent, and adequacy of public, industry, and professional participation in this review process; and, insofar as the Panel identified any deficiencies, to recommend improvements in the policies and procedures, including changes that might be effectuated through administrative action and those that might require additional legislative authority.

Between November 1976 and May 1977, the Panel submitted to the Secretary 17 interim reports and staff papers on particular aspects of FDA regulation. On May 31, 1977, the Panel submitted its Final Report summarizing the findings and recommendations of its 27-month inquiry. The Panel's principal conclusions were:

1. The system of new drug regulation that requires governmental premarket clearance of prescription drugs, based on evidence of safety and effectiveness, is fundamentally sound.

2. FDA is neither pro- nor anti-industry in its review and approval of new drugs.

3. Implementation of the system of new drug regulation by FDA needs substantial improvement. The Panel proposed a wide range of legislative, administrative, and procedural reforms to achieve this objective.

Copies of the Final Report, together with the interim and staff reports, are on display in the office of the Hearing Clerk (HFC–20), Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, Md. 20857. Additional copies of these reports have been printed and may be obtained from the Public Health Service Forms and Publications Distribution Center, 12100 Parklawn Drive, Rockville, Md. 20857.

On June 2, 1977, the Secretary asked the Commissioner of Food and Drugs to undertake a thorough and careful review of all recommendations offered by the Panel and to identify the actions that the Commissioner will take to implement those recommendations of the Panel with which he agrees. The Secretary further directed that this "review of the Panel's report and recommendations should be informed by full consultation with public interest groups, consumer organizations, the affected industries and other interested persons." As one aspect of this consultation, the Commissioner published a notice in the FEDERAL REGISTER of June 14, 1977 (42 FR 30432) inviting interested persons to submit comments on the Panel's report and specific recommendations, for use by the Commissioner in reaching final decisions on these matters. Comments were requested to be filed on or before August 15, 1977, and may be seen in the office of the Hearing Clerk (HFC–20), Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, Md. 20857, between 9 a.m. and 4 p.m., Monday through Friday.

In light of the comments received and because of the public interest in and importance of the Panel's proposals, the Commissioner believes that further opportunity should be provided for interested persons to present information and views on the Panel's report and recommendations, as well as on the comments submitted to FDA regarding them. Accordingly, a public hearing will be held on September 29, 1977, pursuant to 21 CFR Part 15, to receive further comments. The purpose of the hearing is to provide an open forum for the presentation of views concerning the validity and/or merit of specific findings and recommendations and their applicability or practicability, as well as to foster greater consideration of the Panel's proposals among the regulated industry and the general public. Although the hearing will encompass all aspects of the Panel's report, there are several specific areas of consideration on which the Commissioner particularly seeks advice. These are:

1. Relations and communications with regulated industries.
2. Trade secrets and freedom of information policies.
3. Improvement in new drug review procedures.
4. Expansion of postmarketing authorities.
5. Prescribing for unapproved use of drugs.

The hearing will take place at 9 a.m.

The hearing will take place at 9 a.m., in Conference Rm. E, Parklawn Bldg., 5600 Fishers Lane, Rockville, Md. 20857. The presiding officer will be Dr. Donald Kennedy, Commissioner of Food and Drugs.

A written notice of participation must be filed pursuant to 21 CFR 12.45 with the Hearing Clerk (HFC–20), Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20857 not later than September 16, 1977. The envelope containing the notice of participation should be prominently marked "Review Panel Hearing." The notice of participation itself must contain the Hearing Clerk Docket No. 77N–0196, the name, address, and telephone number of the person desiring to make a statement along with any business affiliation, a summary of the scope of the presentation, and the approximate amount of time being requested for the presentation. A schedule for the hearing will be mailed to each person who files a notice of participation; the schedule will also be available from the FDA Hearing Clerk. Individuals and organizations with common interests are urged to consolidate or coordinate their presentations.

In the event that the responses to this notice of hearing are so numerous that insufficient time is available to accommodate the full amount of time requested in the notices of participation received, FDA will allocate the available time among persons making the oral presentations to be used as they wish. Formal written statements (preferably in quadruplicate) may be presented to the presiding officer on September 29, 1977, for inclusion in the administrative record.

The hearing will be open to the public. Any interested person who files a written

V 42 I 171 SEP 2 77 UMI

notice of participation may be heard with respect to matters relevant to the issues under consideration.

Dated: August 27, 1977.

DONALD KENNEDY,
Commissioner of Food and Drugs.

[FR Doc.77-25682 Filed 9-1-77;8:45 am]

[Docket No. 77N-0221]

SAFETY OF CERTAIN FOOD INGREDIENTS

Opportunity for Public Hearing

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This document announces an opportunity for public hearing on the safety of certain acrylates, citrates and citric acid, corn silk, and sodium oleate and sodium palmitate to determine if they are generally recognized as safe (GRAS) or subject to a prior sanction. This action accords with procedures of a comprehensive safety review that the agency is conducting. Interested persons are given an opportunity to give their views on the safety of these substances.

DATES: Requests to make oral presentations at the public hearing must be postmarked on or before October 3, 1977.

ADDRESSES: Written requests to the Select Committee on GRAS Substances, Life Sciences Research Office, Federation of American Societies for Experimental Biology, 9650 Rockville Pike, Bethesda, MD 20014, and to the Hearing Clerk (HFC-20), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT:

Corbin I. Miles, Bureau of Foods (HFF-335), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, D.C. 20204 (202-472-4750).

SUPPLEMENTARY INFORMATION: The Commissioner of Food and Drugs issued, in the FEDERAL REGISTER of July 26, 1973 (38 FR 20053), a notice advising the public that an opportunity would be provided for oral presentation of data, information, and views at public hearings to be conducted by the Select Committee on GRAS Substances of the Life Sciences Research Office, Federation of American Societies for Experimental Biology (hereafter, the Select Committee), about the safety of ingredients used in food to determine if they are GRAS or subject to a prior sanction.

The Commissioner now gives notice that the Select Committee is prepared to conduct a public hearing on the following categories of food ingredients:

Acrylates used in paper and paperboard food-packaging materials (monomeric ethyl acrylate, monomeric methyl acrylate, polymeric ethyl acrylate, polymeric methyl acrylate); citrates and citric acid (citric acid, sodium citrate, potassium citrate, calcium citrate, isopropyl citrate, stearyl citrate, triethyl citrate); corn silk; and sodium oleate and sodium palmitate used in paper and paperboard food-packaging materials will provide an opportunity before the Select Committee reaches its final conclusions, for any interested person(s) to present scientific data, information, and views on the safety of these substances, in addition to those previously submitted in writing pursuant to notices published in the FEDERAL REGISTER of July 26, 1973 (38 FR 20051, 20053) and April 17, 1974 (39 FR 13798).

The Select Committee has reviewed all the available data and information on the categories of food ingredients listed above and has reached one of the five following tentative conclusions on the status of each:

1. There is no evidence in the available information that demonstrates or suggests reasonable grounds to suspect a hazard to the public when it is used at levels that are now current or that might reasonably be expected in the future.

2. There is no evidence in the available information that demonstrates or suggests reasonable grounds to suspect a hazard to the public when it is used at levels that are now current and in the manner now practiced. However, it is not possible to determine, without additional data, whether a significant increase in consumption would constitute a dietary hazard. (This finding does not apply to the substances covered by this notice.)

3. Although no evidence in the available information demonstrates a hazard to the public when it is used at levels that are now current and in the manner now practiced, uncertainties exist requiring that additional studies be conducted. (This finding does not apply to the substances covered by this notice.)

4. The evidence is insufficient to determine that the adverse effects reported are not deleterious to the public health when it is used at levels that are now current and in the manner now practiced. (This finding does not apply to the substances covered by this notice.)

5. The information available is not sufficient to make a tentative conclusion.

The following table lists each ingredient, the Select Committee's tentative conclusion (keyed to the five types of conclusions listed above), and the available information on which the Select Committee reached its conclusions:

Substance	Select committee tentative conclusion	Scientific literature review Order number	Animal study report Order number	Other information
Monomeric and polymeric ethyl acrylate and methyl acrylate used in paper and paperboard food packaging:	----------	PB-234-897/AS	----------	a. Letter dated Dec. 17, 1976, from G. A. Richter, Rohm and Haas Co. Philadelphia, Pa.
Monomeric ethyl acrylate.	1		----------	b. Letter dated Mar. 8, 1977, and attachments from Linda Taylor, FDA.
Monomeric methyl acrylate.	1			
Polymeric ethyl acrylate.	1		----------	c. Report dated Mar. 3, 1950, by Munch Research Labs., Inc., Upper Darby, Pa.
Polymeric methyl acrylate.				
Citrate and citric acid:	----------	PB-223-550/AS PB-241-967/AS	Teratologic evaluation of citric acid (71-54) by Food and Drug Research Labs. Inc., under FDA contract (PB-223-814/AS).	d. Letter dated July 31, 1953, from LaWall and Harrison, Philadelphia, Pa. a. Human intake data taken from "A Comprehensive Survey of Industry on the Use of Food Chemicals. Generally Recognized as Safe (GRAS)," available from the National Technical Information Service, PB Nos. 221-921 through 221-949.
Citric acid				
Sodium citrate	1			
Potassium citrate.	1			
Calcium citrate.	1			
Isopropyl citrate.	1			
Stearyl citrate	1			
Triethyl citrate.	1		Mutagenic evaluation (host-mediated assay, cytogenetics, dominant lethal assay) of citric acid (71-54) by Litton Bionetics, Inc., under FDA contract (PB-245-463/AS).	b. Investigation of the toxic and teratogenic effects of GRAS substances to the developing chicken embryo; citric acid. Submitted by Mississippi State University.

Substance	Select committee tentative conclusion	Scientific literature review Order number	Animal study report Order number	Other information
			Mutagenic evaluation (tier 1) of potassium citrate (75-4) by Litton Bionetics, Inc., under FDA contract (PB-245-518/AS). Mutagenic evaluation (tier 1) of triethyl citrate (75-10) by Litton Bionetics, Inc., under FDA contract (PB-257-866/AS). Mutagenic evaluation (tier 1) of sodium citrate (75-12) by Litton Bionetics, Inc., under FDA contract (PB-254-510/AS).	c. Investigations of the toxic and teratogenic effects of GRAS substances to the developing chicken embryo; potassium citrate. FDA in-house report. d. Investigations of the toxic and teratogenic effects of GRAS substances to the developing chicken embryo; sodium citrate. FDA in-house report. e. Investigation of the toxic and teratogenic effects of GRAS substances to the developing chicken embryo; triethyl citrate. FDA in-house report. f. Chronic oral toxicity studies of triethyl citrate in dogs. Submitted by Fleischmann Laboratories. g. Triethyl citrate lifetime study on rats. Submitted by Fleischmann Laboratories.
Corn silk	5	PB-234-900/AS	----------	a. Human intake data taken from "A Comprehensive Survey of Industry on the Use of Food Chemicals Generally Recognized as Safe (GRAS)," available from the National Technical Information Service, PB Nos. 221-921 through 221-949.
Sodium oleate and sodium palmitate used in paper and paperboard food packaging:		PB-241-968/AS	----------	a. Human intake data taken from "A Comprehensive Survey of Industry on the Use of Food Chemicals Generally Recognized as Safe (GRAS)," available from the National Technical Information Service, PB Nos. 221-921 through 221-949.
Sodium oleate	1			b. Evaluation of the health aspects of aluminum compounds as food ingredients (SCOGS-43), submitted by FASEB.
Sodium palmitate.	1			c. Evaluation of the health aspects of hydrogenated fish oil as a food ingredient (SCOGS-66), submitted by FASEB. d. Evaluation of the health aspects of tall oil as it may migrate to foods from packaging materials (SCOGS-68), submitted by FASEB. e. Evaluation of the health aspects of tallow, hydrogenated tallow, stearic acid and calcium stearate as food ingredients (SCOGS-54), submitted by FASEB.

Reports in the table with "PB" prefixes may be obtained from the National Technical Information Service, U.S. Department of Commerce, 5285 Port Royal Rd., Springfield, VA 22151.

In addition to the information contained in the documents listed in the table above, the Select Committee supplemented, where appropriate, their reviews with specific information from specialized sources as announced in a previous hearing opportunity notice published in the FEDERAL REGISTER of September 23, 1974 (39 FR 34218).

The Select Committee's tentative reports on (1) acrylates used in paper and paperboard food-packaging materials (monomeric ethyl acrylate, monomeric methyl acrylate, polymeric ethyl acrylate, polymeric methyl acrylate), (2) citrates and citric acid (citric acid, sodium citrate, potassium citrate, calcium citrate, isopropyl citrate, stearyl citrate, triethyl citrate), (3) corn silk, and (4) sodium oleate and sodium palmitate used in paper and paperboard food-packaging materials are available for review in the office of the Hearing Clerk, Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, and also at the Public Information Office, Food and Drug Administration, Rm. 3807, 200 C St. SW., Washington, D.C. 20204. In addition, all reports and documents used by the Select Committee to review the ingredients are available for review in the office of the Hearing Clerk.

To schedule the public hearing, the Select Committee must be informed of the number of persons who wish to attend and the amount of time requested to give their views. Accordingly, any interested person who wishes to appear at the public hearing to make an oral presentation shall so inform the Select Committee in writing, addressed to: The Select Committee on GRAS Substances, Life Sciences Research Office, Federation of American Societies for Experimental Biology, 9650 Rockville Pike, Bethesda, MD 20014. A copy of each such request shall be sent to the Hearing Clerk, address noted above, and all requests shall be placed on public display in that office. Any such request must be postmarked on or before October 3, 1977, shall state the substance(s) on which an opportunity to present oral views is requested, and shall state how much time is requested for the presentation. As soon as possible thereafter, a notice announcing the date, time, place, and scheduled presentations for any public hearing that may be requested will be published in the FEDERAL REGISTER.

The purpose of the public hearing is to receive data, information, and views not previously available to the Select Committee about the substances listed above. Information already contained in the scientific literature reviews and in the tentative Select Committee report shall not be duplicated, although views on the interpretation of this material may be presented.

Depending on the number of requests for opportunity to make oral presentations, the Select Committee may reduce the time requested for any presentation. Owing to time limitations, individuals and organizations with common interests are urged to consolidate their presentations. Any interested person may, in lieu of an oral presentation, submit written views, which shall be considered by the Select Committee. Three copies of such written views shall be addressed to the Select Committee at the address noted above, and must be postmarked not later than 10 days before the scheduled date of the hearing. A copy of any written views shall be sent to the Hearing Clerk, Food and Drug Administration, and shall be placed on public display in that office.

A public hearing will be presided over by a member of the Select Committee. Hearings will be transcribed by a reporting service, and a transcript of each hearing may be purchased directly from the reporting service and will also be placed on public display in the office of the Hearing Clerk, Food and Drug Administration.

Dated: August 25, 1977.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Compliance.

[Docket No. 77N-0025]

SPECIFICATION, MANUFACTURING, AND USE INFORMATION ON CERTAIN GRAS OR PRIOR-SANCTIONED HUMAN FOOD INGREDIENTS

Amended Request for Data and Information

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This notice amends the request for submittal of data and information on (1) food-grade specifications, (2) manufacturing practices, and (3) extent of food use of certain generally recognized as safe (GRAS) or prior-sanc-

V 42 171 SEP 2 77 UMI

tioned human food ingredients, which appeared as a notice in the FEDERAL REGISTER of May 31, 1977 (42 FR 27676).

DATE: Available data and information may be submitted until October 1, 1977.

ADDRESS: Written submissions to the Food and Nutrition Board, GRAS/Food Additives Survey Office (JH 224), National Academy of Sciences, 2101 Constitution Ave. NW., Washington, D.C. 20418.

FOR FURTHER INFORMATION CONTACT:

Corbin I. Miles, Bureau of Foods (HFF–335), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, D.C. 20204 (202–472–4750).

SUPPLEMENTARY INFORMATION: In the FEDERAL REGISTER of May 31, 1977 (42 FR 27676), the Food and Drug Administration (FDA) requested submission of data and information on (1) food-grade specifications, (2) manufacturing procedures, and (3) use data for certain generally recognized as safe (GRAS) and prior-sanctioned food ingredients. The information was requested to provide sufficient data to complete FDA reviews of the affirmed GRAS status of these ingredients. The Commissioner had previously determined that without such data it may not be possible to affirm a substance as GRAS or to specify the conditions under which it may be safely used in food. The notice requested submission of data and information by August 1, 1977.

While recognizing FDA's need for this data and information, the National Academy of Sciences—National Research Council's (NAS/NRC) Committee on GRAS/Food Additive Surveys informed FDA in a letter, dated July 7, 1977, of its concern over a potential problem that may arise as part of this request. Because some of the substances included in the above-described notice are also included in the NAS current survey of industry food additives, colors, and certain flavors and GRAS ingredients (as announced in the FEDERAL REGISTER of June 17, 1977 (42 FR 30894)), the Committee expressed concern that the industry may be confused over two such requests for similar information on these ingredients. The Committee also suggested that it is unnecessary to request the food industry to submit this data and information to both NAS and FDA, and it said that inadequate data may be submitted because of the dual request. The Committee therefore suggested that the information requested in the FDA notice of May 31, 1977 be sent to the Food and Nutrition Board (address below) and that the deadline for submission of such data be extended to October 1, 1977 to coincide with completion of the current NAS survey.

The Commissioner has carefully considered the NAS request and agrees with it. Therefore, to minimize any potential for confusion and to facilitate complete and timely responses to both the FDA request of May 31, 1977 and the NAS survey, the Commissioner makes the following amendments to the May 31 notice:

1. Offerors of all data and information in response to the May 31 notice are requested to submit such data and information to the Food and Nutrition Board, GRAS/Food Additive Survey Office (JH 224), National Academy of Sciences, 2101 Constitution Ave. NW., Washington, D.C. 20418, attention Mr. Durward F. Dodgen 202–389–6537 or Kenneth R. Fulton 202–389–6330.

2. The deadline for submittal of data and information in response to the May 31 notice is extended to October 1, 1977, to coincide with the deadline date of the current NAS survey.

3. Data and information submitted in response to the May 31 notice should be submitted within the format requirements of the current NAS survey questionnaire. Questionnaires should be requested from the above-designated NAS-GRAS/Food Additive Survey Office personnel, as indicated in the FEDERAL REGISTER notice of June 17, 1977 (42 FR 30894).

The NAS Committee will receive and process responses to the FDA request and provide specification, manufacturing, and composites of use information to FDA. Individual responses on food use of the ingredients will be retained by NAS and will not be supplied to FDA.

Dated: August 26, 1977.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Compliance.

[FR Doc.77-25407 Filed 9-1-77;8:45 am]

[Docket No. 77N–0203; DESI 12342]

TRANYLCYPROMINE SULFATE

Drugs for Human Use; Drug Efficacy Study Implementation: Permission for Drug to Remain on the Market

AGENCY: Food and Drug Administration (FDA).

ACTION: Notice.

SUMMARY: This notice specifies the conditions under which tranylcypromine sulfate tablets may remain on the market pending completion and review of planned clinical studies to determine its effectiveness in treating certain types of depression.

DATES: Protocols due on or before October 3, 1977.

Studies must be in progress within 60 days after receipt of Bureau of Drugs approval or comments on protocols.

Studies must be completed within 1 year after starting.

ADDRESSES: All submissions pursuant to this notice should be identified with the words "Paragraph XIV Drugs—Category XX—Tranylcypromine Sulfate" placed in a box in the upper portion of the cover letter, and should be directed to the Division of Neuropharmacological Drug Products, Psychopharmacology Unit (HFD–120), Bureau of Drugs, Food and Drug Administration, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

Ronald Kartzinel, Bureau of Drugs (HFD–120), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857 (301–443–4020).

SUPPLEMENTARY INFORMATION: In a notice published in the FEDERAL REGISTER of December 14, 1972 (37 FR 26623), the Commissioner of Food and Drugs informed manufacturers of prescription drugs for human use of the future schedule for implementation of the Drug Efficacy Study. That notice listed certain drugs, together with the justification for their medical need, which may remain on the market pending completion of scientific studies to determine effectiveness, and provided for future additions to, or deletions from, that list. Tranylcypromine sulfate tablets is now being added to that list, as discussed below.

In a notice (DESI 12342) published in the FEDERAL REGISTER of September 1, 1970 (35 FR 13855), the Food and Drug Administration announced its conclusion that the drug product described below is less than effective (probably effective) for symptomatic relief in patients who have severe depression, are not candidates for electroconvulsive therapy, have failed to respond satisfactorily to other antidepressant therapy, and are hospitalized or under similar close supervision. Additional data were submitted by the manufacturer, but they were determined not to provide substantial evidence of effectiveness.

NDA 12–342; Parnate Tablets containing tranylcypromine sulfate; Smith Kline & French Laboratories, Division of SmithKline Corp., 1500 Spring Garden St., Philadelphia, Pa. 19101.

The position of FDA that Parnate is probably effective was identical with the conclusion of the Panel on Psychiatric Drugs of the National Academy of Sciences-National Research Council, Drug Efficacy Study Group. Although the Panel had commented that solid proof of efficacy is far from evident, in its General Comments, the Panel had stated as follows:

> Despite the side effects of this group of drugs, the Panel feels that monoamine oxidase inhibitors should be available to the practitioner to provide a greater range of treatment for selected depressed populations. Clinical experience suggests that monoamine oxidase inhibitors may be effective in a small and as yet poorly delineated group of depressed patients.

In 1971 it was the consensus of members of the FDA Neuropharmacology Advisory Committee that there are instances in which Parnate treatment results in a remission of a depressive illness which has failed to respond to other measures. It was the opinion of those consulted that Parnate should be available with restricted labeling.

In July 1973, Smith Kline & French submitted a supplemental application providing for revised labeling and requested a waiver of the requirement of clinical trials to prove effectiveness, on the basis of ethical considerations involved in such trials. The Food and Drug Administration granted the waiver, and on September 5, 1973, the supplemental application was approved. The indication approved was "Parnate is indicated for symptomatic relief of severe reactive or endogenous depression in hospitalized or closely supervised patients who have not responded to other antidepressant therapy."

Since the approval of September 5, 1973, the information available concerning Parnate and other monoamine oxidase inhibitors has been thoroughly reviewed by FDA with the assistance of the Psychopharmacological Agents Advisory Committee and its Subcommittee on Monoamine Oxidase Inhibitors. The purpose of this exhaustive review was to determine whether the data available provide substantial evidence of effectiveness. On April 21, 1975, Smith Kline & French submitted material concerning the safety and effectiveness of Parnate in treating depressed patients for consideration by the Subcommittee on Monoamine Oxidase Inhibitors. The data were thoroughly reviewed by a member of the Subcommittee and a member of the Bureau of Drugs Division of Neuropharmacological Drug Products. Their report was presented to the Subcommittee on May 15, 1975, and to the full Committee on June 26–27, 1975.

The Director of the Bureau of Drugs considered the findings of the Committee and concluded that, while there is some suggestive evidence of efficacy, the studies available did not meet the statutory criteria for substantial evidence of effectiveness.

The conclusions of the review were communicated to Smith Kline & French by letter of August 25, 1975. The letter pointed out that, in accordance with Paragraph XIV of the order entered on October 11, 1972, by Judge William B. Bryant of the U.S. District Court for the District of Columbia, and published in the FEDERAL REGISTER of December 14, 1972 (37 FR 26623), a limited number of drugs may remain on the market pending completion of scientific studies to determine effectiveness when there is compelling justification of the medical need for the drug. The letter invited Smith Kline & French to submit information to justify such a medical need, along with a commitment to carry out the necessary efficacy studies. The firm subsequently submitted satisfactory documentation of the medical need, but, in a meeting on December 10, 1975, with members of the Bureau of Drugs, expressed reluctance, because of ethical considerations, to conduct additional clinical studies, and urged that the requirement for additional studies be waived.

Since FDA granted the waiver of clinical studies and approved the supplemental application on September 5, 1973, as discussed above, it was demonstrated that adequate and well-controlled studies can be successfully conducted with a monoamine oxidase inhibitor without violating ethical precepts or patients' rights. Under the circumstances of a lack of substantial evidence of effectiveness and evidence that well-controlled studies could be conducted, the Director of the Bureau of Drugs concluded that approval of the new drug applicaion for Parnate should be withdrawn. Accordingly, a notice of opportunity for hearing on a proposal to withdraw approval of the new drug application was published in the FEDERAL REGISTER of October 5, 1976 (41 FR 43942).

On November 2, 1976, the firm requested a hearing, and on November 16, 1976, cited material previously submitted to the Bureau of Drugs, that indicated that the firm was making arrangements for the necessary clinical studies.

The Commissioner of Food and Drugs now concludes that, in view of sufficient justification of the medical need for the drug and assurance that the necessary clinical studies will be undertaken, the probably effective classification of tranylcypromine sulfate tables should be reinstated and the drug should be permitted to remain on the market pending completion and review of such studies. A notice appearing elsewhere in this issue of the FEDERAL REGISTER rescinds the October 5, 1976, notice.

Accordingly, a new section is hereby added to the list of drugs which may remain on the market (paragraph 3 of the notice of December 14, 1972, as amended) to read as follows:

XX. TRANYLCYPROMINE SULFATE

In a notice published in the FEDERAL REGISTER of September 1, 1970 (35 FR 13855), the Food and Drug Administration announced its conclusion that Parnate Tablets (tranylcypromine sulfate) (DNA 12–342) is less than effective (probably effective) for symptomatic relief in patients who have severe depression, are not candidates for electroconvulsive therapy, have failed to respond satisfactorily to other antidepressant therapy, and are hospitalized or under similar close supervision. Information subsequently submitted by Smith Kline & French Laboratories, holder of the NDA, provided suggestive evidence of efficacy, but did not meet the statutory criteria for substantial evidence of effectiveness. It has ben determined that adequate and well-controlled clinical studies can be successfully conducted with such drugs without violating ethical precepts or patients' rights. There is adequate justification of the medical need for tranylcypromine sulfate in patients who have not responded to other antidepressant therapy. Tranylcypromine is one of a small number of drugs which reputedly exert antidepressant action through inhibition of the enzyme monoamine oxidase. Whereas the majority of patients respond to the administration of tricyclic antidepressants which offer a greater ease of clinical administration and do not require the drug and dietary restrictions necessary to the safe use of monoamine oxidase inhibitors, some patients do not respond to tricyclic drugs and require a trial with other available drug classes or modalities of antidepressant therapy. Smith Kline & French has assured the agency that it intends to conduct the necessary studies. The Commissioner of Food and Drugs concludes, therefore that tranylcypromine sulfate tablets may remain on the market pending completion and review of studies to determine effectiveness. The specific conditions under which tranylcypromine sulfate tablets may remain on the market are as follows:

1. *Labeling.* The drug shall be labeled as probably effective for symptomatic relief of severe reactive or endogenous depression in hospitalized or closely supervised patients who have not responded to other antidepressant therapy.

2. *Studies.* On or before October 3, 1977, the manufacturer or distributor of any such product, if he has not already done so, shall submit protocols to the Division of Neuropharmacological Drug Products, Psychopharmacology Unit (HFD–120), Bureau of Drugs, for at least two adequate and well-controlled studies by independent investigators or for a multi-clinic study in which the data of at least three investigators can be evaluated independently, to determine whether or not the product is effective for the indication.

The Bureau of Drugs will review submitted protocols within a 30-day period and will provide to the manufacturer or distributor notice of approval or comments.

(b) Within 60 days after receipt of the Bureau's approval or comments on the protocol, studies shall be in progress and the manufacturer or distributor shall so notify the Division of Neuropharmacological Drug Products in writing.

(c) At 6–month intervals after studies have begun, the manufacturer or distributor shall submit a progress report stating the number of patients and investigators in the studies, the number of studies completed, and the number continuing.

(d) Within 12 months after starting the studies, the manufacturer or distributor shall submit data on the completed study to the Division of Neuropharmacological Drug Products.

3. It will be acceptable to the Food and Drug Administration for manufacturers of tranylcypromine sulfate tablets to conduct studies in cooperation with one another and to submit a joint protocol.

Failure of any manufacturer or distributor of tranylcypromine sulfate tablets, whether or not his drug is the sub-

V 42 171 SEP 2 77 UMI

ject of a new drug application, to comply with the requirements of this notice, or to show adequate progress, will result in regulatory action to remove the drug product from the market.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 505, 701, 52 Stat. 1052–1053, as amended, 1055–1056, as amended (21 U.S.C. 355, 371)), the Administrative Procedure Act (5 U.S.C. 553, 554), and under authority delegated to the Commissioner (21 CFR 5.1).

Dated: August 24, 1977.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Compliance.

[FR Doc.77-25278 Filed 9-1-77;8:45 am]

[Docket No. 76N-0156; DESI 12342]

TRANYLCYPROMINE SULFATE

Rescission of Opportunity for Hearing

AGENCY: Food and Drug Administration (FDA).

ACTION: Notice.

SUMMARY: This notice rescinds a notice of opportunity for hearing published October 5, 1976, that proposed to withdraw approval of the new drug application (NDA 12–342) for Parnate (tranylcypromine sulfate) Tablets, a drug used in the treatment of certain types of depression. The drug's classification is reinstated as probably effective and, in a notice appearing elsewhere in this issue of the FEDERAL REGISTER, the Commissioner of Food and Drugs announces the conditions under which tranylcypromine sulfate tablets may remain on the market pending completion and review of additional clinical studies concerning its effectiveness.

DATE: Effective September 2, 1977.

FOR FURTHER INFORMATION CONTACT:

Robert H. Hahn, Bureau of Drugs (HFD–32), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857 (301–443–3650).

SUPPLEMENTARY INFORMATION: In a notice published in the FEDERAL REGISTER of October 5, 1976 (41 FR 43942) the Director of the Bureau of Drugs offered an opportunity for hearing on his proposal to issue an order withdrawing approval of the following new drug application:

NDA 12–342; Parnate Tablets containing tranylcypromine sulfate; Smith Kline & French Laboratories, Division of SmithKline Corp., 1500 Spring Garden St., Philadelphia, Pa. 19101.

The basis of the proposed action was that there is lack of substantial evidence that the drug is effective for its claimed indications. In response to the notice, the firm cited submissions previously made to the Bureau of Drugs that indicated that it was making arrangements to conduct the necessary adequate and well-controlled clinical studies to determine the effectiveness of the drug. Having been assured that such studies are to be conducted, the Commissioner of Food and Drugs has concluded that Parnate should be added to the list of drugs temporarily exempt from further implementation of the Drug Efficacy Study pending completion and review of the required studies. A notice announcing that conclusion appears elsewhere in this issue of the FEDERAL REGISTER. The notice of opportunity for hearing of October 5, 1976, is hereby rescinded.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052–1053, as amended (21 U.S.C 355)), and under authority delegated to the Director of the Bureau of Drugs (21 CFR 5.82).

Dated: July 27, 1977.

J. RICHARD CROUT,
Director Bureau of Drugs.

[FR Doc.77-25277 Filed 9-1-77;8:45 am]

Health Resources Administration

DETERMINATION OF POPULATION OF HEALTH SERVICE AREAS

Section 1516 of the Public Health Service Act, as added by the National Health Planning and Resources Development Act of 1974 (Pub. L. 93–461), authorizes the Secretary of Health, Education, and Welfare to make grants (hereinafter referred to as "planning grants") to health systems agencies to assist them in meeting their costs. The amount of the planning grant to each health systems agency, as provided in the regulations governing this program (42 CFR Part 122, Subpart C), is determined in accordance with a formula set forth in the regulations, and is based in part upon a determination by the Secretary of the population of the health service area to be served by each agency. Section 122.205 of the governing regulations provides that the Secretary will determine the population of such areas based upon the latest available estimate from the Department of Commerce, and will publish annually in the FEDERAL REGISTER a list of all health service areas and their populations as so determined. The purpose of this Notice is to set forth the populations of the health service areas designated. In the future, the populations of the health service areas will be published prior to the final allocation of funds in each fiscal year. Pursuant to section 1536 of the Act, certain States (District of Columbia, Rhode Island and Hawaii) as well as the Virgin Islands, Guam, the Trust Territories of the Pacific Islands, and American Samoa do not have health service areas established within them or health systems agencies designated for them but are nonetheless eligible to receive planning grants, based in part upon their population. This Notice also sets forth the population of such areas.

The latest available Department of Commerce comparable estimates of the populations of the health service areas are the July 1, 1975, estimates which appear in the current Population Reports, series P–26. The issues from series P–26 publish the population of States by counties and by equivalent major incorporated jurisdictions, and were used to determine the population of the areas within all States except those listed below. The Department of Treasury, Office of Revenue Sharing, "Tribe List and Extract" was used to clarify the populations of health service areas in Arizona and the health service area that includes portions of Arizona, New Mexico, and Utah.

Series P–25 Population Reports lists the population of States and Territories by counties, incorporated places, and selected minor jurisdictions. Issues from this series were used to determine, by aggregation of data for local jurisdictions, the populations of Alaska, Connecticut, Illinois, and Massachusetts, as well as the population of the District of Columbia.

Estimates of July 1, 1973, Population Reports, series P–25 indicate the population of Puerto Rico, American Samoa, Guam, Virgin Islands, and the Trust Territories of the Pacific Islands. These are the latest available estimates from the Department of Commerce for the outlying territories.

Accordingly, the Secretary has made the following determination of populations of the health service and other areas as described above.

Dated August 24, 1977.

HAROLD MARGULIES,
Deputy Administrator, Health Resources Administration.

HEALTH PROFESSIONS AND NURSING STUDENT LOANS

"Low-Income Levels" for Loan Repayment

Under sections 741(*l*) and 836(*j*) of the Public Health Service Act, and the applicable program regulations, the Secretary of Health, Education, and Welfare may repay, upon application by an individual, all or part of the individual's educational loans made after November 17, 1971, for meeting the costs of training at a school of medicine, osteopathy, dentistry, veterinary medicine, optometry, pharmacy, podiatry, or nursing if the Secretary determines that the individual:

(1) Failed after November 17, 1971, to complete the health professions studies leading to the individual's first professional degree or to complete the specified nursing studies for which the loan(s) was made;

(2) Is in exceptionally needy circumstances;

(3) Is from a low-income or disadvantaged family; and

(4) Has not resumed or cannot reasonably be expected to resume the course of study within two years following the date on which the individual ended his studies.

Sections 57.217(c) and 57.317(c) of the applicable program regulations (42 CFR Part 57, Subparts C and D) require the Secretary to publish annually in the FEDERAL REGISTER the low-income levels which will be used in determining an applicant's eligibility for this repayment program.

This Notice updates the income levels that are used in determining what is a "low-income family" for purposes of repayment of educational loans by the Secretary under sections 741(*l*) and 836(j) of the Public Health Service Act. These income levels, together with other relevant factors such as value of assets, unusual expenses, income available to the individual, etc., are also considered in determining whether an applicant is "in exceptionally needy circumstances" or is from a "disadvantaged family."

The income figures below were taken from low-income levels, published by the U.S. Bureau of the Census, using an index adopted by a Federal Interagency

V 42 1171 SEP 2 77 UMI

Committee for use in a variety of Federal Programs, then multiplied by a factor of 1.3 for adaptation to the Health Professions and Nursing Student Loan Programs, and have been updated to reflect increases in the Consumer Price Index through December 31, 1976.

Size of parents' family (includes only dependents listed on Federal income tax form):	Income level [1]
1	$3,800
2	5,000
3	5,900
4	7,600
5	8,900
6 or more	10,000

[1] Rounded to $100—adjusted gross income for calendar year 1976.

Dated: August 19, 1977.

National Institutes of Health

DIVISION OF RESEARCH GRANTS

Workshop

Notice is hereby given of a Workshop on Mechanism of Localized Bone Resorption to be held by the Oral Biology and Medicine Study Section and the General Medicine B Study Section at the Shoreham Americana Hotel, Washington, D.C., November 14, 1977, from 8:00 a.m. to adjournment and November 15, 1977, from 8:30 a.m. to adjournment.

Further information may be obtained from Dr. Thomas M. Tarpley, Jr., Executive Secretary, Oral Biology and Medicine Study Section, Westwood Building, Room 325, telephone 301/496-7818, and Dr. William F. Davis, Jr., Executive Secretary, General Medicine B Study Section, Westwood Building, Room 322, Telephone 301/496-7730.

This workshop will be open to the public. Attendance by the public will be limited to space available.

Dated: August 25, 1977.

SUZANNE L. FREMEAU,
Committee Management Officer, NIH.

[FR Doc.77-25296 Filed 9-1-77;8:45 am]

NATIONAL DIABETES ADVISORY BOARD

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of a meeting of the National Diabetes Advisory Board on October 19, 1977, 8:30 a.m. to 5:00 p.m., in Room 529A, South Portal Building of Health, Education, and Welfare, 330 Independence Avenue SW., Washington, D.C.

In addition, the Executive Committee of the Board will have a meeting on October 18, 1977, 8:30 a.m. to 5:00 p.m. at the same location. The meetings, which will be open to the public both days from 8:30 a.m. to 5:00 p.m., are being held to continue review of the status and implementation of the long-range plan to combat diabetes formulated by the National Commission on Diabetes. Attendance by the public will be limited to space available.

Messrs. James N. Fordham or Leo E. Tracy, Office of Scientific and Technical Reports, NIAMDD, National Institutes of Health, Building 31, Room 9A04, Bethesda, Md. 20014 (301-496-3583), will provide summaries of the meeting.

OFFICE OF MANAGEMENT ANALYSIS AND SYSTEMS

Statement of Organization, Functions and Delegations of Authority

Correction

In FR Doc. 77-20084 appearing in the issue of Thursday, July 14, 1977, at page 36312, paragraph "B" should read as follows:

B. The Office of Management Analysis and Systems: (1) Recommends management policies; (2) implements approved policies and assesses their effectiveness; (3) establishes management control mechanisms and administers the management-by-objectives process; (4) analyzes organizational structures and management procedures and recommends improvements; (5) applies management science and systems analysis techniques and, (6) controls the development of information systems and implements the Department's policies on the collection, storage, and dissemination of information.

SAFETY AND OCCUPATIONAL HEALTH STUDY SECTION

Notice of Meeting

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (Public Law 92-463), the Center for Disease Control announces the following National Institute for Occupational Safety and Health Committee meeting:

Name: Safety and Occupational Health Study Section.
Date: October 20-21, 1977.
Place: Quality Inn, 2775 Van Ness Avenue, San Francisco, Calif.
Time: 9 a.m.
Type of Meeting: Open: 9 a.m. to 10:30 a.m. on October 20, 1977. Closed: Remainder of meeting.
Contact Person: C. Ilana Howarth, Acting Executive Secretary, 5600 Fishers Lane, Parklawn Bldg., Room 9-63, Rockville, Md. 20857, phone 301-443-4493.
Purpose: The Committee is charged with the initial review of research, training, demonstration, and fellowship grant applications for Federal assistance in program areas administered by the National Institute for Occupational Safety and Health, and with advising the Institute staff on training and research needs.

Agenda: Agenda items for the open portion of the meeting will include reading of minutes of previous meeting, and administrative and staff reports. Beginning at 10:30 a.m., October 20, 1977, through adjournment on October 21, 1977, the Study Section will be performing the initial review of research grant and training grant applications for Federal Assistance, and will not be open to the public, in accordance with the provisions set forth in Section 552b(c)(6), Title 5 U.S. Code, and the Determination of the Director, Center for Disease Control, pursuant to Public Law 92-463. Agenda items are subject to change as priorities dictate.

The portion of the meeting so indicated is open to the public for observation and participation. A roster of members and other relevant information regarding the meeting may be obtained from the contact person listed above.

Dated: August 25, 1977.

WILLIAM C. WATSON, JR.,
Director, Center for Disease Control.

Office of the Secretary

SUPPLEMENTARY MEDICAL INSURANCE FOR THE AGED AND DISABLED

Economic Index for Period July 1977 through June 1978

Notice is hereby given that the economic index applicable to prevailing charges for physicians' services under the program of Supplementary Medical Insurance for the Aged and Disabled (Part B of Title XVIII of the Social Security Act, commonly known as "Medicare Part B") is 1.357 for the period July 1, 1977 through June 30, 1978. This represents an increase of 6.35 percent over the index of 1.276 applicable for the prior 12 months, computed pursuant to section 1842(b)(3) of the Social Security Act (42 U.S.C. 1395u(b)(3)), as amended by section 224(a) of Pub. L. 92-603 (42 U.S.C. 1395u), sections 2 and 3 of Pub. L. 94-368 (42 U.S.C. 1395u), and as implemented by 20 CFR 405.504(a)(3).

The increase in the economic index over the base value of 1.000 is the maximum allowable increase in any prevailing charge for physicians' services in the period July 1977 through June 1978 over the corresponding prevailing charge for the same service in the same geographic area in fiscal year 1973. It is calculated by increasing the economic index for the period July 1976 through June 1977 (as adjusted for certain revisions in the Bureau of Labor Statistics indexes) by the weighted average of the increases in calendar year 1976 over calendar year 1975 in several indexes published by the Bureau of Labor Statistics, and by an index of the increase in physicians' malpractice insurance premiums based on a survey of the premiums charged in 47 States and in the District of Columbia by several major insurers. However, pursuant to sections 2 and 3 of Pub. L. 94-368, as implemented by regulations published in the FEDERAL REGISTER (42 FR 18274) on April 6, 1977, the application of the economic index may not result in a lowering of the allowable prevailing charges for physicians' services below the levels that were in effect for the fiscal year ending June 30, 1975.

A separate component to reflect the effect of malpractice insurance premium increases on physician practice expenses was previously included for the first time in the economic index calculated for the 12-month period beginning in July 1976. To accommodate the lack of prior (separate) data on malpractice insurance costs, the other components of the index have again been computed on an annual basis to reflect the changes in these components in 1976 over 1975 and in 1975 over 1974. The calendar year 1974 data used for these components in the calculation of the economic index, in turn, reflect the cumulative increases since calendar year 1971. Therefore (with appropriate adjustments for the malpractice insurance data) the economic index (1.357) for the 12-month period beginning in July 1977 reflects the cumulative change in the components of the index since calendar year 1971, as is intended by section 1842(b)(3) of the Social Security Act as amended by Pub. L. 94-368, and by § 405.504(a)(3)(i) of Regulations No. 5.

The calculation reflects information that became available from the Bureau of Labor Statistics after the economic index for the period July 1976 through June 1977 was announced in the FEDERAL REGISTER on September 8, 1976, and put into effect. The economic index for a particular period must necessarily be calculated on the basis of the best information that is available at the time the calculation is made and put into effect. Therefore, the new data have been used to calculate the economic index for the period July 1977 through June 1978 in order to provide the most accurate calculation that is possible at this time of the changes that have taken place in the components of the index since the base year (calendar year 1971).

Calendar year 1976 charge data will be used to determine reasonable charges for the period July 1, 1977 through June 30, 1978. The table below shows the derivation of the economic index.

FOR FURTHER INFORMATION CONTACT:

Paul Riesel, Bureau of Health Insurance, 301-594-9595, or David R. McKusick, Office of the Actuary, 301-594-2864, 6401 Security Boulevard, Baltimore, Md. 21235.

OFFICE OF MANAGEMENT AND BUDGET

CLEARANCE OF REPORTS

List of Requests

The following is a list of requests for clearance of reports intended for use in collecting information from the public received by the Office of Management and Budget on 8/26/77 (44 USC 3509). The purpose of publishing this list in the FEDERAL REGISTER is to inform the public.

The list includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number(s), if applicable; the frequency with which the information is proposed to be collected; the name of the reviewer or reviewing division within OMB, and an indication of who will be the respondents to the proposed collection.

Requests for extension which appear to raise no significant issues are to be approved after brief notice thru this release.

Further information about the items on this daily list may be obtained from the Clearance Office, Office of Management and Budget, Washington, D.C. 20503 (202-395-4529), or from the reviewer listed.

NEW FORMS

ENVIRONMENTAL PROTECTION AGENCY

Reporting Chemical Substances for Inventory, section 8 (a) and (b) Toxic Substance Control Act, single time, chemical manufacturers, processors and importers, Ellett, C. A., 395-5867.

DEPARTMENT OF COMMERCE

Bureau of Census: Survey of Federal General Revenue Sharing and Antirecession Fiscal Assistance Expenditures, RS-900 and 901, single time, local government officials, Ellett, C. A., 395-5867.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Health Services Administration: Patterns of Utilization of Contraceptive Services for Teenagers, single time, teenage title X clinic users and dropouts, Richard Eisinger, 395-6140.

Office of Education:

Financial Status and Performance Reports for Domestic Mining and Mineral Fuel Conservation Fellowships Program, OE-405-1, 405-2, annually, institutions of higher education, Lowry, R. L., 395-3772.

Endorsement of Defaulted Notes (National Direct Student Loan Program), OE 553, on occasion, institutions of postsecondary education, Kathy Wallman, 395-6140.

REVISIONS

VETERANS ADMINISTRATION

Application for Headstone or Marker, 40-1330, on occasion, relatives of deceased veterans, Caywood, D. P., 395-3443.

DEPARTMENT OF AGRICULTURE

Economic Research Service: Survey of Hired Farmworkers—December 1976 CPS, CPS-1, single time, 53,000 households in Dec. CPS National Sample, Strasser, A., 395-5867.

EXTENSIONS

U.S. CIVIL SERVICE COMMISSION

CSC Audit Function Questionnaire, PPW-1, annually, firms engaged in manufacturing wholesale trade and trans, Warren Topelius, 395-5872.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education: Certificate of Project Costs Capitalized, Interest, Higher Education Facilities Act, OE 1144, OE 1143, on occasion, institutions of higher education, Marsha Traynham, 395-4529.

PHILLIP D. LARSEN,
Budget and Management Officer.

DEPARTMENT OF LABOR

Employment and Training Administration

EMPLOYMENT TRANSFER AND BUSINESS COMPETITION DETERMINATIONS UNDER THE RURAL DEVELOPMENT ACT

Applications

The organizations listed in the attachment have applied to the Secretary of Agriculture for financial assistance in the form of grants, loans, or loan guarantees in order to establish or improve facilities at the locations listed for the purposes given in the attached list. The financial assistance would be authorized by the Consolidated Farm and Rural Development Act, as amended, 7 USC 1924(b), 1932, or 1942(b).

The Act requires the Secretary of Labor to determine whether such Federal assistance is calculated to or is likely to result in the transfer from one area to another of any employment or business activity provided by operations of the applicant. It is permissible to assist the establishment of a new branch, affiliate or subsidiary, only if this will not result in increased unemployment in the place of present operations and there is no reason to believe the new facility is being established with the intention of closing down an operating facility.

The Act also prohibits such assistance if the Secretary of Labor determines that it is calculated to or is likely to result in an increase in the production of goods, materials, or commodities, or the availability of services or facilities in the area, when there is not sufficient demand for such goods, materials, commodities, services, or facilities to employ the efficient capacity of existing competitive commercial or industrial enterprises, unless such financial or other assistance will not have an adverse effect upon existing competitive enterprises in the area.

The Secretary of Labor's review and certification procedures are set forth at 29 CFR Part 75. In determining whether the applications should be approved or denied, the Secretary will take into consideration the following factors:

1. The overall employment and unemployment situation in the local area in which the proposed facility will be located.

2. Employment trends in the same industry in the local area.

3. The potential effect of the new facility upon the local labor market, with particular emphasis upon its potential impact upon competitive enterprises in the same area.

4. The competitive effect upon other facilities in the same industry located in other areas (where such competition is a factor).

5. In the case of applications involving the establishment of branch plants or facilities, the potential effect of such new facilities on other existing plants or facilities operated by the applicant.

All persons wishing to bring to the attention of the Secretary of Labor any information pertinent to the determinations which must be made regarding these applications are invited to submit such information in writing within two weeks of publication of this notice to: Deputy Assistant Secretary for Employment and Training, 601 D St., NW., Washington, D.C. 20213.

Signed at Washington, D.C. this 29th day of August, 1977.

ERNEST G. GREEN,
Assistant Secretary for Employment and Training.

Applications Received During the Week Ending Aug. 26, 1977

Name of applicant	Location of enterprise	Principal product or activity
Lewisburg Chiropractic Clinic	Lewisburg, W. Va	Chiropractic, professional service.
Lyon Oil Co	Millwood, W. Va	Petroleum storage and refining facility.
Oleksa Enterprises, Inc	Morgantown, W. Va	Rental of real estate, fuel distributorship, and trucking operation.
Davis Casket Co., Inc	Americus, Ga	Manufacture and marketing steel caskets.
Isomedix, Inc	Spartanburg, S.C	Medical supply sterilization center.
John Lee McMinn	Water Valley, Miss	Retail building materials.
Sharrock Elevator, Inc	Edison, Ohio	Manufacture of feed and fertilizer.
Town Hall Estates	Clayton, N. Mex	Nursing care.

VERMONT

Ending of Extended Benefit Period and Federal Supplemental Benefit Period

This notice announces the ending of the Extended Benefit Period and the Federal Supplemental Benefit Period in the State of Vermont, effective on September 3, 1977.

BACKGROUND

The Federal-State Extended Unemployment Compensation Act of 1970 (title II of Pub. L. 91-373; 84 Stat. 695, 708) created a program of extended unemployment benefits (referred to as Extended Benefits) as a permanent part of the Federal-State Unemployment Compensation Program, for unemployed individuals who have exhausted their rights to regular unemployment benefits under State and Federal unemployment compensation laws. Extended Benefits are payable during an Extended Benefit Period, which is triggered on in a State when unemployment in the State or in all States collectively reaches the high levels set in the Act. During an Extended Benefit Period the maximum amount of Extended Benefits which is payable to eligible individuals is up to 13 weeks. An Extended Benefit Period commenced in the State of Vermont on April 7, 1974

The Emergency Unemployment Compensation Act of 1974 (Pub. L. 93-572), enacted December 31, 1974) created a temporary program of supplementary unemployment benefits (referred to as Federal Supplemental Benefits) for unemployed individuals who have exhausted their rights to regular benefits and Extended Benefits under State and Federal unemployment compensation laws. Federal Supplemental Benefits are payable during a Federal Supplemental Benefit Period in a State which has entered into an Agreement under the Act with the United States Secretary of Labor. A Federal Supplemental Benefit Period is triggered on in a State when unemployment in the State or in the State and the nation reaches the high levels set in the Act. During a Federal Supplemental Benefit Period the maximum amount of Federal Supplemental Benefits which is payable to eligible individuals is up to 13 weeks. A Federal Supplemental Benefit Period commenced in the State of Vermont on January 5, 1975.

The statutes also provide that benefit periods in a State will trigger off when unemployment in the State is no longer at the high levels set in the Acts. A benefit period actually terminates at the end of the third week after the week for which there is an "off" indicator. In Vermont both the Extended Benefit Period and the Federal Supplemental Benefit Period have triggered off.

DETERMINATION OF "OFF" INDICATORS

The employment security agency of the State of Vermont has determined in accordance with the applicable statutes and regulations that the average rate of insured unemployment in the State for the period consisting of the week ending on August 13, 1977, and the immediately preceding twelve weeks, was less than 5.0 percent.

Therefore, I have determined in accordance with the applicable statutes and regulations, and as authorized by the Secretary of Labor's Order 4-75, dated April 16, 1975 (published in the FEDERAL REGISTER on April 28, 1975, at 40 FR 18515), that there was an Extended Benefit "off" indicator and a Federal Supplemental Benefit "off" indicator in the State of Vermont for the week ending on August 13, 1977, and that both the Extended Benefit Period and the Federal Supplemental Benefit Period in that State terminates on September 3, 1977.

INFORMATION FOR CLAIMANTS

Any individual to whom Extended Benefits or Federal Supplemental Benefits were payable in the State (whether or not any payment actually was made), for any portion of the last week of the Federal Supplemental Benefit Period, will have an additional eligibility period beginning immediately following the end of the Federal Supplemental Benefit Period. During the additional eligibility period the individual will be entitled to Federal Supplemental Benefits to the same extent as if the Federal Supplemental Benefit Period continued to be in effect. The additional eligibility period will have a duration of 13 weeks, unless it is terminated sooner by reason of the beginning of a new Federal Supplemental Benefit Period in the State. There will not be an additional eligibility period for Extended Benefits.

Individuals currently filing claims for Extended Benefits or Federal Supplemental Benefits will receive written notices from the Vermont Department of Employment Security of the end of the Extended Benefit Period and the Federal Supplemental Benefit Period in that State and its effect on their entitlement to Extended Benefits and Federal Supplemental Benefits. The notice to any individual who will have an additional eligibility period following the Federal Supplemental Benefit Period will include information concerning potential entitlement to Federal Supplemental Benefits during the additional eligibility period.

Persons who wish information about their rights to Extended Benefits and Federal Supplemental Benefits in the State of Vermont should contact the nearest office of the Vermont Department of Employment Security in their locality.

Signed at Washington, D.C., on August 29, 1977.

ERNEST G. GREEN,
Assistant Secretary for Employment and Training.

Occupational Safety and Health Administration

[V-77-11]

DAYCO CORP.

Variance and Interim Order

AGENCY: Occupational Safety and Health Administration, Department of Labor.

ACTIONS: (1) Notice of application for variance and interim order; (2) Grant of interim order.

SUMMARY: This notice announces the application of the Dayco Corp. Springfield Plant for a variance and interim order pending a decision on the application for a variance from the standard prescribed in 29 CFR 1910.107(c)(6) concerning spray finishing using flammable and combustible materials. It also announces the granting of an interim order until a decision is rendered on the application for variance.

DATES: The effective date of the interim order is September 2, 1977. The last date for interested persons to submit comments is October 3, 1977. The last date for affected employers and employees to request a hearing on the application is October 3, 1977.

ADDRESSES: Send comments or requests for a hearing to: Office of Variance Determination, Occupational Safety and Health Administration, U.S. Department of Labor, 200 Constitution Avenue NW., Room N-3668, Washington, D.C. 20210.

FOR FURTHER INFORMATION CONTACT:

Mr. James J. Concannon, Director, Office of Variance Determination, at the above address, telephone: 202-523-7121.

or the following Regional and Area Offices:

U.S. Department of Labor, Occupational Safety and Health Administration, 911 Walnut Street—Room 3000, Kansas City, Mo. 64106.

U.S. Department of Labor, Occupational Safety and Health Administration, 1627 Main Street—Room 1100, Kansas City Mo. 64108.

SUPPLEMENTARY INFORMATION:

NOTICE OF APPLICATION

Notice is hereby given that the Dayco Corp., Springfield Plant, Battlefield Road and Scenic Drive, Springfield, Mo. 65804 has made application pursuant to section 6(d) of the Occupational Safety and Health Act of 1970 (84 Stat. 1596; 29 U.S.C. 655) and 29 CFR 1905.11 for a variance, and interim order pending a decision on the application for a variance, from the standards prescribed in 29 CFR 1910.107(c)(6) spray finishing using flammable and combustible material.

The address of the place of employment that will be affected by the application is as follows:

Dayco Corporation, Springfield Plant, Battle Road and Scenic Drive, Springfield, Mo. 65804.

The applicant certifies that employees who would be affected by the variance have been notified of the application by giving a copy of it to their authorized employee representative, and by posting a copy at all places where notices to employees are normally posted. Employees have also been informed of their right to petition the Assistant Secretary for a hearing.

Regarding the merits of the application, the applicant contends that it is providing a place of employment as safe as that required by § 1910.107(c)(6) which requires, in part, that electrical wiring, motors and other equipment outside of but within 20 feet of any spraying area, and not separated therefrom by partitions shall not produce sparks under normal conditions and shall otherwise conform to the provisions of Subpart S for Class 1, Division II Hazardous Locations.

The applicant asserts that cylindrical drums used to mainufacture power transmission belts are sprayed on the surface with a material containing flammable and combustible material in their spray booth. The spray booth has a powered exhauster maintaining 150 feet per minute air velocity on the face of the spray booth. The applicant contends that it has the necessary equipment installed to: (1) insure that the required air velocity is maintained, (2) sprinkle the space within the spray booth on the downstream and upstream sides of the filters, (3) interlock the spraying pump to the ventilation blower, and (4) have the electrical wiring and electrical equipment outside of the spraying area conform to the National Electrical Code NFPA 70-1975.

GRANT OF INTERIM ORDER

It appears from the application for a variance and interim order and from the application that as required by section 6(d) of the Act, the operation of the spray booth in the manner precribed will provide to the affected employees a place of employment as safe as that which would be provided if the applicant complied with 29 CFR 1919.107(c)(6). It further appears that an interim order is necessary to prevent undue hardship to the applicant and its employees pending a decision on the variance. Therefore it is ordered, pursuant to the authority in section 6(d) of the Occupational Safety and Health Act of 1970, in 29 CFR 1905.-11(c) and in Secretary of Labor's Order No. 8-76 (41 FR 25059), that Dayco Corp. be, and it is hereby, authorized to operate their spray booths in the manner described within the application provided that the follow provisions are met:

(1) The ventilation shall be such so that the concentration of solvent vapors or dust from spraying may not exceed five (5) percent of the Lower Flammable Limit (LFL), five feet from the face and any opening in the booth, and in any low lying places between five feet and 20 feet from the face and any openings in the booth.

(2) The spraying equipment shall be interlocked with the ventilation system so that the spraying equipment cannot be operated unless the ventilation is in operation.

(3) Monitoring shall be conducted by a competent person with a combustible gas meter for the solvent vapors or an air sampling device for the dust for an initial period of at least three months. Monitoring must be done during peak spraying and immediately after spraying once a week for the first month and thereafter once a month for the last two months.

(4) Procedures shall be written, using the spraying experience gained during the monitoring period, listing the conditions for spraying, such as amounts of minimum ventilation (natural or mechanical or both), maximum volume and type of spraying material applied per hour, and the number and type of spray apparatus. A summary of the monitoring results and spraying procedures shall be available for inspection. The procedures shall become part of the training for all employees that perform spraying in the spray booth.

(5) If concentrations exceed five percent of the LFL at five feet from the face or any openings in the spray booth, or in any low lying places between five feet and 20 feet from the face or any openings in the booth, all spraying shall cease immediately with the ventilation system remaining in operation at least until the concentration is down to five percent of

V 42 171
SEP 2 77
UMI

the LFL at five feet from the face or any openings in the booth or any low lying places between five feet and 20 feet from the faces or any openings in the booth. Spraying may not proceed until controls have been implemented to maintain the levels at five percent or less of the LFL at five feet from the face and any openings in the spray booth or in any low lying places between five feet and 20 feet from the face or any openings in the booth.

(6) When increased volume or new equipment is used that may require increased ventilation to maintain five percent of the LFL, monitoring shall be repeated and the procedures adjusted if necesary to include any changes.

Dayco Corp. shall give notice of this interim order to employees affected therby by the same means required to be used to inform them of the application for a variance.

This interim order shall remain in effect until a decision is rendered on the application for a variance.

Signed at Washington, D.C., this 26th day of August 1977.

EULA BINGHAM,
Assistant Secretary of Labor.

Correction

In FR Doc. 77-22926, appearing on page 40276 in the issue of Tuesday, August 9, 1977, the second through fifth full paragraphs in the third column of the page should be inserted between the second and third full paragraphs of the document as published.

Pension and Welfare Benefit Programs

ADVISORY COUNCIL ON EMPLOYEE WELFARE AND PENSION BENEFIT PLANS

Meeting

Pursuant to Section 512 of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1142) a meeting of the Advisory Council on Employee Welfare and Pension Benefit Plans will be held at 9:30 a.m. on Tuesday, September 20, 1977, in the Federal Ballroom North, Quality Inn—Capitol Hill, 415 New Jersey Avenue NW., Washington, D.C.

The meeting will be open to the public. The purpose of the meeting is to discuss the items listed in the following agenda:

1. Swearing-in of Jozetta H. Srb.
2. Status report of Advisory Council recommendations.
3. Department of Labor progress report since last Advisory Council meeting.
4. Impact of ERISA fiduciary standards on investment of pension assets.
5. Investment Work Group report.
6. Small Plans Impact Work Group report.
7. Establishment of Work Group on Communication of Benefit Information to Participants and Beneficiaries of Employee Benefit Plans.
8. Council suggestions for new study projects for work groups.

Any member of the public may file a written statement concerning the topics under this agenda by submitting 30 copies on or before the close of business Monday, September 19, 1977, to the Administrator of Pension and Welfare Benefit Programs, New Department of Labor Building, 200 Constitution Avenue NW., Room N4629, Washington, D.C. 20216.

Persons desiring to attend should notify Mr. Edward F. Lysczek, Executive Secretary oft he Advisory Council, New Department of Labor Building, 200 Constitution Avenue NW., Room N4629, Washington, D.C. 20216, or may call Area Code 202-523-8753.

Signed at Washington, D.C. this 29th day of August 1977.

IAN D. LANOFF,
Administrator of Pension and Welfare Benefit Programs.

[TA-W-1648]

ANNA-RUBINA, INC., PORT ISABEL, TEX.

Negative Determination Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1648: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on February 14, 1977 in response to a worker petition received on February 10, 1977 which was filed by the workers on behalf of workers engaged in shrimp fishing for Anna-Rubina, Inc., Port Isabel, Tex.

The notice of investigation was published in the FEDERAL REGISTER on March 8, 1977, (42 FR 13082). No public hearing was requested and none was held.

The information upon which the determination was made principally from officials of Anna-Rubina, Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether any of the other criteria have been met, criterion (4) has not been met.

The Department's investigation has revealed that the decline in the quantity of shrimp caught by Anna-Rubina in 1976 was due to several factors including adverse weather conditions occurring during the height of the shrimp season in November and December which kept the trawlers in port, the lack of shrimp available in the known fishing grounds, and because the 200 mile fishing restriction imposed by the Mexican government prevented domestic shrimpers from fishing off the Mexican coastal waters.

Ann-Rubina's only customer buys all the shrimp that Anna-Rubina, Inc. is able to supply. This customer purchases imported shrimp when Rubina and other domestic suppliers are unable to meet the customer's requirements.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that imports of articles like or directly competitive with shrimp produced by Anna-Rubina, Inc., Port Isabel, Texas have not contributed importantly to the total or partial separation of workers of that firm as required for certification under Section 222 of the Trade Act of 1974.

Signed at Washington, D.C. this 19th day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

Office of the Secretary

ANWELT CORP. ET. AL.

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted investigations pursuant to section 221(a) of the Act and 29 CFR 90.12.

The purpose of each of the investigations is to determine whether absolute or relative increases of imports of articles like or directly competitive with articles produced by the workers' firm or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision.

Petitioners meeting these eligibility requirements will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

Pursuant to 29 CFR 90.13, the petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than September 12, 1977.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than September 12, 1977.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, D.C. 20210.

Signed at Washington, D.C., this 15th day of August 1977.

HAROLD A. BRATT,
Acting Director, Office of Trade Adjustment Assistance.

[TA-W-2137]

ARKAY PANTS CO., FALL RIVER, MASSACHUSETTS

Negative Determination Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2137: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on June 13, 1977 in response to a worker petition received on June 10, 1977 which was filed by the Amalgamated Clothing and Textile Workers' Union on behalf of workers and former workers producing men's and boys' outerwear at the Fall River, Massachusetts plant of the Arkay Pants Company.

The notice of investigation was published in the FEDERAL REGISTER on June 24, 1977 (42 FR 32328). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the Arkay Pants Company, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether the other criteria have been met, the investigation revealed that criterion (2) has not been met.

The Arkay Pants Company, a manufacturer, consists of one plant in Fall River, Massachusetts engaged in the production of boys' winter coats.

Since Arkay produces only on order, production and sales are the same. Company production in terms of quantity increased 15.4 percent in 1975 compared to 1974 and increased 16.9 percent in 1976 compared to 1975. Company production increased 27.2 percent in the first six months of 1977 compared to the first six months of 1976. Production increased in each of the last three quarters of 1976 and the first two quarters of 1977 when compared to the like quarters of the preceding year.

As a result of Arkay's recent history of increased sales, the plant has had periods of full production, forcing Arkay to use outside contractors to fulfill increasing customer requirements of merchandise. There is no indication that current workers are threatened with any involuntary separations from employment at the Fall River, Massachusetts plant of the Arkay Pants Company.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that sales or production of boys' coats at the Fall River, Massachusetts plant of the Arkay Pants Company have not declined absolutely as required for certification under Section 222 of the Trade Act of 1974.

Signed at Washington, D.C. this 19th day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[TA-W-1497]

BETHLEHEM STEEL CORP.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1497: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on December 15, 1976, in response to a worker petition received on Decemeber 15, 1976, which was filed by the United Steelworkers of America on behalf of workers and former workers producing reinforcing bars and welded pipe at the Steelton, Pa., plant of Bethlehem Steel Corp.

The Notice of Investigation was published in the FEDERAL REGISTER on January 18, 1977 (42 FR 3366). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Bethlehem Steel Corp., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether any other criteria have been met, the investigation has revealed that criterion (4) has not been met.

A. WELDED PIPE

Customers of the Steelton plant that were surveyed by the Department have not switched purchases of welded pipe from the Steelton plant to foreign sources. Customers of the Steelton plant who decreased purchases of welded pipe from that plant in 1976 indicated that their decreases were attributable to a decline in construction of gas transmission lines. One customer attributed his decline to a switch to other domestic sources, coupled with a general decline in sales.

B. REINFORCING BARS

Customers of the Steelton plant that were surveyed by the Department have not switched purchases of reinforcing bars from the Steelton plant to foreign sources. Customers who decreased purchases from the Steelton plant attributed their decreases to a decline in construction projects.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with welded pipe and reinforcing bars produced at the Steelton plant have not contributed importantly to the total of partial separation of workers at that plant as required for certification under Section 222 of the Trade Act of 1974.

Signed at Washington, D.C., this 19th day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc.77-25729 Filed 9-1-77;8:45 am]

[TA-W-1498]

BETHLEHEM STEEL CORP.

Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1498: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on December 15, 1976, in response to a worker petition received on December 15, 1976, which was filed by the United Steelworkers of America on behalf of workers and former workers producing industrial fasteners, wire, and reinforcing bars at the Vernon, Calif. plant of the Bethlehem Steel Corp.

The Notice of Investigation was published in the FEDERAL REGISTER on January 11, 1977 (42 FR 2370). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Bethlehem Steel Corp., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all four of the above criteria have been met for workers producing either industrial fasteners or carbon steel wire. The investigation also revealed that without regard to whether any of the other criteria have been met, criterion (4) has not been met for workers producing reinforcing bars.

SIGNIFICANT TOTAL OR PARTIAL SEPARATION

Workers at the Vernon plant that were separately identifiable by product line.

A. INDUSTRIAL FASTENERS

Employment of workers engaged in employment related to the production of industrial fasteners declined 26 percent in 1976 compared to 1975.

B. WIRE

Employment of workers engaged in employment related to the production of wire declined 22 percent in 1976 compared to 1975.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

A. INDUSTRIAL FASTENERS

Sales decreased in quantity 16 percent in 1976 compared to 1975. Production in quantity decreased 43 percent in 1976 compared to 1975.

B. WIRE

Sales decreased in quantity 5 percent in 1976 compared to 1975. Production decreased in quantity 2 percent in 1976 compared to 1975.

INCREASED IMPORTS

A. INDUSTRIAL FASTENERS

Imports of nuts, bolts, and large screws of iron and steel increased in 1973 to 544.5 million pounds from 474.2 million pounds in 1972, increased further to 776.4 million pounds in 1974, decreased in 1975 to 534.7 million pounds, then increased again in 1976 to 704.5 million pounds. The ratio of imports of nuts, bolts, and large screws of iron and steel to domestic producer's shipments was 33.5 percent in 1972, and increased every year thereafter through 1976 when it was 97.7 percent.

Imports of small screws of iron or steel was 97,097,000 pounds in 1972, increased to 121,790,000 pounds in 1973, increased further in 1974 to 134,459,000 pounds, decreased in 1975 to 61,489,000 pounds, then increased in 1976 to 108,250,000 pounds. The ratio of imports of small screws of iron or steel to domestic production was 23.7 percent in 1972, increased to 25.7 percent in 1972, increased further in 1974 to 28.6 percent, decreased in 1975 to 17.9 percent, then increased again in 1976 to 25.7 percent.

B. WIRE

Imports of carbon steel wire decreased from 515.3 thousand tons in 1972 to 433.2 thousand tons in 1973. In 1974, imports increased to 553.8 thousand tons, then declined to 349.6 thousand tons in 1975. In 1976, imports increased 6.3 percent to 371.8 thousand tons. The ratio of imports to domestic shipments of carbon steel wire decreased from 23.3 percent in 1972 to 17.5 percent in 1973. In 1974, the ratio increased to 22.6 percent, then decreased to 22.0 percent in 1975. In 1976, the ratio decreased to 19.9 percent.

CONTRIBUTED IMPORTANTLY

A. INDUSTRIAL FASTENERS

The Department contacted some customers of the Vernon plant that bought industrial fasteners. Many of these customers contacted indicated that they purchased imports. Some customers had decreased purchases from the Vernon plant and increased purchases of imports. These firms stated that the cheaper price of the imports was the major reason for their switch.

B. WIRE

The Department contacted some customers of the Vernon plant that bought carbon steel wire products. Some of the customers contacted indicated that they purchased imports. Some of these customers decreased purchases from the Vernon plant and increased purchases of imported wire.

C. REINFORCING BARS

The Department contacted some customers of the Vernon plant that bought reinforcing bar. None of these increased purchases of imports in 1976 while decreasing purchases from the Vernon plant. Firms who decreased purchases from the Vernon plant most frequently cited a lack of business, particularly a decline in construction, as the reason for their decrease in purchases from the Vernon plant.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with industrial fasteners and carbon steel wire products produced at the Vernon, Calif., plant of Bethlehem Steel Corp. contributed importantly to the total or partial separations of workers engaged in the production of such products at that plant. In accordance with the provisions of the Act, I make the following certification:

All workers at the Vernon, Calif., plant of the Bethlehem Steel Corp., engaged in employment related to the production of either industrial fasteners or carbon steel wire and wire products who became totally or partially separated from employment on or after November 15, 1975 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

It is further concluded that increases of imports of articles like or directly competitive with reinforcing bars produced at the Vernon, Calif., plant of the Bethlehem Steel Corp. did not contribute importantly to the total or partial separations of workers engaged in the production of such products as required in Section 222 of the Trade Act of 1974.

Signed at Washington, D.C., this 19th day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc.77-25730 Filed 9-1-77;8:45 am]

[TA-W-1967]

BOULET SPORTSWEAR, LTD., NEW YORK, NEW YORK

Certification Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1597; investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on April 7, 1977 in response to a worker petition received on April 5, 1977 which was filed on behalf of workers and former workers producing men's sportswear and underwear at Boulet Sportswear, Ltd., New York, New York.

The notice of investigation was published in the FEDERAL REGISTER on April 15, 1977 (42 FR 19939). No public hearing was requested, and none was held.

The information upon which the determination was made was obtained principally from officials of Boulet Sportswear, Ltd., its customers, the National Cotton Council, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation revealed that all of the above criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Average employment at Boulet Sportswear (all salaried workers) increased 121 percent in 1975 compared to 1974, decreased 6 percent in 1976 compared to 1975, then decreased 18 percent to the first quarter of 1977 compared to the first quarter of 1976.

Boulet Sportswear, did not reduce weekly hours of employment of its (salaried) workers.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Total company sales (men's pants, underwear, sweaters and shirts) increased

V 42 171 SEP 2 77 UMI

30 percent in value (adjusted for price changes) in the second quarter of 1976 compared to the second quarter of 1975, then decreased in value 10, 45, and 59 percent, respectively, in the third and fourth quarters of 1976 and the first quarter of 1977 compared to each like quarter in the previous year.

Sales of men's pants in value (adjusted for price changes) were unchanged in the second quarter of 1976 compared to the second quarter of 1975, then decreased 41, 72, and 81 percent, respectively, in the third and fourth quarters of 1976 and in the first quarter of 1977 compared to each like quarter in the previous year. Men's pants represented 40 percent of total company sales in 1976.

Sales of men's underwear (including briefs and robes) increased 87 percent in value (adjusted for price changes) in the second quarter of 1976 compared to the second quarter of 1975, then decreased 13, 11, and 17 percent, respectively, in the third and fourth quarters of 1976 and the first quarter of 1977 compared to each like quarter in the previous year. Underwear represented 40 percent of total company sales in 1976.

Sales of men's sweaters increased in value (adjusted for price changes) 744 and 66 percent, respectively, in the third and fourth quarters of 1976 compared to each like quarter in 1975, then decreased 28 percent in the first quarter of 1977 compared to the first quarter in 1976. Men's sweaters represented 11 percent of total company sales in 1976.

Sales of men's shirts decreased in value (adjusted for price changes) 40, 6, 61, and 94 percent, respectively, in the last three quarters of 1976 and the first quarter of 1977 compared to each like quarter in the previous year. Men's shirts accounted for 9 percent of total company sales in 1976.

Sales are primarily to customer order. Neither production nor finished goods inventory data are maintained by the company.

INCREASED IMPORTS

Imports of men's and boys' dress and sport trousers and shorts decreased in quantity both absolutely and relative to domestic production in 1973 and 1974 compared to the previous year, then increased both absolutely and relatively in 1975 and 1976 compared to the previous year. These imports increased from 55,508 thousand units in 1975 to 73,209 thousand units in 1976, then increased from 14,623 thousand units in the first quarter of 1976 to 17,152 thousand units in the first quarter of 1977. The ratio of imports to domestic production increased from 34.1 percent in 1975 to 41.9 percent in 1976.

Imports of men's and boys' underwear, knit and not knit, decreased in quantity both absolutely and relative to domestic production in 1973 and 1974 compared to the previous year, then increased both absolutely and relatively in 1975, and increased absolutely in 1976 compared to the previous year. These imports increased from 1,443 thousand dozen in 1975 to 1,507 thousand dozen in 1976, then decreased from 421 thousand dozen in the first quarter of 1976 to 399 thousand dozen in the first quarter of 1977. The ratio of imports to domestic production decreased from 2.2 percent in 1975 to 2.1 percent in 1976.

Imports of men's and boys' sweaters, knit cardigans, and-pullovers increased in quantity both absolutely and relative to domestic production in 1973 compared to 1972, then decreased both absolutely and relatively in 1974 compared to 1973. These imports decreased absolutely, but increased relative to domestic production in 1975 compared to 1974, then increased both absolutely and relatively in 1976 compared to 1975. These imports increased from 20.4 million units in 1975 to 26.5 million units in 1976, then increased from 2.7 million units in the first quarter of 1976 to 2.8 million units in the first quarter of 1977. The ratio of imports to domestic production increased from 36.6 percent in 1975 to 67.8 percent in 1976.

Imports of men's and boys' woven sport shirts decreased in quantity both absolutely and relative to domestic production in 1973 compared to 1972, then increased both absolutely and relatively each year thereafter through 1976 compared to the previous year. These imports increased from 61,008 thousand units in 1975 to 79,820 thousand units in 1976, then decreased from 15,701 thousand units in the first quarter of 1976 to 14,852 thousand units in the first quarter of 1977. The ratio of imports to domestic production increased from 38.7 percent in 1975 to 48.6 percent in 1976.

Imports of men's and boys' knit sport and dress shirts, excluding T-shirts increased in quantity absolutely and relative to domestic production in 1973 compared to 1972, decreased absolutely and relatively in 1974 compared to 1973, and increased absolutely and relatively in 1975 compared to 1974. These imports increased 12 percent absolutely in 1976 compared to 1975, then decreased 1 percent in the first quarter of 1977 compared to the first quarter in 1976. The ratio of imports to domestic production decreased from 22.9 percent in 1975 to 22.6 percent in 1976.

CONTRIBUTED IMPORTANTLY

Customers who were surveyed stated that they had switched purchases of sportswear primarily pants, sweaters and shirts from Boulet Sportswear to imports.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with men's sportswear produced by Boulet Sportswear, Ltd., contributed importantly to the total or partial separation of the workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers engaged in employment related to the production of sportswear at Boulet Sportswear, Ltd., New York, New York, who became totally or partially separated from employment on or after July 1, 1976 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 15th day of August 1977.

BRIAN TURNER,
Executive Assistant to the Deputy Under Secretary for International Affairs.

[FR Doc.77-25356 Filed 9-1-77;8:45 am]

[TA-W-1710]

CAPITOL GARTER CO., INC.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1710; investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 3, 1977 in response to a worker petition received on February 25, 1977 which was filed by the International Ladies' Garment Workers' Union on behalf of workers and former workers producing girdles, brassieres, pants liners, panty briefs, and garter belts at the New York, New York plant of the Capitol Garter Company, Incorporated.

The notice of investigation was published in the FEDERAL REGISTER on March 15, 1977 (42 FR 14185). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the Capitol Garter Company, Incorporated, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard as to whether any of the other criteria have been met, criterion (4) has not been met.

The Department's investigation has revealed that the overriding factor in the decline in sales and eventual closing of the Capitol Garter Company, Incorporated was the bankruptcy and withdrawal from the retail trade of Capitol Garter's largest customer in late 1975. This customer's purchases had accounted for approximately sixty percent of Capitol Garter's total sales in 1974 and 1975. Unable to replace this lost business, Capitol Garter's sales declined 58.3 percent in 1976 compared to 1975 and the company ceased all operations in December 1976.

Other customers of Capitol Garter indicated that they were not purchasing imported girdles. These customers indicated that they had held purchases from Capitol Garter at relatively constant levels in 1976 compared to 1975.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with girdles, brassieres, panty briefs, pants liners, and garter belts produced at the Capitol Garter Company, Incorporated, New York, New York have not contributed importantly to the total or partial separations of workers at that firm as required for certification under Title II, Chapter 2 of the Trade Act of 1974.

Signed in Washington, D.C., this 23rd day of August 1977.

HARRY GRUBERT,
Director, Office of Foreign Economic Research.

[TA-W-1711]

CAPRI COATS, PANORAMA CITY, CALIF.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1711: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on March 3, 1977, in response to a worker petition received on March 1, 1977, which was filed by the International Ladies' Garment Workers Union on behalf of workers and former workers producing women's and misses' coats at Capri Coats, Panorama City, Calif.

The notice of investigation was published in the FEDERAL REGISTER on March 15, 1977 (42 FR 14185). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Capri Coats, David L. Maffei Co., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all of the criteria have been met for Capri Coats.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Production of Capri Coats began in October 1975. Employment of production workers at Capri Coats increased in the second, third, and fourth quarters of 1976 compared to the previous quarter, 8 percent, 81 percent, and 4 percent, respectively. Employment of production workers declined 2 percent for the period November through December 1976 compared to the same period in 1975. All production workers were terminated on December 17, 1976.

In 1976 the plant was closed due to lack of work for one week in January and one week in February and for the months of March and April.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Capri Coats produced coats on a contract basis, therefore production is equivalent to sales.

Sales and production in quantity (units) of women's and misses' coats increased in the second, third, and fourth quarters of 1976 compared to the previous quarter, 17 percent, 49 percent, and 42 percent, respectively. Sales and production decreased 16 percent for the November through December 1976 period as compared to the same period in 1975. Production ceased on December 17, 1976.

Total sales and production of women's and misses' coats for all five plants of the David L. Maffei Co. (parent company of Capri Coats) declined 5 percent in quantity from 1975 to 1976 and declined 35 percent in the first quarter of 1977 compared to the first quarter of 1976.

INCREASED IMPORTS

Imports of women's and misses' coats increased in absolute terms, from 1972 to 1973, decreased from 1973 to 1974, and increased from 1974 to 1975. Imports increased absolutely 48 percent from 1975 to 1976 and increased absolutely 17 percent in the first quarter of 1977 compared to the first quarter of 1976. The ratio of imports to domestic production and consumption increased from 35.4 percent and 26.1 percent, respectively, in 1975 to 52.2 percent and 34.3 percent, respectively, in 1976.

CONTRIBUTED IMPORTANTLY

Capri Coats produced exclusively for one manufacturer. The manufacturer reduced purchases from Capri Coats from 1975 to 1976 because his sales had declined. Customers of this manufacturer, who were surveyed reduced purchases from the manufacturer and increased purchases of imported women's and misses' coats in 1976.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with women's and misses' coats produced by Capri Coats contributed importantly to the total or partial separation of the workers of that plant. In accordance with the provisions of the Act, I make the following certification:

All workers of Capri Coats, Panorama City, Calif., who became totally or partially separated from employment on or after February 14, 1976, and before April 1, 1977, are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974. All workers who became totally or partially separated on or after April 1, 1977, are denied certification.

Signed at Washington, D.C., this 19th day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc.77-25357 Filed 9-1-77;8:45 am]

[TA-W-1548]

CURLEE CLOTHING CO., INC., MAYFIELD, KY.

Certification Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1548: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on January 4, 1977, in response to a worker petition received on that date which was filed on behalf of workers and former workers engaged in employment related to the production of men's suits, vests, sportcoats, and slacks, at the Mayfield, Ky., plant of the Curlee Clothing Co., Inc.

The notice of investigation was published in the FEDERAL REGISTER on January 28, 1977 (42 FR 5499). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the Curlee Clothing Co., Inc., its customers, the U.S. Department of Commerce, the U.S. In-

V 42 I 171 SEP 2 7 7 UMI

ternational Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation revealed that all of the above criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Average employment of production workers at both plants of the Curlee Clothing Co. (Mayfield, Ky. and Winchester, Ky.) decreased 25 percent from 1974 to 1975, and 3 percent from 1975 to 1976.

Average employment of production workers at the Mayfield, Ky., plant of the Curlee Clothing Co., decreased 24 percent from 1974 to 1975, and 16 percent from 1975 to 1976.

Average employment of production workers at the Winchester, Ky., plant of the Curlee Clothing Co., decreased 27 percent from 1974 to 1975, and increased 21 percent from 1975 to 1976.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Sales at the Curlee Clothing Co., Inc., including both the Mayfield, Ky., and Winchester, Ky. plants) decreased in quantity and value 27 percent and 25 percent, respectively, from 1974 to 1975, and 10 percent and 5 percent, respectively, from 1975 to 1976.

Production of men's sportcoats at the Mayfield, Ky., plant of Curlee decreased in quantity 42 percent from 1974 to 1975, and 21 percent from 1975 to 1976.

Production of men's slacks at the Mayfield, Ky., plant of Curlee decreased in quantity 26 percent from 1974 to 1975, then increased 9 percent from 1975 to 1976.

Production of men's sportcoats at the Winchester, Ky., plant of Curlee decreased in quantity 43 percent from 1974 to 1975, then increased 56 percent from 1975 to 1976.

Production of men's vests at the Mayfield, Ky., and Winchester, Ky., plants of Curlee was begun in 1976.

INCREASED IMPORTS

Imports of men's and boys' tailored dress coats and sportcoats increased absolutely from 1972 to 1973, decreased from 1973 to 1974, then increased from 1974 to 1975. Imports increased 27 percent absolutely from 1975 to 1976 and the ratio of imports to domestic production increased from 28.2 percent in 1975 to 32.4 percent in 1976.

Imports of men's and boys' tailored suits increased absolutely in every year compared to the previous year from 1973 through 1976. Imports increased 15 percent absolutely from 1975 to 1976 and the ratio of imports to domestic production increased from 18.3 percent in 1975 to 20.0 percent in 1976.

Imports of men's and boys' dress and sport trousers and shorts decreased absolutely in 1973 and 1974 compared to the previous years, then increased in 1975 compared to 1974. Imports increased absolutely 32 percent from 1975 to 1976 and the ratio of imports to domestic production increased from 34.1 percent in 1975, to 41.9 percent in 1976.

Imports of men's and boys' tailored suit vests increased absolutely in every year compared to the previous year from 1973 through 1976. Imports increased 129 percent absolutely from 1975 to 1976, and the ratio of imports to domestic production decreased from 16.0 percent in 1975 to 12.9 percent in 1976.

CONTRIBUTED IMPORTANTLY

Customers of Curlee Clothing Co. were surveyed regarding their purchases of men's suits, vests, sportcoats, and slacks. Many of the customers surveyed decreased their purchases from Curlee from 1975 to 1976, and increased their purchases from other domestic sources who manufacture offshore.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with men's suits, vests, sportcoats, and slacks, produced at the Mayfield, Ky., plant of the Curlee Clothing Co., Inc. contributed importantly to the total or partial separation of the workers at that plant. In accordance with the provisions of the act, I make the following certification:

All workers at the Mayfield, Ky., plant of the Curlee Clothing Co., Inc., who became totally or partially separated from employment on or after December 14, 1975, are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 18th day of August 1977.

HARRY GRUBERT,
Director, Office of Foreign Economic Research.

[FR Doc.77-25358 Filed 9-1-77;8:45 am]

[TA-W-2125]

DELL KNITWEAR INC., BRONX, N.Y.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2125: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on June 7, 1977 in response to a worker petition received on June 7, 1977 which was filed on behalf of workers and former workers producing children's sweaters at the Bronx, New York plant of Dell Knitwear, Inc.

The notice of investigation was published in the FEDERAL REGISTER on June 16, 1977 (42 FR 30936). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Dell Knitwear, Incorporated, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that without regard to whether the other criteria have been met, the fourth criterion has not been met.

Average employment of production workers at the Bronx, N.Y. plant of Dell Knitwear increased 25.5 percent in 1976 compared to 1975, increasing in each quarter of 1976 compared to the same quarters in 1975; employment further increased 25.6 percent in the first quarter of 1977 compared to the same quarter in 1976.

Employment at Dell Knitwear follows a definite seasonal pattern. In 1976, as in the previous year, employment increased gradually from March to November. In December 1976 and January 1977, employment declined sharply, following the pattern of a year earlier. Employment again began to increase during February and March 1977. The trade adjustment assistance program was not intended to cover total or partial separations that would have occurred regardless of the level of imports, e.g., those resulting from seasonal factors.

There is no indication that current workers are threatened with any involuntary separations from employment at the Bronx, N.Y. plant.

As stated in the petition, the workers at Dell Knitwear, Inc. are seeking adjustment assistance benefits for unemployment experienced during 1975. Section 223(b) (1) of the Trade Act of 1974 states that a certification shall not apply to workers separated more than one year before the date of the petition. The petition was dated June 1, 1977.

A survey representative of Dell Knitwear's customers indicated that none had decreased purchases from Dell Knitwear in 1976 compared to 1975 while increasing purchases of imported children's sweaters.

CONCLUSION

After careful review of the facts obtained in the investigation, it is concluded that imports like or directly competitive with children's sweaters produced at the Bronx, N.Y. plant of Dell Knitwear, Inc. did not contribute importantly to the separations of workers at that plant.

Signed at Washington, D.C., this 19th day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc.77-25359 Filed 9-1-77;8:45 am]

[TA-W-2064]

KIDDY KRAFT MANUFACTURING, PHILADELPHIA, PA.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2064: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on May 11, 1977 in response to a worker petition received on May 6, 1977 which was filed by the International Ladies Garment Workers Union on behalf of workers and former workers producing juntors' coats at Kiddy Kraft Manufacturing, Philadelphia, Pa.

The notice of investigation was published in the FEDERAL REGISTER on May 24, 1977 (42 FR 26481). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Kiddy Kraft Manufacturing, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the worker's firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The Department's investigation reveals that all four criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

The plant was closed in the first quarter of 1976 since Kiddy Kraft received no orders, and was closed during one week in March and three weeks in April 1977 because of a decrease in orders. Employment steadily decreased from the third quarter of 1976 through the first quarter of 1977.

Employment declined 1.6 percent in the third quarter of 1976 compared to the third quarter of 1975 and declined 14.1 percent in the fourth quarter of 1976 compared to the fourth quarter of 1975. Employment then declined 87.5 percent and 32.9 percent in April and May, respectively, in 1977 compared to April and May in 1976.

The average number of weekly hours worked by production employees declined 2.6 percent in 1976 compared to 1975.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Kiddy Kraft was closed in the first quarter of 1976. Sales and production declined 9.5 percent in the third quarter of 1976 compared to the second, declined 8.9 percent in the fourth quarter of 1976 compared to the third, and declined 66.7 percent in the first quarter of 1977 compared to the fourth quarter of 1976. Production declined 78.2 percent and 23.0 percent in April and May, respectively of 1977 compared to April and May 1976.

INCREASED IMPORTS

Imports of women's, misses and children's coats and jackets increased from 1972 to 1973, decreased from 1973 to 1974 and increased from 1974 to 1975. Imports increased 48.5 percent from 1,517,000 dozen in 1975 to 2,252,000 dozen in 1976. The ratio of imports to domestic production and consumption decreased from 1972 to 1974 and increased from 30.9 percent and 23.6 percent, respectively, in 1974 to 52.2 percent and 34.3 percent, respectively, in 1976.

CONTRIBUTED IMPORTANTLY

A customer who represented over 50 percent of orders received by Kiddy Kraft in 1976 decreased orders to Kiddy Kraft in 1976 and began placing orders with foreign contractors.

As a result of a decrease in the number of coats ordered, employment declines were experienced at Kiddy Kraft in the third and fourth quarters of 1976 and the first quarter of 1977.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with juniors' coats produced by Kiddy Kraft Manufacturing, Philadelphia, Pa., contributed importantly to the total or partial separation of workers of that plant. In accordance with the provisions of the Trade Act of 1974, I make the following certification:

All workers at Kiddy Kraft Manufacturing, Philadelphia, Pa., who became totally or partially separated from employment on or after May 6, 1976 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 19th day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc.77-25360 Filed 9-1-77;8:45 am]

[TA-W-1754]

L. K. SHAPIRO ASSOCIATES, INC., AND MARDOR OF CALIFORNIA, INC.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1754: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 3, 1977 in response to a worker petition received on March 1, 1977 which was filed by the International Ladies' Garment Workers Union on behalf of workers and former workers producing women's coats at L. K. Shapiro Associates, Inc., Los Angeles, California. The investigation was expanded to include Panorama Garment Corporation, Van Nuys, California, and Mardor of California, Incorporated, Los Angeles, California, both wholly-owned subsidiaries of L. K. Shapiro Associates, Incorporated.

The Notice of Investigation was published in the FEDERAL REGISTER on March 22, 1977 (42 FR 15477). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of L. K. Shapiro Associates, Inc., its customers, the U.S. Department of Commerce, the U.S. In-

V 42 171 SEP 2 77 UMI

ternational Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production.

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether any of the other criteria have been met, criterion (4) has not been met.

L. K. Shapiro Associates, Inc., designs, sells and provides the administration for the manufacture of women's coats. The actual production, cutting, sewing, and trimming of the coats is done for L. K. Shapiro by contractors.

Panorama Garment Corporation and Mardor of California were both wholly-owned subsidiaries of L. K. Shapiro. Panorama and Mardor were commissioned contractors, producing women's coats exclusively for L. K. Shapiro. All production and employment at Panorama Garment Corporation ceased in March 1975, prior to February 14, 1976, the earliest possible impact date for this case.

Sales of women's coats by L. K. Shapiro increased both in quantity and value from 1975 to 1976. Customers surveyed indicated that they did not reduce their purchases of women's coats from L. K. Shapiro in favor of imported coats.

In December 1976 officials of L. K. Shapiro decided to close Mardor of California and to contract all coat production to outside domestic contractors. This was done in order to minimize the overhead expenses needed to operate Mardor during seasonal periods of low demand.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with women's coats produced by L. K. Shapiro Associates, Incorporated and by Mardor of California, Incorporated, Los Angeles, California did not contribute importantly to the total or partial separations of the workers of these firms.

Signed at Washington, D.C., this 23rd day of August 1977.

HARRY GRUBERT,
Director, Office of Foreign Economic Research.

[TA-W-2045]

LILYETTE BRASSIERE CO., INC., NEW YORK, N.Y. AND HATO REY, PUERTO RICO

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2045: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on May 3, 1977 in response to a worker petition received on May 2, 1977 which was filed by the International Ladies' Garment Workers' Union on behalf of workers and former workers engaged in work related to the production of brassieres at the New York, N.Y. warehouse of Lilyette Brassiere Co., Inc. The investigation was subsequently expanded to include workers producing brassieres at the firm's Hato Rey, Puerto Rico plant.

The notice of investigation was published in the FEDERAL REGISTER on May 20, 1977, (42 FR 25941). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Lilyette Brassiere Co., Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all four of the above criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Average employment of production workers declined 4.4 percent in 1976 compared to 1975 and 33.5 percent in the first quarter of 1977 compared to the same quarter in 1976.

The New York warehousing facilities were shut down on February 28, 1977.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Production of brassieres declined 16.3 percent in 1976 compared to 1975 and 51.6 percent in the first quarter of 1977 compared to the same quarter in 1976.

Lilyette's production takes place at a company owned plant in Hato Rey, Puerto Rico which operates under the name Lily of Puerto Rico, Inc.

INCREASED IMPORTS

Imports of brassieres, bra-lettes and bandeaux increased each year, from 5.967 million dozens in 1972 to 8.751 million dozens in 1976, and increased from 1.831 million dozens in the first quarter of 1976 to 2.235 million dozens in the same quarter in 1977.

CONTRIBUTED IMPORTANTLY

A survey representative of Lilyette's customers indicated that several customers decreased their purchases from Lilyette in 1976 compared to 1975 and in the first quarter of 1977 compared to the same quarter in 1976, while increasing their purchases of imported brassieres.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with brassieres produced at the Hato Rey, Puerto Rico plant of Lilyette Brassiere Co., Inc. and shipped from New York, New York warehouse of Lilyette Brassiere Co., Inc. contributed importantly to the total or partial separations of the workers at those plants. In accordance with the provisions of the Act, I make the following certification:

"All workers engaged in employment related to the production, storage, and shipping of brassieres at the Hato Rey, Puerto Rico plant (Lily of Puerto Rico, Inc.) and the New York, N.Y. warehouse of Lilyette Brassiere Co., Inc., who became totally or partially separated from employment on or after April 28, 1976, are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974."

Signed at Washington, D.C. this 19th day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration & Planning.

[FR Doc.77-25361 Filed 9-1-77;8:45 am]

LOW-CARBON FERROCHROMIUM

On July 11, 1977, the International Trade Commission determined that increased imports of low-carbon ferrochromium are not a substantial cause of serious injury to the domestic industry for purposes of the import relief provisions of the Trade Act of 1974 (42 FR 36896).

Section 224 of the Trade Act directs the Secretary of Labor to initiate an industry study whenever the ITC begins an investigation under the import relief provisions of the Act. The purpose of the study is to determine the number of workers in the domestic industry petitioning for relief who have been or are likely to be certified as eligible for adjustment assistance and the extent to which existing programs can facilitate the adjustment of such workers to import competition. The Secretary is required to make a report of this study to the President and also make the report public (with the exception of information which the Secretary determines to be confidential).

The Department of Labor has concluded its report on low-carbon ferrochromium. The report found as follows:

1. Since April 3, 1975, the effective date of the adjustment assistance program, the Department of Labor has received three petitions for certification of eligibility for adjustment assistance from workers engaged in the production of low-carbon ferrochromium. To date, the Department has certified two of these petitions, and an investigation is in process in the remaining case. As of April 30, 1977, an estimated 290 workers had been certified for adjustment assistance and $611,181 had been paid out to 258 of them in the form of trade readjustment allowances supplemental to any unemployment insurance that a worker may also have received.

2. Over the first half of 1977, overall employment in the low-carbon ferrochromium industry has not changed much from the depressed level reached in late 1976. In view of recent improvements in the stainless steel industry, which is the primary user of low-carbon ferrochromium, the Department of Labor does not expect further layoffs in the industry over the balance of the year.

3. The three domestic plants which produce low-carbon ferrochromium have all laid off substantial numbers of workers since early 1976. Approximately 225 of these workers have still not been rehired by their former employers. Unemployment rates in all of the affected local areas, which are all located in eastern Ohio, are either close to or somewhat below the national average. Consequently the reemployment prospects of most of the laid off workers are fair.

4. The Comprehensive Employment and Training Act (CETA) programs appear to be capable of meeting the program claims of most of the displaced workers. Although actual levels of enrollment are somewhat higher than expected levels in the available programs, funding appears to be more than adequate to sustain them. The Employment and Training Administration through the State Employment Service has the authority to produce additional training when CETA funds are not available.

Copies of the Department report containing nonconfidential information developed in the course of the 6-month investigation may be purchased by contacting the Office of Trade Adjustment Assistance, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, D.C. 20210 (phone 202-523-7665).

Signed at Washington, D.C. this 22nd day of August 1977.

HOWARD D. SAMUEL,
Deputy Under Secretary, International Affairs.

[FR Doc.77-25362 Filed 9-1-77;8:45 am]

[TA-W-2026]

PICATO, MANCHESTER, CONN.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2026: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on April 25, 1977 in response to a worker petition received on April 22, 1977 which was filed on behalf of workers and former workers producing women's coordinated sportswear at the Manchester, Conn. plant of Picato, a wholly owned subsidiary of the General Mills Corp.

The notice of investigation was published in the FEDERAL REGISTER on May 13, 1977 (42 FR 23656). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Picato, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) that sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) that articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) that such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all four of the above criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Employment at the Manchester, Connecticut plant of Picato increased 19.4 percent in 1976 compared to 1975 and then decreased 11.1 percent in the January-April period of 1977 compared to the January-April period of 1976. Average weekly hours worked decreased 11.9 percent in the January-April period of 1977 compared to the January-April period of 1976.

Picato ceased all operations on June 15, 1977.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Sales in quantity decreased 13.0 percent in 1976 compared to 1975 and then increased 39.1 percent in the first quarter of 1977 compared to the first quarter of 1976. Sales ceased in the second quarter of 1977 when the company closed.

INCREASED IMPORTS

Imports of women's, misses', and children's coats and jackets were recorded at 1,769,000 dozen in 1972; 1,807,000 dozen in 1973; 1,478,000 dozen in 1974; and 1,517,000 dozen in 1975. In 1976 imports rose to 2,252,000 dozen, an increase of 48.5 percent from 1975. For the first quarter of 1977, imports increased to 590,000 dozen, representing an increase of 16.6 percent compared to 506,000 dozen in the first quarter of 1976. The ratio of imports to domestic production increased from 30.9 percent in 1974 to 35.4 percent in 1975 and to 52.2 percent in 1976.

Imports of women's, misses', and children's slacks and shorts decreased from 12,094,000 dozen in 1972 to 8,923,000 dozen in 1974 and then increased to 10,067,000 dozen in 1975. In 1976 imports rose to 11,040,000 dozen, an increase of 9.7 percent from 1975. For the first quarter of 1977, imports decreased to 3,373,000 dozen, representing a decline of 4.5 percent compared to 3,531,000 dozen in the first quarter of 1976. The ratio of imports to domestic production increased from 30.3 percent in 1974 to 33.0 percent in 1975 and to 39.0 percent in 1976.

Imports of women's, misses', and children's blouses and shirts increased in each year from 17,265,000 dozen in 1972 to 26,113,000 dozen in 1975. In 1976 imports rose to 30,273,000 dozen, an increase of 15.9 percent from 1975. For the first quarter of 1977, imports decreased to 8,280,000 dozen, representing a decline of 14.3 percent compared to 9,657,000 dozen in the first quarter of 1976. The ratio of imports to domestic production increased from 50.2 percent in 1973 to 70.4 percent in 1975 and to 76.0 percent in 1976.

Imports of women's misses', and children's skirts decreased from 593,000 dozen in 1972 to 254,000 dozen in 1974 and then increased to 508,000 dozen in 1975. In 1976 imports rose to 780,000 dozen, an increase of 53.5 percent from 1975. For the first quarter of 1977, imports were recorded at 103,000 dozen, representing a decline of 61.3 percent compared to 266,000 dozen in the first quarter of 1976. The ratio of imports to domestic production increased from 4.9 percent in 1974 to 10.6 percent in 1975 and to 12.2 percent in 1976.

Imports of women's, misses', and children's dresses decreased from 2,242,000 dozen in 1972 to 1,578,000 dozen in 1974 and then increased to 1,655,000 dozen in 1975. In 1976 imports declined to 1,614,000 dozen, a decrease of 2.5 percent from 1975. For the first quarter of 1977, imports were recorded at 371,000 dozen, representing an increase of 1.1 percent compared to 367,000 dozen in the first quarter of 1976. The ratio of imports to domestic production increased from 6.3 percent in 1973 to 8.0 percent in 1975 before declining to 7.9 percent in 1976.

Imports of women's, misses', and children's sweaters decreased from 8,087,000 dozen in 1972 to 7,990,000 dozen in 1973 and then increased to 8,965,000 dozen in 1975. In 1976 imports rose to 9,613,000 dozen, an increase of 7.2 percent from 1975. For the first quarter of 1977, imports were recorded at 816,000 dozen, representing a decline of 33.4 percent compared to 1,225,000 dozen in the first quarter of 1976. The ratio of imports to

V 42 171 SEP 2 77 UMI

domestic production increased from 94.2 percent in 1973 to 115.1 percent in 1975 and to 122.3 percent in 1976.

CONTRIBUTED IMPORTANTLY

A survey of customers of Picato indicated that some of these customers switched their purchases of women's sportswear from Picato to imported items. Style, quality, and price influenced these customers to buy imported women's sportswear.

CONCLUSION

After careful review of the facts obtained in the investigation I conclude that increases of imports of articles like or directly competitive with women's jackets, slacks, shorts, blouses, shirts, skirts, dresses, and sweaters produced at the Manchester, Connecticut plant of Picato contributed importantly to the separations of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

"All workers at the Manchester, Connecticut plant of Picato who became totally or partially separated from employment on or after October 11, 1976 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974."

Signed at Washington, D.C. this 19th day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[FR Doc.77-25363 Filed 9-1-77;8:45 am]

[TA-W-556]

McLOUTH STEEL CO., TRENTON, MICH.

Revised Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor issued a Notice of Determination on March 31, 1976, and published in the FEDERAL REGISTER on April 9, 1976 (41 FR 15082) certifying workers engaged in employment related to the production of stainless steel cold rolled sheet and strip at the Detroit, Mich., plant of McLouth Steel Co. and denying workers engaged in the production of carbon steel sheet, strip, slabs, pig iron, and stainless steel hot rolled strip at the Trenton, Mich., plant and workers engaged in the production of carbon steel cold rolled sheet and strip at the Gibraltar, Mich., plant of McLouth Steel Co.

At the request of the United Steelworkers of America, a review investigation was instituted. The review investigation reexamined the case history and additional information submitted by the petitioners and officials of McLouth Steel Co. concerning the Trenton, Mich., plant.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all of the above criteria have been met with respect to workers producing stainless steel hot rolled strip at the Trenton, Mich., plant of McLouth Steel Co.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Four major units of the Trenton plant are primarily involved in the production of stainless steel hot rolled strip: melt shop furnace No. 7, mold preparation, stainless slab conditioning, and the slab reheat furnace.

Total hours worked on the production of stainless steel hot rolled strip in those units declined 74.4 percent from 1974 to 1975 and then increased 102.9 percent from 1975 to 1976. Total hours worked decreased in each quarter of 1975 when compared to the same quarter in 1974.

Layoffs attributable to declines in stainless steel production are not separately identifiable in the labor turnover data for the Trenton plant. However, the average number of people on layoff status increased 2,215 percent from 1974 to 1975 and then declined 88 percent from 1975 to 1976. Layoffs in 1975 equaled 59 percent of average annual employment.

SALES AND/OR PRODUCTION HAVE DECLINED ABSOLUTELY

Production of stainless steel hot rolled strip at the Trenton, Mich., plant of McLouth Steel declined 76.8 percent from 1974 to 1975 and then increased 147.2 percent from 1975 to 1976.

All of the stainless steel hot rolled strip produced at Trenton is shipped to the Detroit plant for cold rolling. Sales of stainless steel cold rolled sheet and strip at the Detroit plant of McLouth declined 74 percent from 1974 to 1975.

INCREASED IMPORTS

Imports of stainless steel hot and cold rolled sheet and strip decreased absolutely and relatively from 1972 to 1973 and then increased absolutely and relatively from 1973 to 1974 and from 1974 to 1975. From 1975 to 1976, imports increased by 18 percent from 66.0 thousand tons to 78.2 thousand tons. The ratio of imports to domestic shipments increased from 7.5 percent in 1974 to 15.1 percent in 1975 and then decreased to 11.1 percent in 1976.

CONTRIBUTED IMPORTANTLY

The Department's determination in TA-W-556 denied workers producing stainless steel hot rolled strip at the Trenton plant because stainless steel constituted less than 5 percent of Trenton's production and because employees work interchangeably on all products.

The evidence developed during the Department's reinvestigation indicates that although production of stainless steel hot rolled strip is a small percentage of total production at the Trenton, Mich., plant, a separate group of the most senior employees in the plant are engaged in stainless steel production in the melt shop furnace No. 7, mold preparation, stainless slab conditioning, and slab reheat furnace units. The stainless steel operation is staffed by a seniority system in which employees exercise preferences for jobs according to their length of service. Positions in stainless steel production are generally filled by the most senior employees in the plant. When stainless steel production declines and jobs in the stainless operation terminate, stainless steel employees can bump into jobs in carbon steel production, according to their seniority.

The Department's first investigation revealed that McLouth Steel operates an integrated production process between its Trenton, Mich. plant and its Detroit, Mich., plant in the manufacture of stainless steel cold rolled sheet and strip. All of the stainless steel hot rolled strip produced at the Trenton plant is sent to Detroit for cold rolling. Customers of the Detroit plant indicated that they had decreased their purchases of stainless steel sheet and strip from the subject firm and had increased purchases of imports.

CONCLUSION

After careful review of the facts obtained in the reinvestigation of TA-W-556, McLouth Steel Co., Trenton, Mich., I concluded that increases in imports of stainless steel hot and cold rolled sheet and strip like or directly competitive with the stainless steel hot and cold rolled sheet and strip produced at McLouth Steel Co. contributed importantly to the total or partial separations of workers in the Trenton, Mich., plant of that firm. In accordance with the provisions of the Act, I hereby issue the following revised determination:

All workers who became totally or partially separated from employment related to the production of stainless steel hot rolled strip on or after December 29, 1974, in the melt shop furnace No. 7, mold preparation, stainless slab conditioning, and slab reheat furnace units of the Trenton, Mich., plant of McLouth Co. are eligible to apply for adjustment assistance benefits under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 19th day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc.77-25364 Filed 9-1-77;8:45 am]

[TA-W-2069]

QUAKER TROUSER CO.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2069: investigation regarding eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on May 12, 1977 in response to a worker petition received on that date which was filed on behalf of workers and former workers producing men's dress pants at the Quaker Trouser Company, Philadelphia, Pennsylvania.

The Notice of Investigation was published in the FEDERAL REGISTER on May 24, 1977 (42 FR 26482). No public hearing was requested an none was held.

The information upon which the determination was made was obtained principally from information provided by officials of Quaker Trouser Company, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The Department's investigation revealed that all four of the above criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Employment at Quaker Trouser Company decreased 14 percent in 1976 compared to 1975 and decreased 33 percent in the first quarter of 1977 compared to the same quarter of 1976.

SALES OR PRODUCTON, OR BOTH, HAVE DECREASED ABSOLUTELY

Sales by the Quaker Trouser Company decreased 14 percent in 1975 compared to 1974, decreased 8 percent in 1976 compared to 1975 and decreased 40 percent in the first five months of 1977 compared to the same period of 1976.

INCREASED IMPORTS

Imports of men's and boy's dress and sport trousers and shorts increased from 39.8 million units in 1974 to 55.5 million units in 1975, and increased to 73.2 million units in 1976. Imports increased from 14.6 million units in the first quarter of 1976 to 17.1 million units in the same period of 1977. The ratio of imports to domestic production increased from 18.2 in 1974 to 34.1 in 1975 and increased to 41.9 in 1976.

CONTRIBUTED IMPORTANTLY

Customers of Quaker Trouser Company who were surveyed have decreased purchases from Quaker Trouser and stated that they purchase imported men's pants.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with men's pants produced by Quaker Trouser Company contributed importantly to the separations of workers of that firm. In accordance with the provisions of the Trade Act of 1974, I make the following certification:

All workers of Quaker Trouser Company, Philadelphia, Pennsylvania who became totally or partially separated from employment on or after May 9, 1976 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 23rd day of August 1977.

HARRY GRUBERT,
Director, Office of Foreign Economic Research.

ROCKWELL INTERNATIONAL, DRAPER DIVISION, HOPEDALE, MASSACHUSETTS

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2179: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on June 24, 1977 which was filed by the United Steelworkers of America on behalf of workers and former workers producing weaving looms at the Hopedale, Massachusetts plant of Rockwell International.

The notice of investigation was published in the FEDERAL REGISTER on July 12, 1977, (42 FR 35904). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Rockwell International, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all four of the above criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Average employment of production workers decreased 17.7 percent in the first 5 months of 1977 compared to the same period of 1976.

Average employment of salaried workers decreased 5.2 percent in the first 5 months of 1977 compared to the same period of 1976.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Sales of weaving looms decreased 39.8 percent in the first 5 months of 1977 compared to the same period of 1976.

Production of weaving looms decreased 38.0 percent in the first 5 months of 1977 compared to the same period of 1976.

INCREASED IMPORTS

Imports of shuttle broadloom weaving machines increased from 211 units in the first 4 months of 1976 to 365 units in the same period of 1977.

Imports of shuttleless broadloom weaving machines decreased from 1,534 units in the first 4 months of 1976 to 802 units in the same period of 1977.

CONTRIBUTED IMPORTANTLY

Some of the customers surveyed by the Office of Trade Adjustment Assistance indicated that they have increased purchases of imported weaving looms while decreasing purchases of domestically produced weaving looms.

A certification of eligibility to apply for adjustment assistance, issued under provisions of the Trade Act of 1974, expires on August 12, 1977—two years from its date of issuance.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with weaving looms produced at Hopedale plant of Rockwell International, Draper Division contributed

V 42 171 SEP 2 77 UMI

In December 1976 officials of L. K. Shapiro decided to close Mardor of California and to contract all coat production to outside domestic contractors. This was done in order to minimize the overhead expenses needed to operate Mardor during seasonal periods of low demand.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with women's coats produced by L. K. Shapiro Associates, Incorporated and by Mardor of California, Incorporated, Los Angeles, California, did not contribute importantly to the total or partial separations of the workers of these firms.

Signed at Washington, D.C., this 23rd day of August 1977.

HARRY GRUBERT,
Director, Office of Foreign Economic Research.

LOW-CARBON FERROCHROMIUM

On July 11, 1977, the International Trade Commission determined that increased imports of low-carbon ferrochromium are not a substantial cause of serious injury to the domestic industry for purposes of the import relief provisions of the Trade Act of 1974 (42 FR 36896).

Section 224 of the Trade Act directs the Secretary of Labor to initiate an industry study whenever the ITC begins an investigation under the import relief provisions of the Act. The purpose of the study is to determine the number of workers in the domestic industry petitioning for relief who have been or are

[TA-W-2026]

PICATO, MANCHESTER, CONN.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Employment at the Manchester, Connecticut plant of Picato increased 19.4 percent in 1976 compared to 1975 and then decreased 11.1 percent in the January-April period of 1977 compared to the January-April period of 1976. Average weekly hours worked decreased 11.9 percent in the January-April period of 1977 compared to the January-April period of 1976.

Picato ceased all operations on June 3, 1977.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Sales in quantity decreased 13.0 percent in 1976 compared to 1975 and then increased 39.1 percent in the first quarter of 1977 compared to the first quarter of 1976. Sales ceased in the second quarter of 1977 when the company closed.

INCREASED IMPORTS

Imports of women's, misses', and children's coats and jackets were recorded

percent in 1974 to 10.6 percent in 1975 and to 12.2 percent in 1976.

Imports of women's, misses', and children's dresses decreased from 2,242,000 dozen in 1972 to 1,578,000 dozen in 1974 and then increased to 1,655,000 dozen in 1975. In 1976 imports declined to 1,614,000 dozen, a decrease of 2.5 percent from 1975. For the first quarter of 1977, imports were recorded at 371,000 dozen, representing an increase of 1.1 percent compared to 367,000 dozen in the first quarter of 1976. The ratio of imports to domestic production increased from 6.2 percent in 1973 to 8.0 percent in 1975 before declining to 7.9 percent in 1976.

Imports of women's, misses', and children's sweaters decreased from 8,087,000 dozen in 1972 to 7,990,000 dozen in 1973 and then increased to 8,965,000 dozen in 1975. In 1976 imports rose to 9,813,000 dozen, an increase of 7.2 percent from 1975. For the first quarter of 1977, imports were recorded at 816,000 dozen, representing a decline of 33.4 percent compared to 1,225,000 dozen in the first quarter of 1976. The ratio of imports to

P 2 7 7 UMI

domestic production increased from 94.2 percent in 1973 to 115.1 percent in 1975 and to 122.3 percent in 1976.

CONTRIBUTED IMPORTANTLY

A survey of customers of Picato indicated that some of these customers switched their purchases of women's sportswear from Picato to imported items. Style, quality, and price influenced these customers to buy imported women's sportswear.

CONCLUSION

After careful review of the facts obtained in the investigation I conclude that increases of imports of articles like or directly competitive with women's jackets, slacks, shorts, blouses, shirts, skirts, dresses, and sweaters produced at the Manchester, Connecticut plant of Picato contributed importantly to the separations of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

"All workers at the Manchester, Connecticut plant of Picato who became totally or partially separated from employment on or after October 11, 1976 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974."

Signed at Washington, D.C. this 19th day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[FR Doc.77-25363 Filed 9-1-77;8:45 am]

[TA-W-556]

McLOUTH STEEL CO., TRENTON, MICH.

Revised Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor issued a Notice of Determination on March 31, 1976, and published in the FEDERAL REGISTER on April 9, 1976 (41 FR 15082) certifying workers engaged in employment related to the production of stainless steel cold rolled sheet and strip at the Detroit, Mich., plant of McLouth Steel Co. and denying workers engaged in the production of carbon steel sheet, strip, slabs, pig iron, and stainless steel hot rolled strip at the Trenton, Mich., plant and workers engaged in the production of carbon steel cold rolled sheet and strip at the Gibraltar, Mich., plant of McLouth Steel Co.

At the request of the United Steelworkers of America, a review investigation was instituted. The review investigation reexamined the case history and additional information submitted by the petitioners and officials of McLouth Steel Co. concerning the Trenton, Mich., plant.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all of the above criteria have been met with respect to workers producing stainless steel hot rolled strip at the Trenton, Mich., plant of McLouth Steel Co.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Four major units of the Trenton plant are primarily involved in the production of stainless steel hot rolled strip: melt shop furnace No. 7, mold preparation, stainless slab conditioning, and the slab reheat furnace.

Total hours worked on the production of stainless steel hot rolled strip in those units declined 74.4 percent from 1974 to 1975 and then increased 102.9 percent from 1975 to 1976. Total hours worked decreased in each quarter of 1975 when compared to the same quarter in 1974.

Layoffs attributable to declines in stainless steel production are not separately identifiable in the labor turnover data for the Trenton plant. However, the average number of people on layoff status increased 2,215 percent from 1974 to 1975 and then declined 88 percent from 1975 to 1976. Layoffs in 1975 equaled 59 percent of average annual employment.

SALES AND/OR PRODUCTION HAVE DECLINED ABSOLUTELY

Production of stainless steel hot rolled strip at the Trenton, Mich., plant of McLouth Steel declined 76.8 percent from 1974 to 1975 and then increased 147.2 percent from 1975 to 1976.

All of the stainless steel hot rolled strip produced at Trenton is shipped to the Detroit plant for cold rolling. Sales of stainless steel cold rolled sheet and strip at the Detroit plant of McLouth declined 74 percent from 1974 to 1975.

INCREASED IMPORTS

Imports of stainless steel hot and cold rolled sheet and strip decreased absolutely and relatively from 1972 to 1973 and then increased absolutely and relatively from 1973 to 1974 and from 1974 to 1975. From 1975 to 1976, imports increased by 18 percent from 66.0 thousand tons to 78.2 thousand tons. The ratio of imports to domestic shipments increased from 7.5 percent in 1974 to 15.1 percent in 1975 and then decreased to 11.1 percent in 1976.

CONTRIBUTED IMPORTANTLY

The Department's determination in TA-W-556 denied workers producing stainless steel hot rolled strip at the Trenton plant because stainless steel constituted less than 5 percent of Trenton's production and because employees work interchangeably on all products.

The evidence developed during the Department's reinvestigation indicates that although production of stainless steel hot rolled strip is a small percentage of total production at the Trenton, Mich., plant, a separate group of the most senior employees in the plant are engaged in stainless steel production in the melt shop furnace No. 7, mold preparation, stainless slab conditioning, and slab reheat furnace units. The stainless steel operation is staffed by a seniority system in which employees exercise preferences for jobs according to their length of service. Positions in stainless steel production are generally filled by the most senior employees in the plant. When stainless steel production declines and jobs in the stainless operation terminate, stainless steel employees can bump into jobs in carbon steel production, according to their seniority.

The Department's first investigation revealed that McLouth Steel operates an integrated production process between its Trenton, Mich. plant and its Detroit, Mich., plant in the manufacture of stainless steel cold rolled sheet and strip. All of the stainless steel hot rolled strip produced at the Trenton plant is sent to Detroit for cold rolling. Customers of the Detroit plant indicated that they had decreased their purchases of stainless steel sheet and strip from the subject firm and had increased purchases of imports.

CONCLUSION

After careful review of the facts obtained in the reinvestigation of TA-W-556, McLouth Steel Co., Trenton, Mich., I concluded that increases in imports of stainless steel hot and cold rolled sheet and strip like or directly competitive with the stainless steel hot and cold rolled sheet and strip produced at McLouth Steel Co. contributed importantly to the total or partial separations of workers in the Trenton, Mich., plant of that firm. In accordance with the provisions of the Act, I hereby issue the following revised determination:

All workers who became totally or partially separated from employment related to the production of stainless steel hot rolled strip on or after December 29, 1974, in the melt shop furnace No. 7, mold preparation, stainless slab conditioning, and slab reheat furnace units of the Trenton, Mich., plant of McLouth Co. are eligible to apply for adjustment assistance benefits under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 19th day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc.77-25364 Filed 9-1-77;8:45 am]

[TA-W-2069]

QUAKER TROUSER CO.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2069: investigation regarding eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on May 12, 1977 in response to a worker petition received on that date which was filed on behalf of workers and former workers producing men's dress pants at the Quaker Trouser Company, Philadelphia, Pennsylvania.

The Notice of Investigation was published in the FEDERAL REGISTER on May 24, 1977 (42 FR 26482). No public hearing was requested an none was held.

The information upon which the determination was made was obtained principally from information provided by officials of Quaker Trouser Company, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The Department's investigation revealed that all four of the above criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Employment at Quaker Trouser Company decreased 14 percent in 1976 compared to 1975 and decreased 33 percent in the first quarter of 1977 compared to the same quarter of 1976.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Sales by the Quaker Trouser Company decreased 14 percent in 1975 compared to 1974, decreased 8 percent in 1976 compared to 1975 and decreased 40 percent in the first five months of 1977 compared to the same period of 1976.

INCREASED IMPORTS

Imports of men's and boy's dress and sport trousers and shorts increased from 39.8 million units in 1974 to 50.5 million units in 1975, and increased to 73.2 million units in 1976. Imports increased from 14.6 million units in the first quarter of 1976 to 17.1 million units in the same period of 1977. The ratio of imports to domestic production increased from 18.2 in 1974 to 34.1 in 1975 and increased to 41.9 in 1976.

CONTRIBUTED IMPORTANTLY

Customers of Quaker Trouser Company who were surveyed have decreased purchases from Quaker Trouser and stated that they purchase imported men's pants.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with men's pants produced by Quaker Trouser Company contributed importantly to the separations of workers of that firm. In accordance with the provisions of the Trade Act of 1974, I make the following certification:

All workers of Quaker Trouser Company, Philadelphia, Pennsylvania who became totally or partially separated from employment on or after May 9, 1976 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 23rd day of August 1977.

HARRY GRUBERT,
Director, Office of Foreign Economic Research.

[FR Doc.77-25733 Filed 9-1-77;8:45 am]

[TA-W-2179]

ROCKWELL INTERNATIONAL, DRAPER DIVISION, HOPEDALE, MASSACHUSETTS

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2179: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on June 27, 1977 in response to a worker petition received on June 24, 1977 which was filed by the United Steelworkers of America on behalf of workers and former workers producing weaving looms at the Hopedale, Massachusetts plant of Rockwell International.

The notice of investigation was published in the FEDERAL REGISTER on July 12, 1977, (42 FR 35904). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Rockwell International, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all four of the above criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Average employment of production workers decreased 17.7 percent in the first 5 months of 1977 compared to the same period of 1976.

Average employment of salaried workers decreased 5.2 percent in the first 5 months of 1977 compared to the same period of 1976.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Sales of weaving looms decreased 39.8 percent in the first 5 months of 1977 compared to the same period of 1976.

Production of weaving looms decreased 38.0 percent in the first 5 months of 1977 compared to the same period of 1976.

INCREASED IMPORTS

Imports of shuttle broadloom weaving machines increased from 211 units in the first 4 months of 1976 to 365 units in the same period of 1977.

Imports of shuttleless broadloom weaving machines decreased from 1,534 units in the first 4 months of 1976 to 802 units in the same period of 1977.

CONTRIBUTED IMPORTANTLY

Some of the customers surveyed by the Office of Trade Adjustment Assistance indicated that they have increased purchases of imported weaving looms while decreasing purchases of domestically produced weaving looms.

A certification of eligibility to apply for adjustment assistance, issued under provisions of the Trade Act of 1974, expires on August 12, 1977—two years from its date of issuance.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with weaving looms produced at Hopedale plant of Rockwell International, Draper Division contributed

V 42 171 SEP 2 77 UMI

importantly to the total or partial separations of the workers at that plant. In accordance with the provisions of the Act, I make the following certification:

All workers at the Hopedale plant of Rockwell International, Draper Division who became totally or partially separated from employment on or after August 12, 1977 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 19th day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[TA-W-1759]

TRUE FORM FOUNDATIONS, DARBY, PENNSYLVANIA

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1759: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 3, 1977 in response to a worker petition received on March 1, 1977 which was filed by the Philadelphia Dress Joint Board of the International Ladies Garment Workers Union on behalf of workers and former workers producing women's underwear at the Darby plant of True Form Foundations.

The Notice of Investigation was published in the FEDERAL REGISTER on March 22, 1977 (42 FR 15472). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of True Form Foundations, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation revealed that the without regard to any of the other criteria, the fourth criterion has not been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATION

Average employment of production workers increased 1 percent in 1975 compared to 1974, declined 2 percent in 1976 compared to 1975, and declined 9 percent in the first quarter of 1977 compared to the first quarter of 1976.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Total company sales in quantity increased 28 percent in the third quarter of 1976 compared to the third quarter of 1975, increased 14 percent in the fourth quarter of 1976 compared to the fourth quarter of 1975 and increased 13 percent in the first quarter of 1977 compared to the first quarter of 1976.

Sales in value, increased 29 percent in 1976 compared to 1975.

Cutting production at Darby, in quantity, increased 12 percent in the third quarter of 1976 compared to the third quarter of 1975, declined 6 percent in the fourth quarter of 1976 compared to the fourth quarter of 1975, and increased 5 percent in the first quarter of 1977 compared to the first quarter of 1976.

Sewing production at Darby, in quantity, increased 15 percent in 1976 compared to 1975 and declined 7 percent in the first quarter of 1977 compared to the first quarter of 1976.

Packing production at Darby, in quantity, declined 16 percent in the third quarter of 1976 compared to the third quarter of 1975, increased 16 percent in the fourth quarter of 1976 compared to the fourth quarter of 1975, and declined 13 percent in the first quarter of 1977 compared to the first quarter of 1976.

INCREASED IMPORTS

Imports of brassieres, bra-lettes, and bandeaux increased absolutely in 1973 and 1974 when compared to the previous year, increased in 1975 compared to 1974, increased 26 percent in 1976 compared to 1975, and increased 22 percent in the first quarter of 1977 compared to the first quarter of 1976. The ratio of imports to domestic production increased from 42.3 percent in 1975 to 50.3 percent in 1976.

Imports of corsets and girdles declined absolutely in 1973 and increased in 1974 when compared to the previous year, increased in 1975 compared to 1974, increased 69 percent in 1976 compared to 1975, and increased 13 percent in the first quarter of 1977 compared to the first quarter of 1976. The ratio of imports to domestic production increased from 3.1 percent in 1975 to 5.3 percent in 1976.

Imports of women's, misses', and juniors' underwear, which includes briefs and pant liners, declined absolutely in 1973 and 1974 when compared to the previous year, increased in 1975 compared to 1974, increased 28 percent in 1976 compared to 1975, and increased 61 percent in the first quarter of 1977 compared to the first quarter of 1976. The ratio of imports to domestic production increased from 2.3 percent in 1975 to 2.6 percent in 1976.

CONTRIBUTED IMPORTANTLY

Customers responding to an OTAA survey represented over 33 percent of company sales. None of these customers decreased purchases from True Form and increased purchases of imports. Total company sales at True Form increased from 1975 to 1976.

True Form began importing brassieres in 1973. Company imports represent less than 2 percent of total sales. The imported brassieres are offered as periodic low cost sale items.

Company wide sales which includes sewing production from the Darby plant, two other domestic company owned plants and from two domestic contractors increased from 1975 to 1976 and in the first quarter of 1977 compared to the first quarter of 1976. Therefore any decrease in production at the Darby plant was offset by an internal switch in production to other company owned domestic plants.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increase of imports like or directly competitive with brassieres, girdles, all-in-ones, pant liners, and briefs produced at the Darby, Pennsylvania plant of True Form Foundations did not contribute importantly to the total or partial separation of the workers at that plant.

Signed at Washington, D.C. this 19th day of August 1977.

JAMES F. TAYLOR,
Director, Officer of Management, Administration and Planning.

[TA-W-1563]

U.S. STEEL CORP. CENTRAL FURNACES

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1563: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on January 10, 1977 in response to a worker petition received on that date which was filed by the United Steelworkers of America on behalf of workers and former workers producing pig iron at the Lorain, Ohio plant of U.S. Steel Corp.

The notice of investigation was published in the FEDERAL REGISTER on January 28, 1977 (42 FR 5456). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials U.S. Steel Corp., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether the other criteria have been met, criterion three (3) has not been met.

Evidence developed in the Department's investigation revealed that imports of pig iron decreased from 427,000 tons in 1975 to 370,000 tons in 1976 Imports decreased from 102,000 tons in the first quarter of 1976 to 39,000 tons in the first quarter of 1977.

There are no imports of hot metal.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that imports of articles like or directly competitive with pig iron and hot metal produced at the Central Furnaces of U.S. Steel Corp., Lorain, Ohio have not contributed importantly to the decline in sales or production of the plant or to the total or partial separations of workers of that plant as required for certification under Section 222 of the Trade Act of 1974.

Signed at Washington, D.C., this 19th day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc.77-25734 Filed 9-1-77;8:45 am]

[TA-W-1436]

U.S. STEEL CORP., DUQUESNE, PA.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1436: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on December 15, 1976 in response to a worker petition received on November 15, 1976 which was filed by the United Steelworkers of America on behalf of workers and former workers producing carbon and alloy hot rolled bar-size light shapes at the Duquesne Work of the U.S. Steel Corp. Pittsburgh, Pa.

The Notice of Investigation was published in the FEDERAL REGISTER on January 4, 1977 (42 FR 901). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of U.S. Steel Corporation, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision has decreased absolutely;

(3) That imports of articles like or directly competitive with articles produced by such workers' firm or an appropriate subdivision thereof, have increased either actual, or relative to domestic production, and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether the other criteria have been met, the investigation has revealed that criterion four (4) has not been met.

Evidence developed in the Department's investigation revealed that the Duquesne Works of the U.S. Steel Corp. produced carbon and alloy hot rolled bar-size light shapes. Imports or carbon steel bar-size light shapes have declined steadily each year from 1974 through 1976. The imports to shipments ratio declined each year from 53.1 percent in 1974 to 19.5 percent in 1976. The survey conducted by the Office of Trade Adjustment Assistance reflects the decline in import purchases by end users. Customers responding stated that either they did not purchase imported steel bars or that they have decreased purchases of imported steel bars in 1976 compared to 1975. Some customers reported increased purchases of domestically produced steel bar-size light shapes.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that imports of articles like or directly competitive with carbon and alloy hot rolled bar-size light shapes produced at the Duquesne Works of the U.S. Steel Corporation have not contributed importantly to the total or partial separations of workers of that firm as required for certification under Section 222 of the Trade Act of 1974.

Signed at Washington, D.C. this 19th day of August, 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc.77-25368 Filed 9-1-77;8:45 am]

[TA-W-1449]

UNITED STATES STEEL CORP., TORRANCE, CALIFORNIA

Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1449: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on December 15, 1976 in response to a worker petition received on that date which was filed by the United Steelworkers of America on behalf of workers and former workers producing carbon steel structural shapes and steel bars at the Torrance, Calif. plant of U.S. Steel Corporation.

The Notice of Investigation was published in the FEDERAL REGISTER on January 7, 1977 (42 FR 1542). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from information and publications provided by the officials of U.S. Steel Corp., its customers, the U.S. International Trade Commission, U.S. Department of Commerce, American Iron and Steel Institute, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

V 42 171 SEP 2 77 UMI

The Department's investigation has revealed that with respect to carbon steel structural shapes production, all of the above criteria have been met. With respect to bar production, without regard to whether the other criteria have been met, criterion (4) has not been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Employment of workers producing structural shapes at the Torrance plant declined 39.2 percent in the first eleven months of 1976 compared to the same period in 1975. Average weekly hours worked declined 13.3 percent in the first eleven months of 1976 compared to the like period in 1975.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Sales of structural shapes at the Torrance plant declined 49.0 percent in volume in the first eleven months of 1976 compared to the first eleven months of 1975.

INCREASED IMPORTS

Imports of carbon steel structural shapes declined annually from 1,614.0 thousand short tons in 1972 to 804.9 thousand short tons in 1975 and increased in 1976 to 1,351.4 thousand short tons. The ratio of imports to domestic shipments increased from 19.5 percent in 1975 to 40.0 percent in 1976.

CONTRIBUTED IMPORTANTLY

Customers of structural shapes who were surveyed indicated that they reduced purchases from the Torrance plant of U.S. Steel while increasing purchases of imported structural shapes.

Customers of steel bars who were surveyed indicated either that they did not purchase any imported steel bars or that they did not shift their purchases of steel bars made at the Torrance plant to imported steel bars. Furthermore, employment of workers producing steel bars at the Torrance plant increased 32.2 percent in the first eleven months of 1976 compared to the same period in 1975.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with the carbon steel structural shapes produced at the Torrance, Calif. plant of U.S. Steel Corporation contributed importantly to the total or partial separations of the workers producing carbon steel structural shapes at that plant. In accordance with the provisions of the Trade Act of 1974, I make the following certification:

All workers engaged in employment related to the production of carbon steel structural shapes at the Torrance, Calif. plant of U.S. Steel Corp. who became totally or partially separated from employment on or after November 15, 1975 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

I further conclude that imports of steel bars did not contribute importantly to total or partial separations of workers producing steel bars at the Torrance plant as required for certification under Section 222 of the Trade Act of 1974.

Signed at Washington, D.C. this 19th day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc.77-25367 Filed 9-1-77;8:45 am]

[TA-W-1840]

WHITINSVILLE SPINNING RING CO.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1840: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 21, 1977 in response to a worker petition received on February 23, 1977 which was filed by three former employees on behalf of workers and former workers producing steel twister rings and steel spinning rings at the Whitinsville, Mass. plant of Whitinsville Spinning Ring Co.

The Notice of Investigation was published in the FEDERAL REGISTER on March 5, 1977 (42 FR 18158). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Whitinsville Spinning Ring Co., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all four of the criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

The average number of production workers declined 10 percent in 1976 compared to 1975 and declined 10 percent in the first quarter of 1977 compared to the first quarter of 1976. The company began laying off production employees in February 1977 in anticipation of closing the plant. Most production employees were laid off by April 8, 1977. Some workers remained for close-out operations and they are expected to be laid off soon.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Sales of rings manufactured at the Whitinsville plant increased nine percent in value in 1976 compared to 1975. In the first quarter of 1977, sales increased compared to the first quarter of 1976 as all remaining raw faterials were used up. In April 1977, all production ceased.

The company has no plans to resume production at the Whitinsville, Mass. plant. Sales values were adjusted for inflation using the wholesale Price Index commodity for spinning rings and twister rings as published by the Bureau of Labor Statistics.

INCREASED IMPORTS

U.S. Imports of spinning rings and twister rings increased from 16.6 thousand units in 1972 to 39.0 thousand units in 1973 and 41.0 thousand units in 1974 before declining to 21.5 thousand units in 1975 and 20.1 thousand units in 1976. Imports increased from 5.0 thousand units in the first three months of 1976 to 6.6 thousand units in the first three months of 1977.

The ratio of imports to domestic production increased from 2.7 percent in 1972 to 6.0 percent in 1973, 8.6 percent in 1974 and 10.0 percent in 1975 before declining to 8.5 percent in 1976. The ratio of imports to domestic production increased from 8.8 percent in the first three months of 1976 to 10.1 percent in the first three months of 1977.

CONTRIBUTED IMPORTANTLY

Whitinsville Spinning Ring Co. reported to the Department that in recent years some of their customers had shifted purchases from its domestic steel twister rings to its imported psm rings. (Twister rings and psm rings are substitutable items.) Customers confirmed this. In addition, some customers reported that they reduced purchases of steel spinning rings from Whitinsville because they switched to imported steel spinning rings.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with spinning rings and twister rings produced at the Whitinsville, Mass. plant of Whitinsville Spinning Ring Co. contributed importantly to the total or partial separations of the workers at that plant. In accordance with the provisions of the Act, I make the following certification:

All workers at the Whitinsville, Massachusetts plant of Whitinsville Spinning Ring Co. who became totally or partially separated from employment on or after February 21, 1977 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 23rd day of August 1977.

HARRY GRUBERT,
Director, Office of Foreign Economic Research.

[TA-W-1654]

WONDERING BOY

Negative Determination Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1654: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on February 15, 1977, in response to a worker petition received on February 10, 1977, which was filed on behalf of workers and former workers engaged in shrimp fishing at Wondering Boy in Port Isabel, Tex.

The notice of investigation was published in the FEDERAL REGISTER on March 8, 1977 (42 FR 13095). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Wondering Boy, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether the other criteria have been met, criterion (4) has not been met.

CONTRIBUTED IMPORTANTLY

The Department's investigation has revealed that Wondering Boy's only customer buys all the shrimp that Wondering Boy is able to supply. This customer only purchases imported shrimp when Wondering Boy and other domestic suppliers are unable to meet the customer's requirements.

The decline in the quantity of shrimp caught by the trawler in 1976 was due to several factors including adverse weather conditions occurring during the height of the shrimp season in November and December which kept the trawler in port, the lack of shrimp available in the known fishing grounds, and the imposition of a 200 mile fishing restriction by the Mexican government which prevented domestic shrimpers without permits from fishing in Mexican coastal waters.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that imports of articles like or directly competitive with shrimp produced by the Wondering Boy, Port Isabel, Tex., have not contributed importantly to the total or partial separations of workers of that firm as required for certification under Section 222 of the Trade Act of 1974.

Signed at Washington, D.C., this 23rd day of August 1977.

HARRY GRUBERT,
Director, Office of Foreign Economic Research.

[TA-W-1909]

WOODBURY MANUFACTURING CO., WILKES BARRE, PA.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1909; investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 24, 1977 in response to a worker petition received on March 24, 1977 which was filed by the International Ladies' Garment Workers' Union on behalf of workers and former workers producing sportswear at the Wilkes Barre, Pa. plant of Woodbury Manufacturing Co.

The Notice of Investigation was published in the FEDERAL REGISTER on April 12, 1977 (42 FR 19175). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the Woodbury Manufacturing Co.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the worker's firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether any of the other criteria have been met, criterion (2) has not been met.

The Woodbury Manufacturing Co. produces men's and women's jackets and blazers. The manufacturing is done on a contract basis with an apparel manufacturer.

Evidence developed in the Department's investigation revealed that production in terms of quantity of men's and women's jackets and blazers at the Woodbury Manufacturing Co. increased 69.6 percent in 1976 compared to 1975. Production increased 20.0 percent in the first quarter of 1977 compared to the first quarter of 1976.

Production and sales data at the Woodbury Manufacturing Co. are equivalent.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that neither sales nor production at the Wilkes-Barre, Pa. plant of the Woodbury Manufacturing Co. have decreased as required for certification under Section 222 of the Trade Act of 1974.

Signed at Washington, D.C. this 19th day of August 1977.

JAMES F. TAYLOR,
Director, Office and Management, Administration and Planning.

[Docket No. N-77-795]

ADVISORY COMMITTEE

First Meeting

AGENCY: Department of Housing and Urban Development.

ACTION: Notice is given of the initial meeting of the Task Force on Housing Costs, whose functions were published at 42 FR 27679. Notice is given also of the initial meeting of any committee formally established by the Task Force.

SUMMARY: *Task Force and Committee Meetings:* The initial meeting of the full Task Force will be held on October 5 and 6, 1977. The full Task Force will convene each day at 9:30 am in the Departmental

V 42 171 SEP 2 77 UMI

Conference Room, Tenth Floor (Room 10233), Department of Housing and Urban Development, 451 Seventh Street SW., Washington, D.C. 20410. Any committee of the Task Force which is then established may convene also during this period. Information about the time and place of any such committee meeting will be available to the public during this period in Room 7110, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, D.C. 20410 Telephone: 202–755–6076.

SUPPLEMENTARY INFORMATION: The purpose of and agendas for these initial meetings may include, but are not limited to, the following:

1. Certification and qualification of Task Force members;

2. Review and comment on written materials provided by HUD staff concerning factors that affect the cost of housing and concerning actions that might reduce such costs;

3. Consideration of other issues and ideas not raised in these materials;

4. Testimony from members of the general public;

5. Discussion of the merits of all suggested actions;

6. Discussion of recommendations to the Secretary of HUD concerning actions the Federal Government, particularly HUD, might take to reduce the cost of new housing to the consumer;

7. Establishment of Task Force organization, and appointment of officers and committees;

8. Scheduling of additional Task Force meetings and any committee meetings; and

9. Consideration of other Task Force business.

ADDRESS: Committee Management Officer Douglas C. Brooks, 451 Seventh Street SW., Washington, D.C. 20410.

FOR FURTHER INFORMATION CONTACT:

Douglas C. Brooks 202–755–9086, or Donald K. McLain 202–755–5333.

Task Force and committee meetings will be open to the public.

Issued at Washington, D.C., August 26, 1977.

1. Pheasant species to be covered by this permit application is: Brown-eared Manchurian (*Crossoptilon mantchuricum*), White-eared Manchurian (*Crossoptilon crossoptilon*), Elliot's (*Syrmaticus ellioti*), Mikado (*Syrmaticus mikado*), Edward's (*Lophura edwardsi*), Swinhoe's *Lophura swinhoii*). Black-throated bobwhite or Black masked (*Colinus nigrogularis*). When I receive the requested permit it will enable me to sell legally the surplus stock from my existing breeders as listed above.

2. The pens are 5 x 21 and 6 feet high; 6 x 21 and 8 x 21 and 6 feet high. The water containers are made of galvanized steel; 4 x 4 x 10; the food containers are 3 x 6 x 10 covered for weather protection. Each pen has evergreen trees and grass covered with wire so the birds can eat the grass and not kill the roots. For weather protection the back of the pens are covered with wood and shingles 6 feet high.

3. I have been raising birds for about 10 years. I took a poultry course at the Essex Agricultural School in Danvers, Mass. Last year I was Vice-President of the Northeastern Avicultural Society. This year I am President of the club. I also belong to the American Waterfowl Society and to the Gazette.

4. I will participate in any breeding program and maintain or contribute data to a "Studbook" as directed by the U.S. Fish and Wildlife Service.

5. All birds shipped will be in unused wire bound wooden crates, padded to prevent scalping or injury. Food and water containers will be secured in the crates. There will be enough room and size for the bird to stand and move around. The crates will be marked with "Live Birds—Please Rush" on four sides of the crates.

6. So far I have been fortunate not to have any of these birds die. All my pens are protected by 4 ft. chain link fence. The 4 ft. fence circles the area where the birds are kept. At the top of the fence is electric wire for added protection.

7. So far I have been successful with my birds and as a result I have surplus of the young and also I am interested in getting new birds for the blood line. This permit will enable me to buy and sell from ones that have this license to keep these birds from becoming extinct.

7ii I hope never to have to give up raising birds for my hobby. I also hope my son would carry on. If it happens that I cannot continue or my son I will dispose of the birds to only qualified breeders that have this permit or as directed by the regulations of the U.S. Fish and Wildlife Service.

c I understand that the above permit will enable me to transact only to those holding the permit. I should also state that at any time my birds can be seen.

Documents and other information submitted in connection with this application are available for public inspection during normal business hours at the Service's office in Room 512, 1717 H Street, NW., Washington, D.C.

Interested persons may comment on this application by submitting written data, views, or arguments, preferably in triplicate, to the Director (FWS/WPO), U.S. Fish and Wildlife Service, Washington, D.C. 20240. This application has been assigned File Number PRT 2–1175–25; please refer to this number when submitting comments. All relevant comments received on or before October 3, 1977, will be considered.

Most of these pens have Japanese Yews planted in them. All aviaries are predator proof, having a shed in the rear. These aviaries are located on three acres of land.

(3) I have raised pheasants for the past thirty eight years, and have had the pheasants listed above during most of this time. In 1974 I received the Grand Master Breeder Award given by the American Game Bird Breeder's Cooperative Federation being the second one to receive this award. I have also received many other breeding awards.

(4) I am willing to participate in a cooperate breeding program. I have raised a large number during the years of the pheasants listed above.

(5) I have shipped hundreds of pheasants and know what size of containers or coops to ship them in without harming the birds as different pheasants need different kinds of crates.

(6) During the years that I have had the pheasants listed above you will lose some to old age and other causes, but have had no serious illness.

(7) I have been raising the pheasants listed above so that the future generations will have these birds. I have had hundreds of people come to see these birds which they cannot see in their native habitat. I have had hundreds of school children come to see my birds.

(8) When I retire I hope that the pheasants that I have will go to other breeders to propagate them for future generations.

THREATENED SPECIES PERMIT

Receipt of Application

Notice is hereby given that the following application for a permit is deemed to have been received under Section 4(d), 16 USC 1533(d), of the Endangered Species Act of 1973 (Public Law 93-205).

Applicant: Harold H. Polk, 2953 Fairchild, Wayzata, Minn. 55391.

ATTACHMENTS 17.33 TO PERMIT REQUEST

(L) "Captive Self-Sustaining Population" permit is requested for the following species of pheasants:

(1) Brown-eared pheasant (*Crossoptilon mantichuricum*).

(2) White-eared pheasant (*Crossoptilon crossoptilon drouyni*).

(3) Bar-tailed pheasant (*Symraticus humiae*).

(4) Mikado pheasant (*Syrmaticus mikado*).

(5) Palawan peacock pheasant (*Polypectron emphanum*).

(6) Elliots pheasant (*Syrmaticus ellioti*).

(7) Edwards pheasant (*Lophura edwardsi*).

I seek a permit to authorize an unlimited number of transactions through interstate commerce over a two year period of time for the 7 species of pheasants listed above in this paragraph, with the permit being subject to renewal according to section 13.24.

(2) I have 100 aviaries varying in size from 12 by 18 feet to ones that are 12 by 50 feet.

ATTACHMENT 17.33 TO PERMIT REQUEST

(1) A "Captive Self-Sustaining Population" permit is requested for the following species of pheasants:

(1) Brown Eared pheasants (*Crossoptilon mantichuricum*).

(2) Humes Bartailed pheasant (*Syrmaticus humiae*).

(3) Mikado pheasant (*Syrmaticus mikado*).

(4) Palawan pheasant (*Polypectron emphanum*).

(5) Edwards pheasant (*Lophura edwardsi*).

(6) Swinehoe's pheasant (*Lophura swinhoii*).

The applicant seeks a permit to authorize an unlimited number of transactions by interstate commerce over a two year period of time for the six species of pheasants identified above, with the permit subject to renewal in accordance with section 13.24.

(2) The applicant possesses numerous pheasant aviaries of varying sizes. The largest of which is 25' by 125' by 6' and the smallest is 10' by 10' by 6' for breeding pairs. The greatest number are 16' by 16' by 6'. Each pen is constructed of one inch wire netting on the sides. The same one inch netting is on the tops in either wire or nylon. Fourteen of the aviaries have individual housing not less in size than 8' by 8' by 5' for protection from the elements. The balance of the aviaries share three communal buildings, appropriately sectioned to relate to the outside enclosures. A photograph shows the representative pens and is attached as Attachment A.

Nineteen of the aviaries are located on a two acre lot, immediately adjacent to the applicant's residence, the others are on a ten acre area adjacent to applicant's caretaker's residence. At least a hundred additional acreas are available.

(3) Applicant has been propagating pheasants for ten or more years. He already has five of the species referred to in this permit application, in his aviaries and consequently is experienced in breeding and raising them.

The applicant is a member of the following wildlife organizations:

The Wildfowl Trust (England). American Pheasant and Waterfowl Society. Minnesota Pheasant and Waterfowl Society. Oregon Pheasant Breeders. He is presently serving as the Secretary-Treasurer of the Minnesota Pheasant and Waterfowl Society. He is an accredited Pullorum-Typhoid tester for the State of Minnesota Livestock Sanitary Board.

(4) The applicant is ready and willing to participate in a cooperative breeding program and to contribute data for a stud book.

(5) The applicant will continue to use shipping crates of a crush proof nature provided with food and water in each use of public transportation. To date no losses have been experienced in transportation.

(6) Pheasant losses have been a minimal fraction of one per cent. Such as did occur, were primarily due to predators such as the horned owl and racoons. This has been cleared by double overhead netting with a space of two feet between so that the owl's strike force is dissipated before reaching the second netting.

(7) (i) The applicant is making this application to purchase, sell or trade in interstate commerce the six pheasants listed in item (1) of this attachment. The permit, if granted, will enable the applicant to improve the bloodline strength of the offspring from the pheasants he now possesses and to dispose of the progeny he raises each year to qualified breeders in other States. Sales will assist in partially defraying the costs of propagation of the identified species. Granting the permit will also serve to increase the virility and strength of the species and thus enhance the survival of the "captive Self-Sustaining Population" in the United States. The applicant does not breed pheasants for economic purposes, rather, it is the enjoyment and pleasure of serving to preserve these beautiful birds for the future to enjoy and possibly in a small way contributing to the reintroduction of them into their natural home and habitat when political situations will allow.

(7) (ii) Upon termination of the applicant's breeding activity for any reason not presently apparent, the pheasants covered in this application as well as any others, then in the applicant's possession, will be gifted to qualified breeders who share the same standards and enjoyment.

Sincerely,

HAROLD H. POLK.

HENRY DOORLY ZOO,
OMAHA ZOOLOGICAL SOCIETY,
Omaha, Neb., July 19, 1977.

DIRECTOR (FWS/LE),
U.S. Fish & Wildlife Service, U.S. Department of the Interior, Washington, D.C.

DEAR SIR: The Henry Doorly Zoo is applying for a captive, self-sustaining population permit for transactions involving jaguars, leopards, and tiger. Detailed application requirement descriptions follow:

Application requirements (section 17.33):

1. The common and scientific names of the species sought to be covered by the permit, the activity sought to be authorized.

Species applied for: Jaguar, *Panthera onca*, Leopard, *Panthera pardus*, and Tiger, *Panthera tigris*. The activity sought to be authorized is the selling and receiving in interstate commerce the above listed species. We request the permit for maximum duration period of two years.

2. A complete description, including photographs or diagrams of the area, and facilities where such wildlife will be housed and cared for.

All animals listed in this application will be housed in a new cat complex. The $2.5 million building consists of a total of twenty-one inside and outside public displays and forty-eight behind-the-scenes cat holding areas and dens. Artificial rockwork, trees, waterfalls, or ponds are provided in most of the public displays. A floor plan and a paper describing the building in considerable more detail are attached.

3. A brief resume of the technical expertise of the persons who will care for such wildlife.

Resumes of the Henry Doorly Zoo staff and of the cat area supervisor are attached. All these personnel have had experience in managing and propagating felines.

4. A statement of the applicant's willingness to participate in a cooperative breeding program and to maintain or contribute data on a studbook.

We are willing to participate in a cooperative breeding program and to contribute data to a studbook.

5. A detailed description of the type, size, and construction of all containers into which such wildlife will be placed during transportation.

The shipping crates will exceed minimum standards required by the International Air Transport Association (IATA). Feeding and water facilities are built into the crates.

6. For the 5 years preceding the date of the application provide a detailed description of all mortalities involving the species covered in the application.

During the past five years, there have been eleven mortalities involving species covered in this application:

Species	ID No.	Date of death	Cause of death
Jaguar	131	Apr. 7, 1974	Injuries from fight with mate.
Do	1988	June 15, 1974	Unknown—died day of birth.
Do	1989	July 14, 1976	Euthanized because of injuries inflicted by adjoining jaguar.
Leopard	2744	June 3, 1977	Urinary infection (1 week old) at time of death.
Do	2743	June 14, 1977	Urinary infection and G.I. (1 month old) at time of death.
Sumatran Tiger	2100	May 17, 1975	Injuries by mother.
Do	2048	July 21, 1974	Do.
Do	3	June 19, 1976	See attached autopsy report.
Do	521	....do	Do.
Do	1122	....do	Do.
Do	1616	....do	Do.
Do	1617	....do	Do.

The Henry Doorly Zoo has two full-time veterinarians on its staff. An active program of preventive medicine is maintained. A nursery/hospital building is located on the zoo grounds. The zoo receives excellent cooperation from local hospitals and universities. The replacement of the old cat quarters with the new cat complex building will greatly increase our ability to manage these species. Injuries from adjoining animals should be minimized since solid walls, not bars, now divide adjoining enclosures. The building's many behind-the-scenes dens and the capability for closed circuit television monitoring should reduce mother inflicted injuries. The knowledge gained from the Sumatran tiger deaths should prevent another occurrance. All pesticide application at the zoo is now performed only by the staff veterinarian.

7. A full statement of the reasons why the applicant is justified in obtaining the permit including (i) the details of the activities sought to be authorized by the permit.

(i) The applicant requests authorization to be permitted to buy, sell, or trade the captive self-sustaining species listed in the application. These activities would facilitate gene-pool management, propagation, and exhibition of these species. The Henry Doorly Zoo has had excellent success in breeding felines. The addition of the new cat complex allows us to house additional animals. We intend to reproduce these additional captive self-sustaining species with the best interests of gene-pool management in mind. To accomplish this, we will need the ability to acquire and sell or trade these animals.

(ii) The planned disposition of such wildlife upon termination of the activities sought to be authorized.

The University of Nebraska at Lincoln Museum of Natural History or the University of Omaha's Biology Department receives suitable carcasses after thorough post mortem examination. Carcasses or "part thereof" are also utilized by the zoo's docents as part of their educational program for the Henry Doorly Zoo.

"I hereby certify that I have read and am familiar with the regulations contained in Title 50, Part 13, of the Code of Federal Regulations and the other applicable parts in Subchapter B of Chapter I, Title 50, and I further certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement hereon may subject me to the criminal penalties of 18 U.S.C. 1001."

Sincerely,

LEE G. SIMMONS,
Director.

Documents and other information submitted in connection with this application are available for public inspection during normal business hours at the Service's office in Room 512, 1717 H Street NW., Washington, D.C.

Interested persons may comment on this application by submitting written data, views, or arguments, preferably in triplicate, to the Director (FWS/WPO), U.S. Fish and Wildlife Service, Washington, D.C. 20240. This application has been assigned File Number PRT 2-1215-25; please refer to this number when submitting comments. All relevant comments received on or before October 3, 1977, will be considered.

Dated: August 30, 1977.

DONALD G. DONAHOO,

Attachments 17.33

1. The following Species are sought to be covered by this Permit.
a. Pheasant, Brown Eared (*Crossoptilon Manichuricum*).
b. Pheasant, Edwards (*Lophura Edwardsi*).
c. Pheasant, Bartail (*Syrmaticus Humiae*).
d. Pheasant, Mikado (*Syrmaticus Mikado*).
e. Pheasant, Palawan Peacock (*Polyplectron emphanum*).
f. Pheasant, Swinhoes (*Lophura Swinhoii*).
This Permit is sought for unlimited activities in buying and selling Interstate Endangered Species not classified CSSP.

2. See Atch page 2 and 3.

3. I have approx 22 years experience raising and propagating these and similar Wildlife. I have, during this time successfully propagated all breeds of Pheasants now listed in 17.7 as CSSP. My helper has 6 years experience caring for these and similar wildlife and has assisted in propagating all breeds of pheasants now listed as CSSP.

4. I would be most happy to participate in a cooperative breeding program and maintain or contribute data on a studbook.

5. All containers for shipping are constructed of wood and fiber board with sufficient vents to insure a supply of air. Food and water containers are provided with holes to facilitate replenishing should it become necessary. The size of shipping containers are determined by the breed of pheasant but will in all cases allow three inches of head clearance when standing erect. Length will be twice the length of the bird and min eighteen inches wide. The top of containers have sponge inside to insure top of birds head is not injured. Instructions and extra feed are atch to containers for shipping agents if additional feed and water is necessary. I have never lost or injured a bird when shipping.

6. During the past 5 years, to the best of my knowledge and records, the following pheasants have been lost to disease and or accidents. 1972 None. 1973 (2) Swinhoes destroyed due to sliped tendons in legs. 1974 (1) Grey Peacock killed by falling tree during storm. Tree has since been removed. 1975 (3) Elliotts, (2) Mikados, (2) Brown Eared, (1) Palawan. The Autopsy revealed Botulism caused death. Feed analysis proved positive and feed company paid off portion of cost of birds. This feed had been manufactured only 6 days. 1976 (1) Grey peacock cock bird killed by hen. Boards with 4" legs were put in pens

for pheasants to get under and not depend on foliage alone for protection. (1) Mikado Respiratory Infection. No flock medication was recommended by Vet. 1977 (1) Elliott Brooder accident. Removed all loose objects from around top of brooder. (1) Elliott *Aspergillosis*. Removed birds from pen until all leaves and grass were removed.

This list is mostly from memory of the first three years since my records are no longer available. The shed I kept my egg and breeding records caught fire and burned.

7. I feel I am justified in obtaining this permit since I process all the CSSP Pheasants and have successfully propagated them. I need the permit to be able to sell Interstate the offspring of these birds. I also must have new blood shipped in to keep my stock strong. These Pheasants will be sold to other breeders processing a CSSP Permit.

Documents and other information submitted in connection with this application are available for public inspection during normal business hours at the Service's office in Room 512, 1717 H Street, NW., Washington, D.C.

Interested persons may comment on this application by submitting written data, views, or arguments, preferably in triplicate, to the Director (FWS/WPO), U.S. Fish and Wildlife Service, Washington, D.C. 20240. (1) Pheasant Bar-tailed Syrmaticus humiae
" Swinhoe Lophura Swinhoii
" Elliot Syrmaticus ellioti

(2) Pens are 10 ft. x 20 ft. With a 10 ft. by 4 ft. solid shelter on west end.

also equipped with automatic waterers

(3) I have been raising Swinhoe and Elliot pheasants for 17 years. Bar-tailed about 10 years.

Until the endangered species act went into effect I raised about 125 young each year of these breeds. I stopped raising young at that time as due to the restrictions I could not sell my young and I could not afford to feed that many birds and I would have run out of pen space. Now with the CSSP I will be able to sell the young to help toward the feed bill so I have once again started hatching young. Though I have been raising ornamental pheasants for 17 years; my wife has over 30 years experience as her father has raised these birds for at least that long, and it has become a combined family hobby.

(4) I am willing to cooperate in any way possible to insure the survival of endangered or threatened Species.

(5) I use wire bound wooden crates with padded tops for transportation. They are equipped with containers for feed and water. I have always used these for shipping and have never had any trouble.

(6) The first year the endangered species act went into effect I lost my young due to crowded conditions and fighting. This happened because I did not feel I should sell the young without permits which at that time were impossible to get. Other than that I've only lost birds due to old age.

(7) It is my opinion the only way any species of ornamental pheasants will survive is through captive propagation. There are many people like myself who do this as a hobby, but we must be able to sell our young to help pay feed bills and pay for pen repairs; also to obtain new blood lines if something should happen to one of our breeding pairs.

National Park Service

GOLDEN GATE NATIONAL RECREATION AREA ADVISORY COMMISSION

Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that a meeting of the Golden Gate National Recreation Area Advisory Commission will be held at 9:30 a.m. (PDT) on Saturday morning, September 24, 1977 at the Fort Mason Visitor Center, Golden Gate National Recreation Area Headquarters, San Francisco, California.

The Advisory Commission was established by Public Law 92-589 to provide for the free exchange of ideas between the National Park Service and the public and to facilitate the solicitation of advice or other counsel from members of the public on problems pertinent to the National Park Service system in Marin and San Francisco counties.

Members of the Advisory Commission are as follows:

Mr. Frank Boerger, *Chairman*
Ms. Amy Meyer, *Secretary*
Mr. Ernest Ayala
Mr. Richard Bartke
Mr. Fred Blumberg
Ms. Daphne Greene
Mr. Peter Haas, Sr.
Mr. John Jacobs
Ms. Ginnny Park Li
Mr. Joseph Mendoza
Mr. John Mitchell
Mr. Merritt Robinson
Mr. Jack Spring
Dr. Edgar Wayburn
Mr. Joseph Williams

The major item on the agenda will be briefings by National Park Service staff to update the Advisory Commission on the current status of the Golden Gate National Recreation Area.

The meeting will be open to the public. Any member of the public may file with the Commission a written statement concerning the matters to be discussed.

Persons wishing further information concerning this meeting or who wish to submit written statements may contact Jerry L. Schober, Acting General Manager, Bay Area National Parks, Fort Mason, San Francisco, Calif. 94123, telephone 415-556-2920.

Minutes of the meeting will be available for public inspection by October 28, 1977 in the Office of the General Manager, Bay Area National Parks, Fort Mason, San Francisco, Calif.

Dated: August 25, 1977.

BRUCE M. KILGORE,
Acting Regional Director, Western Region.

PROPOSED ALUNITE PROJECT IN BEAVER COUNTY, UTAH

Availabilty of Final Environmental Impact Statement

Pursuant to Section 102(2) (c) of the National Environmental Policy Act of 1969, the Department of the Interior has prepared a final environmental impact statement for a proposed Alunite mining and processing plant in Beaver County, Utah. The environmental impact statment considers the possible effects the proposed construction and operation of an Alunite processing plant, open-pit mine, water system, transportation system, and employment of approximately 1,000 people would have on the environment.

The final environmental impact statement has been submitted to the Council on Environmental Quality and made available to government agencies and the public.

Copies of the final statement are available for review at the following locations:

Office of Public Affairs, Bureau of Land Management, Interior Building, 18th and C Streets NW., Washington, D.C. 20240.
Utah State Office, Bureau of Land Management, University Club Building, 136 East South Temple, Salt Lake City, Utah 84111.
Cedar City District Office, 1579 North Main St., Cedar City, Utah 84720.
Cedar City Public Library, 136 West Center St., Cedar City, Utah 84720.
Milford City Office, 55 West 400 South, Milford, Utah 84751.
County Recorder's Office, Beaver County Courthouse, Beaver, Utah 84713.

A limited number of single copies of the final statement are available upon request to the District Manager, Cedar City District, Bureau of Land Management, P.O. Box 729, 1579 North Main St., Cedar City, Utah 84720.

GEORGE L. TURCOTT,
Associate Director, Bureau of Land Management.

Approved: June 20, 1977.

LARRY E. MEIEROTTO,
Deputy Assistant Secretary of the Interior.

INTERNATIONAL TRADE COMMISSION

TELEVISION RECEIVERS FROM JAPAN

Termination of Preliminary Investigation

Notice is hereby given that—(1) The United States International Trade Commission instituted this preliminary investigation on March 26, 1976, pursuant to section 603 of the Trade Act of 1974 (19 U.S.C. 2482) to determine whether to institute an investigation under section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337). A Notice of Preliminary Investigation was published in the FEDERAL REGISTER on April 8, 1976 (41 FR 14949), and on December 20, 1976, the preliminary investigation was suspended pending further notice of the Commission (41 FR 55949, December 23, 1976). This Commission has given careful consideration to this preliminary investigation on the basis of the most efficient allocation of Commission resources, the public interest, and recent developments with respect to the importation of these articles. As a result of such consideration, the Commission hereby terminates this preliminary investigation.

(2) The Commission hereby quashes the subpoenas of September 10, 1976, issued under the authority of this preliminary investigation. Further, all motions pending before the Commission in this preliminary investigation are hereby denied as moot. The Commission makes no determination at this time as to whether to institute an investigation under section 337.

By order of the Commission.

Issued: August 29, 1977.

KENNETH R. MASON,
Secretary.

FOURTH SECTION APPLICATIONS FOR RELIEF

AUGUST 30, 1977.

An application, as summarized below, has been filed requesting relief from the requirements of Section 4 of the Interstate Commerce Act to permit common carriers named or described in the application to maintain higher rates and charges at intermediate points than those sought to be established at more distant points.

Protests to the granting of an application must be prepared in accordance with Rule 40 of the General Rules of Practice (49 CFR 1100.40) and filed within 15 days from the date of publication of this notice in the FEDERAL REGISTER.

FSA No. 43419—*Pipeline Rates—Petroleum Products from the Southwest.* Filed by Williams Pipe Line Company, (No. 9), for interested carriers. Rates on petroleum products, as described in the application, from specified points in Kansas and Oklahoma, to specified points in Missouri, Iowa, and Illinois.

Grounds for relief—Market and carrier competition.

Tariffs—Williams Pipe Line Company tariffs Nos. 4, 6, and 3-B, I.C.C. Nos. 5, 8, and 10, respectively. Rates are published to become effective on September 25, 1977.

FSA No. 43420—*Pipeline Rates—Liquid Fertilizers from the Southwest.* Filed by Williams Pipe Line Company, (No. 10). Rates on liquid fertilizers, as described in the application, from Verdigris (Tulsa), Oklahoma, to Jordan and Greenwood, Indiana, the intermediate points; Dublin, Indiana, the end destination.

Grounds for relief—Motor-water competition.

Tariff—Williams Pipe Line Company tariff No. 7, I.C.C. No. 9. Rates are published to become effective on September 28, 1977.

By the Commission.

H. G. HOMME, Jr.,
Acting Secretary.

[Exemption No. 116; Amdt. 7]

GRAND TRUNK WESTERN RAILROAD CO. AND NORFOLK AND WESTERN RAILWAY CO.

Exemption Under Provision of Rule 19 of the Mandatory Car Service Rules Ordered in Ex Parte No. 241

To: Grand Trunk Western Railroad Co.
Norfolk and Western Railway Co.

Upon further consideration of Exemption No. 116 issued March 8, 1976.

It is ordered, That, under authority vested in me by Car Service Rule 19, Exemption No. 116 to the Mandatory Car Service Rules ordered in Ex Parte No. 241 be, and it is hereby, amended to *expire November 30, 1977.*

This amendment shall become effective August 31, 1977.

Issued at Washington, D.C., August 23, 1977.

INTERSTATE COMMERCE COMMISSION,
JOEL E. BURNS,
Agent.

[No. 36629]

LOUISIANA INTRASTATE TRAFFIC

Demurrage and Storage Charges

In the matter of petition for investigation of demurrage and storage rates and charges within the State of Louisiana.

Petitioners, 15 class I common carriers by railroad [1] subject to Part I of the Interstate Commerce Act and also operating in intrastate commerce in the state of Louisiana, filed a joint petition under section 13(3) of the Interstate Commerce Act on July 11, 1977, requesting that this Commission institute an investigation of Louisiana intrastate demurrage and storage rules, classifications, regulations and practices affecting demurrage and storage rates and charges, under sections 1(6), 13 and 15a of the Interstate Commerce Act, in which petitioners will seek to increase the demurrage and storage rates and charges on Louisiana intrastate freight traffic to those now in effect on interstate freight traffic by changing intrastate storage rules and free time for loading. The proposed results would conform to J. F. Doyle Freight Tariff 4-J.

[1] The Alabama Great Southern Railroad Company, The Arkansas & Louisiana Missouri Railway Company, Chicago Rock Island and Pacific Railroad Company, The Atchison, Topeka and Santa Fe Railway Company, Illinois Central Gulf Railroad Company, The Kansas City Southern Railway Company, Louisiana & Arkansas Railway Company, Louisiana Southern Railway Company, Louisville and Nashville Railroad Company, Missouri Pacific Railroad Company, New Orleans & Lower Coast Railroad Company, New Orleans Terminal Company, St. Louis Southwestern Railway Company, Southern Pacific Transportation Company, and Tremont & Gulf Railway Company.

Petitioners sought the changes in intrastate storage rates in an application filed October 5, 1976, with the Louisiana Public Service Commission. A hearing was held on February 15, 1977, and the application denied on April 27, 1977. Petitioners also sought the changes in demurrage rules for free time by application filed August 27, 1976, with the Louisiana Public Service Commission. A hearing was held on January 20, 1977, and the application denied March 25, 1977. A request for rehearing was denied April 27, 1977. No final action was taken by the State commission within 120 days of the filing of either application.

Petitioners contend that present interstate rail demurrage and storage rates and charges from, to, and within Louisiana are just and reasonable and that the proposed intrastate rates and charges will not exceed a just and reasonable level; that transportation conditions for intrastate traffic in Louisiana are not more favorable than for interstate traffic; that traffic moving subject to present Louisiana intrastate rail demurrage and storage rates and charges fails to provide its fair share of earnings; and that the present Louisiana intrastate rail demurrage and storage charges create undue and unreasonable advantage, preference, and prejudice between persons and localities in intrastate commerce within Louisiana and interstate and foreign commerce, and result in undue, unreasonable, and unjust discrimination against and an undue burden on interstate commerce in violation of sections 13 and 15a of the Interstate Commerce Act, among others, to the extent that they do not conform to those applicable to interstate commerce, as published in J. F. Doyle Freight Tariff 4-J.

Under sections 13(4) and 13(5) of the Interstate Commerce Act, this Commission is directed to institute an investigation into the lawfulness of intrastate rail freight rates and charges, upon filing of a petition by the railroads pursuant to section 13(3) of the Act, after the appropriate State agency has failed to take final action within 120 days after a carrier by railroad has filed with such appropriate State body a change in an intrastate rate, fare, or charge, or a change in a classification, regulation, or practice that has the effect of changing such a rate, fare or charge, for the purpose of adjusting such rate, fare or charge to the rate charged on similar traffic in interstate or foreign commerce. This Commission may act notwithstanding the laws or constitution of any State, or the pendency of any proceeding before any State court or other State authority. The failure of the Public Service Commission of the State of Louisiana to act finally within 120 days of the filing by petitioners of their applications vested exclusive authority in this Commission.

Wherefore, and good cause appearing therefor:

UMI
V 42 171
SEP 2 77
UMI

It is ordered, That the petition be, and it is, hereby granted; and that an investigation, under sections 13 and 15a of the Interstate Commerce Act, be, and it is, hereby instituted to determine whether the Louisiana intrastate rail demurrage and storage rates and charges in any respect cause any unjust discrimination against or any undue burden on interstate or foreign commerce, or cause undue or unreasonable advantage, preference, or prejudice as between interstate or foreign commerce, or are otherwise unlawful, by reason of the failure of such rates and charges to conform to those applicable to interstate commerce, as published in J. F. Doyle Freight Tariff 4–J; and to determine if any rates, charges, classifications, regulations or practices shall be prescribed to remove any unlawful advantage, preference, discrimination, undue burden, or other violation of law, found to exist.

It is further ordered, That all common carriers by railroad operating in the State of Louisiana subject to the jurisdiction of this Commission, be, and they are, hereby made respondents in this proceeding.

It is further ordered, That all persons who wish to participate actively in this proceeding and to file and receive copies of pleadings shall make known that fact by notifying the Office of Proceedings, Room 5342, Interstate Commerce Commission, Washington, D.C. 20423, on or before September 19, 1977. Although individual participation is not precluded, to conserve time and to avoid unnecessary expense, persons having common interests should endeavor to consolidate their presentations to the greatest extent possible. The Commission desires participation of only those who intend to take an active part in the proceeding.

It is further ordered, That as soon as practicable after the date of indicating a desire to participate in the proceeding has passed, the Commission will serve a list of names and addresses of all persons upon whom service of all pleadings must be made and that thereafter this proceeding will be assigned for oral hearing or handling under modified procedure.

And it is further ordered, That a copy of this order be served upon each of the petitioners and respondents herein; that the State of Louisiana be notified of the proceeding by sending copies of this order and of the instant petition by certified mail to the Governor of the State of Louisiana and the Louisiana Public Service Commission; and that further notice of this proceeding be given to the public by depositing a copy of this order in the Office of the Secretary of the Interstate Commerce Commission, at Washington, D.C., and by filing a copy with the Director, Office of the FEDERAL REGISTER, for publication in the FEDERAL REGISTER.

This is not a major Federal Action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969.

Dated at Washington, D.C., this 23rd day of August 1977.

By the Commission, Commissioner Murphy.

H. G. HOMME, Jr.,
Acting Secretary.

[FR Doc.77-25717 Filed 9-1-77;8:45 am]

[No. 36638]

OREGON INTRASTATE FREIGHT RATES AND CHARGES—1977

Petition for Investigation

By the joint petition authorized under section 13(3) of the Interstate Commerce Act, filed July 22, 1977, petitioners, three common carriers by railroad[1] subject to Part I of the Interstate Commerce Act, and also operating in intrastate commerce in the State of Oregon, request that this Commission institute an investigation of their Oregon intrastate freight rates and charges, under sections 13 and 15(a) of the Interstate Commerce Act, wherein they will seek an order authorizing them to increase such rates and charges in the same amounts authorized for interstate application by this Commission in Ex Parte No. 330, Increased Freight Rates—West and Interterritorial 1976, and Ex Parte No. 336, Increased Freight Rates and Charges—1977.

By tariff filed on December 8, 1976, with the Public Utility Commissioner of Oregon, petitioners sought to make the increase granted in Ex Parte No. 330, supra, applicable on Oregon intrastate traffic, effective on January 13, 1977. On January 12, 1977, said Commissioner denied the increase to petitioners. The tariff was suspended until May 12, 1977, and its suspension was renewed until November 12, 1977.

By tariff filed on January 31, 1977, with said Commissioner, petitioners sought to make the increase granted in Ex Parte No. 336, supra, applicable on Oregon intrastate traffic, effective on March 8, 1977. On February 18, 1977, said Commissioner denied the increase to petitioners. The tariff was suspended until July 6, 1977, and its suspension renewed until January 6, 1978.

Petitioners contend that present interstate freight rates from, to, and within Oregon are just and reasonable and that the proposed intrastate rates will not exceed a just and reasonable level; that transportation conditions for intrastate traffic in Oregon are not more favorable than for interstate traffic; that traffic moving under present Oregon intrastate rail freight rates and charges fails to provide its fair share of earnings; and, that the present Oregon intrastate rail freight rates and charges create undue and unreasonable advantage, preference, and prejudice between persons and localities in intrastate commerce within Oregon and interstate and foreign commerce, and result in undue, unreasonable, and unjust discrimination against and an undue burden on interstate commerce in violation of sections 13 and 15(a) of the Interstate Commerce Act, among others, to the extent that they do not include the increases authorized in Ex Parte No. 330, supra, and Ex Parte No. 336, supra.

Under sections 13(4) and 13(5) of the Interstate Commerce Act, this Commission is directed to institute an investigation into the lawfulness of intrastate rail freight rates and charges, upon filing of a petition by a carrier by railroad pursuant to section 13(3) of the act, after the appropriate State agency has reached a final decision or has failed to act within 120 days after a carrier by railroad has filed with such appropriate State body, a change in an intrastate rate, fare, or charge for the purpose of adjusting such rate, fare, or charge to the rate charged on similar traffic moving in interstate or foreign commerce. This Commission may act notwithstanding the laws or constitution of any State, or the pendency of any proceeding before any State court or other State authority.

Wherefore, and good cause appearing therefor:

It is ordered, That the petition be, and it is, hereby granted; and that an investigation under sections 13 and 15(a) of the Interstate Commerce Act be, and it is, hereby instituted to determine whether the Oregon intrastate rail freight rates in any respect cause any unjust discrimination against or any undue burden on interstate or foreign commerce, or cause undue or unreasonable advantage, preference, or prejudice as between interstate or foreign commerce, or are otherwise unlawful, by reason of the failure of such rates and charges to include the full increases authorized for interstate application by this Commission in Ex Parte No. 330, supra, and Ex Parte No. 336, supra; and to determine if any rates or charges, or maximum or minimum charges, or both, shall be prescribed to remove any unlawful advantage, preference, discrimination, undue burden, or other violation of law, found to exist.

It is further ordered, That all common carriers by railroad operating in the State of Oregon subject to the jurisdiction of this Commission, be, and they are, hereby made respondents in this proceeding.

It is further ordered, That all persons who wish to actively participate in this proceeding and to file and receive copies of pleadings shall make known that fact by notifying the Office of Proceedings, Room 5342, Interstate Commerce Commission, Washington, D.C. 20423, on or before September 19, 1977. Although individual participation is not precluded, to conserve time and to avoid unnecessary expense, persons having common interests should endeavor to consolidate their presentations to the greatest extent possible. The Commission desires participation of only those who intend to take an active part in the proceeding.

It is further ordered, That as soon as practicable after the date of indicating a desire to participate in the proceeding

[1] Burlington Northern, Inc., Oregon Electric Railway Company, and Oregon Trunk Railway Company.

has passed, the Commission will serve a list of names and addresses of all persons upon whom service of all pleadings must be made and that thereafter this proceeding will be assigned for oral hearing or handling under modified procedure.

And it is further ordered, That a copy of this order be served upon each of the petitioners and respondents herein; that the State of Oregon be notified of the proceeding by sending copies of this order of the instant petition by certified mail to the Governor of the State of Oregon and the Public Utility Commissioner of Oregon; and that further notice of this proceeding be given to the public by depositing a copy of this order in the Office of the Secretary of the Interstate Commerce Commission, at Washington, D.C., and by filing a copy with the Director, Office of the FEDERAL REGISTER, for publication in the FEDERAL REGISTER.

NOTE.—This is not a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969.

Dated at Washington, D.C., this 24th day of August 1977.

By the Commission, Commissioner Murphy.

H. G. HOMME, Jr.,
Acting Secretary.

[Section 5a Appl. No. 46 (Amdt. 12); and Appl. 49]

SOUTHERN MOTOR CARRIERS RATE CONFERENCE, INC. AND CENTRAL AND SOUTHERN MOTOR FREIGHT TARIFF ASSOCIATION, INC.

Agreement and Notice

AUGUST 25, 1977.

The Commission is in receipt of a joint application for and on behalf of the motor carriers party to the above-entitled agreements for approval of a revised agreement.

Filed August 15, 1977 by:

M. M. Gordon, President, Central and Southern Motor Freight Tariff Assn. Inc., 2722 Crittenden Drive, Louisville, Ky. 40209.
Forrest M. Durrett, President, Southern Motor Carriers Rate Conference, Inc., 1307 Peachtree St., N.E., Atlanta, Ga. 30309.

Of Counsel:

Sol I. Golden, Arnall, Golden and Gregory, Tenth Floor Sutton Federal Bldg., Atlanta, Ga. 30303.
Homer S. Carpenter, Rice, Carpenter and Carraway, 1600 Wilson Blvd., Arlington, Va. 22209.
John Womack, Central and Southern Motor Freight Tariff Association, Inc., P.O. Box 21339, Louisville, Ky. 40209.

The application involves: Proposed merger of the Central and Southern Motor Freight Tariff Association, Inc. into the Southern Motor Carriers Rate Conference, Inc., under revised organization and procedures and broadened territorial scope to encompass rates between southern and central territories; changes to comply with the standards promulgated in Ex Parte No. 297, 349 I.C.C. 811 and 351 I.C.C. 437; and petition for termination of approval in Section 5a Application No. 49, Central and Southern Motor Freight Tariff Association, Inc.—Agreement, upon approval of the revised agreement.

The complete application may be inspected at the Office of the Commission, in Washington, D.C.

Any interested person desiring to protest and participate in this proceeding shall notify the Commission in writing on or before October 3, 1977. As provided by the General Rules of Practice of the Commission, persons other than applicants should fully disclose their interest, and the position they intend to take with respect to the application. Otherwise, the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application, without further or formal hearing.

H. G. HOMME, Jr.,
Acting Secretary.

SECURITIES AND EXCHANGE COMMISSION.

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94-409, that the Securities and Exchange Commission will hold the following meetings during the week of September 5, 1977, Room 825, 500 North Capitol Street, Washington, D.C.

A closed meeting will be held on Wednesday, September 7, 1977, at 10 a.m. An open meeting will be held on Thursday, September 8, 1977, at 10 a.m.

The Commissioners, their legal assistants, the Secretary of the Commission, and recording secretaries will attend the closed meeting. Certain staff members who are responsible for the calendared matters may be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, the items to be considered at the closed meeting may be so considered pursuant to one or more of the exemptions set forth in 5 U.S.C. 552b(c)(4)(8)(9)A and (10) and 17 CFR 200.402(a)(8)(9)(i) and (10).

Chairman Williams, Commissioners Loomis, Evans, and Pollack determined to hold the aforesaid meetings in closed session.

The subject matter of the closed meeting scheduled for Wednesday, September 7, 1977, at 10 a.m. will be:

Formal orders of investigation.

Referral of investigative files to Federal, State or Self Regulatory authorities.

Institution of administrative proceedings.

Institution of injunctive actions.

Matters relating to issuer registration statements.

Regulatory matters arising from or bearing enforcement implications.

Other litigation matters.

The subject matter of the open meeting scheduled for Thursday, September 8, 1977, at 10 a.m. will be:

1. The transmittal to Congress of a legislative proposal to implement the Commission's recommendations in its Final Report on Bank Securities Activities.

2. Request for hearing received on the application of The Vanguard Group, Inc. and the Vanguard Funds for an order which would permit the investment companies to assume the responsibility for and the expenses of the distribution of their shares.

3. Proposal by the Municipal Securities Rulemaking Board (MSRB) to adopt MSRB Rule G-12, which is intended to codify uniform industry practices for the

V 42 171
SEP 2 77
UMI

processing, clearance, and settlement of transactions in municipal securities.

4. Proposal by the Municipal Securities Rulemaking Board (MSRB) to adopt MSRB Rule G–15, which would establish confirmation delivery and disclosure requirements for transactions in municipal securities.

5. Proposed adoption of Form SECO–4–77, which amends the annual assessment schedule for nonmember ("SECO") broker-dealers for fiscal year 1977.

6. Petition for Commission Review filed by The Valley Fair Corporation concerning the denial of the company's request for an extension of time to file an annual report for the fiscal year ended April 24, 1977.

7. Proposed adoption of amendments of Rules 5–02, 5–04, and 12–02 of Regulation S–X, which require more detailed disclosures by commercial and industrial companies of investments in marketable securities and other security investments.

8. Application filed by The Columbia Gas System, Inc. for an order to issue and sell short-term notes and commercial paper and request for hearing by the State of Ohio regarding this application.

CHAPTER X—FEDERAL INSURANCE ADMINISTRATION

SUBCHAPTER B—NATIONAL FLOOD INSURANCE PROGRAM

[Docket No. FI-196]

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for the Village of Ridgewood, N.J.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: On August 24, 1973, the Federal Insurance Administrator published a list of communities for which the Federal Insurance Administration (FIA) published maps identifying Special Flood Hazard Areas. This list included the Village of Ridgewood, N.J. It has been determined by FIA, after further technical review of the Flood Hazard Boundary Map for the Village of Ridgewood, N.J., in light of additional, recently acquired flood information, that certain property (described below) is not within the Special Flood Hazard Area.

This map amendment, by establishing that the subject property is not within the Special Flood Hazard Area, removes the requirement to purchase flood insurance for that property as a condition of Federal or federally-related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: September 2, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202—755–5581 or toll free line 800—424–8872, Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: If a property owner was required to purchase flood insurance as a condition of Federal or federally-related financial assistance for construction or acquisition purposes, and the lender now agrees to waive the property owner from maintaining flood insurance coverage on the basis of this map amendment, the property owner may obtain a full refund of the premium paid for the current policy year, provided that no claim is pending or has been paid on the policy in question during the same policy year. The premium refund may be obtained from the National Flood Insurers Association (NFIA) through the agent or broker who sold the policy.

The text reads as follows:

§ 1920.7 Notice of letter of map amendment.

Map No. H 340067 Panel 03, published on August 24, 1973 in 38 FR 22776, indicates that Lot 11, Block 4015, at 223 Brookside Avenue, Ridgewood, N.J., as recorded in Book 6021, Page 478, in the office of the Clerk of Bergen County, N.J., is within the Special Flood Hazard Area. Map No. H 340067 Panel 03 is hereby corrected to reflect the above property is not within the Special Flood Hazard Area identified on August 31, 1973.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: June 24, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

[Docket No. FI-277]

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for the Borough of Waldwick, N.J.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: On January 9, 1974, the Federal Insurance Administrator published a list of communities for which the Federal Insurance Administration (FIA) published maps identifying Special Flood Hazard Areas. This list included the Borough of Waldwick, N.J. It has been determined by FIA, after further technical review of the Flood Hazard Boundary Map for the Borough of Waldwick, New Jersey, in light of additional, recently acquired flood information, that certain property (described below) is not within the Special Flood Hazard Area.

This map amendment, by establishing that the subject property is not within the Special Flood Hazard Area, removes the requirement to purchase flood insurance for that property as a condition of Federal or Federally-related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: September 2, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or toll free line 800–424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: If a property owner was required to purchase flood insurance as a condition of Federal or federally-related financial assistance for construction or acquisition purposes, and the lender now agrees to waive the property owner from maintaining flood insurance coverage on the basis of this map amendment, the property owner may obtain a full refund of the premium paid for the current policy year, provided that no claim is pending or has been paid on the policy in question during the same policy year. The premium refund may be obtained from the National Flood Insurers Association (NFIA) through the agent or broker who sold the policy.

The text reads as follows:

§ 1920.7 Notice of letter of map amendment.

Map No. H 340078A Panel 02, published on January 9, 1974 in 39 FR 1433, indicates that Lot 19, Block 73G, located at 25 Malcolm Street, Waldwick, N.J., as recorded in Book 6165, Page 359, in the office of the Clerk of Bergen County, N.J., is within the Special Flood Hazard Area. Map No. H 340078A Panel 02 is hereby corrected to reflect the existing structure on the above property is not within the Special Flood Hazard Area identified on January 9, 1974.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: June 24, 1977.

PART 1920—PROCEDURE FOR MAP CORRECTION

[Docket No. FI-297]

Letter of Map Amendment for the City of Mountain View, Calif.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: On June 27, 1974, the Federal Insurance Administrator published a list of communities for which the Federal Insurance Administration (FIA) published maps identifying Special Flood Hazard Areas. This list included the City of Mountain View, Calif. It has been determined by FIA, after further technical review of the Flood Hazard Boundary Map for the City of Mountain View, Calif., in light of additional, recently acquired flood information, that certain property (described below) is not within the Special Flood Hazard Area.

This map amendment, by establishing that the subject property is not within the Special Flood Hazard Area, removes the requirement to purchase flood insurance for that property as a condition of Federal or Federally-related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: September 2, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or toll free line 800–424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: If a property owner was required to purchase flood insurance as a condition of Federal or Federally-related financial assistance for construction or acquisition purposes, and the lender now agrees to waive the property owner from maintaining flood insurance coverage on the basis of this map amendment, the property owner may obtain a full refund of the premium paid for the current policy year, provided that no claim is pending or has been paid on the policy in question during the same policy year. The premium refund may be obtained from the National Flood Insurers Association (NFIA) through the agent or broker who sold the policy.

The text reads as follows:

§ 1920.7 Notice of letter of map amendment.

Map No. H 060347A Panel 05, published on June 27, 1974, in 39 FR 23263, indicates that Lot 33, Montibello Acres, Mountain View, Calif., as recorded in Volume X of Maps, Pages 1 through 3, in the office of the Recorder of Santa Clara County, Calif., is within the Special Flood Hazard Area. Map No. H 060347A Panel 05 is hereby corrected to reflect that the existing structure on the above property is not within the Special Flood Hazard Area identified on June 14, 1974.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: June 24, 1977.

[Docket No. FI-454]

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for Sacramento County, Calif.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: On January 28, 1975, the Federal Insurance Administrator published a list of communities for which the Federal Insurance Administration (FIA) published maps identifying Special Flood Hazard Areas. This list includes Sacramento County, Calif. It has been determined by FIA, after further technical review of the Flood Hazard Boundary Map for Sacramento County, Calif., in light of additional, recently acquired flood information, that certain property (described below) is not within the Special Flood Hazard Area.

This map amendment, by establishing that the subject property is not within the Special Flood Hazard Area, removes the requirement to purchase flood insurance for that property as a condition of Federal or Federally-related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: September 2, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or toll free line 800–424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: If a property owner was required to purchase flood insurance as a condition of Federal or Federally-related financial assistance for construction or acquisition purposes, and the lender now agrees to waive the property owner from maintaining flood insurance coverage on the basis of this map amendment, the property owner may obtain a full refund of the premium paid for the current policy year, provided that no claim is pending or has been paid on the policy in question during the same policy year. The premium refund may be obtained from the National Flood Insurers Association (NFIA) through the agent or broker who sold the policy.

The text reads as follows:

§ 1920.7 Notice of letter of map amendment.

Map No. H 060262 Panel 10, published on January 28, 1975, in 40 FR 4126, indicates that Parcel No. 1, Parcel No. 2 and Parcel No. 3, at 2545 Fulton Avenue, Sacramento County, Calif., as recorded in Book 69–10–01, Pages 280 through 282, in the office of the Recorder of Sacramento County, Calif., is within the Special Flood Hazard Area. Map No. H 060262 Panel 10 is hereby corrected to reflect that existing building Nos. 1 through 7 on the above property are not within the Special Flood Hazard Area identified on January 10, 1975.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; (42 U.S.C. 4001–4128); and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: June 24, 1977.

SUPPLEMENTARY INFORMATION: If a property owner was required to purchase flood insurance as a condition of Federal or Federally related financial assistance for construction or acquisition purposes, and the lender now agrees to waive the property owner from maintaining flood insurance coverage on the basis of this map amendment, the property owner may obtain a full refund of the premium paid for the current policy year, provided that no claim is pending or has been paid on the policy in question during the same policy year. The premium refund may be obtained from the National Flood Insurers Association (NFIA) through the agent or broker who sold the policy.

The text reads as follows:

§ 1920.7 Notice of letter of map amendment.

Map No. H 400385 Panels 03 and 05, published on September 10, 1976 in 41 FR 38501, indicate that Lots 1 through 10, Block 1; Lots 11 through 17, Block 2; Lots 1 through 11, Block 5; and Lots 2 through 10, and 13, Block 4, John Cox 1st Addition, Grove, Okla., as recorded in Book 263B, Pages 450 through 452, in the office of the Clerk of Delaware County, Okla., is within the Special Flood Hazard Area. Map No. H 400385 Panels 03 and 05 are hereby corrected to reflect the above property is not within the Special Flood Hazard Area identified on October 29, 1976.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: June 24, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

PART 1920—PROCEDURE FOR MAP CORRECTION

[Docket No. FI-2600]

Letter of Map Amendment for the City of Arvada, Colo.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: On February 14, 1977, the Federal Insurance Administrator published a list of communities for which the Federal Insurance Administration (FIA) published maps identifying Special Flood Hazard Areas. This list included the city of Arvada, Colo. It has been determined by FIA, after further technical review of the Flood Insurance Rate Map for the city or Arvada, in light of additional, recently acquired flood information, that certain property (described below) is not within the Special Flood Hazard Area.

This map amendment, by establishing that the subject property is not within the Special Flood Hazard Area, removes the requirement to purchase flood insurance for that property as a condition of Federal or federally-related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: September 2, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or toll free line 800–424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: If a property owner was required to purchase flood insurance as a condition of Federal or federally-related financial assistance for construction or acquisition purposes, and the lender now agrees to waive the property owner from maintaining flood insurance coverage on the basis of this map amendment, the property owner may obtain a full refund of the premium paid for the current policy year, provided that no claim is pending or has been paid on the policy in question during the same policy year. The premium refund may be obtained from the National Flood Insurers Association (NFIA) through the agent or broker who sold the policy.

The text reads as follows:

§ 1920.7 Notice of letter of map amendment.

Map No. H&I 085072A Panel 08, published on February 14, 1977 in 42 FR 9110, indicates that Lot 16, Block 1, Park View Subdivision, Arvada, Colo., as recorded in Book 22, Page 3, in the office of the Clerk and Recorder of Jefferson County, Colo., is within the Special Flood Hazard Area. Map No. H&I 085072A Panel 08 is hereby corrected to reflect that the existing structure on the above property is within Zone B and is not within the Special Flood Hazard Area identified on July 13, 1972.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: June 24, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[Docket No. 77N-0222]

NITRATES AND NITRITES IN POULTRY PRODUCTS

Statement of Policy; Request for Data

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Commissioner of Food and Drugs determines that nitrates and nitrites as currently used in manufacturing poultry products are food additives, and he establishes a program for obtaining information required to resolve definitively questions about their safe use. The agency will entertain requests for the issuance of interim food additive regulations authorizing the continued use of nitrates and nitrites in poultry products, if the requests are accompanied by a commitment to conduct testing to demonstrate (1) that the requested uses do not result in the formation of cancer-causing nitrosamines before the food is ingested; (2) that the requested levels of nitrates or nitrites are otherwise safe for human consumption; and (3) that use as a preservative is necessary to prevent the growth of *Clostridium botulinum* and the resulting production of botulinal toxin in the food.

DATE: Written requests for issuance of interim food additive regulations and comments from interested persons must be submitted on or before November 1, 1977.

ADDRESS: Written requests, supporting data and information, and other comments should be submitted (in quadruplicate) to the Hearing Clerk, Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

John J. McAuliffe, Bureau of Foods (HFF-334), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, D.C. 20204 (202-472-5690).

SUPPLEMENTARY INFORMATION: This document sets forth and explains the conclusion of the Commissioner of Food and Drugs that nitrates (sodium nitrate ($NaNO_3$), also known as soda niter, nitrate of soda and chile saltpeter; and potassium nitrate (KNO_3), also known as saltpeter and nitrate of potash) and nitrites (sodium nitrite ($NaNO_2$); potassium nitrite (KNO_2)), if used as preservatives or characterizing ingredients in the manufacture of poultry products, such as smoked poultry, chicken hot dogs, and turkey hams, are considered food additives under section 201(s) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321(s)). The same substances may be color additives under section 201(t) of the act (21 U.S.C. 321(t)), if used essentially for the purpose of affecting color. This notice outlines the conditions under which such substances may continue to be used in poultry products, and establishes a schedule for resolving persistent issues concerning the safety of these substance.

Pursuant to § 180.1 (21 CFR 180.1), the Commissioner will entertain requests for the issuance of interim food additive regulations authorizing the use of nitrates and nitrites in poultry products, pending the conduct of prescribed safety tests. Further, the Commissioner will, in response to proper request, consider the inclusion of nitrates and nitrites on the list of provisionally approved color additives, subject to the conditions specified below. Such requests must be submitted to the Food and Drug Administration (FDA) within 60 days, accompanied by specified information and by commitments to undertake, and report to the agency the results of, three types of safety-related tests. Food or color additive petitions in the format set forth in § 71.1 or § 171.1 (21 CFR 71:1 or 171.1) will also be necessary if these substances are to be considered for long-term approval as food or color additives.

The Commissioner also invites the submission of data and views from any interested person respecting the use of nitrates and nitrites in poultry products, including (1) the need for, and appropriateness of, continued use of nitrates and nitrites in specific types of poultry products, (2) the safety of nitrates and nitrites, and (3) the potential for nitrates or nitrites to form nitrosamines in poultry products prior to their ingestion by humans. The Commissioner is particularly interested in receiving views bearing on the nature of any further long-term testing necessary to resolve conclusively issues about the safety of nitrates and nitrites as curing agents in poultry products.

Comments on this notice, and any pertinent information, should be submitted to the Hearing Clerk at the above address by November 1, 1977, to permit evaluation at the same time that the agency is considering any requests for interim food additive status or provisional color listing.

If the Commissioner receives requests for interim food additive status or provisional color listing supported by reasonable grounds, he will issue proposals to that effect in the FEDERAL REGISTER and invite submission of further comments before taking final action on the requests. Should the Commissioner determine that any requested use of nitrates or nitrites in poultry fails to provide reasonable grounds to support issuance of a proposal, he will deny the request and determine that the use is unlawful. The Commissioner will not permit the use of nitrites in any poultry product in which nitrosamines are found prior to ingestion by humans. However, pending submission of requests for interim food additive status and final action by FDA, current uses of nitrates and nitrites in poultry products will not be regarded by FDA as causing the products to be adulterated under the act.

BACKGROUND

Nitrates and nitrites have long been used in the curing of several types of poultry products, in some instances for at least 30 years. Previously, FDA has considered such uses to be covered by "prior sanctions" issued before September 6, 1958, by the U.S. Department of Agriculture (USDA) under the Poultry Products Inspection Act (21 U.S.C. 451 *et seq.*). Those uses were thus not subject to the food additive provisions of sections 201(s) and 409 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321(s) and 348). On April 22, 1977, and on July 15, 1977, however, the Commissioner received letters from the Assistant Secretary of Agriculture for Food and Consumer Services, Ms. Carol Tucker Foreman, which conclude, based on available information, that USDA had not officially approved the use of nitrates and nitrites in poultry products under the Poultry Products Inspection Act before passage of the Food Additives Amendment of 1958 and that, therefore, such uses are not covered by valid prior sanctions. Assistant Secretary Foreman asked the Commissioner to determine whether use of nitrates and nitrites in poultry products is considered a food additive or color additive use and whether those uses are safe.

The clarification by USDA of its position on the prior sanction status of nitrates and nitrites in poultry products has prompted a reexamination of FDA's own understanding of the status of these compounds, resulting in the issuance of this notice. The Food and Drug Administration has no basis for independently questioning Ms. Foreman's conclusion, and further, the Commissioner believes that the conclusion of USDA about whether it had issued, for these uses, prior sanctions that satisfy the terms of section 201(s) of the act is dispositive.

Furthermore, as a matter of policy the Commissioner has for some time maintained that the category of prior-sanctioned substances used in food represents an anomaly in the law. This anomally justifies a narrow construction of those provisions that shelter compounds used as food additives from the basic requirements of the Food Additives Amendment of 1958. Debate over the prior-sanctioned status of nitrates and nitrites has for too long deflected attention from the central issues on the use of these substances. These issues include (1) whether nitrates or nitrites are useful in reducing the risk of botulism that could result from the ingestion of contaminated poultry products, (2) whether nitrates or nitrites form cancer-causing nitrosamines in poultry products prior to ingestion, and (3) whether nitrates or nitrites are otherwise safe for human consumption. The Commissioner concludes, with Assistant Secretary Foreman, that the time has come to assemble the data required to resolve these questions.

HISTORY OF THE USE OF NITRATES AND NITRITES IN POULTRY PRODUCTS

Nitrates and nitrites have been used for centuries, directly or indirectly, in the curing of meat and poultry. The unique organoleptic qualities of cured meats and some poultry products are often the result of the use of nitrates and nitrites. At the present time nitrates and nitrites are used in the production of such foods to preserve them and to impart the taste, texture, and color that consumers, through long exposure, have come to associate with such foods.

Nitrates (sodium nitrate ($NaNo_3$) and potassium nitrate (KNO_3)) and nitrites (sodium nitrite ($NaNO_2$) and potassium nitrite (KNO_2)) are water soluble inorganic salts. Nitrates are transformed to nitrites in food and in the gastrointestinal tract through bacterial and enzymatic action. It is possible, but as yet not well documented, that nitrates may also be transformed to nitrites in meat by strictly chemical reactions.

Appreciation of the role of nitrates and nitrites in retarding growth of and toxin development by *Clostridium botulinum* has increased over the last 40 years. *C. botulinum* is a microorganism that is ordinarily quite harmless when naturally present in the soil or in the sea. *C. botulinum* becomes a source of concern only when it grows in food; it then produces a toxin which, if ingested, causes botulism, an acute food poisoning marked by a high mortality rate. Nitrates and nitrites have been shown to be effective in inhibiting the growth of *C. botulinum* in chopped ham (Christiansen, L. N., et al., "Effect of Nitrite and Nitrate on Toxin Production by *Clostridium botulinum* and on Nitrosamine Formation in Perishable Canned Comminuted Cured Meat," Applied Microbiology, 25:357 (1973)); in bacon (Christiansen, L. N., et al., "Effect of Sodium Nitrite on Toxin Production by *Clostridium botulinum* in Bacon," Applied Microbiology, 27:733 (1974)); in wieners (Hustad, G. O., et al., "Effect of Sodium Nitrite and Sodium Nitrate on Botulinal Toxin Production and Nitrosamine Formation in Wieners," Applied Microbiology, 26:22 (1973)); in summer style sausage (Christiansen, L. N., et al., "Effect of Sodium Nitrite and Nitrate on *Clostridium botulinum*. Growth and Toxin Production in a Summer Style Sausage," Journal of Food Science, 40:488 (1975)); and in some smoked fish (unpublished data).

Several literature references document the long use of nitrates and nitrites in the curing of poultry products, and reflect the growth of commercial use of these substances. For example, in October 1938, A. K. Besley and S. J. Marsden of the USDA Bureau of Animal Industry, issued (A&D No. 28) "Suggestions for Curing and Smoking Turkeys," and stated: "A suitable curing mixture consists of 6 pounds of salt, 3 pounds of sugar and 2 ounces of saltpeter (potassium nitrate) dissolved in 4½ gallons of water. This pickle contains approximately 13 percent of salt and has a salinometer reading of about 70° at a temperature of 38° F. Experience has shown that about four times this indicated quantity of pickle is required to cover 100 pounds of moderately large, drawn turkeys when packed carefully in a 50-gallon barrel."

In 1941, P. J. Schaible and J. A. Davidson of the Chemistry and Poultry Sections, Michigan Agricultural Station, wrote in "Boning, Curing, and Smoking Poultry Meat," The U.S. Egg and Poultry Magazine, pp. 228-230, and 255-256: "In small numbers, poultry has been cured and smoked for many years on farms. Although the product has not been uniform in appearance or taste and has been high priced, customers have shown sufficient interest to encourage a few firms specializing in unusual meat delicacies to enter the field. Goose breasts and legs have been cured and smoked for some time, but of recent years attention has been directed to turkey." Saltpeter (potassium nitrate) is included in the curing formulations given. In 1941, Besley and Marsden of USDA, in "A Study of Turkey Curing and Smoking," Poultry Science, pp. 496-506, presented some of the experimental evidence obtained in studying the curing and smoking of turkeys. The authors stated: "The presence of saltpeter in the cure resulted in a pink cast to the white meat and a rich, red-colored dark meat, typical of cured lean pork."

In the past few years, many new food products have been developed using poultry in lieu of red meat. Sodium nitrite is used in many of these products, which have the same basic characteristics as red meat items and are known by such names as "Chicken Hot Dogs," "Chicken Franks," and "Turkey Ham." The use of chicken in hot dogs was sanctioned by USDA on October 3, 1969.

It is the responsibility of FDA to evaluate the safety of all additives to foods, including meat, poultry, and egg products, and to publish regulations prescribing safe conditions of use. However, USDA has responsibility for enforcing quantitative restrictions and assuring proper use of additives in meat, poultry, and egg products. Furthermore, USDA has independent authority to prohibit use of food additives in meat and poultry, even though their use may have been approved by FDA.

SAFETY OF NITRATES AND NITRITES IN POULTRY PRODUCTS

Current USDA requirements specify that the use of nitrates, nitrites, or any combination of these, shall not result in more than 200 parts per million (ppm) nitrite, calculated as sodium nitrite, in the finished product (9 CFR 381.147(f)(3)). This apparently was the amount considered necessary to accomplish the desired characterizing and preservative effects.

Nitrates occur in practically all parts of the environment but primarily in water and vegetables. It has been estimated that the drinking water consumed by an average resident in the United States contains 0.7 ppm nitrate and that the average nitrate content of vegetables ranges from 13 ppm in dry beans to 2,760 ppm in beets (White, J. W., Jr., "Relative Significance of Dietary Sources of Nitrate and Nitrite," Journal of Agricultural and Food Chemistry, 23:886 (1975), as corrected in the same journal, 24:202 (1976)). Leafy vegetables such as lettuce, cabbage, and broccoli are also high in nitrates. Nitrates have a very low toxicity that has been reported to be of the same order as the toxicity of sodium chloride (Institute of Food Technologists' Expert Panel on Food Safety and Nutrition, "Nitrites, Nitrates, and Nitrosamines in Food—a Dilemma," Food Technology/Journal of Food Science, 37:989 (1972). Sodium nitrate has been fed to rats up to 10 percent in the diet for their lifetime. Other than some depression in growth at levels above 1 percent, no adverse effects were noted in these animals (Lehman, A. J., "Nitrates and Nitrites in Meat Products," Association of Food and Drug Officials, U.S. Quarterly Bulletin, 22:136 (1958)).

Nitrites, on the other hand, occur less frequently in the environment but are more toxic. In pigs that were fed up to 18.3 milligrams of potassium nitrite per kilogram of body weight there was no effect on weight gain or feed efficiency, but methemoglobinemia (impairment of ability of blood to carry oxygen) was apparent. When fed potassium nitrite at more than 21.3 mg/kg body weight, the pigs died (London, W. T., et al., "An Attempt to Produce Chronic Nitrite Toxicosis in Swine," Journal of the American Veterinary Medical Association, 150:398 (1967)). Methemoglobinemia is also seen in man, particularly in infants accidentially exposed to nitrites (Committee on Nutrition, "Infant Methemoglobinemia. The Role of Dietary Nitrate," Pediatrics, 46:475 (1970)).

Nitrites have not been shown to be carcinogenic or teratogenic at any dose level. However, additional research is currently being carried out. A recent report in Science, 196:1,000 (1977) discussed the mutagenic activity of nitrite-treated foods. Extracts of Japanese raw fish, beef, and hot dogs treated with nitrite were evaluated using the *Salmonella typhimurium* test. The raw fish extracts exhibited mutagenic activity, but the beef and hot dog samples were not mutagenic. Additionally, FDA has supported a dominant lethal study in rats on potassium nitrite and potassium nitrate. These studies, funded under contract to Stanford Research Institute, were recently completed (June 1977). Preliminary conclusions indicate that potassium nitrate is nonmutagenic in the rat, and that potassium nitrite may be a mutagen in the rat at 112, 373, and 1,120 ppm in the diet.

R. Preussman has reviewed the chronic toxicity of nitrites (Proceedings of the International Symposium on Nitrite in Meat Products, held at the Central Institute for Nutrition and Food Research TNO, ZEIST, the Netherlands, September 10-14, 1973, pp. 217-226) and summarizes the work of several investigators. One investigator (Druckery) gave 100 milligrams of nitrite per kilogram of body weight to rats over the lifespan of

V 42 171 SEP 2 77 UMI

three generations. Except for a (probably not significant) shortening of the lifespan and a reduction in hemoglobin concentration, no adverse toxic effects of the treatment were noted; reproduction of treated animals was not affected and no teratogenic effects were observed in the offspring. Another investigator (Sander) added 1 percent sodium nitrite to the diet of rats for 117 days and observed the animals until natural death; he saw no tumors or other serious toxic effect.

An ongoing study with sodium nitrite in the rat is discussed later in this document in connection with a study involving the simultaneous feeding of sodium nitrite and an amine in rats.

Although the values for the ingestion of nitrates and nitrites by the population of the United States are not well documented, J. White ("Relative Significance of Dietary Sources of Nitrate and Nitrite," Journal of Agricultural and Food Chemistry, 23:886 (1975) as corrected in the same journal 24:202 (1976)) has estimated the average daily ingestion of nitrates and nitrites for a United States resident to be 99.8 and 11.22 milligrams, respectively. More than four-fifths of the dietary intake of nitrates is from vegetables and less than one-tenth from cured meats, including poultry products. Three-fourths of the nitrite entering the human stomach originates in saliva, and approximately one-fifth from cured meats including poultry products.

While nitrites have not been shown to be carcinogenic, it is known that nitrites can, under certain conditions, combine with secondary or tertiary amines to form compounds known as nitrosamines. There are many different nitrosamines, some of which are known carcinogens. Nitrosamines have been detected occasionally at low levels in various cured meat products, but not with any consistency in any except fried bacon. Nitrosamines were detected in 3 out of 34 frankfurter samples at 11 to 84 parts per billion (Wasserman, A. E., et al., "Dimethylnitrosamine in Frankfurters," Food and Cosmetics Toxicology, 10:681 (1972)), in 5 out of 59 prepared meat products at 10 to 80 parts per billion (Sen, N. P., "The Evidence of Presence of Dimethylnitrosamine in Meat Products," Food and Cosmetics Toxicology, 10:219 (1972)), and in 1 ham sample out of 51 samples of various meat products, at 5 parts per billion (Fazio, T., et al., "Analysis of Nitrite and/or Nitrate—Processed Meats for N-Nitrosodimethylamine," Journal of the Association of Official Analytical Chemists, 54:1157 (1971)). N-Nitrosopyrolidine was detected in all 22 samples of fried bacon at levels up to 139 parts per billion (Havery, D. C., et al., "Survey of Food Products for Volatile N-Nitrosamines," Journal of the Association of Official Analytical Chemists, 59:540 (1976)). Cured poultry products have not been comprehensively examined to determine whether they contain nitrosamines. Indications of traces of apparent nitrosamines were observed in two of four chicken frankfurter products recently examined in an FDA laboratory.

The mutagenic properties of nitrosamines have been studied extensively in various systems. McCann et al. document nitrosamine compounds which have been shown to be mutagenic in selected bacterial test systems (Proceedings of the National Academy of Sciences of the USA, 72:5135 (1975)).

Nitrosamines have been formed experimentally in the gastrointestinal tracts of mice, rats, and rabbits by simultaneous administration of nitrites and secondary amines. In vitro experiments have shown for both animals and man that nitrosamine formation can occur under conditions normally present in the stomach (Sen, N. P. et al., "Formation of *N*-Nitrosamines from Secondary Amines and Nitrite in Human and Animal Gastric Juice," Food and Cosmetics Toxicology, 7:301 (1969)). It is not known whether this phenomenon is increased or even affected by ingestion of foods containing nitrites. In human subjects with gastric hypoacidity (low stomach acidity) who were administered a drink containing both diphenylamine and sodium nitrate, bacterial reduction of nitrate to nitrite and formation of diphenylnitrosamine (a noncarcinogen) was demonstrated (Sander, J. and F. Seif, "Bacterial Reduction of Nitrate in the Human Stomach, as a Cause of Nitrosamine Formation," Arzneimittel Forschung, 19:1091 (1969)).

Cancer has occurred in laboratory animals in experiments in which high levels of nitrites and secondary amines were fed to the animals. These experiments indicate the possibility of the formation of carcinogenic nitrosamines in the bodies of animals. As would be expected, the levels of nitrites employed in these studies far exceeded the levels commercially used in human foods. A study conducted recently at the Massachusetts Institute of Technology under FDA contract (R. C. Shank and P. M. Newberne, "Dose-Response Study of the Carcinogenicity of Dietary Sodium Nitrite and Morpholine in Rats and Hamsters," Food and Cosmetics Toxicology, 14:1 (1976)), although possibly flawed, has suggested a dose-response relationship for the induction of liver and lung tumors in rats fed combinations of sodium nitrite and morpholine (a cyclic amine) when the nitrite levels in the diet were of the order used in commercially prepared human foods.

The study also suggests, in the rat, a possible relationship between the feeding of sodium nitrite alone and an increased incidence of lymphoreticular tumors. The significance of these tumors is, however, unclear because of a variety of uncertainties with respect to the feeding of nitrite alone in this study. These uncertainties include the possible interaction of nitrite with the semisynthetic diet that was used, the possible influence of the diet itself, and the fact that in this study, as in other studies of combined nitrite and secondary amine, the nitrite group itself represented a control group. Because of these uncertainties, FDA has sponsored an additional study to examine directly the questions of potential nitrite carcinogenicity. This study is nearing completion and to date has shown no indication that sodium nitrite is carcinogenic.

Questions about the potential carcinogenicity of nitrites have persisted for several years, and have dominated discussions about the proper regulatory action on their continued use. In 1973, the Secretary of Agriculture established an Expert Panel on Nitrites, Nitrates, and Nitrosamines, consisting of scientific experts both within and outside government, to advise him whether the use of nitrates and nitrites in the curing of meats and poultry constituted a public health hazard, and if so, whether such use should be restricted or prohibited.

The USDA Expert Panel is to conclude its deliberations in September 1977 and to thereafter make recommendations to the Secretary of USDA. The recommendations will address such considerations as the levels of nitrite in all cured meat products; the formation of nitrosamines and an evaluation of their dangers; evaluation of currently available alternatives to nitrite use; and a review of products, if any, in which nitrites are used solely for color or other organoleptic purposes.

Legal Status of Nitrates and Nitrites in Poultry Products

Section 201(s) of the Federal Food, Drug, and Cosmetic Act defines "food additive" as follows:

> The term "food additive" means any substance the intended use of which results or may reasonably be expected to result, directly or indirectly, in its becoming a component or otherwise affecting the characteristics of any food • • • if such substance is not generally recognized, among experts qualified by scientific training and experience to evaluate its safety, as having been adequately shown through scientific procedures (or, in the case of a substance used in food prior to January 1, 1958, through either scientific procedures or experience based on common use in food) to be safe under the conditions of its intended use; except that such term does not include—
>
> • • • • •
>
> (3) A color additive; or
>
> (4) Any substance used in accordance with a sanction or approval granted prior to the enactment of this paragraph pursuant to this Act, the Poultry Products Inspection Act (21 U.S.C. 451 and the following) or the Meat Inspection Act of March 4, 1907 (34 Stat. 1260), as amended and extended (21 U.S.C. 71 and the following). • • •.

Under this definition, substances sanctioned by USDA for use in poultry products under the Poultry Products Inspection Act prior to the enactment of the Food Additives Amendment of 1958 (September 6, 1958) are not considered "food additives". A substance that is prior-sanctioned need not be covered by an effective food additive regulation in order to be used, nor need its safety have been demonstrated in accordance with modern toxicological standards. If FDA determines that such a substance is not safe, the agency has the burden of demonstrating that it causes foods in which it is used to be adulterated under section 402(a)(1) or (2)(A) of the act (21 U.S.C. 342(a)(1), (2)(A)). Furthermore, because they are not food additives, prior-sanctioned substances are not subject to section 409(c)(3)(A) (the Delaney anticancer clause) of the act (21 U.S.C. 348(c)(3)(A)).

Section 201(t)(1) of the act defines "color additive":

> The term "color additive" means a material which—
>
> (A) Is a dye, pigment, or other substance made by a process of synthesis or similar artifice, or extracted, isolated, or otherwise derived, with or without intermediate or final change of identity, from a vegetable, animal, mineral, or other source and
>
> (B) When added or applied to a food, drug, or cosmetic, or to the human body or any part thereof, is capable (alone or through reaction with other substance) of imparting color thereto; except that such term does not include any material which the Secretary, by regulation, determines is used or intended to be used) solely for a purpose or purposes other than coloring.

This definition makes no provision for continued use of substances that had been sanctioned by FDA or USDA prior to enactment of the Color Additive Amendments of 1960. However, the amendments permited the "provisional listing" and continued use, pending completion of safety testing, of substances meeting the definition of a color additive already in use in food in 1960.

There are no FDA regulations that independently authorize the commercial use of nitrates and nitrites in poultry products, either as food additives or as color additives, nor has FDA itself issued a prior sanction permitting their use. In § 170.60(b) (21 CFR 170.60(b)), FDA regulations do, however, recognize their use, based on the belief that USDA had issued valid prior sanctions.

The longstanding use of nitrates and nitrites in poultry products is reflected in several documents. Ms. Foreman's letter indicates that, as far back as November 20, 1958, USDA authorized the use of nitrates and nitrites for specific purposes in certain poultry products. Additionally, USDA issued the Products Inspection Regulations, published in the Federal Register of May 16, 1972 (37 FR 9706), which include nitrates and nitrites on the list of substances permitted to be used in poultry. Nitrates and nitrites appear under the heading, "Curing agents," for the listed purpose "to fix color" (9 CFR 381.147(f)(3)).

FDA's belief that § 381.147(f)(3) rested on a prior USDA sanction is reflected in FDA's own proposal on nitrates and nitrites published in the Federal Register of November 3, 1972 (37 FR 23456). A portion of that proposal (proposed §§ 121.2007 and 121.2008 (21 CFR 121.-2007 and 121.2008)) would have established regulations recognizing and governing the prior-sanctioned uses of nitrates and nitrites in both meat and poultry products. Proposed §§ 121.2007 and 121.2008 would have listed amounts of nitrates and nitrites for use in poultry, as well as meat products, that coincide with the levels specified in § 381.-147(f)(3) of USDA's Poultry Products Inspection Regulations. Section 170.60(b) (21 CFR 170.60(b)) also reflects FDA's belief that USDA had issued a prior sanction. This FDA regulation explicitly mentions a prior sanction covering the use of nitrates and/or nitrites "in the commercial curing of meat and meat products and poultry products • • •". Thus, although FDA had not issued a prior sanction for nitrates and nitrites in poultry products, the Commissioner believed that USDA, the agency with primary jurisdiction over meat and poultry products, had done so. On this basis, FDA included the prior sanctions in § 170.60 and proposed to include them in §§ 121.2007 and 121.2008.

Assistant Secretary Foreman's April 22, 1977 letter to the Commissioner squarely rebuts the assumption on which FDA had previously operated. The letter states that "(B)ased upon our review of available information, it does not appear that there is such a prior sanction or approval of nitrates and nitrites in poultry products." In the absence of prior sanctions, FDA must determine—as Assistant Secretary Foreman's letter requests—whether there is any other legal basis for the use of nitrates and nitrites in poultry products. Initial inquiry must be directed to the question of whether nitrates and nitrites in poultry products are "food additives" or "color additives", or both, as those terms are defined in section 201 (s) and (t) of the act. The answer depends on the purposes for which the substances are used.

Assistant Secretary Foreman's letter states: "nitrates and nitrites 'impart color' when added to white or brown poultry meat in that nitrates and nitrites cause such poultry meat to turn a reddish color." Nitrates and nitrites added to poultry products would appear, therefore, to meet the definition of a color additive in section 201(t) of the act. Indeed, if nitrates or nitrites are used solely for coloring, they are clearly color additives. However, FDA has not approved a color additive petition for nitrates or nitrites in poultry products under section 706 of the act (21 U.S.C. 376) and neither currently appears on the list of colors provisionally listed for use in food in § 81.1 (21 CFR 81.1)).

On the other hand, consideration of the levels of nitrates and nitrites currently permitted by USDA for use in poultry products suggests that the substances are being used, and have been permitted for use, for purposes in addition to imparting color. Indeed, it would appear that the predominant purposes for which nitrates and nitrites are used in poultry products are other than coloring. The amount of nitrates or nitrites needed to fix color in a poultry product is approximately 20 ppm. Yet USDA regulations under 9 CFR 381.147(f)(3) permit up to 200 ppm nitrates or nitrites in finished poultry products. That level is the amount generally thought necessary to prevent the growth of *Clostridium botulinum* and the formation of toxin, and thus to preserve products in which such formation might occur.

It is well established that when a tolerance is necessary for safe use, no food additive or color additive may be used in food in excess of the amount reasonably required to produce the intended effect; see sections 409(c)(4) and 706(b)(7) of the act (21 U.S.C. 348(c)(4), 376(b)(7)). Thus, although 9 CFR 381.147(f)(3) does not identify preservation or characterizing effects as the purposes for which nitrates and nitrites are used in poultry products, the amounts permitted by USDA suggest that these noncolor uses are, and generally have been, the predominant functions of nitrate and nitrite use.*.

A substance used to preserve food is a food additive unless it falls within one of the exceptions to the statutory definition. The definition of a "food additive" in section 201(s) of the act excludes a number of categories of substances added to food—including substances that were sanctioned by USDA or FDA prior to September 6, 1958, substances generally recognized as safe (GRAS), and color additives. As previously noted, USDA has advised that it had not sanctioned the use of nitrates and nitrites in poultry products prior to the effective date of the Food Additives Amendment of 1958. The Commissioner concludes that nitrates and nitrites used in poultry products are neither prior-sanctioned nor covered by any other exception to the statutory definition of "food additive".

As previously explained, the definition of "food additive" in section 201(s) of the act excludes GRAS substances. While nitrates and nitrites in poultry products may at one time have been considered GRAS, they are not now viewed as GRAS by FDA, nor does the Commissioner have any indication that USDA now considers them to be GRAS.

As noted above, one effect of adding nitrates and nitrites to poultry products is to impart color. The statutory definition of color additive could be read literally to include any substance that imparts color, and the statutory definition of food additive to exclude any substance that is a color additive, thus making the two categories of substances mutually exclusive. The Commissioner does not believe that this result was intended by Congress, and it does not correspond with sound public policy or historical practice under the act. In the Color Additive Amendments of 1960, Congress was amending a statute under which, since 1958, substances used to color food had been treated as food additives or as coal tar dyes. A primary purpose of the Color Additive Amendments of 1960 was to do away with these differences in the treatment of color additives. As stated in the Report of the House Committee on Interstate and Foreign Commerce, accompanying H.R. 7624, the amendments: would do away with the differences in legal require-

V 42 171 SEP 2 77 UMI

ments and treatment as between the so-called coal-tar colors and other color additives, and would establish an integrated and internally consistent basis for determining the admissibility of any coloring material for use in or on foods, drugs, or cosmetics (other than hair dyes). This would be accomplished by excepting color additives (as defined in the bill) from the term "food additive"; repealing the present provisions for listing and certification of coal-tar colors; enacting, as part of a single section (sec. 706), comprehensive provisions for the separate listing of any color additives suitable and safe for general or restricted use in foods, drugs, or cosmetics, and for their certification (or exemption from certification) and making other amendments to the act to mesh with these provisions.

The bill would embrace all color additives whether or not synthesized and whether or not capable of derivation from a coal-tar constituent. From the point of view of determining safety of use, there is no sound scientific basis for distinguishing between a color additive extracted from a plant, animal, or mineral source and one which is synthesized with a chemical structure which will bring it under the term "coal-tar color". The bill would therefore establish common ground rules for all such colors.

There is no evidence in the legislative history of the Color Additive Amendments of 1960 that Congress, when it modified the definition of food additive, intended to exempt additives to foods that are used primarily for a purpose other than coloring but also satisfy the sweeping definition of color additive. Rather, the intent appears to have been to exempt those substances used solely as color additives from the definition of food additives so that petitioners for "non-coal-tar" colors would be relieved of the burden of having to demonstrate safety twice, under both the food additive and the color additive provisions of the act.

Section 70.3(g) of the FDA color additive regulations (21 CFR 70.3(g)) has been interpreted consistently with the recognition that a substance may be both a food additive and a color additive, reflecting the fact that some ingredients added to food may serve more than one technological purpose. Thus, the exception for color additives in section 201(s) does not preclude a substance from being both a color additive and a food additive, depending on its uses and effects, and therefore subject to the requirements of both sections 409 and 706 of the act.

Therefore, nitrates and nitrites, when used in poultry products at levels necessary to accomplish their preservative effect, are food additives within the meaning of section 201(s) of the act. No food additive petition for the use of nitrates and nitrites as a preservative in poultry products, however, has been approved by FDA. Furthermore, as previously noted, neither nitrates nor nitrites are currently approved as color additives or listed among the colors provisionally authorized for use in food.

It might be argued that, under these circumstances, a literal reading of the act requires immediate termination of the use of nitrates and nitrites in all poultry products. In the Commissioner's judgment, however, such precipitous action would fail to take into account the important health benefits that preservatives provide in preventing botulism, and therefore such action may not be warranted for the protection of the public health. Although significant safety issues have been raised about the use of nitrates and nitrites, their immediate elimination from all poultry and meat products would likewise pose serious safety concerns.

Some current uses of nitrates and nitrites may not be necessary to prevent the growth of *Clostridium botulinum*. There may also be uses in poultry that result in the formation of nitrosamines in foods before they are eaten. Consequently, the Commissioner believes that the immediate objective of both USDA and FDA should be to eliminate all nonpreservative uses of nitrates and nitrites for which substantial evidence of safety is lacking. This document is directed to this end and to establish a schedule for the completion of any further testing needed to resolve the questions of the safety of the addition of nitrates and nitrites to poultry products where nitrosamines are not performed, and to identify, and eliminate, any uses in poultry that result in preformed cancer-causing nitrosamines.

In the past, when the Commissioner has been reasonably certain that a substance with a long history of use may continue to be used safely, FDA has issued an interim food additive regulation that permits continued but limited use while required data are accumulated to enable the agency to make a final decision about the approvability of the substance (see 21 CFR Part 180).

The Commissioner has reached no final judgment about whether an interim food additive regulation covering even restricted uses of nitrates and nitrites in poultry products would be appropriate. However, he will consider proposing to establish an interim food additive regulation if USDA or other interested parties submit appropriate requests. The criteria for issuing an interim food additive regulation are set forth in § 180.1. Requests must address each criterion and provide all pertinent data and information needed to enable the agency to evaluate fully the request. The information required is more fully described in the concluding section of this notice.

The authority of FDA to issue interim food additive regulations permitting continued use of substances about which safety questions have been raised pending the accumulation of data to resolve those questions has been judicially upheld (*Jacobson v. Edwards*, Civil Action No. 445-71 (D.D.C. July 6, 1971), CCH FDC Reports paragraph 40, 817, p. 42, 114, *aff'd* No. 71-2046 (D.C. Cir. Dec. 15, 1972)).

Agency regulations make no provision for the issuance of "interim color additive regulations," however, and some question might be raised about FDA authority to add a substance to the provisional list of colors for the first time in 1977, some 17 years after the passage of the Color Additive Amendments of 1960. Although the Commissioner would have reservations about placing nitrates and nitrites on the provisional list at this late date, it is his opinion, upon careful consideration of the provisions and history of the 1960 amendments, that under appropriate circumstances, nitrates and nitrites could lawfully be so added. The legality of such action, however, is but one issue to be addressed. Clearly, the more important issue is whether nitrates and nitrites used as color additives are or would be safe. The Commissioner has no reason at the present time to propose the addition of nitrates and nitrites to the provisional list of colors. So far as he is now aware, neither type of substance is being used in poultry products solely for the purpose of affecting color. While some current users of nitrates and nitrites in poultry products undoubtedly desire the coloring effect of nitrates and nitrites used for preservation, FDA has not historically required dual approval of additives used for purposes that also affect color.

The Commissioner therefore will not require the submission of companion requests for both interim food additive status and provisional color listing for any use of nitrates or nitrites as a preservative or characterizing ingredient in poultry products.

The Commissioner would consider petitions for the "permanent" listing of nitrates or nitrites used solely for the purpose of coloring, at levels no higher than necessary to accomplish a coloring effect. If, contrary to his current understanding, nitrates and nitrites are currently being used in poultry products essentially as color additives, the Commissioner would also entertain requests for their provisional listing as color additives, subject to the following conditions: (1) A petition for "permanent" listing is filed simultaneously; (2) the requested color additive uses are ones that were in commercial use prior to July 12, 1960; (3) the Commissioner can be satisfied that provisional listing would pose no significant risk to public health; and (4) the request is accompanied by a commitment promptly to conduct the studies necessary to establish the safe conditions of use.

Issues on Which Data and Views Are Requested

The most important criterion for issuance of an interim food additive regulation under § 180.1 is the assurance that continued use of a substance will pose no significant risk to the health of consumers. In determining whether, for any uses in poultry products, nitrates and nitrites satisfy this criterion, the Commissioner will consider all information submitted with any requests for interim food additive status or for provisional color additive listing. He will also welcome views and scientific data submitted

by other interested persons and organizations, including the USDA Expert Panel that is considering the uses of nitrates and nitrites in curing meat and poultry products.

Before concluding that continued use of nitrates or nitrites in a product does not pose a significant risk to human health, the Commisioner must be satisfied that such use does not result in the formation of cancer-causing nitrosamines in the food before it is ingested, regardless of whether such formation occurs during production or when the product is prepared for eating. In addition, the Commissioner will carefully evaluate all available data relating to the toxicity of nitrates and nitrites when directly ingested.

To assist persons who wish to comment on, or submit data concerning, the policy announced in this document, the Commissioner has identified several questions on which the agency specifically requests information and advice:

(1) To what extent is botulinal toxin a genuine concern in poultry products? Which products?

(2) To what extent are nitrates and nitrites effective in preventing the growth of *C. botulinum* and formation of botulinal toxin in poultry products? Are there other compounds that would be equally effective? What levels of nitrates and nitrites are needed to prevent the growth of *C. botulinum* and formation of botulinal toxin?

(3) What is the chemical action of nitrates/nitrites in poultry products?

(4) What is the biochemical mechanism of the coloring or color-fixing properties of nitrates and nitrites?

(5) What additional studies are necessary to resolve the foregoing questions, as well as the outstanding safety issues discussed above?

The Commissioner advises that he will entertain requests for the issuance of interim food additive regulations or for provisional listing as a color additive. To the extent that the types of data identified in questions (1) through (4) above cannot be presented in response to this notice, requestors must express a willingness to commit themselves to conduct any studies that are necessary for resolution of the unanswered questions within a reasonable period of time. This requirement would obviously extend to any studies identified in the comments received in response to question (5).

A request for an interim food additive regulation is not required to be accompanied by a request for provisional listing and a petition for "permanent" listing as a color additive to support a coloring effect that is a consequence of the food additive use for which the request is filed. The Commissioner concludes that any request providing sufficient supporting grounds for the proposal of an interim food additive regulation would at the same time be sufficient to support the safety of any coloring effect.

Therefore, the Commissioner does not, at this time, perceive any useful purpose to be served by requiring an accompanying color additive petition in these circumstances. If the Commissioner should conclude that additional information is needed with respect to any coloring effect, he would require further submissions in the future.

Dated: August 25, 1977.

DONALD KENNEDY,
Commissioner of Food and Drugs.

Title 29—Labor

CHAPTER XXV—EMPLOYEE BENEFITS SECURITY OFFICE, DEPARTMENT OF LABOR

PART 2550—RULES AND REGULATIONS FOR FIDUCIARY RESPONSIBILITY

Exemption for Loans to Employee Stock Ownership Plans

AGENCY: Department of Labor.

ACTION: Final regulations.

SUMMARY: These regulations under sections 408(b)(3), 407(d)(5) and 407(d)(6) of the Employee Retirement Income Security Act of 1974 (the Act) set forth requirements relating to the exemption for loans to employee stock ownership plans (ESOPs), the definition of the term employee stock ownership plan and the definition of the term qualifying employer security. These regulations are intended to provide guidance for the public in complying with the law. They affect all employees who are participants in an ESOP and all employers who establish ESOPs.

EFFECTIVE: Generally effective for plan years ending after December 31, 1974.

FOR FURTHER INFORMATION CONTACT:

Rhea Schwartz, Department of Labor, Room C–4508, 200 Constitution Avenue, NW., Washington, D.C. 20210 (202–523–6855).

SUPPLEMENTARY INFORMATION:

Background

On July 30, 1976, the Department of Labor (the Department) published in the FEDERAL REGISTER (41 FR 31870), a proposal to adopt regulations 29 CFR 2550.408b–3, 2550.407d–5 and 2550.407d–6 under section 408(b)(3), 407(d)(5) and 407(d)(6) of the Act. Similar Internal Revenue Service provisions appeared at the same time (41 FR 31833).

By notice published in the FEDERAL REGISTER on October 19, 1976, the public was invited to comment orally or in writing not only upon issues addressed in the proposed regulations, but also upon issues addressed by section 803(h) of the Tax Reform Act of 1976 (90 Stat. 1590) and by the Conference Report of the Committee of Conference on H.R. 10612 (H.R. Rep. No. 94–1515, 94th Cong., 2d Sess., 539–542 (1976)), as both relate to ESOPs. A public hearing was held on November 12, 1976.

Both substantive and structural changes in the proposed regulations were made after consideration of all the comments received. Thus, the regulations, as adopted, differ considerably from the proposed regulations. Certain provisions have been added. Others are restructured or deleted. However, many changes are designed solely to simplify the regulations. Therefore, no substantive inference should be drawn solely from the fact that a particular proposed provision has been either deleted or restructured.

Major Substantive Deletions

Special requirements for use of loan proceeds

Several comments suggest major revisions to proposed sections 2550.408b–(3)(b)(1)(ii) (B) through (F). These provisions relate to requirements with respect to voting stock; non-voting common stock, preferred stock and other equity securities; unrestricted dividend rights; and to the overall limitation on employer securities (other than certain common stock or convertible securities) acquired with loan proceeds. The majority recommended deletion. This document makes the deletion.

However, this deletion does not mean that the Department is unconcerned with the nature of securities acquired by an ESOP with the proceeds of an exempt loan. The acquisition of securities by an ESOP will be judged under the requirements of section 404(a)(1) of the Act.

Major Substantive Additions

Rights of first refusal

Section 2550.408b–3(i) is added under the regulations, as adopted, to permit an ESOP to acquire employer securities that are subject to a right of first refusal.

Many comments stress the necessity of a right of first refusal to protect small, closely-held corporations, whose securities are not publicly traded, from dilution of control, takeovers by competitors and inadvertent "going public". The regulations, as adopted, reflect the comments by permitting a 14-day right of first refusal in favor of the employer, the ESOP, or both. However, the securities subject to a right of first refusal must not be publicly traded at the time the right of first refusal is sought to be exercised. Also, the selling price and other terms of the purchase under such a right of first refusal must be not less favorable to the seller of such securities than the greater of the fair market value of the securities or the purchase price and other terms offered by a third party buyer making a good faith offer.

Major Revisions

(1) *Definition of "Publicly Traded"*

In response to a number of comments, the concept of "publicly traded" is expanded under the regulations, as adopted, to include securities quoted on a system sponsored by a national securities association registered under section 15A(b) of the Securities Exchange Act. The primary effect of this change is to limit the extent to which a put option is required.

(2) *Scope of ESOP Loan Exemption*

Many comments suggest that the proposed amendment limiting the scope of the ESOP loan exemption to the prohibitions of section 406(a) of the Act is not supported by the Act or its legislative history. The same criticism is made concerning the requirement that loans involving fiduciary self-dealing must be arranged and approved by an independent fiduciary.

Based upon a review of the comments and the legislative history, the scope of the ESOP loan exemption is expanded under the regulations, as adopted. The only prohibited transactions to which the exemption under section 408(b)(3) does not apply are those arising under section 406(b)(3), relating to the receipt by a fiduciary of any consideration for his own personal account from a party dealing with a plan. Also, the independent fiduciary requirement is eliminated under the regulations, as adopted.

The ERISA Conference Report states that, because of potential problems with respect to ESOP loans by parties in interest, "the conferees intend that all aspects of these transactions will be subject to special scrutiny by the Department of Labor and the Internal Revenue Service to ensure that they are primarily for the benefit of plan participants and beneficiaries" (H.R. Rep. No. 93–1280, 93d Cong., 2d Sess., 313 (1974)). The regulations, as adopted, make it clear that the "special scrutiny" for ESOP transactions referred to by the conferees is not meant to require an administrative exemption for loans by fiduciaries. Rather, the language is interpreted as requiring the careful examination of these transactions to ensure that they are primarily for the benefit of participants and their beneficiaries and that they satisfy the requirements of section 404(a)(1) of the Act.

(3) *Primary Benefit Requirement*

The requirement that a loan to an ESOP be made primarily for the benefit of participants and beneficiaries of the plan is expressed with greater specificity under the regulations, as adopted. In response to comments requesting clarification of this provision, two tests are added under § 2550.408b–3(c) to illustrate how a determination can be made with respect to whether a transaction meets the primary benefit requirement. The first test, derived from the ERISA Conference Report, involves a determination based upon the projected net effect of the loan on the ESOP over the duration of the transaction (See ERISA Conference Report, p. 313). The second test requires that the terms of an ESOP loan be at least as favorable as a comparable loan resulting from arm's-length negotiations involving independent parties.

(4) *Default*

The proposed regulations restrict the transfer of plan assets in the event of default to a failure to meet the loan payment schedule. As suggested in the comments, the regulations, as adopted, are less restrictive. The limitation on the transfer of plan assets in the event of default applies only to loans in which the party in interest extends credit in a form other than a guarantee.

(5) *Release from encumbrance*

The proposed regulations require securities to be released from encumbrance in at least equal annual amounts. This rule is eliminated from the regulations,

as adopted, because, as pointed out in the comments, it is unnecessarily rigid. Instead, the regulations, as adopted, now provide, as a general rule, for release of securities from encumbrance as principal and interest are paid. Also, an alternative rule now permits release from encumbrance with reference to principal payments only. In the case of loans made after November 1, 1977, the alternative applies only to loans with a term of ten years or less that require payments at a cumulative rate not less rapid than level annual payments. In these cases, interest payments will not be disregarded unless based on standard loan amortization tables.

The regulations, as adopted, note that the release of securities in unequal annual amounts may reflect conditions causing plan disqualification if contributions are not substantial and recurring or if the limitations on annual additions under section 415 of the Code are exceeded.

(6) *Put Options*

The comments address various aspects of the put option provision of the proposed regulation. Several comments express concern over the strain on an employer's cash supply that could result from the continuous exercise of put options by participants, unless installment payments were permissible. Others point out that under certain circumstances, the corporate laws of several states prohibit corporations from purchasing their own securities, and that certain corporations, e.g., banks, may be absolutely prohibited by law from issuing put options.

The regulations, as adopted, relating to put options reflect many of these comments. Therefore, they differ considerably from the proposed regulations.

The regulations, as adopted, address the problem that arises if an employer is prohibited by law from honoring a put option. In such cases, a third party other than the ESOP must be bound to honor the put option. They also make it clear that the ESOP must not be bound under any circumstances to honor a put option. However, it may be granted the option to assume the rights and obligations of the employer at the time that the put option is exercised.

The minimum duration of the put option is reduced to fifteen months. However, if, for example, the employer or a designated third party were prohibited by law from honoring a put option, the fifteen-month period runs only when the legal restriction ceases to apply. Also, a security not subject to a put option when distributed must be subject to the requirements for put options, if, for example, it ceases to be publicly traded within 15 months after distribution.

Other new put option provisions include a limitation on the number of years over which periodic payments under a put option may be spread and a prohibition of certain payment restrictions. Also, the scope of the put option requirement is expanded to include publicly traded securities that are not freely tradable because of certain restrictions.

(7) *Special Rules for Certain Exempt Loans*

A number of comments indicate the need to permit retroactive amendment to certain ESOP loans to prevent inadvertent prohibited transactions in loan agreements consummated in good faith prior to the publication of the regulations, as adopted. In light of these comments, the proposed regulations are modified to provide transitional relief.

The regulations, as adopted, provide special rules for loans entered into before January 1, 1976. These loans are not subject to the provisions relating to puts, calls or other options, buy-sell or similar arrangements; liability of ESOPs; default; release from encumbrance; rights of first refusal; put options; and other loan terms. They are subject to the remaining provisions of the regulation because these provisions could be reasonably anticipated by reading the statutory provisions relating to ESOPs.

Other special rules apply more restrictively to loans made between January 1, 1976 and November 1, 1977. These additional restrictions embody provisions contained in Technical Information Release 1413, guidelines relating to ESOPs, published on November 4, 1975 (1975–50 I.R.B. 16). However, these special rules would allow an ESOP loan made during such period to be exempt for the entire loan period even though such loan fails to satisfy the three additional provisions under the special rule for release from encumbrance, or the provisions relating to rights of first refusal and default.

In addition, a loan may be retroactively amended under the regulations, as adopted, to comply with the default and put option provisions. Under the special rule for put options, a security distributed without a put option will satisfy the regulations, as adopted, as of the date of distribution if by November 1, 1977 the security becomes subject to a put option satisfying the regulations. The 15-month period for the duration of the put option begins with the date on which the security becomes subject to the put option.

(8) *Valuation of Securities Subject to Rights of First Refusal and Put Options*

The selling price of a security subject to a right of first refusal must be no less favorable to the plan than the greater of the price offered by a buyer, other than the employer or the ESOP, making a good faith offer to purchase the security, or the fair market value determined under 26 CFR 54.4975–11(d)(5). The price at which a put option must be exercisable is the fair market value of the security determined in accordance with 26 CFR 54.4975–11(d)(5).

Definition of the Term "Employee Stock Ownership Plan"

Section 407(d)(6) of the Act defines the term "employee stock ownership plan" and § 2550.407d–6 contains requirements that a plan must meet under section 407(d)(6). In addition, § 2550.–407d–6 of the regulations, as adopted, provides that ESOPs must comply with such other requirements as the Secretary of the Treasury adopts by regulation under section 4975(e)(7) of the Internal Revenue Code (see 26 CFR 54.–4975–11)(a) through (f) in this issue of the FEDERAL REGISTER).

Definition of Qualifying Employer Security

The term "other equity security" is included in the definition of "qualifying employer security" under the Code but not under section 407(d)(5) of the Act. The proposed regulations are silent on this difference. One comment suggests that this difference is of substantive significance. Since insufficient justification is offered in support of this suggestion, no change is made.

The regulations set forth below are adopted pursuant to the authority contained in section 505 of the Act (Pub. L. 93–406, 88 Stat. (29 U.S.C. 1135)).

Accordingly, Part 2550 of Chapter XXV of Title 29 of the Code of Federal Regulations is amended by inserting §§ 2550.408b–3, 2550.407d–5 and 2550.–407d–6 as set forth below:

Paragraph 1. § 2550.408b–3 is inserted in the appropriate place to read as set forth below:

§ 2550.408b–3 Loans to Employee Stock Ownership Plans.

(a) *Definitions.* When used in this section, the terms listed below have the following meanings:

(1) *ESOP.* The term "ESOP" refers to an employee stock ownership plan that meets the requirements of section 407(d)(6) of the Employee Retirement Income Security Act of 1974 (the Act) and 29 CFR 2550.407d–6. It is not synonymous with "stock bonus plan." A stock bonus plan must, however, be an ESOP to engage in an exempt loan. The qualification of an ESOP under section 401(a) of the Internal Revenue Code (the Code) and 26 CFR 54.4975–11 will not be adversely affected merely because it engages in a non-exempt loan.

(2) *Loan.* The term "loan" refers to a loan made to an ESOP by a party in interest or a loan to an ESOP which is guaranteed by a party in interest. It includes a direct loan of cash, a purchase-money transaction, and an assumption of the obligation of an ESOP. "Guarantee" includes an unsecured guarantee and the use of assets of a party in interest as collateral for a loan, even though the use of assets may not be a guarantee under applicable state law. An amendment of a loan in order to qualify as an exempt loan is not a refinancing of the loan or the making of another loan.

(3) *Exempt loan.* The term "exempt loan" refers to a loan that satisfies the provisions of this section. A "non-exempt loan" is one that fails to satisfy such provisions.

(4) *Publicly traded.* The term "publicly traded" refers to a security that is listed on a national securities exchange registered under section 6 of the Securities Exchange Act of 1934 (15 U.S.C. 78f) or that is quoted on a system sponsored by a national securities association regis-

V 42 171
SEP 2 77
UMI

tered under section 15 A(b) of the Securities Exchange Act (15 U.S.C. 78o).

(5) *Qualifying employer security.* The term "qualifying employer security" refers to a security described in 29 CFR 2550.407d–5.

(b) *Statutory exemption*—(1) *Scope.* Section 408(b)(3) of the Act provides an exemption from the prohibited transaction provisions of sections 406(a) and 406(b)(1) of the Act (relating to fiduciaries dealing with the assets of plans in their own interest or for their own account) and 406(b)(2) of the Act (relating to fiduciaries in their individual or in any other capacity acting in any transaction involving the plan on behalf of a party (or representing a party) whose interests are adverse to the interests of the plan or the interests of its participants or beneficiaries). Section 406(b)(3) does not provide an exemption from the prohibitions of section 406(b)(3) of the Act (relating to fiduciaries receiving consideration for their own personal account from any party dealing with a plan in connection with a transaction involving the income or assets of the plan).

(2) *Special scrutiny of transaction.* The exemption under section 408(b)(3) includes within its scope certain transactions in which the potential for self-dealing by fiduciaries exists and in which the interests of fiduciaries may conflict with the interests of participants. To guard against these potential abuses, the Department of Labor will subject these transactions to special scrutiny to ensure that they are primarily for the benefit of participants and their beneficiaries. Although the transactions need not be arranged and approved by an independent fiduciary, fiduciaries are cautioned to scrupulously exercise their discretion in approving them. For example, fiduciaries should be prepared to demonstrate compliance with the net effect test and the arm's-length standard under paragraphs (c)(2) and (3) of this section. Also, fiduciaries should determine that the transaction is truly arranged primarily in the interest of participants and their beneficiaries rather than, for example, in the interest of certain selling shareholders.

(c) *Primary benefit requirement*—(1) *In general.* An exempt loan must be primarily for the benefit of the ESOP participants and their beneficiaries. All the surrounding facts and circumstances, including those described in paragraphs (c)(2) and (3) of this section, will be considered in determining whether such loan satisfies this requirement. However, no loan will satisfy such requirement unless it satisfies the requirements of paragraphs (d), (e) and (f) of this section.

(2) *Net effect on plan assets.* At the time that a loan is made, the interest rate for the loan and the price of securities to be acquired with the loan proceeds should not be such that plan assets might be drained off.

(3) *Arm's-length standard.* The terms of a loan, whether or not between independent parties, must, at the time the loan is made, be at least as favorable to the ESOP as the terms of a comparable loan resulting from arm's-length negotiations between independent parties.

(d) *Use of loan proceeds.* The proceeds of an exempt loan must be used, within a reasonable time after their receipt, by the borrowing ESOP only for any or all of the following purposes:

(1) To acquire qualifying employer securities.

(2) To repay such loan.

(3) To repay a prior exempt loan. A new loan, the proceeds of which are so used, must satisfy the provisions of this section.

Except as provided in paragraphs (l) and (j) of this section or as otherwise required by applicable law, no security acquired with the proceeds of an exempt loan may be subject to a put, call, or other option, or buy-sell or similar arrangement while held by and when distributed from a plan, whether or not the plan is then an ESOP.

(e) *Liability and collateral of ESOP for loan.* An exempt loan must be without recourse against the ESOP. Furthermore, the only assets of the ESOP that may be given as collateral on an exempt loan are qualifying employer securities of two classes: those acquired with the proceeds of the exempt loan and those that were used as collateral on a prior exempt loan repaid with the proceeds of the current exempt loan. No person entitled to payment under the exempt loan shall have any right to assets of the ESOP other than:

(1) Collateral given for the loan,

(2) Contributions (other than contributions of employer securities) that are made under an ESOP to meet its obligations under the loan, and

(3) Earnings attributable to such collateral and the investment of such contributions.

The payments made with respect to an exempt loan by the ESOP during a plan year must not exceed an amount equal to the sum of such contributions and earnings received during or prior to the year less such payments in prior years. Such contributions and earnings must be accounted for separately in the books of account of the ESOP until the loan is repaid.

(f) *Default.* In the event of default upon an exempt loan, the value of plan assets transferred in satisfaction of the loan must not exceed the amount of default. If the lender is a party in interest, a loan must provide for a transfer of plan assets upon default only upon, and to the extent of the failure of the plan to meet the payment schedule of the loan. For purposes of this paragraph, the making of a guarantee does not make a person a lender.

(g) *Reasonable rate of interest.* The interest rate of a loan must not be in excess of a reasonable rate of interest. All relevant factors will be considered in determining a reasonable rate of interest, including the amount and duration of the loan, the security and guarantee (if any) involved, the credit standing of the ESOP and the guarantor (if any), and the interest rate prevailing for comparable loans. When these factors are considered, a variable interest rate may be reasonable.

(h) *Release from encumbrance*—(1) *General rule.* In general, an exempt loan must provide for the release from encumbrance of plan assets used as collateral for the loan under this paragraph. For each plan year during the duration of the loan, the number of securities released must equal the number of encumbered securities held immediately before release for the current plan year multiplied by a fraction. The numerator of the fraction is the amount of principal and interest paid for the year. The denominator of the fraction is the sum of the numerator plus the principal and interest to be paid for all future years. See § 2550.408b–3(h)(4). The number of future years under the loan must be definitely ascertainable and must be determined without taking into account any possible extensions or renewal periods. If the interest rate under the loan is variable, the interest to be paid in future years must be computed by using the interest rate applicable as of the end of the plan year. If collateral includes more than one class of securities, the number of securities of each class to be released for a plan year must be determined by applying the same fraction to each class.

(2) *Special rule.* A loan will not fail to be exempt merely because the number of securities to be released from encumbrance is determined solely with reference to principal payments. However, if release is determined with reference to principal payments only, the following three additional rules apply. The first rule is that the loan must provide for annual payments of principal and interest at a cumulative rate that is not less rapid at any time than level annual payments of such amounts for 10 years. The second rule is that interest included in any payment is disregarded only to the extent that it would be determined to be interest under standard loan amortization tables. The third rule is that subdivision (2) is not applicable from the time that, by reason of a renewal, extension, or refining, the sum of the expired duration of the exempt loan, the renewal period, the extension period, and the duration of a new exempt loan exceeds 10 years.

(3) *Caution against plan disqualification.* Under an exempt loan, the number of securities released from encumbrance may vary from year to year. The release of securities depends upon certain employer contributions and earnings under the ESOP. Under 26 CFR 54.4975–11(d)(2) actual allocations to participants' accounts are based upon assets withdrawn from the suspense account. Nevertheless, for purposes of applying the limitations under section 415 of the Code to these allocations, under 26 CFR 54.4975–11(a)(8)(ii) contributions used by the ESOP to pay the loan are treated as annual additions to participants' accounts. Therefore, particular caution must be exercised to avoid exceeding the maximum annual additions under section 415 of the

Code. At the same time, release from encumbrance in annually varying numbers may reflect a failure on the part of the employer to make substantial and recurring contributions to the ESOP which will lead to loss of qualification under section 401(a) of the Code. The Internal Revenue Service will observe closely the operation of ESOPs that release encumbered securities in varying annual amounts, particularly those that provide for the deferral of loan payments or for balloon payments. See 26 CFR 54.4975–7(b)(8)(iii).

(4) *Illustration.* The general rule under paragraph (h)(1) of this section operates as illustrated in the following example:

Example. Corporation X establishes an ESOP that borrows $750,000 from a bank. X guarantees the loan which is for 15 years at 5% interest and is payable in level annual amounts of $72,256.72. Total payments on the loan are $1,083,850.80. The ESOP uses the entire proceeds of the loan to acquire 15,000 shares of X stock which is used as collateral for the loan. The number of securities to be released for the first year is 1,000 shares, i.e., 15,000 shares × $72,256.72/$1,083,850.80 = 15,000 shares × 1/15. The number of securities to be released for the second year is 1,000 shares, i.e., 14,000 shares × $72,256.72/$1,011,594.08 = 14,000 shares × 1/14. If all loan payments are made as originally scheduled, the number of securities released in each succeeding year of the loan will also be 1,000.

(i) *Right of first refusal.* Qualifying employer securities acquired with proceeds of an exempt loan may, but need not, be subject to a right of first refusal. However, any such right must meet the requirements of this paragraph. Securities subject to such right must be stock or an equity security, or a debt security convertible into stock or an equity security. Also, they must not be publicly traded at the time the right may be exercised. The right of first refusal must be in favor of the employer, the ESOP, or both in any order of priority. The selling price and other terms under the right must not be less favorable to the seller than the greater of the value of the security determined under 26 CFR 54.4975–11(d)(5), or the purchase price and other terms offered by a buyer, other than the employer or the ESOP, making a good faith offer to purchase the security. The right of first refusal must lapse no later than 14 days after the security holder gives written notice to the holder of the right that an offer by a third party to purchase the security has been received.

(j) *Put option.* A qualifying employer security acquired with the proceeds of an exempt loan by an ESOP after September 30, 1976, must be subject to a put option if it is not publicly traded when distributed or if it is subject to a trading limitation when distributed. For purposes of this paragraph, a "trading limitation" on a security is a restriction under any Federal or State securities law or any regulation thereunder, or an agreement (not prohibited by this section) affecting the security which would make the security not as freely tradable as one not subject to such restriction. The put option must be exercisable only by a participant, by the participant's donees, or by a person (including an estate or its distributee) to whom the security passes by reason of a participant's death. (Under this paragraph "participant" means a participant and the beneficiaries of the participant under the ESOP.) The put option must permit a participant to put the security to the employer. Under no circumstances may the put option bind the ESOP. However, it may grant the ESOP an option to assume the rights and obligations of the employer at the time that the put option is exercised. If it is known at the time a loan is made that Federal or state law will be violated by the employer's honoring such option, the put option must permit the security to be put, in a manner consistent with such law, to a third party (e.g., an affiliate of the employer or a shareholder other than the ESOP) that has substantial net worth at the time the loan is made and whose net worth is reasonably expected to remain substantial.

(k) *Duration of put option.*—(1) *General rule.* A put option must be exercisable at least during a 15-month period which begins the date the security subject to the put option is distributed by the ESOP.

(2) *Special rule.* In the case of a security that is publicly traded without restriction when distributed but ceases to be so traded within 15 months after distribution, the employer must notify each security holder in writing on or before the tenth day after the date the security ceases to be so traded that for the remainder of the 15-month period the security is subject to a put option. The number of days between the tenth day and the date on which notice is actually given, if later than the tenth day, must be added to the duration of the put option. The notice must inform distributees of the terms of the put options that they are to hold. The terms must satisfy the requirements of paragraphs (j) through (l) of this section.

(l) *Other put option provisions.*—(1) *Manner of exercise.* A put option is exercised by the holder notifying the employer in writing that the put option is being exercised.

(2) *Time excluded from duration of put option.* The period during which a put option is exercisable does not include any time when a distributee is unable to exercise it because the party bound by the put option is prohibited from honoring it by applicable Federal or state law.

(3) *Price.* The price at which a put option must be exercisable is the value of the security, determined in accordance with paragraph (d)(5) of 26 CFR 54.4975–11.

(4) *Payment terms.* The provisions for payment under a put option must be reasonable. The deferral of payment is reasonable if adequate security and a reasonable interest rate are provided for any credit extended and if the cumulative payments at any time are no less than the aggregate of reasonable periodic payments as of such time. Periodic payments are reasonable if annual installments, beginning with 30 days after the date the put option is exercised, are substantially equal. Generally, the payment period may not end more than 5 years after the date the put option is exercised. However, it may be extended to a date no later than the earlier of 10 years from the date the put option is exercised or the date the proceeds of the loan used by the ESOP to acquire the security subject to such put option are entirely repaid.

(5) *Payment restrictions.* Payment under a put option may be restricted by the terms of a loan, including one used to acquire a security subject to a put option, made before November 1, 1977. Otherwise, payment under a put option must not be restricted by the provisions of a loan or any other arrangement, including the terms of the employer's articles of incorporation, unless so required by applicable state law.

(m) *Other terms of loan.* An exempt loan must be for a specific term. Such loan may not be payable at the demand of any person, except in the case of default.

(n) *Status of plan as ESOP.* To be exempt, a loan must be made to a plan that is an ESOP at the time of such loan. However, a loan to a plan formally designated as an ESOP at the time of the loan that fails to be an ESOP because it does not comply with section 401(a) of the Code or 26 CFR 54.4975–11 will be exempt as of the time of such loan if the plan is amended retroactively under section 401(b) of the Code or 26 CFR 54.4975–11(a)(4).

(o) *Special rules for certain loans.*—(1) *Loans made before January 1, 1976.* A loan made before January 1, 1976, or made afterwards under a binding agreement in effect on January 1, 1976 (or under renewals permitted by the terms of such an agreement on that date) is exempt for the entire period of such loan if it otherwise satisfies the provisions of this section for such period, even though it does not satisfy the following provisions of this section:

(i) The last sentence of paragraph (d);

(ii) Paragraphs (e), (f), and (h)(1) and (2); and

(iii) Paragraphs (i) through (m), inclusive.

(2) *Loans made after December 31, 1975, but before (insert 60 days after publication of final regulations).* A loan made after December 31, 1975, but before November 1, 1977, or made afterwards under a binding agreement in effect on November 1, 1977 (or under renewals permitted by the terms of such an agreement on that date) is exempt for the entire period of such loan if it otherwise satisfies the provisions of this section for such period even though it does not satisfy the following provisions of this section:

(i) Paragraph (f);

(ii) The three provisions of paragraph (h)(2); and (iii) paragraph (i).

V 42 171
SEP 2 77
UMI

(3) *Release rule.* Notwithstanding paragraphs (o) (1) and (2) of this section, if the proceeds of a loan are used to acquire securities after November 1, 1977, the loan must comply by such date with the provisions of paragraph (h) of this section.

(4) *Default rule.* Notwithstanding paragraphs (o) (1) and (2) of this section, a loan by a party in interest other than a guarantor must satisfy the requirements of paragraph (f) of this section. A loan will satisfy these requirements if it is retroactively amended before November 1, 1977, to satisfy these requirements.

(5) *Put option rule.* With respect to a security distributed before November 1, 1977, the put option provisions of paragraphs (j), (k), and (l) of this section will be deemed satisfied as of the date the security is distributed if by December 31, 1977, the security is subject to a put option satisfying such provisions. For purposes of satisfying such provisions, the security will be deemed distributed on the date the put option is issued. However, the put option provisions need not be satisfied with respect to a security that is not owned on November 1, 1977, by a person in whose hands a put option must be exercisable.

Par. 2. § 2550.407d–5 is inserted in the appropriate place to read as set forth below:

§ 2550.407d–5 Definition of the term "qualifying employer security".

(a) *In general.*—For purposes of this section and section 407(d) (5) of the Employee Retirement Income Security Act of 1974 (the Act), the term "qualifying employer security" means an employer security which is:

(1) Stock; or

(2) A marketable obligation, as defined in paragraph (b) of this section and section 407(e) of the Act.

(b) For purposes of paragraph (a) (2) of this section and section 407(d) (5) of the Act, the term "marketable obligation" means a bond, debenture, note, or certificate, or other evidence of indebtedness (hereinafter in this paragraph referred to as "obligation") if:

(1) Such obligation is acquired—

(i) On the market, either

(A) At the price of the obligation prevailing on a national securities exchange which is registered with the Securities and Exchange Commission, or

(B) If the obligation is not traded on such a national securities exchange, at a price not less favorable to the plan than the offering price for the obligation as established by current bid and asked prices quoted by persons independent of the issuer;

(ii) From an underwriter, at a price—

(A) Not in excess of the public offering price for the obligation as set forth in a prospectus or offering circular filed with the Securities and Exchange Commission, and

(B) At which a substantial portion of the same issue is acquired by persons independent of the issuer; or

(iii) Directly from the issuer at a price not less favorable to the plan than the price paid currently for a substantial portion of the same issue by persons independent of the issuer;

(2) Immediately following acquisition of such obligation,

(i) Not more than 25 percent of the aggregate amount of obligations issued in such issue and outstanding at the time of acquisition is held by the plan, and

(ii) At least 50 percent of the aggregate amount referred to in paragraph (A) is held by persons independent of the issuer; and

(3) Immediately following acquisition of the obligation, not more than 25 percent of the assets of the plan is invested in obligations of the employer or an affiliate of the employer.

Par. 3. § 2550.407d–6 is inserted in the appropriate place to read as set forth below:

§ 2550.407d–6 Definition of the term "employee stock ownership plan".

(a) *In general.*—(1) *Type of plan.* To be an "ESOP" (employee stock ownership plan), a plan described in section 407(d) (6) (A) of the Employee Retirement Income Security Act of 1974 (the Act) must meet the requirements of this section. See section 407(d) (6) (B).

(2) *Designation as ESOP.* To be an ESOP, a plan must be formally designated as such in the plan document.

(3) *Retroactive amendment.* A plan meets the requirements of this section as of the date that it is designated as an ESOP if it is amended retroactively to meet, and in fact does meet, such requirements at any of the following times:

(i) 12 months after the date on which the plan is designated as an ESOP;

(ii) 90 days after a determination letter is issued with respect to the qualification of the plan as an ESOP under this section, but only if the determination is requested by the date in paragraph (a) (3) (i) of this section; or

(iii) A later date approved by the Internal Revenue Service district director.

(4) *Addition to other plan.* An ESOP may form a portion of a plan the balance of which includes a qualified pension, profit-sharing, or stock bonus plan which is not an ESOP. A reference to an ESOP includes an ESOP that forms a portion of another plan.

(5) *Conversion of existing plan to an ESOP.* If an existing pension, profit-sharing, or stock bonus plan is converted into an ESOP, the requirements of section 404 of the Act, relating to fiduciary duties, and section 401(a) of the Internal Revenue Code (the Code), relating to requirements for plans established for the exclusive benefit of employees, apply to such conversion. A conversion may constitute a termination of an existing plan. For definition of a termination, see the regulations under section 411(d) (3) of the Code and section 4041 (f) of the Act.

(6) *Certain arrangements barred.*—(i) *Buy-sell agreements.* An arrangement involving an ESOP that creates a put option must not provide for the issuance of put options other than as provided under § 2550.408b–3(j), (k) and (l). Also, an ESOP must not otherwise obligate itself to acquire securities from a particular security holder at an indefinite time determined upon the happening of an event such as the death of the holder.

(b) *Plan designed to invest primarily in qualifying employer securities.* A plan constitutes an ESOP only if the plan specifically states that it is designed to invest primarily in qualifying employer securities. Thus, a stock bonus plan or a money purchase pension plan constituting an ESOP may invest part of its assets in other than qualifying employer securities. Such plan will be treated the same as other stock bonus plans or money purchase pension plans qualified under section 401(a) of the Code with respect to those investments.

(c) *Regulations of the Secretary of the Treasury.* A plan constitutes an ESOP for a plan year only if it meets such other requirements as the Secretary of the Treasury may prescribe by regulation under section 4975(e) (7) of the Code. (See 26 CFR 54.4975–11).

Signed at Washington, D.C., this 18th day of August, 1977.

IAN LANOFF,
Administrator of Pension and Welfare Benefit Programs, Labor-Management Services Administration.

Title 26—Internal Revenue

CHAPTER I—INTERNAL REVENUE SERVICE, DEPARTMENT OF THE TREASURY

SUBCHAPTER D—MISCELLANEOUS EXCISE TAXES

[T.D. 7506]

PART 54—PENSION, ETC. EXCISE TAX

Employee Stock Ownership Plans

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document provides final regulations relating to employee stock ownership plans ("ESOP's"). Changes in the applicable tax law were made by the Employee Retirement Income Security Act of 1974 (ERISA). Together with temporary regulations published elsewhere in today's FEDERAL REGISTER, these regulations are intended to provide guidance for the public in complying with the law. They affect all employees who participate in ESOP's and employers who establish ESOP's.

DATE: The regulations are generally effective for plan years ending after December 31, 1974.

FOR FURTHER INFORMATION CONTACT:

Thomas Rogan of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, D.C. 20224 (Attention: CC:LR:T) (202–566–3478).

SUPPLEMENTARY INFORMATION:

BACKGROUND

On July 30, 1976, the FEDERAL REGISTER published proposed amendments to the Income Tax Regulations (26 CFR Part I) under section 301 of the Internal Revenue Code of 1954 and to the Pension, etc. Excise Tax Regulations (26 CFR Part 54) under section 4975 (d) (3), (e) (7), and (e) (8) of the Code (41 FR 31833). Similar Department of Labor provisions appeared at the same time (41 FR 31870).

By a notice published in the FEDERAL REGISTER on October 19, 1976, the public was invited to comment orally or in writing not only upon issues addressed in the proposed amendments, but also upon issues addressed by section 803(h) of the Tax Reform Act of 1976 (90 Stat. 1590) and by the Conference Report of the Committee of Conference on H.R. 10612 (H.R. Rep. No. 94–1515, 94th Cong., 2d Sess., 539–542 (1976)), as both relate to ESOP's.

A public hearing was held on November 12, 1976. After consideration of all comments, some of the amendments are adopted as revised by this Treasury decision. Others are revised and re-proposed elsewhere in today's FEDERAL REGISTER. Also, temporary regulations parallel to the re-proposed amendments are adopted elsewhere in today's FEDERAL REGISTER.

Both substantive and structural changes are made in the proposed amendments. Thus, the final regulations differ considerably from the proposed amendments. Certain provisions are added. Others are restructured or deleted. However, many changes are designed solely to simplify the final regulations. Therefore, no substantive inference should be drawn solely from the fact that a particular proposed amendment is either deleted or restructured.

MAJOR SUBSTANTIVE DELETIONS

(1) TREATMENT OF SALE AS REDEMPTION

Many comments object to the proposed amendment under § 1.301–1(1). The amendment would result in treating some ESOP transactions as dividends distributed by the employer to shareholders. Some of the comments question the legal validity of this proposal, its application solely to ESOP's, and its failure to identify specific transactions to which the proposal would apply. In order that these comments may be considered further, this proposal is withdrawn. Guidance on this matter may be expected within the context of shareholder transactions with employee plans in general.

(2) SPECIAL REQUIREMENTS FOR USE OF LOAN PROCEEDS

Several comments suggest major revisions to proposed § 54.4975–7(b) (2) (i) (B) (2) *through* (5). These provisions relate to requirements with respect to voting stock; to non-voting common stock, preferred stock or other equity securities; to unrestricted dividend rights; and to the overall limitation on employer securities (other than certain common stock or convertible securities) acquired with loan proceeds. The majority recommend deletion. This document makes the deletion.

However, this deletion does not mean that the Department of Labor and the Internal Revenue Service are unconcerned with the nature of securities acquired by an ESOP with the proceeds of an exempt loan. The acquisition of securities by an ESOP will be judged by the Department of Labor under the requirements of section 404(a) (1) of ERISA.

(3) PASS-THROUGH OF VOTING RIGHTS

The comments reflect a mixed reaction to the proposed amendment relating to the exercise of voting and other rights attributable to securities owned by an ESOP. Particularly, the comments focus on the provision requiring the pass-through of voting rights to participants with respect to allocated securities. Some comments favor the proposed amendments. Others suggest minor modifications. However, most of the comments object to the treatment of ESOP's differently in this respect from other qualified employee plans.

Because of these comments, the proposed § 54.4975–11(d) is withdrawn. The requirements generally applicable with respect to the exercise of rights under qualified employee plans apply to ESOP's.

MAJOR SUBSTANTIVE ADDITIONS

(1) RIGHTS OF FIRST REFUSAL

Section 54.4975–7(b) (9) is added under the final regulations to permit an ESOP to acquire employer securities that are subject to a right of first refusal.

Many comments stress the necessity of a right of first refusal to protect small, closely held corporations whose securities are not publicly traded from dilution of control, takeovers, by competitors, and inadvertent "going public". The final regulations reflect the comments by permitting a 14-day right of first refusal in favor of the employer, the ESOP, or both. However, the securities subject to a right of first refusal must not be publicly traded at the time the right is sought to be exercised. Also, the selling price and other terms of the purchase under a right of first refusal must not be less favorable to the seller of the security than the greater of the fair market value of the security or the purchase price and other terms offered by a third party making a good faith offer.

MAJOR REVISIONS

(1) DEFINITION OF "PUBLICLY TRADED"

In response to a number of comments, the concept of "publicly traded" is expanded under the final regulations to include securities quoted on a system sponsored by a registered national securities association. The primary effect of this change is to limit the extent to which a put option is required.

(2) SCOPE OF ESOP LOAN EXEMPTION

Many comments suggest that the proposed amendment limiting the scope of the ESOP loan exemption to the prohibitions of section 4975(c) (1) (A) through (D) is not supported by ERISA or its legislative history. The same criticism is made concerning the requirement that loans involving fiduciary self-dealing must be arranged and approved by an independent fiduciary.

Based upon a review of the comments and the legislative history, the scope of the ESOP loan exemption is expanded under the final regulations. The only prohibited transactions to which the exemption under section 4975(d) (3) does not apply are those arising under section 4975(c) (1) (F), relating to the receipt by a fiduciary of any consideration for his own personal account from a party dealing with a plan. Also, the independent fiduciary requirement is eliminated under the final regulations.

The ERISA Conference Report states that, because of potential problems with respect to ESOP loans by disqualified persons, "the conferees intend that all aspects of these transactions will be subject to special scrutiny by the Department of Labor and the Internal Revenue Service to ensure that they are primarily for the benefit of plan participants and beneficiaries" (H.R. Rep. No. 93–1280, 93d Cong., 2d Sess., 313 (1974)). The final regulations make it clear that the "special scrutiny" for ESOP transactions referred to by the conferees is not meant to require an administrative exemption for loans by fiduciaries. Rather, the language is interpreted as requiring the careful examination of these transactions to ensure that they are primarily for the benefit of participants and their beneficiaries and that they satisfy the requirements of section 404(a) (1) of ERISA.

(3) PRIMARY BENEFIT REQUIREMENT

The requirement that an ESOP loan be made primarily for the benefit of participants and beneficiaries of the plan is expressed with greater specificity under the final regulations. In response to comments requesting clarification of this provision, two tests are added under § 54.4975–7(b) (3) to illustrate how a determination can be made with respect to whether a transaction meets the primary benefit requirement. The first test, derived from the ERISA Conference Report, involves a determination based on the projected net effect of the loan on the ESOP over the duration of the transaction. (See ERISA Conference Report, p. 313.) The second test requires that the terms of an ESOP loan be at least as favorable as a comparable loan resulting from armslength negotiations involving independent parties.

(4) DEFAULT

The proposed amendment restricts the transfer of plan assets in the event of default to a failure to meet the loan payment schedule. As suggested in the comments, the final regulations are less restrictive. The limitation on the transfer of plan assets in the event of default applies only to loans in which the disqualified person extends credit in a form other than a guarantee.

UMI

(5) RELEASE FROM ENCUMBRANCE AND SUSPENSE ACCOUNT

The proposed amendments require securities to be released in at least equal annual amounts from encumbrance and from a suspense account. This rule is eliminated from the final regulations because, as pointed out in the comments, it is unnecessarily rigid. Instead, the final regulations now provide, as a general rule, for release of securities from encumbrance and the suspense account as principal and interest are paid. Also, an alternative rule now permits release from encumbrance and from the suspense account with reference to principal payments only. In the case of loans made after November 1, 1977, the alternative applies only to loans with a term of 10 years or less that require payments at a cumulative rate not less rapid than level annual payments. In these cases, interest payments will not be disregarded unless based on standard loan amortization tables.

The final regulations note that the release of securities in unequal annual amounts may reflect conditions causing plan disqualification if contributions are not substantial and recurring or if the limitations on annual additions under section 415 are exceeded.

(6) PUT OPTIONS

The comments address various aspects of the put option provision under the proposed amendments. Several comments express concern over the strain on an employer's cash supply that could result from the continuous exercise of put options by participants, unless installment payments were permissible. Others point out that under certain circumstances, the corporate laws of several states prohibit corporations from purchasing their own securities, and that certain corporations, e.g., banks, may be absolutely prohibited by law from issuing put options.

The final regulations relating to put options reflect many of these comments. Therefore, they differ considerably from the proposed amendments.

The final regulations address the problem that arises if an employer is prohibited by law from honoring a put option. In such cases, a third party other than the ESOP must be bound to honor the put option. They also make it clear that the ESOP must not be bound under any circumstances to honor a put option. However, it may be granted the option to assume the rights and obligations of the employer at the time that the put option is exercised.

The minimum duration of the put option is reduced to 15 months. However, if, for example, the employer or a designated third party is prohibited by law from honoring a put option, the 15-month period runs only when the legal restriction ceases to apply. Also, a security not subject to a put option when distributed must be subject to the requirements for put options if, for example, it ceases to be publicly traded within 15 months after distribution.

Other new put option provisions include a limitation on the number of years over which periodic payments under a put option may be spread and a prohibition of certain payment restrictions. Also, the scope of the put option requirement is expanded to include publicly traded securities that are not freely tradable because of certain restrictions.

(7) SPECIAL RULES FOR CERTAIN EXEMPT LOANS

A number of comments indicate the need to permit retroactive amendment of certain ESOP loans to prevent inadvertent prohibited transactions in loan agreements consummated in good faith before the publication of the final regulations. In light of these comments, the proposed amendments are modified to provide transitional relief.

The regulations provide special rules for loans entered into before January 1, 1976. These loans are not subject to the requirements relating to puts, calls or other options, or buy-sell or similar arrangements; liability of ESOP's; default; release from encumbrance; rights of first refusal; put options; and other loan terms. They are subject to the remaining provisions of the regulation because these provisions could be reasonably anticipated by reading the statutory provisions relating to ESOP's.

Other special rules apply more restrictively to loans made between January 1, 1976, and November 1, 1977. These additional restrictions embody provisions contained in Technical Information Release 1413, guidelines relating to ESOP's, published on November 4, 1975 (1975-50 I.R.B. 16). However, these special rules would allow an ESOP loan made during this period to be exempt for the entire loan period even though the loan fails to satisfy the three additional provisions under the special rules for release from encumbrance or the provisions relating to rights of first refusal and default.

In addition, a loan may be retroactively amended under the final regulations to comply with the default and put option provisions. Under the special rule for put options, a security distributed without a put option will satisfy the final regulations as of the date of distribution if by November 1, 1977 the security becomes subject to a put option satisfying the regulations. The 15-month period for the duration of the put option begins with the date on which the security becomes subject to the put option.

(8) TRANSITIONAL RULES FOR PLANS

The comments also note that transitional rules are lacking under the proposed amendments for plan qualification as an ESOP. This relief is available under the final regulations for ESOP's established before November 1, 1977 if they are amended by December 31, 1977, to satisfy the final regulations.

(9) PURCHASE OF LIFE INSURANCE

Many comments criticize the limitation in the proposed amendments on the purchase of life insurance policies with ESOP assets that are not the proceeds of an exempt loan. That limitation is deleted. Thus, in general, the rules applicable to purchases of life insurance by qualified plans apply to ESOP's. However, the rule of the proposed amendments restricting the use of exempt loan proceeds by an ESOP is unchanged. Thus, an ESOP loan is not exempt if life insurance policies are acquired with the loan proceeds.

(10) VALUATION

Many comments urge deletion of the requirement that an annual certificate of value must be provided in certain situations. The final regulations delete this requirement. They also add the requirement that any determination of value must be made in good faith. In the case of a transaction involving a plan and a disqualified person, this determination must be made as of the date of the transaction. In all other cases, it must be made as of the most recent valuation date under the plan.

An independent appraisal is recognized as a good faith determination of value. However, in the case of a transaction between a plan and a disqualified person, a determination based only on an independent appraisal may not be conclusive.

(11) QUALIFYING EMPLOYER SECURITY

The term "other equity security" is included in the definition of "qualifying employer security" under the Code but not under section 407(d) (5) of ERISA. The proposed amendments are silent on this difference. One comment suggests that this difference is of substantive significance. Since insufficient justification is offered in support of this suggestion, no change is made.

GUIDELINES SUPERSEDED

Questions and answers relating to ESOP's were published in Technical Information Release (TIR) 1413 on November 4, 1975, as guidelines pending the issuance of regulations. The regulations under this Treasury decision supersede the following of those questions and answers in so far as they apply to ESOP's:

(1) G-1, relating to definition of ESOP;

(2) F-3, relating to rights of first refusal;

(3) F-4, relating to call options;

(4) F-5, relating to buy-sell arrangements with shareholders;

(5) F-6, to the extent that the first paragraph of the answer applies to section 4975(e)(7)(A), relating to the funding of ESOP's;

(6) F-9, relating to incidental life insurance; and

(7) F-10, relating to loans to ESOP's.

DRAFTING INFORMATION

The principal author of this regulation was Thomas Rogan of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service, Treasury Department, and Department of Labor participated in developing the regulation, both on matters of substance and style.

ADOPTION OF AMENDMENTS TO THE REGULATIONS

Accordingly, 26 CFR Part 54 is amended as follows:

Paragraph 1. There is inserted in the appropriate place the following new section:

§ 54.4975-7 Other statutory exemptions.

(a) [Reserved].

(b) *Loans to employee stock ownership plans*—

(1) *Definitions.* When used in this paragraph (b) and § 54.4975-11, the terms listed below have the following meanings:

(i) *ESOP.* The term "ESOP" refers to an employee stock ownership plan that meets the requirements of section 4975(e)(7) and § 54.4975-11. It is not synonymous with "stock bonus plan." A stock bonus plan must, however, be an ESOP to engage in an exempt loan. The qualification of an ESOP under section 401(a) and § 54.4975-11 will not be adversely affected merely because it engages in a non-exempt loan.

(ii) *Loan.* The term "loan" refers to a loan made to an ESOP by a disqualified person or a loan to an ESOP which is guaranteed by a disqualified person. It includes a direct loan of cash, a purchase-money transaction, and an assumption of the obligation of an ESOP. "Guarantee" includes an unsecured guarantee and the use of assets of a disqualified person as collateral for a loan, even though the use of assets may not be a guarantee under applicable state law. An amendment of a loan in order to qualify as an exempt loan is not a refinancing of the loan or the making of another loan.

(iii) *Exempt loan.* The term "exempt loan" refers to a loan that satisfies the provisions of this paragraph (b). A "non-exempt loan" is one that fails to satisfy such provisions.

(iv) *Publicly traded.* The term "publicly traded" refers to a security that is listed on a national securities exchange registered under section 6 of the Securities Exchange Act of 1934 (15 U.S.C. 78f) or that is quoted on a system sponsored by a national securities association registered under section 15A(b) of the Securities Exchange Act (15 U.S.C. 78o).

(v) *Qualifying employer security.* The term "qualifying employer security" refers to a security described in § 54.4975-12.

(2) *Statutory exemption.*—(i) *Scope.* Section 4975(d)(3) provides an exemption from the excise tax imposed under section 4975(a) and (b) by reason of section 4975(c)(1)(A) through (E). Section 4975(d)(3) does not provide an exemption from the imposition of such tax by reason of section 4975(c)(1)(F), relating to fiduciaries receiving consideration for their own personal account from any party dealing with a plan in connection with a transaction involving the income or assets of the plan.

(ii) *Special scrutiny of transaction.* The exemption under section 4975(d)(3) includes within its scope certain transactions in which the potential for self-dealing by fiduciaries exists and in which the interests of fiduciaries may conflict with the interests of participants. To guard against those potential abuses, the Internal Revenue Service will subject these transactions to special scrutiny to ensure that they are primarily for the benefit of participants and their beneficiaries. Although the transactions need not be arranged and approved by an independent fiduciary, fiduciaries are cautioned to exercise scrupulously their discretion in approving them. For example, fiduciaries should be prepared to demonstrate compliance with the net effect test and the arm's-length standard under paragraph (b)(3)(ii) and (iii) of this section. Also, fiduciaries should determine that the transaction is truly arranged primarily in the interest of participants and their beneficiaries rather than, for example, in the interest of certain selling shareholders.

(3) *Primary benefit requirement.*—(i) *In general.* An exempt loan must be primarily for the benefit of the ESOP participants and their beneficiaries. All the surrounding facts and circumstances, including those described in paragraph (b)(3)(ii) and (iii) of this section, will be considered in determining whether the loan satisfies this requirement. However, no loan will satisfy the requirement unless it satisfies the requirements of paragraphm (b)(4), (5), and (6) of this section.

(ii) *Net effect on plan assets.* At the time that a loan is made, the interest rate for the loan and the price of securities to be acquired with the loan proceeds should not be such that plan assets might be drained off.

(iii) *Arm's-length standard.* The terms of a loan, whether or not between independent parties, must, at the same time the loan is made, be at least as favorable to the ESOP as the terms of a comparable loan resulting from arm's-length negotiations between independent parties.

(4) *Use of loan proceeds.* The proceeds of an exempt loan must be used within a reasonable time after their receipt by the borrowing ESOP only for any or all of the following purposes:

(i) To acquire qualifying employer securities.

(ii) To repay such loan.

(iii) To repay a prior exempt loan. A new loan, the proceeds of which are so used, must satisfy the provisions of this paragraph (b).

Except as provided in paragraph (b)(9) and (10) of this section or as otherwise required by applicable law, no security acquired with the proceeds of an exempt loan may be subject to a put, call, or other option, or buy-sell or similar arrangement while held by and when distributed from a plan, whether or not the plan is then an ESOP.

(5) *Liability and collateral of ESOP for loan.* An exempt loan must be without recourse against the ESOP. Furthermore, the only assets of the ESOP that may be given as collateral on an exempt loan are qualifying employer securities of two classes: those acquired with the proceeds of the loan and those that were used as collateral on a prior exempt loan repaid with the proceeds of the current exempt loan. No person entitled to payment under the exempt loan shall have any right to assets of the ESOP other than:

(i) Collateral given for the loan.

(ii) Contributions (other than contributions of employer securities) that are made under an ESOP to meet its obligations under the loan, and

(iii) Earnings attributable to such collateral and the investment of such contributions.

The payments made with respect to an exempt loan by ESOP during a plan year must not exceed an amount equal to the sum of such contributions and earnings received during or prior to the year less such payments in prior years. Such contributions and earnings must be accounted for separately in the books of account of the ESOP until the loan is repaid.

(6) *Default.* In the event of default upon an exempt loan, the value of plan assets transferred in satisfaction of the loan must not exceed the amount of default. If the lender is a disqualified person, a loan must provide for a transfer of plan assets upon default only upon and to the extent of the failure of the plan to meet the payment schedule of the loan. For purposes of this subparagraph (6), the making of a guarantee does not make a person a lender.

(7) *Reasonable rate of interest.* The interest rate of a loan must not be in excess of a reasonable rate of interest. All relevant factors will be considered in determining a reasonable rate of interest, including the amount and duration of the loan, the security and guarantee (if any) involved, the credit standing of the ESOP and the guarantor (if any), and the interest rate prevailing for comparable loans. When these factors are considered, a variable interest rate may be reasonable.

(8) *Release from encumbrance.*—(i) *General rule.* In general, an exempt loan must provide for the release from encumbrance under this subdivision (i) of plan assets used as collateral for the loan. For each plan year during the duration of the loan, the number of securities released must equal the number of encumbered securities held immediately before release for the current plan year multiplied by a fraction. The numerator of the fraction is the amount of principal and interest paid for the year. The denominator of the fraction is the sum of the numerator plus the principal and interest to be paid for all future years. See § 54.4975-7(b)(8)(iv). The number of future years under the loan must be definitely ascertainable and must be determined without taking into account any possible extensions or renewal po-

V 42 171 SEP 2 77 UMI

riods. If the interest rate under the loan is variable, the interest to be paid in future years must be computed by using the interest rate applicable as of the end of the plan year. If collateral includes more than one class of securities, the number of securities of each class to be released for a plan year must be determined by applying the same fraction to each class.

(ii) *Special rule.* A loan will not fail to be exempt merely because the number of securities to be released from encumbrance is determined solely with reference to principal payments. However, if release is determined with reference to principal payments only, the following three additional rules apply. The first rule is that the loan must provide for annual payments of principal and interest at a cumulative rate that is not less rapid at any time than level annual payments of such amounts for 10 years. The second rule is that interest included in any payment is disregarded only to the extent that it would be determined to be interest under standard loan amortization tables. The third rule is that this subdivision (ii) is not applicable from the time that, by reason of a renewal, extension, or refinancing, the sum of the expired duration of the exempt loan, the renewal period, the extension period, and the duration of a new exempt loan exceeds 10 years.

(iii) *Caution against plan disqualification.* Under an exempt loan, the number of securities released from encumbrance may vary from year to year. The release of securities depends upon certain employer contributions and earnings under the ESOP. Under § 54.4975–11(d)(2) actual allocations to participants' accounts are based upon assets withdrawn from the suspense account. Nevertheless, for purposes of applying the limitations under section 415 to these allocations, under § 54.4975–11(a)(8)(ii) contributions used by the ESOP to pay the loan are treated as annual additions to participants' accounts. Therefore, particular caution must be exercised to avoid exceeding the maximum annual additions under section 415. At the same time, release from encumbrance in annual varying numbers may reflect a failure on the part of the employer to make substantial and recurring contributions to the ESOP which will lead to loss of qualification under section 401(a). The Internal Revenue Service will observe closely the operation of ESOP's that release encumbered securities in varying annual amounts, particularly those that provide for the deferral of loan payments or for balloon payments.

(iv) *Illustration.* The general rule under paragraph (b)(8)(i) of this section operates as illustrated in the following example:

Example. Corporation X establishes an ESOP that borrows $750,000 from a bank. X guarantees the loan, which is for 15 years at 8% interest and is payable in level annual amounts of $72,256.72. Total payments on the loan are $1,083,850.80. The ESOP uses the entire loan proceeds to acquire 15,000 shares of X stock which is used as collateral for the loan. The number of securities to be released for the first year is 1,000 shares, i.e., 15,000 shares × $72,256.72/$1,083,850.80 = 15,000 shares x 1/15. The number of securities to be released for the second year is 1,000 shares, i.e., 14,000 shares × $72,256.72/$1,011,594.08 = 14,000 shares × 1/14. If all loan payments are made as originally scheduled, the number of securities released in each succeeding year of the loan will also be 1,000.

(9) *Right of first refusal.* Qualifying employer securities acquired with proceeds of an exempt loan may, but need not, be subject to a right of first refusal. However, any such right must meet the requirements of this subparagraph (9). Securities subject to such right must be stock or an equity security, or a debt security convertible into stock or an equity security. Also, the securities must not be publicly traded at the time the right may be exercised. The right of first refusal must be in favor of the employer, the ESOP, or both in any order of priority. The selling price and other terms under the right must not be less favorable to the seller than the greater of the value of the security determined under § 54.4975–11(d)(5), or the purchase price and other terms offered by a buyer, other than the employer or the ESOP, making a good faith offer to purchase the security. The right of first refusal must lapse no later than 14 days after the security holder gives written notice to the holder of the right that an offer by a third party to purchase the security has been received.

(10) *Put option.* A qualifying employer security acquired with the proceeds of an exempt loan by an ESOP after September 30, 1976, must be subject to a put option if it is not publicly traded when distributed or if it is subject to a trading limitation when distributed. For purposes of this sumfparagraph (10), a "trading limitation" on a security is a restcition under any Federal or state securities law, any regulation thereunder, or an agreement, not prohibited by this paragraph (b), affecting the security which would make the security not as freely tradable as one not subject to such restriction. The put option must be exercisable only by a participant, by the participant's donees, or by a person (including an estate or its distributee) to whom the security passes by reason of a participant's death. (Under this subparagraph (10), "participant" means a participant and beneficiaries of the participant under the ESOP.) The put option must permit a participant to put the security to the employer. Under no circumstances may the put option bind the ESOP. However, it may grant the ESOP an option to assume the rights and obligations of the employer at the time that the put option is exercised. If it is known at the time a loan is made that Federal or state law will be violated by the employer's honoring such put option, the put option must permit the security to be put, in a manner consistent with such law, to a third party (e.g., an affiliate of the employer or a shareholder other than the ESOP) that has substantial net worth at the time the loan is made and whose net worth is reasonably expected to remain substantial.

(11) *Duration of put option.*—(i) *General rule.* A put option must be exercisable at least during a 15-month period which begins on the date the security subject to the put option is distributed by the ESOP.

(ii) *Special rule.* In the case of a security that is publicly traded without restriction when distributed but ceases to be so traded within 15 months after distribution, the employer must notify each security holder in writing on or before the tenth day after the date the security ceases to be so traded that for the remainder of the 15-month period the security is subject to a put option. The number of days between such tenth day and the date on which notice is actually given, if later than the tenth day, must be added to the duration of the put option. The notice must inform distributees of the terms of the put options that they are to hold. Such terms must satisfy the requirements of paragraph (b)(10) through (12) of this section.

(12) *Other put option provisions.*—(i) *Manner of exercise.* A put option is exercised by the holder notifying the employer in writing that the put option is being exercised.

(ii) *Time excluded from duration of put option.* The period during which a put option is exercisable does not include any time when a distributee is unable to exercise it because the party bound by the put option is prohibited from honoring it by applicable Federal or state law.

(iii) *Price.* The price at which a put option must be exercisable is the value of the security, determined under § 54.4975–11(d)(5).

(iv) *Payment terms.* The provisions for payment under a put option must be reasonable. The deferral of payment is reasonable if adequate security and a reasonable interest rate are provided for any credit extended and if the cumulative payments at any time are no less than the aggregate of reasonable periodic payments as of such time. Periodic payments are reasonable if annual installments, beginning with 30 days after the date the put option is exercised, are substantially equal. Generally, the payment period may not end more than 5 years after the date the put option is exercised. However, it may be extended to a date no later than the earlier of 10 years from the date the put option is exercised or the date the proceeds of the loan used by the ESOP to acquire the security subject to the put option are entirely repaid.

(v) *Payment restrictions.* Payment under a put option may be restricted by the terms of a loan, including one used to acquire a security subject to a put option made before November 1, 1977. Otherwise, payment under a put option must not be restricted by the provisions of a loan or any other arrangement, including the terms of the employer's articles of incorporation, unless so required by applicable state law.

(13) *Other terms of loan.* An exempt loan must be for a specific term. Such loan may not be payable at the demand

of any person, except in the case of default.

(14) *Status of plan as ESOP.* To be exempt, a loan must be made to a plan that is an ESOP at the time of such loan. However, a loan to a plan formally designated as an ESOP at the time of the loan that fails to be an ESOP because it does not comply with section 401(a) of the Code or § 54.4975–11 will be exempt as of the time of such loan if the plan is amended retroactively under section 401(b) or § 54.4975–11(a)(4).

(15) *Special rules for certain loans.*—(i) *Loans made before January 1, 1976.* A loan made before January 1, 1976, or made afterwards under a binding agreement in effect on January 1, 1976 (or under renewals permitted by the terms of the agreement on that date) is exempt for the entire period of the loan if it otherwise satisfies the provisions of this paragraph (b) for such period, even though it does not satisfy the following provisions of this section: the last sentence of paragraph (b)(4) and all of paragraph (b) (5), (6), (8) (i) and (ii), and (9) through (13), inclusive.

(ii) *Loans made after December 31, 1975, but before November 1, 1977.* A loan made after December 31, 1975, but before November 1, 1977 or made afterwards under a binding agreement in effect on November 1, 1977 (or under renewals permitted by the terms of the agreement on that date) is exempt for the entire period of the loan if it otherwise satisfies the provisions of this paragraph (b) for such period even though it does not satisfy the following provisions of this section: paragraph (b)(6) and (9) and the three additional rules listed in paragraph (b)(8)(ii).

(iii) *Release rule.* Notwithstanding paragraph (b)(15)(i) and (ii) of this section, if the proceeds of a loan are used to acquire securities after November 1, 1977, the loan must comply by such date with the provisions of paragraph (b)(8) of this section.

(iv) *Default rule.* Notwithstanding paragraph (b)(15)(i) and (ii) of this section, a loan by a disqualified person other than a guarantor must meet the requirements of paragraph (b)(6) of this section. A loan will meet these requirements if it is retroactively amended before November 1, 1977 to/meet these requirements.

(v) *Put option rule.* With respect to a security distributed before November 1, 1977, the put option provisions of paragraph (b) (10), (11), and (12) of this section will be deemed satisfied as of the date the security is distributed if by December 31, 1977, the security is subject to a put option satisfying such provisions. For purposes of satisfying such psovisions, the security will be deemed distributed on the date the put option is issued. However, the put option provisions need not be satisfied with respect to a security that is not owned on November 1, 1977, by a person in whose hands a put option must be exercisable.

Par. 2. There are inserted in the appropriate place the following new sections:

§ 54.4975–11 "ESOP" requirements.

(a) *In general.*—(1) *Type of plan.* To be an "ESOP" (employee stock ownership plan), a plan described in section 4975(e)(7)(A) must meet the requirements of this section. See section 4975(e)(7)(B).

(2) *Designation as ESOP.* To be an ESOP, a plan must be formally designated as such in the plan document.

(3) *Non-terminable provisions.* [Reserved]

(4) *Retroactive amendment.* A plan meets the requirements of this section as of the date that it is designated as an ESOP if it is amended retroactively to meet, and in fact does meet, such requirements at any of the following times:

(i) 12 months after the date on which the plan is designated as an ESOP;

(ii) 90 days after a determination letter is issued with respect to the qualification of the plan as an ESOP under this section, but only if the determination is requested by the time in paragraph (a)(4)(i) of this section; or

(iii) A later date approved by the district director.

(5) *Addition to other plan.* An ESOP may form a portion of a plan the balance of which includes a qualified pension, profit-sharing, or stock bonus plan which is not an ESOP. A reference to an ESOP includes an ESOP that forms a portion of another plan.

(6) *Conversion of existing plan to an ESOP.* If an existing pension, profit-sharing, or stock bonus plan is converted into an ESOP, the requirements of section 404 of the Employee Retirement Income Security Act of 1974 (ERISA) (88 Stat. 877), relating to fiduciary duties, and section 401(a) of the Code, relating to requirements for plans established for the exclusive benefit of employees, apply to such conversion. A conversion may constitute a termination of an existing plan. For definition of a termination, see the regulations under section 411(d)(3) of the Code and section 4041(f) of ERISA.

(7) *Certain arrangements barred.*—(i) *Buy-sell agreements.* An arrangement involving an ESOP that creates a put option must not provide for the issuance of put options other than as provided under § 54.4975–7(b)(10), (11) and (12). Also, an ESOP must not otherwise obligate itself to acquire securities from a particular security holder at an indefinite time determined upon the happening of an event such as the death of the holder.

(ii) *Integrated plans.* [Reserved]

(8) *Effect of certain ESOP provisions on section 401 (a) status.*—(i) *Exempt loan requirements.* An ESOP will not fail to meet the requirements of section 401(a)(2) merely because it gives plan assets as collateral for an exempt loan under § 54.4975–7(b)(5) or uses plan assets under § 54.49757(b)(6) to repay an exempt loan in the event of default.

(ii) *Individual annual contribution limitation.* An ESOP will not fail to meet the requirements of section 401(a)(16) merely because annual additions under section 415(c) are calculated with respect to employer contributions used to repay an exempt loan rather than with respect to securities allocated to participants.

(iii) *Income pass-through.* [Reserved].

(9) *Transitional rules for ESOP's established before November 1, 1977.* A plan established before November 1, 1977 that otherwise satisfies the provisions of this section constitutes an ESOP if it is amended by December 31, 1977, to comply from November 1, 1977 with this section even though before November 1, 1977 the plan did not satisfy paragraphs (c) and (d)(2), (4), and (5) of this section.

(10) *Additional transitional rules.* [Reserved].

(b) *Plan designed to invest primarily in qualifying employer securities.* A plan constitutes an ESOP only if the plan specifically states that it is designed to invest primarily in qualifying employer securities. Thus, a stock bonus plan or a money purchase pension plan constituting an ESOP may invest part of its assets in other than qualifying employer securities. Such plan will be treated the same as other stock bonus plans or money purchase pension plans qualified under section 401a with respect to those investments.

(c) *Suspense account.* All assets acquired by an ESOP with the proceeds of an exempt loan under section 4975(d)(3) must be added to and maintained in a suspense account. They are to be withdrawn from the suspense account by applying § 54.4975–7(b)(8) and (15) as if all securities in the suspense account were encumbered. Such assets acquired before November 1, 1977, must be withdrawn by applying § 54.4975–7(b)(8) or the provision of the loan that controls release from encumbrance. Assets in such suspense accounts are assets of the ESOP. Thus, for example, such assets are subject to section 401(a)(2).

(d) *Allocations to accounts of participants.*—(1) *In general.* Except as provided in this section, amounts contributed to an ESOP must be allocated as provided under § 1.401–1(b)(ii) and (iii) of this chapter, and securities acquired by an ESOP must be accounted for as provided under § 1.402(a)–1(b)(2)(ii) of this chapter.

(2) *Assets withdrawn from suspense account.* As of the end of each plan year, the ESOP must consistently allocate to the participants' accounts non-monetary units representing participants' interests in assets withdrawn from the suspense account.

(3) *Income.* Income with respect to securities acquired with the proceeds of an exempt loan must be allocated as income of the plan except to the extent that the ESOP provides for the use of income from such securities to repay the loan.

(4) *Forfeitures.* If a portion of a participant's account is forfeited, qualifying employer securities allocated under paragraph (d)(2) of this section must be forfeited only after other assets. If interests in more than one class of qualifying employer securities have been allocated to the participant's account, the

V 42 171 SEP 2 77 UMI

participant must be treated as forfeiting the same proportion of each such class.

(5) *Valuation.* For purposes of § 54.4975–7(b) (9) and (12) and this section, valuations must be made in good faith and based on all relevant factors for determining the fair market value of securities. In the case of a transaction between a plan and a disqualified person, value must be determined as of the date of the transaction. For all other purposes under this subparagraph (5), value must be determined as of the most recent valuation date under the plan. An independent appraisal will not in itself be a good faith determination of value in the case of a transaction between a plan and a disqualified person. However, in other cases, a determination of fair market value based on at least an annual appraisal independently arrived at by a person who customarily makes such appraisals and who is independent of any party to a transaction under § 54.4975–7(b) (9) and (12) will be deemed to be a good faith determination of value.

(e) *Multiple plans.*—(1) *General rule.* An ESOP may not be considered together with another plan for purposes of applying section 401(a) (4) and (5) or section 410(b) unless:

(i) The ESOP and such other plan exist on November 1, 1977, or

(ii) Paragraph (e) (2) of this section is satisfied.

(2) *Special rule for combined ESOP's.* [Reserved]

(f) *Distribution.*—(1) *In general.* Except as provided in paragraph (f) (2) and (3) of this section, with respect to distributions, a portion of an ESOP consisting of a stock bonus plan or a money purchase pension plan is not to be distinguished from other such plans under section 401(a). Thus, for example, benefits distributable from the portion of an ESOP consisting of a stock bonus plan are distributable only in stock of the employer. Also, benefits distributable from the money-purchase portion of the ESOP may be, but are not required to be, distributable in qualifying employer securities.

(2) *Exempt loan proceeds.* If securities acquired with the proceeds of an exempt loan available for distribution consist of more than one class, a distributee must receive substantially the same proportion of each such class. However, as indicated in paragraph (f) (1) of this section, benefits distributable from the portion of an ESOP consisting of a stock bonus plan are distributable only in stock of the employer.

(3) *Income.* [Reserved]

§ 54.4975–12 Definition of the term "qualifying employer security".

(a) *In general.* For purposes of section 4975(e) (8) and this section, the term "qualifying employer security" means an employer security which is:

(1) Stock or otherwise an equity security, or

(2) A bond, debenture, note, or certificate or other evidence of indebtedness which is described in paragraphs (1), (2), and (3) of section 503(e).

(b) *Special rule.* In determining whether a bond, debenture, note, or certificate or other evidence of indebtedness is described in paragraphs (1), (2), and (3) of section 503(e), any organization described in section 401(a) shall be treated as an organization subject to the provisions of section 503.

(Secs. 4975(e) (7) and 7805, Revenue Code of 1954 (88 Stat. 976, 68A Stat. 917; 26 U.S.C. 4975(e) (7), 7805).)

JEROME KURTZ,
Commissioner of Internal Revenue.

PART 141—TEMPORARY EXCISE TAX REGULATIONS UNDER THE EMPLOYEE RETIREMENT INCOME SECURITY ACT OF 1974

Certain Requirements for Employee Stock Ownership Plans

AGENCY: Internal Revenue Service, Treasury.

ACTION: Temporary regulations.

SUMMARY: This document provides temporary regulations relating to employee stock ownership plans ("ESOP's"). Changes in the applicable tax laws were made by the Employee Retirement Income Security Act of 1974 and the Tax Reform Act of 1976. Together with final regulations published elsewhere in today's FEDERAL REGISTER, these regulations are intended to provide guidance for the public in complying with the law. They affect all employees who participate in ESOP's and employers who establish ESOP's.

DATE: The regulations are generally effective for plan years ending after December 31, 1974.

FOR FURTHER INFORMATION CONTACT:

Thomas Rogan of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, D.C. 20224 (Attention: CC:LR:T) (202-566-3478).

SUPPLEMENTARY INFORMATION:

BACKGROUND

On July 30, 1976, the FEDERAL REGISTER published proposed amendments to the Income Tax Regulations (26 CFR Part 1) under section 301 of the Internal Revenue Code of 1954 and to the Pension, etc. Excise Tax Regulations (26 CFR Part 54) under section 4975 (d) (3), (e) (7), and (e) (8) of the Code (41 FR 31833). Similar Department of Labor provisions appeared at the same time (41 FR 31870).

By a notice published in the FEDERAL REGISTER on October 19, 1976, the public was invited to comment orally or in writing not only upon issues addressed in the proposed amendments, but also upon issues addressed by section 803(h) of the TAX Reform Act of 1976 (90 Stat. 1590) and by the Conference Report of the Committee of Conference on H.R. 10612 (H.R. Rep. No. 94–1515, 94th Cong., 2d Sess., 539–542 (1976)), as both relate to ESOP's.

A public hearing was held on November 12, 1976. After consideration of all the comments regarding the proposed amendments, certain of those amendments are adopted and others are re-proposed elsewhere in today's FEDERAL REGISTER. The temporary regulations adopted in this Treasury decision incorporate by reference the re-proposed amendments.

The temporary regulations also incorporate by reference a proposal relating to an amendment under the TAX Reform Act of 1976. The notice of this proposed amendment to the regulations is published for the first time along with the re-proposed amendments relating to the Employee Retirement Income Security Act.

ISSUES ADDRESSED

The temporary regulations contain provisions relating to the following issues;

(1) Non-terminable plan provisions,
(2) Integrated plans,
(3) Special multiple plan rule for combined ESOP's, and
(4) Current payment of income to participants.

GUIDELINES SUPERSEDED

Questions and answers relating to ESOP's were published in Technical Information Release (TIR) 1413 on November 4, 1975, as guidelines pending the issuance of regulations. The temporary regulations under this Treasury decision supersede question and answer G–8, relating to the distribution of dividends.

DRAFTING INFORMATION

The principal author of this regulation was Thomas Rogan of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulation, both on matters of substance and style.

ADOPTION OF AMENDMENTS TO THE REGULATIONS

Accordingly, 26 CFR Part 141 is amended by inserting in the appropriate place the following new section:

§ 141.4975–11 "ESOP" requirements.

Until superseded by final regulations, the provisions under § 54.4975–11 as published with notice of proposed rule making in the FEDERAL REGISTER for Friday, September 2, 1977 (42 FR 44396) apply.

There is need for immediate guidance with respect to the provisions contained

in this Treasury decision. For this reason, it is found impracticable to issue it with notice and public procedure under subsection (b) of section 553 of Title 5 of the United States Code or subject to the effective date limitation of subsection (d) of that section.

(Secs. 4975(e) (7) and 7805, Internal Revenue Code of 1954 (88 Stat. 976, 68A Stat. 917; 26 U.S.C. 4975(e) (7), 7805).)

JEROME KURTZ,
Commissioner of Internal Revenue.

Approved: August 26, 1977.

LAURENCE N. WOODWORTH,
Assistant Secretary of the Treasury.

[26 CFR Part 54]

[LR-75-77]

EMPLOYEE STOCK OWNERSHIP PLANS

Notice of Proposed Rulemaking

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains proposed regulations relating to employee stock ownership plans ("ESOP's"). Changes in the applicable tax law were made by the Employee Retirement Income Security Act of 1974 and the Tax Reform Act of 1976. The regulations would provide the public with the guidance needed to comply with the law. They would affect all employees who participate in ESOP's and employers who establish ESOP's.

DATE: Written comments and requests for a public hearing must be delivered or mailed by October 3, 1977. The amendments are generally proposed to be effective for plan years ending after December 31, 1974.

ADDRESS: Send comments and requests for public hearing to: Commissioner of Internal Revenue, Attention: CC:LR:T (LR-75-77), Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT:

Thomas Rogan of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, D.C. 20224 (Attention: CC:LR:T) (202-566-3478).

SUPPLEMENTARY INFORMATION:

BACKGROUND

On July 30, 1976, the FEDERAL REGISTER published proposed amendments to the Income Tax Regulations (26 CFR Part 1) under section 301 of the Internal Revenue Code of 1954 and to the pension, etc. Excise Tax Regulations (26 CFR Part 54) under section 4975(d)(3), (e)(7), and (e)(8) of the Code (41 FR 31833). Similar Department of Labor provisions appeared at the same time 41 FR 31870).

By a notice published in the FEDERAL REGISTER on October 19, 1976, the public was invited to comment orally or in writing not only upon issues addressed in the proposed amendments, but also upon issues addressed by section 803(h) of the Tax Reform Act of 1976 (90 Stat. 1590) and by the Conference Report of the Committee of Conference on H.R. 10612 (H.R. Rep. No. 94-1515, 94th Cong., 2d Sess., 539-542 (1976)), as both relate to ESOP's.

A public hearing was held on November 12, 1976.

After consideration of all the comments regarding the proposed amendments, some of those amendments are revised and reproposed in this document. Others are adopted by a Treasury decision published elsewhere in today's FEDERAL REGISTER. Also, temporary regulations parallel to the proposed and reproposed amendments contained in this document are adopted in today's FEDERAL REGISTER.

The proposed amendments also contain a provision relating to section 803 (h) of the Tax Reform Act of 1976.

NONTERMINABLE PLAN PROVISIONS

The proposed amendments would require an ESOP to include provisions protecting the rights of participants under securities acquired with the proceeds of an exempt loan. Thus, after an exempt loan is repaid or after the plan ceases to be an ESOP, these securities would remain subject to the put option requirements if they were subject to them at the time of the loan. The plan could not be amended to provide otherwise.

INTEGRATED PLANS

Integrated ESOP's would not be permitted after November 1, 1977. However, ESOP's in existence and integrated on that date could continue to operate without amendment. The plan provisions relating to the integration level and the integration percentage could not be increased by later amendments. However, the integration level could continue to increase under the plan if geared to a variable figure determined apart from the plan such as the taxable wage base under the Social Security Act.

DISTRIBUTION OF INCOME

The proposed amendment would provide rules for the current payment of income under ESOP's.

COMMENTS AND REQUESTS FOR A PUBLIC HEARING

Before adopting these proposed regulations, consideration will be given to any written comments that are submitted (preferably six copies) to the Commissioner of Internal Revenue. All comments will be available for public inspection and copying. A public hearing will be held upon written request to the Commissioner by any person who has submitted written comments. If a public hearing is held, notice of the time and place will be published in the FEDERAL REGISTER.

DRAFTING INFORMATION

The principal author of this regulation was Thomas Rogan of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulation, both on matters of substance and style.

PROPOSED AMENDMENTS TO THE REGULATIONS

The proposed amendments to 26 CFR Part 54 are as follows:

Section 54.4975-11 is amended by—

1. Revising paragraph (a)(3), (7)(ii), (8)(iii), and (10),
2. Adding a new sentence at the end of paragraph (d)(3),
3. Revising paragraph (e)(2), and
4. Revising paragraph (f)(3).

These revised and added provisions read as follows:

§ 54.4975-11 "ESOP" requirements.

(a) *In general.* • • •

(3) *Nonterminable provisions.* An ESOP must provide that, notwithstanding the fact that it ceases to be an ESOP, qualifying employer securities acquired with proceeds of an exempt loan will continue after the loan is paid to be subject to § 54.4975-7(b)(4), (10), (11), and (12) relating to put, call or other options and to buy-sell or similar arrangements. Thus, for example, an ESOP must provide that publicly traded securities acquired with exempt loan proceeds must, if the plan ceases to be an ESOP after their acquisition, satisfy the put option provisions in the event that the securities cease to be publicly traded within 15 months after their distribution.

• • • • • •

(7) *Certain arrangements barred.* • • •

(ii) *Integrated plans.* An ESOP established after November 1, 1977, must not be integrated directly or indirectly with contributions or benefits under Title II of the Social Security Act (42 U.S.C. 401) or under the Railroad Retirement Act of 1937 (45 U.S.C. 228a). ESOP's established and integrated before such date may remain integrated. However, such plans must not be amended to increase the integration level or the integration percentage. Such plans may in operation continue to increase the level of integration if under the plan such increase is limited by reference to a criterion existing apart from the plan.

(8) *Effect of certain ESOP provisions on section 401(a) status.* • • •

(iii) *Income pass-through.* An ESOP will not fail to meet the requirements of section 401(a) merely because it provides for the current payment of income under paragraph (f)(3) of this section.

• • • • • •

(10) *Additional transitional rules.* Notwithstanding paragraph (a)(9) of this section, a plan established before November 1, 1977, that otherwise satisfies the provisions of this section constitutes an ESOP if by December 31, 1977, it is amended to comply from November 1, 1977, with this section even though before such date the plan did not satisfy the following provisions of this section:

(i) Paragraph (a)(3) and (8)(iii);

(ii) The last sentence of paragraph (d)(3); and

(iii) Paragraph (f)(3).

• • • • • •

(d) *Allocations to accounts of participants.* • • •

(3) *Income.* • • • Certain income may be distributed currently under paragraph (f)(3) of this section.

• • • • • •

(e) *Multiple plans* • • •

(2) *Special rule for combined ESOP's.* Two or more ESOP's, one or more of which does not exist on November 1, 1977, may be considered together for purposes of applying section 401(a)(4) and (5) or section 410(b) only if the proportion of qualifying employer securities to total plan assets is substantially the same for each ESOP and—

(i) The qualifying employer securities held by all ESOP's are all of the same class; or

(ii) The ratios of each class held to all such securities held is substantially the same for each plan.

(3) *Amended coverage, contribution, or benefit structure.* For purposes of paragraph (e)(1)(i) of this section, if the coverage, contribution, or benefit structure of a plan that exists on November 1, 1977 is amended after that date, as of the effective date of the amendment, the plan is no longer considered to be a plan that exists on November 1, 1977.

(f) *Distribution.* • • •

(3) *Income.* Income paid with respect to qualifying employer securities acquired by an ESOP in taxable years beginning after December 31, 1974, may be distributed at any time after receipt by the plan to participants on whose behalf such securities have been allocated. However, under an ESOP that is a stock bonus plan, income held by the plan for a 2-year period or longer must be distributed under the general rules described in paragraph (f)(1) of this section. (See the last sentence of section 803(h), Tax Reform Act of 1976.)

• • • • • •

JEROME KURTZ,
Commissioner of Internal Revenue.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

COASTAL ENERGY IMPACT PROGRAM PROJECT ASSESSMENTS AND ENVIRONMENTAL IMPACT STATEMENTS

Environmental Guidelines for Preparation

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Department of Commerce.

ACTION: Notice of guidelines.

SUMMARY: The purpose of these guidelines is to provide coastal States and local communities with a detailed description of the environmetnal information necessary as part of their applications for certain kinds of assistance under the Coastal Energy Impact Program (CEIP), section 308 of the Coastal Zone Management Act of 1972, as amended. These guidelines are designed to solicit information essential to the environmental review process required under the National Environmental Policy Act of 1969 (NEPA).

FOR FURTHER INFORMATION CONTACT:

Joellyn Murphy, National Oceanic and Atmospheric Administration, Office of Coastal Zone Management, 3300 Whitehaven Street NW., Washington, D.C. 20235 (202–634–4249).

SUPPLEMENTARY INFORMATION:

ENVIRONMENTAL IMPACT ASSESSMENT (EIA)

Each applicant requesting CEIP funding for a proposed project must complete an Environmental Impact Assessment, based on the following guidelines, to be submitted with the initial application. A copy of the EIA will be sent to the Coastal Energy Impact Program, OCZM/NOAA, Room 372, 3300 Whitehaven Street NW., Washington, D.C. 20235.

An EIA documents the analysis of environmental impacts associated with alternative courses of action studied during the decision making process. The assessment aids in the selection of the best alternative for the siting and construction of a proposed project.

I. CEIP GUIDELINES: ENVIRONMENTAL ASSESSMENT INFORMATION

A. PROCEDURES FOR PREPARING ENVIRONMENTAL IMPACT ASSESSMENTS

The purpose of an environmental impact assessment is to document the analysis of environmental impacts associated with alternative courses of action studied by the applicant during the development of the project proposal, so as to aid OCZM in making its determination as to whether an environmental impact statement (EIS) must be prepared in accordance with the National Environmental Policy Act of 1969. The assessment should also aid the applicant in the selection of an alternative as the proposed course of action. Because the environmental assessment will be used by OCZM in making its decision on the need for an EIS, the information contained in the assessment should be presented in a manner which clearly and succinctly describes the significant environmental impacts that may be associated with the proposed project and its alternatives. These guidelines are intended to aid the applicant in developing an EIA which will serve these needs.

1. *General Project Description*

Identify name of site, type of proposed facility and operation. Identify all specific elements of the project including size, land area, capacity in applicable units affected. Identify the project briefly and identify whether it is an alteration or modification of an existing facility, an additional facility by itself or in an existing complex, or one of the first facilities in a new complex. If it is part of a new complex, the review should address the entire complex rather than only the immediate construction activity addressed in the grant application.

2. *Beneficiaries*

a. Identify the name and size of the community, county or region to be affected.

b. Identify the new or expanded coastal energy activity which is triggering the proposed project.

c. Document the increases in employment and the anticipated increase in population in the community, county/town, or region.

3. *Project Alternatives*

This section shall describe the full range of options from which the proposed project was chosen, the adverse and beneficial environmental impacts of those options, and the reasons the various alternatives were not chosen (for example, different sites or designs, mitigating measures, etc.).

This section will be reviewed by the Office of Coastal Zone Management (OCZM) to determine if the most environmentally appropriate site, design, and timing for the proposed project has been selected.

The general procedure to be used in developing a description for each alternative is as follows:

(a) Describe what is the effect on the area if no action is taken.

(b) Determine objectives of the action, expressed in terms of desired accomplishment.

(c) Determine a general design for any physical structures required for the alternative. Describe possible approaches.

(d) Select a general site if the action involves a major facility.

(e) Develop a general description of the facility and its surrounding environment during construction and after completion of construction.

(f) Describe the character or nature, including existing use, of the environment physically affected, including any downstream uses of water bodies being altered.

(g) Prepare a short (e.g., one page) general description of each alternative. The description should be based on available maps, a visual reconnaissance of the site, and available literature. As an example, if the alternative were a hydroelectric dam, the description could consist simply of a "hydroelectric dam at about river mile 597 with a reservoir elevation of 1,290 ft. and a tailwater elevation of 950 ft. The turbines would be designed for a maximum flow rate of 80,000 cfs (corresponding to generation of 1800/NWe) and no fish ladders or navigation locks would be provided. The reservoir would extend upstream to mile 700. Lands to be inundated are currently used for agriculture. The river contains an important salmon spawning area and provides passage for numerous upstream migrants, etc."

4. *Project Design*

Briefly summarize engineering design. Applicants are advised to employ project design features and techniques which will result in the choice of the alternative providing the least disturbance to the surrounding environment.

Applicants having projects in the later stage of design or with final drawings completed will review all aspects of the project design and development for compatibility with environmental standards.

Environmental protection features with respect to design must meet Federal, State and local requirements, and where Federal, State or local environmental codes and ordinances differ, the most demanding standards must be incorporated into the project design.

5. *Compliance with State and Local Environmental permits and procedures.*

Indicate if the proposed project is subject to State/local environmental regulations and permit procedures. Summarize the results of compliance with these requirements and attach available documentation.

6. *Environmental Summary*

Briefly summarize the major unavoidable environmental problems of the proposed project. Evaluation of environmental impacts will be considered by the applicant in depth when filling out Section I B of these Guidelines.

7. *Short-Term and Long-Term Impacts of Project*

The short-term commitment of environmental resources will be compared to the proposed project's cumulative, long-term impacts. This section thus will discuss "trade offs": what long-term environmental productivity will be enhanced by the short-term uses of the environment in the proposed project. Special attention should be given to effects upon ecological inter-relationships, and to long-term hazards to human health and safety.

8. *Any irreversible and irretrievable commitment of resources which would be involved if the proposed project were implemented*

This section shall discuss and quantify, when possible, any irreversible or irretrievable uses of resources in the proposed project. "Resources" should be defined broadly to include not only air and water quality, but also archeological or historical sites, the habitats of threatened or endangered species, dedicated uses areas such as parks and valuable, environmentally productive areas such as wetlands.

9. *Federal/State Agency Involvement*

a. Identify Federal/State agency funding of other projects as a result of the same coastal energy activity (if applicable). Attach comments received from the A–95 clearinghouse process.

b. Environmental Analysis of Participating Federal Agencies. Indicate if another Federal agency is participating in the project either through the provision of additional funds, a companion project, or a permit review authority. Summarize the results of the involved agency's environmental impact analysis and attach available documentation.

c. Identify existing and proposed area-wide planning agencies (both Federal and State) for the area under consideration.

d. Was the proposed project ever considered by other public funding agencies? Summarize the results.

10. *Consultation and coordination with others*

Since one of the intentions of NEPA was to open an important part of the planning process, environmental study, to public review and comment, all private and public organizations which have cooperated in or contributed to the preparation of the environmental information document should be listed. OCZM will review each project proposal to determine if the public has participated adequately at the earliest stages of a legally mandated public process.

11. *Processing*

Upon receipt, the applicant's Environmental Impact Assessment will be reviewed by the CEIP staff. When the EIA document for a proposed project is complete the usual review period will be 10 days.

In the event of omissions in the study or the need for additional information, the applicant will be advised to submit or provide additional necessary data and material. Where review of the Environmental Impact Assessment discloses need for revisions, applicant will be notified of the necessary changes.

In those instances where the support of a project would produce a significant effect on the environment, it may be necessary to request the applicant to develop materials to be used in preparing a draft Environmental Impact Statement which will be reviewed and issued by the Department of Commerce. (Section II).

B. GUIDELINES FOR ANALYZING SIGNIFICANT ENVIRONMENTAL IMPACTS

The ten categories listed are areas of environmental concern regulated by Federal law. The proposed project must consider in detail potential effects it will have on each of these areas and must conform to permit and public notice requirements.

1. *Land Use*

a. *Development Impact:* (1) Describe the project site and its present use.

(2) Describe the existing land use plan and zoning designations for the project area. Determine whether the plan and zoning are consistent with each other and with the zoning ordinance. Will a zoning amendment be necessary to permit construction of the project?

b. *Impact on other Community Facilities.* If the proposed project is a new or expanded community facility system, does it have the capacity to provide for:

(1) Nursing Homes or Hospitals: 200 units (beds) or more.

(2) Subdivisions: Typical proposed lot size 6000 sq. ft. or greater = 100 units or more.

(3) Multifamily structures: Typical proposed lot size under 6000 sq. ft. = 200 units or more. This was a threshold limit established by HUD, 4010.1 CHG, Nov. 4, 1974.

If the facility has the potential to expand the size of a community beyond these thresholds then special attention must be given to the impact on other community facilities such as schools, hospitals, recreational resources, transportation facilities, fire stations, libraries. Current capacities of the existing public facilities of the area including waste water treatment and water supply systems need to be identified and future demands on their capacities projected.

c. *Submit a small-scale map,* using USGS topographic map 1:24,000 and U.S. Soil Conservation soil/slope maps, locating environmental features of the area in relation to the proposed project:

Dunes	Farmland
Beaches	Seismic conditions
Slippage soils	Streams and creeks
Steep slopes	Wildlife habitats
Wetlands	Proximity to dedicated public use areas
Areas of scenic beauty	Highways and secondary roads
Floodplains	Designated historic preservation areas
Woodlands	
Aquifer recharge areas	

d. *Floodplains.* According to Executive Order 11988, dated May 24, 1977, the term floodplain means "the lowland and relatively flat areas adjoining inland and coastal waters including flood-prone areas of offshore islands, including at a minimum, that area subject to a one percent or greater chance of flooding in any given year." This Executive Order requests that all agencies must protect the values and benefits of floodplains and reduce risks of flood losses by not conducting, supporting or allowing action located in flood plains unless it is the only practicable alternative. Use available HUD floodplain boundary maps, or more detailed U.S. Army Corps of Engineers maps or other available floodplain information, to locate the project in relation to the 100-year floodplain.

If it is determined from the environmental analysis that the only feasible location for the project is a designated floodplain, then the design of the project must (i) minimize potential harm to the floodplain, (ii) meet flood-proof standards under the National Flood Insurance Program and (iii) insure that the project in compliance with the Flood Disaster Protection Act is a special flood hazard area as specified in Section 102 (a) Title I.

e. *Wetlands.* "The term 'wetlands' means those areas that are inundated by surface or ground water with a frequency sufficient to support, and under normal circumstances does or would support, a prevalence of vegetative or aquatic life that requires saturated or seasonally saturated soil conditions for growth and reproduction. Wetlands generally include swamps, marshes, bogs, and similar areas such as sloughs, potholes, wet meadows, river overflows, mud flats, and natural ponds." This definition was contained in Executive Order 11990, dated May 24, 1977.

According to the Order, Federal assistance for new construction located in wetlands should be avoided unless the agency finds that there is no practicable alternative and that the proposed action includes all practicable measures to minimize harm to wetlands which may result from such use.

The term "new construction" includes "draining, dredging, channeling, filling, diking, impounding and related activities and any structures or facilities begun or authorized after the effective date of the Order (May 25, 1977)."

Each Federal agency is also required to provide opportunity for early public review on any plans or proposals for new construction in wetlands.

The nation's wetlands are also protected by section 404 of the Federal Wate Pollution Control Act of 1972 which requires the applicant to apply for a permit for dredge and fill activities in wetlands from the U.S. Army Corps of Engineers. The permit must be obtained by the applicant prior to submission of the application for CEIP funding.

Evaluation of the cumulative effect of piecemeal changes in wetland areas is emphasized in the Corps regulations. No permit is granted unless the benefits of the proposed alteration outweigh the damage to the wetlands resource and the proposed alteration is necessary to achieve those benefits. The applicant must further provide sufficient data on the availability of feasible alternative sites.

If the proposed project will either be located in or adjacent to a wetlands using the above definition, please estimate the project location on the U.S. Geological Survey topographical map exhibit, 1:24,000 (See Section B, Subsection 1(c)) and complete the following check list.

Do the wetlands within the impact area provide:

Feeding for waterfowl, migratory birds and other species.[1]

Wintering areas for waterfowl.[1]

Nursery areas.[1]

Breeding areas.[1]

[1] Identify major species of mammals, fishes, birds, reptiles and amphibians.

V 42 171 SEP 2 77 UMI

Barrier Islands.[1]
Grass Beds.
Shellfish Beds.[1]
Drainageways.
Vegetated Tidelands (salt marshes and mangrove swamps).
Buffer areas.
Migration Pathways.[1]
Filter areas for pollution. (Specify proximity to urban areas and industrial facilities.)
Recharge areas for ground water and aquifers.
Fish and Wildlife game refuge.[1]
Wildlife habitat, including endangered species (Specify type of habitat).[1]
Dedicated Public Use Areas.
Has the applicant applied for or received a permit from the U.S. Army Corps of Engineers?
Has the applicant applied for or received a permit from the State/local wetlands management authority?
Give the name and address of the State and local wetlands management authority.

Information on the resident and migratory species of wildlife and the functions performed by the wetlands in question can be obtained from the U.S. Fish and Wildlife Service field offices, local and State game and fish agencies, local wetlands commissions and other related agencies.

f. Farmland. The Coastal Zone Management Act designates farmland in production as a preferred economic activity in the coastal zone. If the proposed project site will incorporate existing farmland either under production or not in production, complete the following check list:

Does any portion of the project site meet the criteria for prime farmland as defined by U.S. Soil Conservation Service USDA in the Land Inventory and Monitoring Memo-3 (October 31, 1975).
Is the site in a special agricultural district designated by either the State or local governments?
Is the cropland on the site significantly used by wildlife for feeding, nesting or breeding areas?
Is the site located in a district designated by any planning agency as farmland?

Information for this section can be obtained from the nearest Soil Conservation Service office of the Department of Agriculture, the State Conservation/State Extension Services or other appropriate agencies.

g. Wildlife Habitat. (1) The Federal Fish and Wildlife Coordination Act of 1958 recognized the value of wildlife and wildlife habitat as a national resource to be conserved and protected. If the proposed project, or any one of the alternatives, is located in or adjacent to a natural area (wetlands, cropland, dedicated use area), providing wildlife habitat, determine the major effects of the action on the habitat area assessing the extent of the impact.

i. What are the primary species of animals, birds and reptiles common to the area?
ii. What land area will be altered? In what manner?
iii. Are any rare or endangered species indigenous to the proposed altered lands?[2]

[2] If the answer is yes, please describe in greater detail.

iv. Will there be a change in vegetation or stream flow patterns over a large area of land which would affect habitat?[2]
v. Can habitats elsewhere be purchased and improved to accommodate lost population?[2]
vi. What special habitats, such as food, cover, nesting and breeding areas will be changed and what will be the effects of the changes?
vii. What are the important commercial and sports species utilized in this area?
viii. Will the action alter migration patterns (waterfowl, fish, wildlife)?

(2) Concern for various species of fish, wildlife, and plants endangered by economic growth and development without accompanying conservation measures led to the enactment of the Federal Endangered Species Act of 1973.

Therefore, please indicate whether the proposed project could:

i. Jeopardize the continued existence of any endangered or threatened species (flora and fauna), and
ii. Result in the destruction or modification of a habitat or a portion of such habitat of endangered or threatened species.

This analysis shall be conducted in consultation with the Regional Directors of the U.S. Fish and Wildlife Service and/or the Regional Directors of the National Marine Fisheries Service. If there appears to be an effect, the CEIP office shall be notified and shall coordinate the project with the Regional Directors of the U.S. Fish and Wildlife Service. The results of this coordination shall be included in the assessment and considered in the environmental impact consideration.

2. Noisc Impacts

New construction or substantial rehabilitation of noise sensitive land uses such as nursing homes, hospitals, group practice facilities and the location of day care or community counselling services must be justified if it is located in unacceptable noise zones.

To determine if the proposed project is in an unacceptable noise zone, apply Noise Abatement and Control Standards set by HUD Circular 1390.2.

a. *Unacceptable Noise Standards.*[3]—Exceeds 80 dB(A) 60 minutes per 24 hours. Exceeds 75 dB(A) 8 hours per 24 hours.

b. *Optimal Noise Standards.*—Does not exceed 45 dB(A) more than 30 minutes per 24 hours.

c. *The following is a noise standard reference guide:*

Near airport—Jet plane 100 ft. away—average 130 db(A) internal combustion aircraft engine—average 110 dB(A).

Near traffic—Busy street—average 80 dB(A). Automobile at 35–40 M.P.H. average 70 dB(A). Subway train passing station—100 dB(A).

Near large industry: (identify). Pneumatic riveter—average 130 dB(A). Pneumatic drill, 20 ft. away—90 dB(A).

[3] The decibel values for those sound levels measured using A-weighting network of a standardized sound level meter. The A-weighting approximates the response of the human ear to noise.

Are there TV or radio transmission facilities within three horizontal miles of the facility? If so, describe.

3. Air Quality

Federal air quality standards to meet national air quality goals are divided into two categories: primary standards designed to protect human health, and less stringent secondary standards to protect property and aesthetics.

Each State has the primary responsibility to assure air quality by the establishment of implementation plans which specify the manner in which national primary and secondary ambient air quality control regions will be achieved and maintained within the various air quality control regions (title I, section 107) of the Clean Air Act. To determine if the proposed action will have an effect on air quality sufficient to require a detailed assessment, the following should be submitted for the proposed project and considered for each alternative (if applicable).

a. Types of contaminants, specifically toxic or nuisance pollutants such as carbon monoxide, nitrogen dioxide, sulfur oxides, organic compounds, photochemical oxidants, suspended particulate matter, hydrogen sulfide, lead, fluoride, calcium oxide, and beryllium.

b. Proximity to human habitations, especially if within one mile of airports, schools, residential areas, etc. because of possible effects on visibility, esthetic, health, vegetation, and animal life.

c. Topographic features—influencing air currents and ventilation factor.

d. Ventilation factors as measured by volume of air available for the dispersal of pollutants which is dependent upon the character and height of the temperature inversion layer and the amount of windflow. Undesirable effects can be caused in areas that have high frequency of temperature inversions and low wind speeds (0–5 mph).

e. Air pollution history of the area where the action would take place, especially if local air quality standards are being exceeded.

f. Existing industrial concentration and associated air contaminants.

g. Potential for changes in the microclimate of the area (i.e., the climatic structure of the air space near the ground such as temperature, humidity, wind, air pollution, etc.).

This information is available from the State Air Quality Control Board or from the Regional EPA Offices.

Wherever there is some variation between State (or local) and Federal air quality standards, the strictest one applies to the project.

4. Water Quality

Each State is required to set water quality standards for State waters within its boundaries and to set effluent limitations and total maximum daily loads of pollutants including thermal discharges in order of the severity of pollution.

a. *Standards.*—For projects discharging effluents into the waterways, applicable effluent limitations and state water

quality standards for the impact area should be listed. Information can be obtained from the State water control authority or the Regional EPA Office. Water quality problems already identified by local/State or Federal agencies should be specified.

b. *Environmental effects.*—To determine whether the proposed project will cause significant environmental effects on the biota or human usage of water, the following information should be considered for each alternative and submitted for the proposed project (if applicable).

(1) Will the water temperature change? Indicate volume and temperature of merging waters.

(2) Will the water solids content change because of increased suspension of solids, increased settling of solids, or a change in dissolved solids?

(3) Will there be a significant change in nitrogen saturation?[4]

(4) Will there be any change in concentration of hazardous chemicals or radionuclides?[4]

(5) Will there be a change in pathogens?[4]

(6) Will impoundments or changes in water temperature change the rate of eutrophication?[4]

(7) Will the taste or odor change.[4]

(8) Do any of these changes in water quality create conditions which are outside of permissible or desirable conditions as expressed by water quality standards or general social opinion?[4]

5. Waste Water Treatment Plants

If the proposed project is a waste water treatment plant, the following information is requested. This information follows closely the information needed for the facility—planning process developed by EPA for its municipal grants construction program for sewage treatment works, authorized under Title II of the FWPCA. The purpose of coordinating the CEIP grant program with EPA's program is to insure that the intent of the Federal Water Pollution Control Act is carried out.

a. *State Continuing Planning Process or Related Projects and Basin Plans.*—Plans for the proposed treatment plant must conform to applicable approved basin plans prepared under section 303 of the FWPCA. Under the State continuing planning process, "segments" of the nation's waterways have been classified initially as "water quality limited" or "effluent limited". "Water quality limited" segments are those which cannot be expected to meet established water quality standards even if all point sources achieve the effluent limitations required by section 301 of FWPCA. "Effluent limited" segments are those where water quality standards can be achieved after all point sources meet the effluent limitations required by section 301.

b. *Effluent Limitations.*—The assessment should list the effluent limitations applicable to the facility being planned. These effluent limitations normaly may be found in a municipal permit issued under the National Pollutant Discharge Elimination System. A copy of the municipal permit should be attached to the assessment.

If the proposed project is on a "water quality limited" waterway the applicable water quality standards should be obtained from the State and briefly be summarized in the assessment, in addition to effluent limitations necessary to meet the applicable water quality standards.

If the proposed treatment plant will discharge into an "effluent limited" stream segment, secondary treatment must be provided as a minimum (40 CFR Part 133 "Secondary Treatment Information," FEDERAL REGISTER Vol. 38 No. 159, August 17, 1973, pp. 22298–22299). Discharge limitations for treatment plants on "water quality limited" segments will be determined in the basin planning process or, if not available, in conjunction with the permit program.

c. *Areawide Waste Treatment Management Plans.*—Areawide plans, authorized under section 208 of the FWPCA, are to set forth a comprehensive management program for collection and treatment of wastes and for controlling pollution from all point and non-point sources. Indicate whether the proposed project has been considered, is part of, or has been rejected by, the areawide 208 plan or statewide nondesignated area plan.

d. *Title II, section 201 EPA grant program.*—Is the proposed waste treatment project on the State priority list? If so, has it been rejected by EPA or any other Federal agency,

e. *Municipal permits.*—The Waste Water Treatment Plant plan must, as a minimum, conform with all applicable permit requirements and include a copy of the permit if already obtained.

f. *Planning Area for Alternatives.*—The facility planning area for any new waste water treatment should be large enough to analyze the cost-effective alternative methods of waste transport, treatment handling and disposal of sludge and disposal of treated effluent. It should also be large enough to analyze both the primary and secondary (induced growth) effects of alternatives.

(1) Provide a USGS topographic map showing the planning area, the boundaries of political jurisdictions, boundaries of streams, lakes, water impoundments and water basin and service areas of existing waste treatment systems.

(2) Existing waste water flows and treatment systems. Provide an inventory of existing waste water treatment systems, including services, treatment plants, effluent disposal or reuse methods, sludge disposal methods, and flows and waste reduction measures if any in the planning area.

g. *Develop and Evaluate Alternatives.*—The alternative of optimizing performance of existing facilities should be considered first. The level of treatment attainable with optimum performance should serve as a baseline for planning additions or modifications to the treatment system.

Regional Solutions. The possibility of a regional solution to waste water treatment problems should be explored early in the planning process to reduce the number of options requiring detailed consideration to a manageable number. Regional solutions may include interconnection of facilities, construction of one or more large facilities to eliminate the need for many small facilities and joint management of facilities to improve operation and maintenance and reduce costs. Joint facilities may involve interceptors, treatment plants and sludge and effluent disposal systems.

Existing plans which address regional options should be referenced and important conclusions summarized in the assessment. Further analysis of options will not be necessary if regional questions are resolved by existing plans.

h. *Infiltration and Inflow.*—Absent a State certification that excessive infiltration/inflow does not exist, then estimate the infiltration/inflow into the system. Approximate, on a preliminary basis, the costs of treating the existing problems versus the costs of rehabilitating the sewer system to eliminate the problem.

i. *Dredging and Filling.*—Title IV, Permits and Licenses (section 404(a)), authorized the U.S. Army Corps of Engineers to regulate discharging of dredge or fill material into navigable waters by issuing permits. Section 303(b) directs EPA to develop guidelines with the U.S. Corps of Engineers to evaluate the disposal sites for the fill in terms of the effect on municipal water supplies, shellfish beds, fishery areas (including spawning and breeding areas), wildlife or recreational areas.

For projects with dredging and filling activities, describe the type, composition and quantity of the material to be dredged, the method of dredging and the site and plans for disposal of the dredged material.

6. Solid Waste Management

Indicate all aspects of the project including beneficiaries' operations, and known indirect effects which will necessitate the disposal of solid wastes. Indicate the kinds and expected quantities of solid wastes involved and the disposal techniques to be used. Evaluate the adequacy of these techniques especially in relationship to air and water quality. Indicate if recycling or recovery programs are or will be used. Cite any contacts with appropriate experts.

7. Human Population

Will the construction of the facility disrupt one of the following services to a human population for more than 24 hours: water, electrical power, natural gas, or sewage. Indicate the number of people to be relocated and arrangements being made for the relocation. A project must comply with requirements of Title II and Title III of the Uniform Relocation Assistance and Real Property Acquisition Act of 1970 (Pub. L. 91–686).

[4] If the answer is yes, please quantify with the best available information.

V 42 171
SEP 2 77
UMI

8. *Transportation*

Describe available transportation networks such as highways and rail. Estimate the increase in motor vehicle traffic and the ability of existing roads to safely accommodate this increase. Describe new traffic patterns which will arise because of project. Discuss how these new traffic patterns will affect the land uses described above especially residential, hospitals, schools and recreational. Describe the consistency of the project's transportation impacts with the transportation plans for the area and any air quality thresholds. Cite any contact with appropriate experts.

9. *Wild and Scenic Rivers*

Indicate whether the project will affect a river or portion of it which is either included in the National Wild and Scenic Rivers System or designated for potential addition to the system. If so, an analysis shall be conducted through discussions with the appropriate regional office of the Bureau of Outdoor Recreation, the U.S. Department of Agriculture when forest service lands are involved, and appropriate State agencies having implementation authorities. Summarize the results of these discussions. If there appears to be an effect, the CEIP program staff shall be notified and will then coordinate the project with the Secretary of Interior or Agriculture, as required.

The results of this formal coordination shall be included in the assessment and considered in the environmental impact determination.

10. *Historic Preservation*

In this section, steps shall be taken to comply with the "Procedures for the Protection of Historic and Cultural Properties." First, indicate that the National Register of Historic Places has been reviewed and whether there are any listed properties located within the area to be affected by the project. Second, indicate the steps taken such as historical/archeological surveys to determine if there are any properties eligible for listing located within the affected area. Summarize the results of the consultation with the State Historic Preservation Officer (SHPO) and attach appropriate documentation. Discuss the views of any other experts contacted. Based upon the above review process and the views of the SHPO, state whether or not an eligible or listed property will be affected.

If there will be an effect, discuss all of the steps and protective measures taken to complete the "Procedures." Describe the affected property and the nature of the effect.

Describe alternative solutions. For example, the Public Buildings Cooperative Use Act will allow the Public Buildings Service of the General Services Administration (GSA) to locate Federal offices in buildings of historic and architectural value and encourage mixed commercial and cultural uses.

II. PROCEDURES FOR PREPARING ENVIRONMENTAL IMPACT STATEMENTS (EIS)

The Environmental Impact Assessment prepared for a proposed project will be reviewed by the OCZM Associate Administrator in accordance with these guidelines, and with Department of Commerce Administrative Order 216-6, and a "Notice of Intent" or a "Notice of Negative Declaration" will be issued.

Notice of Intent.—A notice of intent is a CEIP letter, memorandum or news release that notifies appropriate Federal, State and local agencies, and the public that the OCZM intends to prepare an environmental statement on a particular action based on the environmental assessment and review.

Notice of Negative Declaration.—A notice of negative declaration is a CEIP letter, memorandum or news release notifying appropriate Federal, State, and local agencies, and the public that an environmental statement is not required and will not be prepared on a particular action.

A. REGIONAL EIS

The Associate Administrator may determine that a Regional EIS will be prepared if a group of related projects are concentrated in a geographic area. A regional EIS will be prepared by the CEIP staff in coordination with the appropriate local, State, and Federal interests.

B. DECISIONS OF ADEQUATE PRIOR ENVIRONMENTAL REVIEW

The Associate Administrator can determine that the Environmental Impact Assessment on a project has received "adequate" prior environmental review. Projects which have been the subject of prior assessment either by the Department of Commerce, or another Federal agency, or have been covered by an areawide Environmental Impact Statement shall not require additional environmental assessment if the following conditions are met:

1. An environmental review pursuant to NEPA has been undertaken by a Federal agency and completed within the last three years;

2. The prior review has been evaluated by CEIP staff and found to be:

a. Sufficiently detailed and accurate in its description of the proposed action to allow a substantive judgment of the environmental consequences of those actions;

b. Currently accurate in its description of existing and prospective site and technology conditions which might affect the contemplated project;

3. The prior review has not been subjected to legal challenge, or if challenged, was found by the court to be adequate, and no further legal action is pending;

4. There are no identifiable adverse consequences to the proposed CEIP action which are environmentally significant and which might be mitigated or prevented through evaluation and/or project modification.

C. "THIRD PARTY" AGREEMENTS

If in the application process for section 308 (E) and (G) Grants it becomes evident that an EIS will be required, the responsible official may seek the applicant's interest in developing a draft EIS by the "third party" method. Generally, such an agreement should be established prior to the development of the applicant's Environmental Impact Assessment and serve the purpose of such environmental impact assessment.

Such agreement will not be initiated unless both the applicant and OCZM have agreed to its establishment. Under a third party agreement, both the applicant and OCZM have certain minimum responsibilities. The applicant will be responsible for retaining a third party consultant to prepare materials for use in the EIS. OCZM shall approve the selection of the third party consultant and shall base such approval on the objectiveness of the consultant, including such factors as the degree of financial independence, the ability to make a free and independent appraisal of environmental impact, and the absence of conflicting interest. In all cases OCZM will be responsible for the scope and content of the assessment or impact statement prepared under NEPA.

T. P. GLEITER,
Assistant Administrator for Administration.

UMI

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education

[45 CFR Part 166]

STATE ADULT EDUCATION PROGRAMS

Maintenance of Effort

AGENCY: Office of Education, HEW.

ACTION: Notice of proposed rulemaking.

SUMMARY: This proposed rule prescribes new maintenance of effort requirements and provisions for waiver for maintenance of effort for State adult education programs. Under existing regulations no payment could be made to a State that failed to maintain its previous year's level of effort. The proposed rule would allow a State an opporunity to deviate from the maintenance of effort requirements with a corresponding reduction of Federal funds, if any, to be determined by the nature of the circumstances causing the deviation.

DATES: Comments on or before October 17, 1977.

ADDRESSES: Comments should be addressed to Paul V. Delker, U.S. Office of Education, Regional Office Building No. 3, 7th and D Streets SW., Room 5056, Washington, D.C. 20202.

FOR FURTHER INFORMATION CONTACT:

Paul V. Delker, 202-245-2278.

SUPPLEMENTARY INFORMATION: Under the authority contained in section 307(b) of the Adult Education Act, 20 U.S.C. 1206, and section 431A of the General Education Provisions Act, 20 U.S.C. 1232, as amended by section 323 of Pub. L. 94-482, the Education Amendments of 1976, the Commissioner of Education, with the approval of the Secretary of Health, Education and Welfare, proposes to amend § 166.51 et seq. of the regulations for State Adult Education Programs (45 CFR Part 166) to establish new requirements for maintenance of effort by States and their political subdivisions.

Summary of the amended maintenance of effort requirement and provisions for waiver. Under existing regulations for the administration of the Adult Education Act, the State must certify that there will be available for expenditure by the State, including its political subdivisions, for adult education from non-Federal sources during the fiscal year for which the allotment is made an amount equal to not less than the total amount expended for such purposes from such sources during the preceding fiscal year.

The proposed regulation provides that the State shall certify that there was available for expenditure by the State for adult education from non-Federal sources for the preceding fiscal year an amount which was not less than the fiscal effort per student or the aggregate amount expended for such purposes from such sources during the second preceding fiscal year. Accordingly, the States may compute maintenance of fiscal effort on either a per student or aggregate expenditure basis.

In addition, the proposed regulations provide for three types of exceptions through a notification or waiver process. First, a State is allowed a maximum percentage reduction in fiscal effort of five percent below the base year for the years for which the Act is in effect. A percentage reduction is computed by dividing the amount of the reduction for the preceding year by the amount of the State's expenditures in the base year. The use of a percentage reduction by the State will not cause a corresponding reduction in the Federal share.

Secondly, the proposed regulations Commissioner may waive the maintenance of effort provision for exceptional circumstances. Exceptional circumstances, which carry a penalty of pro rata reduction of the Federal allocation, include situations where the State educational agency or local educational agency had at least some control of the events resulting in decreased expenditures, but nevertheless made a reasonable effort in a timely fashion to comply with the maintenance of effort requirement.

Thirdly, the proposed regulations contain the standards by which the Commissioner may waive the maintenance of effort provision for very exceptional circumstances. Very exceptional circumstances, which do not carry a penalty of pro rata reduction of the Federal allocation, include situations where the State educational agency or local educational agency had no control of the events resulting in decreased expenditures, but made a reasonable effort in a timely fashion to comply with the maintenance of effort requirement.

The proposed regulations also provide that in the event the Commissioner determines that it would not be equitable to grant a waiver for very exceptional circumstances, the Commissioner may grant a waiver for exceptional circumstances.

The regulations provide, however, that the Commissioner will not consider a waiver to be equitable to reflect exceptional or very exceptional circumstances unless the State agrees to restore future expenditure levels to the level which existed prior to the fiscal year for which the waiver was granted.

PUBLIC COMMENT TO THE NOTICE OF INTENT TO ISSUE REGULATIONS

As a first step in the regulation process, the Commissioner published a Notice of Intent to Issue Regulations in the FEDERAL REGISTER on November 22, 1976 (41 FR 51550-51559). The public was invited to offer comment, advice and guidance to the Office of Education in response to identified or other issues relating to the development of regulations for this amendment. The suggestions received from the public have been given consideration in the preparation of this proposed rule.

The public's comments and the Commissioner's responses to these comments are summarized as follows:

Issue (a)—Aggregate Expenditures. Should aggregate expenditures be considered on an individual or a statewide basis?

Comment. One State agency commented that it was its commitment to provide total matching funds for the program rather than to require matching from local educational agencies. This practice, they assure, has proved attractive to local educational agencies and has resulted in more adults receiving much-needed basic education programs.

Response. Since the legislation refers to aggregate expenditures by the State from non-Federal sources, the Commissioner has interpreted this to mean expenditures on a statewide basis.

Issue (b)—Per Pupil Expenditures. Is there any justifiable basis for using per pupil expenditures in determining maintenance of effort?

Comment. Several comments were received with the recommendation that per student effort not be used to determine maintenance of effort. Reasons given were that adult student open enrollment concepts, non-fixed hours of instruction, flexible scheduling, and ADA/ADM factors for adults are not general measures of student enrollment.

Response. Because the statute provides for the option of the States' using per pupil expenditure in determining that effort has been maintained, the regulation must also provide for this alternative. The State may, however, continue to use the aggregate expenditure method.

Issue (c)—Waivers. What constitutes "exceptional" or "very exceptional" circumstances in determining waiver of the maintenance of effort requirement?

Comment. A local educational agency responded that conditions such as strikes involving in-school services, school closings, statewide strikes, and increased costs for non-controllable budget items (such as fuel) could reduce the amount available for adult education and that these examples should be included in the criteria governing very exceptional circumstances.

Response §§ 166.54 and 166.55. Consideration has been given to each of these situations. These proposed regulations provide that exceptional circumstances include situations where the State educational agency or local educational agency had at least some control of the events resulting in decreased expenditures. Very exceptional circumstances include situations where the State educational agency or local educational agency had no control of the events resulting in decreased expenditures.

Citations of legal authority. As required by section 431(a) of the General Education Provisions Act (20 U.S.C. 1232 (a)), a citation of the statutory or other legal authority for each section of the regulation has been placed in parentheses on the line following the text of the section.

Invitation to comment. Interested persons are invited to submit comments, suggestions, and recommendations to be considered prior to the issuance of the final rule. Comments, suggestions, or recommendations may be sent to the address given at the beginning of this notice. All comments received on or before October 17, 1977, will be considered. All comments submitted will be available for public inspection both during and after the comment period, in Room 5056, Regional Office Building 3, 7th and D Streets SW., Washington, D.C., between 8:30 a.m. and 4:00 p.m., Monday through Friday of each week.

Authority. This proposed rule is issued under the authority of section 307(b) of the Adult Education Act, 20 U.S.C. 1206, and section 431A of the General Education Provisions Act, 20 U.S.C. 1232, as amended by section 323 of Pub. L. 94-482, the Education Amendments of 1976.

NOTE.—The Office of Education has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

(Catalog of Federal Domestic Assistance Program No. 13.400, Adult Education—Grants to States.)

Dated: July 7, 1977.

ERNEST L. BOYER,
U.S. Commissioner of Education.

Approved: August 27, 1977.

HALE CHAMPION,
Acting Secretary of Health, Education, and Welfare.

PART 166—STATE ADULT EDUCATION PROGRAMS

In the table of contents preceding the regulations, certain section and subpart designations are amended or added to read as follows:

Amend title of Subpart E and add the following new sections:

Subpart E—Federal Financial Participation; Payments and Reports

Sec.
166.46 Approved State plan as a condition for payment.
166.47 Reports.

Amend title of Subpart F and add the following sections:

Subpart F—Maintenance of Effort

166.51 Maintenance of effort.
166.52 Withholding of payments.
166.53 Allowable percentage reduction.
166.54 Waiver of maintenance of effort under exceptional circumstances.
166.55 Waiver of maintenance of effort under very exceptional circumstances.
166.56 Restoration of expenditure levels.
166.57 Definitions for Subpart F.

§ 166.27 [Amended]

2. In § 166.27 the cross reference to the reporting requirements regulation is changed from § 166.52 to § 166.47.

3. The title of Subpart E is amended to read as follows:

Subpart E—Federal Financial Participation; Payments and Reports

4. Section 166.51 is renumbered and amended to read as follows:

§ 166.46 Approved State plan as a condition for payment.

Payments to States under the Act will be made only after the Commissioner has approved the State plan submitted in accordance with the requirements of the Act, these regulations, and the GEPR.

§ 166.52 [Renumbered § 166.47]

5. Section 166.52 Reports is renumbered § 166.47 and transferred in toto to Subpart E.

6. Subpart F and new §§ 166.51 through 166.57 are added as follows:

Subpart F—Maintenance of Effort

§ 166.51 Maintenance of effort.

A State shall maintain its fiscal effort on either a per student basis or on an aggregate expenditure basis for adult education from all non-Federal sources compared to the amount expended from all non-Federal sources in the previous year.

(Sec. 307(b); 20 U.S.C. 1206)

§ 166.52 Withholding of payments.

Except as provided in § 166.53 through § 166.55, the Commissioner will not make any payment to a State in any fiscal year unless the Commissioner finds that the fiscal effort of the State for adult education from all non-Federal sources from the preceding fiscal year was not less than the fiscal effort per student or the aggregate amount expended for adult education purposes from all non-Federal sources during the second preceding fiscal year.

(Sec. 307(b); 20 U.S.C. 1206)

§ 166.53 Allowable percentage reduction.

(a) A State shall compute a percentage reduction in fiscal effort by dividing the amount of the reduction for the preceding fiscal year by the amount of the State's expenditures in the base year. ("Base year" is defined in § 166.57(c).)

(b) The Commissioner will consider the maintenance of effort requirement in § 166.51 satisfied if the reduction in expenditures on a per student or on an aggregate basis in the preceding fiscal year, when added to the sum of any percentage reductions previously determined, does not exceed five percent. A State is allowed a maximum percentage reduction of five percent below the base year for the years for which the Act is in effect.

(c) A State intending to use the allowable percentage reduction shall notify the Commissioner. A State shall submit the notification with the annual program plan or as an amendment to the annual program plan.

Example of allowable percentage reduction. If the fiscal effort of a State, including its local educational agencies, for adult education in fiscal year 1977 is three percent less than its fiscal effort in its base year (e.g., FY 1976), the State must notify the Commissioner in its annual program plan for fiscal year 1978 or as an amendment to the annual program plan. The State may then use the remaining two percent of its allowable reduction in subsequent years. For example, when the State submits its annual program plan for fiscal year 1979, it may notify the Commissioner that non-Federal expenditures in fiscal year 1978 were two percent less than they were in the base year. At this point the State has used up its maximum allowable five percent reduction, and may not again reduce its non-Federal expenditures below the base year unless it applies for and is granted a waiver under § 166.54 or § 166.55.

(Sec. 431A(a) of GEPA; 20 U.S.C. 1232)

§ 166.54 Waiver of maintenance of effort under exceptional circumstances.

(a) The Commissioner may waive the maintenance of effort requirement in section 307(b) of the Act and § 166.51 if the Commissioner determines it would be equitable to do so in view of exceptional circumstances affecting the State.

(b) A State shall submit a request for a waiver under paragraph (a) of this section with the annual program plan or an amendment to the annual program plan. A State shall include in the request for a waiver the reason for the request and any additional information the Commissioner may require.

(c) In any case in which a waiver is granted under this section, the Commissioner will reduce the amount of the Federal payment for the current fiscal year in the exact proportion to which the fiscal effort per student or aggregate expenditure was less than 100 percent for the second preceding fiscal year. For example, if a State, having received a waiver under this section, reduced its expenditures in the preceding fiscal year 20 percent below the second preceding fiscal year, the Commissioner will reduce the amount of the Federal payment in the current fiscal year by 20 percent.

(d) Exceptional circumstances include situations where the State educational agency or local educational agency had at least some control of the events resulting in decreased expenditures, but nevertheless made a reasonable effort in a timely fashion to comply with section 307(b) of the Act. Exceptional circumstances as determined by this standard include, but are not limited to, the following situations:

(1) The State decreased its aggregate expenditures for the adult education program due to a justifiable mistake such as a reasonable anticipation of a decrease in enrollment which for unforeseen reasons failed to materialize; or

(2) A newly constituted governing body of the State educational agency had made a reasonable effort to maintain expenditures, but it could not do so due to the continuing effect of the predecessor governing body's policy.

(e) Exceptional circumstances also include situations described in §166.55 (d) where the Commissioner has determined that it would not be equitable to grant a waiver for very exceptional circumstances.

(f) The Commissioner will not grant a waiver in any case where the State educational agency or local educational agency had the fiscal resources available for use to meet the maintenance of effort requirement of the Adult Education Act but failed to spend them.

(Implements Sec. 431A(b)(1)(A) of GEPA; 20 U.S.C. 1232)

V 42 171
SEP 2 77
UMI

§ 166.55 Waiver of maintenance of effort under very exceptional circumstances.

(a) The Commissioner may waive the maintenance of effort requirement in section 307(b) of the Act and §166.51 if the Commissioner determines it would be equitable to do so in view of very exceptional circumstances affecting the State.

(b) A State shall submit a request for a waiver under paragraph (a) with the annual program plan or an amendment to the annual program plan. A State shall include in the request for a waiver the reason for the request and any additional information the Commissioner may require.

(c) In any case in which a waiver is granted under this section, the Commissioner will not reduce the Federal payment for the current fiscal year.

(Sec. 431A(b)(1)(B) of GEPA)

(d) Very exceptional circumstances include situations where the State educational agency or local educational agency had no control of the events resulting in decreased expenditures but made a reasonable effort in a timely fashion to comply with section 307(b) of the Act. Very exceptional circumstances as determined by this standard include, but are not limited to, the following situations:

(1) The tax base of the State, including its local educational agencies, has decreased very significantly due to several factors: e.g., the removal of property from the tax roll because of urban renewal, government acquisition of previously taxed property in substantial amount, or natural or man-made disaster of taxable property;

(H.R. 94-1071, p. 233)

(2) The capacity to raise funds for adult education is out of the control of the State educational agency because of a very substantial need of the State to reduce fiscal resources for education in general, or fiscal resources have been diverted very significantly to other functions which are not within the control of the State educational agency;

(H.R. 94-1071, p. 233)

(3) Situations which occur in States where State law requires that a local educational agency must go to the voters for special levies to meet operating expenses over and above those guaranteed by the State, and the local educational agency has gone to the voters as many times as State law permits and has failed to gain voter approval;

(H.R. 94-1071, p. 233)

(4) The State, in the second year preceding the year for which the annual program plan is submitted, incurred a substantial nonrecurring expense which did not result in an increase in the fiscal effort of its regular adult education program;

(5) Decreased expenditures by the State which are directly attributable to strikes involving educational and/or service personnel;

(6) Reductions of services to adults which are directly attributable to energy shortages or conservation measures which resulted in a general reduction of educational services throughout the State or any of its local educational agencies; or

(7) The tax revenues of the State or its local educational agencies are reduced due to the State's adoption of an equalization formula.

(Implements sec. 431A(b)(1)(B) of GEPA: 20 U.S.C. 1232; H.R. 94-1701, p. 233)

(e) The Commissioner will not grant a waiver in any case where the State educational agency or local educational agency had the fiscal resources available for use to meet the maintenance of effort requirement but failed to spend them.

(Implements sec. 431A(b)(1)(B) of GEPA: 20 U.S.C. 1232)

§ 166.56 Restoration of expenditure levels.

The Commissioner will consider a waiver under § 166.54 or § 166.55 equitable in order to reflect exceptional circumstances or very exceptional circumstances (as the case may be) only if the State agrees to restore future expenditure levels to the level which existed prior to the year for which the waiver was granted. If in any future year expenditures are not restored to the level, the Commissioner will not consider the maintenance of effort requirement of section 307(b) of the Act satisfied unless the Commissioner grants an additional waiver for that year.

Example. A State expends $1,000,000 in non-Federal resources for the adult education program in fiscal year 1976. The non-Federal expenditures in fiscal year 1977 are $800,000. The State applies for a waiver of maintenance of effort in fiscal year 1978 because of the reduction in fiscal year 1977. A waiver is granted in fiscal year 1978 for the reduction in fiscal year 1977. In determining its level of expenditures for fiscal year 1978, the State cannot use $800,000 (the level of expenditures in fiscal year 1977) but must use the $1,000,000 (the level of expenditures in fiscal year 1976).

(Implements Sec. 431A(b) of GEPA; 20 U.S.C. 1232)

§ 166.57 Definitions for Subpart F.

(a) The "preceding fiscal year" for purposes of computing maintenance of expenditure means the first twelve-month fiscal period most commonly used in the State for official reporting purposes which is prior to the period for which the current annual program plan will be in effect.

(b) The "second preceding fiscal year" means the second twelve-month period most commonly used in a State for official reporting purposes, which is prior to the period for which the current annual program plan will be in effect.

(c) The "base year" means the first or second fiscal year as determined by the State which precedes the fiscal year in which the State first uses the allowable percentage reduction. The base year may not be a fiscal year which, because of reduced non-Federal expenditures in that year, was the basis for a waiver granted under § 166.54 or § 166.55.

(Sec. 431A(a) of GEPA; 20 U.S.C. 1232)

Appendix A [Amended]

7. Assurance (8) of the State-Federal Agreement set forth in Appendix A of this part is amended to read as follows:

• • • • • •

(8) The statement checked below reflects the State's maintenance of effort for the preceding fiscal year:

-- (a) The State had available for expenditure for adult education from non-Federal sources for the preceding fiscal year an amount which was not less than the fiscal effort per student or the aggregate amount expended for adult education purposes from non-Federal sources during the second preceding fiscal year; OR

-- (b) Notification of reduction under regulation § 166.53 and supporting documentation are attached (Base year used for notification purposes is fiscal year 19--.); OR

-- (c) Request for waiver under exceptional circumstances, together with supporting documentation, is hereby submitted as an attachment to this plan; OR

-- (d) Request for waiver under very exceptional circumstances, together with supporting documentation, is hereby submitted as an attachment to this plan.

DEPARTMENT OF LABOR

Employment Standards Administration

MINIMUM WAGES FOR FEDERAL AND FEDERALLY ASSISTED CONSTRUCTION

General Wage Determination Decisions

General Wage Determination Decisions of the Secretary of Labor specify, in accordance with applicable law and on the basis of information available to the Department of Labor from its study of local wage conditions and from other sources, the basic hourly wage rates and fringe benefit payments which are determined to be prevailing for the described classes of laborers and mechanics employed in construction activity of the character and in the localities specified therein.

The determinations in these decisions of such prevailing rates and fringe benefits have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates, (37 FR 21138) and of Secretary of Labor's Orders 12–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in effective date as prescribed in that section, because the necessity to issue construction industry wage determination frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General Wage Determination Decisions are effective from their date of publication in the FEDERAL REGISTER without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision together with any modifications issued subsequent to its publication date shall be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR, Part 5. The wage rates contained therein shall be the minimum paid under such contract by contractors and subcontractors on the work.

MODIFICATIONS AND SUPERSEDEAS DECISIONS TO GENERAL WAGE DETERMINATION DECISIONS

Modifications and Supersedeas Decisions to General Wage Determination Decisions are based upon information obtained concerning changes in prevailing hourly wage rates and fringe benefit payments since the decisions were issued.

The determinations of prevailing rates and fringe benefits made in the Modifications and Supersedeas Decisions have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's Orders 13–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in foregoing General Wage Determination Decisions, as hereby modified, and/or superseded shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged in contract work of the character and in the localities described therein.

Modifications and Supersedeas Decisions are effective from their date of publication in the FEDERAL REGISTER without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5.

Any person, organization, or governmental agency having an interest in the wages determined as prevailing is encouraged to submit wage rate information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Office of Special Wage Standards, Division of Wage Determinations, Washington, D.C. 20210. The cause for not utilizing the rule-making procedures prescribed in 5 U.S.C. 553 has been set forth in the original General Wage Determination Decision.

CANCELLATION OF GENERAL WAGE DETERMINATION DECISIONS

General Wage Determination Decision No. CO75–5061 (with Modification No. 1) Adams, Arapahoe, Denver, and Jefferson Counties, Colo., for residential construction is cancelled. Agencies with residential construction projects pending in these locations should utilize the project determination procedure by submitting form SF–308. See Regulations Part 1 (29 CFR), Section 1.5. Contracts for which bids have been opened shall not be affected by this notice, and consistent with 29 CFR 1.7(b)(2), the incorporation of Decision No. CO75–5061 in contract specifications the opening of bids for which is within ten (10) days of this notice need not be affected.

General Wage Determination Decision No. SD77–5019, Minnehaha County, S. Dak., for residential construction is cancelled. Agencies with residential construction projects pending in these locations should utilize the project determination procedure by submitting form SF–308. See Regulations Part 1 (29 CFR), Section 1.5. Contracts for which bids have been opened shall not be affected by this notice, and consistent with 29 CFR 1.7(b)(2), the incorporation of Decision No. SD77–5019 in contract specifications the opening of bids for which is within ten (10) days of this notice need not be affected.

General Wage Determination Decision No. WA77–5008, Yakima County, Wash., for residential construction is cancelled. Agencies with residential construction projects pending in these locations should utilize the project determination procedure by submitting form SF–308. See Regulations Part 1 (29 CFR), Section 1.5. Contracts for which bids have been opened shall not be affected by this notice, and consistent with 29 CFR 1.7(b)(2), the incorporation of Decision No. WA77–5008 in contract specifications the opening of bids for which is within ten (10) days of this notice need not be affected.

Signed at Washington, D.C., this 26th day of August 1977.

RAY J. DOLAN,
Assistant Administrator,
Wage and Hour Division.

LABORERS (HEAVY & HIGHWAY CONSTRUCTION CLASSIFICATION DEFINITIONS)

GROUP I - Pipe Layer (Utilities); Sand Blaster
GROUP II - Form Setter (Structures); Grade Checker
GROUP III - Caulkers, Jointer, Painter, Grouter & Joint Assembler; Cure Cart Operator; Form Setter (Paving) and Expansion Joint Assembler; Paving Sawman; Power Buggyman; Rakers
GROUP IV - Air, Gas & Electric Tool Operator; Cement Finisher Helper; Concrete Processing Material & Monitors; Stringman on Paving Work
GROUP V - Common Labor; Dump Person and Spotter; Fence Erector; Scaleman; Handling and Placing of Metal Mesh, Dowel Bars, Reinforcing Bars and Chairs
GROUP VI - Flag Person

POWER EQUIPMENT OPERATORS (HEAVY & HIGHWAY CONSTRUCTION CLASSIFICATION DEFINITIONS

GROUP I - Power Shovel, Crane, Backhoe and Dragline, Dredge Engineer, Dredge Leverman; Hoisting Engineer (Steel Erection); Motor Patrol (Finish); Piledriver Machine; Master Mechanic; Sideboom Tractor; Horizontal Boring Machine
GROUP II - Central Mix Plant; Paver or Self-propelled Spreader; Tow or Push Boat; C.M.I. Paver; C.M.I. Subgrader (or equivalent); Asphalt Plant; Scraper (over 12 c.y.); Bulldozer (Finish); Push Cat; Churn or Rotary Drill; Trenching Machine (Cleveland 80 or similar capacity); Asphalt Laydown; Asphalt Screed; Asphalt Heater-Planer; Concrete Pump; Self-propelled Curb Machine
GROUP III - Motor Patrol (Rough); Front End Loader (3 c.y. or over); Scraper (12 c.y. & under); Bulldozer (Rough); Asphalt Roller; Mechanics-Welders; Group Equipment Greaser; Concrete Curb Breaking Machine; Concrete Widening Machine; Paving Breaker; Barber-Greene, Haiss Loader or similar machine; Crawler Tractor Pulling Ripper, Disc, Sheepsfoot or Flat Roller; Self propelled Sheepsfoot Roller; Self propelled Roller, Distributor; Screening and Washing Plant; Self-propelled Vibrating Compactor; Trenching Machine (other than above); Steel Placing Machine; Conveyor; Finishing Machine (on Concrete); Flexplane; Bull Float; Form Grader
GROUP IV - Boiler, Mechanical Broom; Oiler or Mechanics Helper or Group Greaser Helper; Farm Type Tractor (pulling disc, harrow or roller); Welding Machine; Pump Operator (other than dredge); Broom and Winch Truck; Compressor; Tank Car Heater (combination boiler and booster); Pumps on Well Points and Deep Wells for Dewatering; Truck Crane Combination Driver-Oiler; Concrete Curbing Machine; Safety Boat; Batch Plant dry; Spreader Attachments; Utility Tractor With Attachments

NEW DECISION

STATE: Iowa COUNTIES: Des Moines, Louisa, and Muscatine (excluding the City of Burlington and abutting municipalities and the Burlington Ordance Plant.

DECISION NO.: IA77-4215 DATE: Date of Publication
DESCRIPTION OF WORK: Heavy and Highway Construction excluding work on or pertaining to the Mississippi River.

	Basic Hourly Rates	Fringe Benefits Payments			
		H & W	Pensions	Vacation	Education and/or Appr. Tr.

GROUP 1 - Power shovel, crane, backhoe and dragline; central mix plant operator; dredge engineer; dredge leverman; paver or spreader operator; hoisting engineer (steel erection); motor patrol; piledriver machine; concrete mixer; tow or push boat operator; master mechanic; C.M.I. paver; C.M.I. subgrader (or equivalent); asphalt plant; front end loader; scraper; bulldozer; push cat tractor pulling scraper; sideboom tractor; churn or rotary drill; trenching machine (Cleveland 80 or similar capacity); asphalt laydown; asphalt screed; asphalt heater-planer unit; asphalt roller; self-propelled elevating grader or similar machine; spreader (concrete); Horizontal boring machine; mechanics-welders; group equipment greaser; concrete pump; self-propelled curb machine

GROUP 2 - Concrete curb breaker; concrete widening machine; paving breaker; barber-greene, haiss loader or similar machine; tractor pulling ripper, disc, sheepsfoot or flat roller; self-propelled sheepsfoot roller; self-propelled roller (other than asphalt); distributor; screening and washing plant; self-propelled vibrating compactor; trenching machine (other than above); steel placing machine; conveyor; finishing machine (on concrete); flexplane; bullfloat; form grader

GROUP 3 - Boiler; mechanical broom; oiler or mechanics helper or Group greaser helper; farm-type tractor (pulling disc, harrow or roller); welding machine; pump operator (other than dredge); boom and winch truck; compressor; tank car heater (combination boiler and booster); pumps on well points and deep wells for dewatering; truck crane combination driver-oiler; concrete curbing machine safety boat operator; batch plant (dry)

SUPERSEDEAS DECISION

STATE: Iowa
DECISION NO.: IA77-4214
COUNTY: Pottawattamie
DATE: Date of Publication
Supersedes Decision No. IA77-4117 dated June 24, 1977 in 42 FR 32470
DESCRIPTION OF WORK: Building Construction in entire County (does not include single family homes and garden type apartments up to and including 4 stories), and Heavy and Highway Construction in the City of Council Bluffs and abuting Municipalities (excluding work on or pertaining to the Missouri River.

a. Employer contributes 4% basic hourly rate for over 5 years service and 2% of basic hourly rate for 6 months to 5 years' service as Vacation Pay Credit. Six paid holidays - A thru F.

b. Seven paid holidays - A thru G.

PAID HOLIDAYS
A-New Year's Day; B-Memorial Day; C-Independence Day; D-Labor Day; E-Thanksgiving Day; F-Christmas Day; G-Friday after Thanksgiving

	Basic Hourly Rates	Fringe Benefits Payments			
		H & W	Pensions	Vacation	Education and/or Appr. Tr.
BUILDING CONSTRUCTION POWER EQUIPMENT OPERATORS:					
Group 1	9.56	.50	.50		.05
Group 2	9.435	.50	.50		.05
Group 3	8.59	.50	.50		.05
Group 4	8.265	.50	.50		.05

CLASSIFICATION DEFINITIONS

POWER EQUIPMENT OPERATORS

Group 1 - Cranes, including those being used as backhoe, dragline, clamshell, etc.,; tower crane; truck cranes and cherry pickers over 15 ton rated capacity; derricks; piledrivers and extractors; caisson rigs; side boom and winch truck used for erection of structural steel and moving and setting of heavy machinery; 3 drum hoist; welders; mechanics; locomotive; dredge (levermen)

Group 2 - 1 and 2 drum hoists; air and electric tuggers (on power plants or setting steel or grating); economobiles; plant mixers; farm type tractors (with loaders, backhoes, attachments, etc.); scrapers (tournapull, etc.); endloaders; dredge (engineer); side boom and winch truck other than Group No. 1; motor patrol; bulldozers; push cat; truck cranes and cherry pickers (15 tons and under); concrete mixers (1 yard and over); ditching machine (8' and over); fork lifts (on steel erection and machinery moving or hoisting above one complete story); concrete pump; dewatering pumps; temporary hoist cage operated; second man on locomotive

Group 3 - Tractors (under 35 HP) with or without attachments; endloaders (under 35 HP) with or without attachments; air compressors (over 125 CFM); Pumps 3" or over; welding machines 600 amps or combination thereof; conveyors; firemen (boiler); generator (75 K.W. and over); fork lifts (other than above Group No. 2); gunnite machine; self-propelled rollers; stump chippers; self propelled tampers; air and electric tuggers (other than above); ditching machine under 8"

Group 4 - Oilers; mechanical heaters; truck crane drivers; permanent elevators

HEAVY AND HIGHWAY CONSTRUCTION

CLASSIFICATIONS

CLASS I Station wagons, panel trucks and pickup trucks

CLASS II Two axle equipment; helpers on low bed when assigned at the discretion of the employer, warehousemen, forklift operators

CLASS III Three axle equipment and tirsmen

CLASS IV Four and five axle equipment

CLASS V Specialized earth moving equipment under 35 tons othe than conventional type trucks, low bed, vachual, mechanics, paving restoration equipment, mechanics

CLASS VI Specialized earth moving equipment over 35 tons

CLASS VII Trailers for earth moving equipment, (double hookup)

PAID HOLIDAYS:
A-New Year's Day; B-Memorial Day; C-Independence Day; D-Labor Day; E-Thanksgiving Day; F-Christmas Day

FOOTNOTES:
a. One half day's pay each month in which an employee has worked 15 days provided he has been employed for 4 months.

b. Holidays: A through F, Washington's Birthday, Columbus Day, Veteran's Day and Patriots' Day provided an employee works two days of the calendar week in which the holiday falls.

CLASS VII	8.14	.545	.575	a+b	

CLASSIFICATIONS

CLASS I Station wagons, panel trucks and pickup trucks

CLASS II Two axle equipment; helpers on low bed when assigned at the discretion of the employer, warehousemen, forklift operators

CLASS III Three axle equipment and tiremen

CLASS IV Four and five axle equipment

CLASS V Specialized earth moving equipment under 35 tons othe than conventional type trucks, low bed, vachual, mechanics, paving restoration equipment, mechanics

CLASS VI Specialized earth moving equipment over 35 tons

CLASS VII Trailers for earth moving equipment, (double hookup)

PAID HOLIDAYS:
A-New Year's Day; B-Memorial Day; C-Independence Day; D-Labor Day; E-Thanksgiving Day; F-Christmas Day

FOOTNOTES:
a. One half day's pay each month in which an employee has worked 15 days provided he has been employed for 4 months.

b. Holidays: A through F, Washington's Birthday, Columbus Day, Veteran's Day and Patriots' Day provided an employee works two days of the calendar week in which the holiday falls.

DECISION NO. MA77-3068

PAID HOLIDAYS:
A-New Year's Day; B-Memorial Day; D-Independence Day; D-Labor Day; E-Thanksgiving Day; F-Christmas Day

FOOTNOTES:

a. Employer contributes 4% of basic hourly rate for 5 months to 5 years of service as Vacation Pay Credit.

b. Holidays: A through F.

c. Holidays: A through F, Washington's Birthday and Patriots Day providing employee has been employed for a period of five (5) working days prior to the holiday and the regular scheduled working day preceding and following the holiday.

d. July 4th and Labor Day provided worker employed 7 days before holiday

e. July 4th and Labor Day - $08 per hour employer contribution to make two paid holidays.

DECISION NO. MA77-3068

	Basic Hourly Rates	Fringe Benefits Payments: H & W	Pensions	Vacation	Education and/or Appr. Tr.
LABORERS:

DECISION NO. NY77-3118

PAID HOLIDAYS: A-New Year's Day; B-Memorial Day; C-Independence Day; D-Labor Day; E-Thanksgiving Day; Christmas Day.

FOOTNOTES:

a. PAID HOLIDAYS: A through F; and 2 hours off on election day for the purpose of voting.

b. Employees receive 2 hours off on election day for purpose of voting.

c. PAID HOLIDAYS: A through F providing the employee works 7 days before and after the holiday.

d. PAID HOLIDAYS: A through F; Washington's Birthday; Good Friday; Columbus Day; Veteran's Day and November Election Day.

e. PAID HOLIDAYS: A through F provided the employee is on the payroll 2 weeks prior to the holiday.

f. PAID HOLIDAYS: Athrough F.

g. Employer contributes 2% of the basic hourly rate for 6 months to 5 years of service or 4% of the basic hourly rate for 5 years or more of service as vacation pay credit.

h. PAID HOLIDAYS: A through F; Washington's Birthday; Good Friday; and Christmas Eve providing the employee has worked 30 full days during the 90 calendar days prior to the holiday, and the regular scheduled work days immediately preceeding and following the holiday.

i. PAID HOLIDAYS: A through F, Washington's Birthday; Election Day for President; and Election of Governor of New York provided the employee works the day before and the day after the holiday.

j. PAID HOLIDAYS: A through F, Washington's Birthday; Lincoln's Birthday; Good Friday; and Columbus Day provided the employee is employed 3 days before the holiday or any of the 3 days following the holiday.

k. PAID HOLIDAYS: Independence Day providing the employee works within the period of June 20 to July 4th.

l. Employee receives 2 hours off with pay on Election Day for the purpose of voting provided the employee has received 4 hours pay that day.

DECISION NO. NY77-3118

LABORERS: BUILDING	Basic Hourly Rates	Fringe Benefits Payments: H & W	Pensions	Vacation	Education and/or Appr. Tr.
General laborers, Mason tender carpenter tender, labor stripping, cleaning forms, labor sweepers, cleaners, grading, digging ditches	$7.98	.96	1.60	a+.40	
Hod carriers, plasterers helpers, scaffold builders (padlock and self supporting scaffold 14 feet or under all runways, mortar mixers,(machine and hand), concrete mixers (by machine under 21 E), vibrators, form setters, pipelayers, asphalt rakers, handling reinforcement rods, working labor foremen, drillers, jackhammer operator, signalman, gunniting, motorbugs, water pump 2" or under, barco machine, wreckers, paving breakers, power saw operators, other machine operators	8.23	.96	1.60	a+.40	
Blasters, laser beam operator	8.38	.96	1.60	a+.40	

FOOTNOTES:

a. Two hours off with pay on Election Day.

DECISION NO. NY77-3118

POWER EQUIPMENT OPERATORS - BUILDING CONSTRUCTION

GROUP I

Backhoe Oliver 88, Fordson, dynahoe, dual purpose & similar machine, Barber Green loader-euclid loader or similar type, cherry picker (cableway), compressor (steel erection), conway or similar mucking machines, dragline, gradall, shovel, backhoe, etc., (crawler or truck), front end loaders, hydraulic boom, Jersey spreader, Letourneau or Tournapull (scrapers over 20 yds. struck), mucking machines, pavement breaker (air ram), paver (concrete), pulsemeter, push button (buzz box) elevator, road boring machine, road mix machines, Roas carrier & similar machines, post hole digger, shovel (tunnels), side boom, spreader (asphalt), scoopmobile-tractor-shovel over 1-¼ yds., trenching machines, tractor type demolition equipment, winch truck "A" Frame

UMI

DECISION NO. NYT7-3118

POWER EQUIPMENT OPERATORS - BUILDING CONSTRUCTION (CONT'D)

GROUP II
Compactor self-propelled, grader, bulldozer D7 & similar tractors with a draw bar horsepower of 100 & over maintenance engineer, mechanic (outside) all types, welder, scraper-20 yds. struck & under, machine pulling sheep's foot roller, etc., roller 4 ton and over, vib. roller

GROUP III
Asphalt plant, boiler (high pressure), bulldozer D6 & similar tractors with a draw bar horsepower less than 100, compressor, compressor plant, concrete mixing plants, concrete pump, conveyor belt machine-irrespective of motor size, fireman, forklift, forklift (electric), joy drill or similar tractor drilling machine, loader-1-¼ yds., & under, lighting unit (portable & generator), locomotive (all sizes), mixer concrete-21E & over, portable asphalt plant, portable batch plant, portable crusher, quarry master, stone crusher, welding machine (steel erection excavation), well drilling machine, well point system

GROUP IV
Air tractor drill, batch plant, bending machine, concrete breaker, concrete spreader, compressor to 125 cu. ft., curb cutter machine, dust collector, farm tractor (all types), finishing machine concrete, material hooper-sand-stone-cement, mixer-concrete-under 21E, Muching grass spreader, heater-all types, pump, pump station (water & sewer), pump-gypsum, etc., concrete, pump-plasterer roller under 4 ton, spreading & fine grading machine, steam Jenny, steel Jenny, steel cuting machine, sweeper, syphon pump air steam, tar joint machine, Turbo jet burner or similar equipment vibrator (1 to 5) fine grading machine

GROUP V
Concrete saw, mechanic's helper, oiler (fuel truck), oiler (grease truck), paint compressor, welder's helper

GROUP VI
A. Master mechanic
B. Helicopter hoist op.
C. Oiler, asphalt paver, utility man
D. Welder - certified
E. SEcond engineer on cranes 30 ton and over
F. Cable splicer
G. Helicopter pilot
H. Helicopter signalman
I. Engineer, all tower cranes, all climbing cranes and all cranes of 100 ton and regardless of how the same is rigged (except for pile rigs)

DECISION NO. NYT7-3118

POWER EQUIPMENT OPERATORS - BUILDING CONSTRUCTION (CONT'D)

GROUP VI (CONT'D)
J. Cranes (crawlers or truck) 100 ft. but less than 149 ft
K. Cranes (crawlers or truck) 149 ft. and over
L. Loaders op. (over 5 yd. capacity)
M. Shovel op. (over 4 yd. capacity)

GROUP VII
Concrete-portable hoist, crane & hoist engineer-steel (concrete, material, supe structure, sub-structure), derrick (stone-steel), elevator & cage, engineer-pile driver, overheadcrane, power house plant, telephies, whirly, hoist (single, double or triple drum), hoist (portable mobile unit), hoist engineer-concrete (crane, derrick, mine hoist), hoist engineer material

FOOTNOTES:
a. Holidays: New Year's Day, Lincoln's Birthday, Washington's Birthday, Good Friday, Memorial Day, Independence Day, Labor Day, Columbus Day, November Election Day, Veteran's Day, Thanksgiving Day and X-Mas Day.

b. Employer contributes $2.00 per day to an Annuity Fund.

NOTICES

DECISION NO. NYT7-3118

BUILDING CONSTRUCTION - POWER EQUIPMENT OPERATORS: REMAINDER OF COUNTY

GROUP 1: Oilers

GROUP 2: Firemen and heavy duty greasers, all boilers and steam generators

GROUP 3: Pumps, vibrators, concrete mixers, spreaders, concrete finishing machines, mortar mixers, air compressors, dust collectors, welding machines well points, two or more Herman Nelson and like heaters, batch and plant op., seed and mulching machines, generators, temporary light plants, concrete pump, beltcrete power pac (beltcrete system), electric submersible pump 4" and over

GROUP 4: Dinkey locomotives, Barber Greene loaders, loaders and conveyors, tractors, scoopmobiles, bulldozers, road rollers, form fine graders, power brooms and sweepers

GROUP 5: Black top spreaders, black top rollers, high lifts, fork lifts, one drum hoist or hod hoists, post hole diggers, traxcavators, core and well well drillers (one drum), economobile and similar type machines, elevators, A-L frame winches, power hoisting (single drum)

GROUP 6: LeTourneau graders or scrapers, trenching machines, push cart

GROUP 7: Tractor road pavers, cranes, power road graders, shovels, backhoes, draglines, pile drivers, hoists two or more drums, three drum engines, hysters, two drum and swinging engines, three drum swinging engine, locomotive cranes, gradalls, hydrocrane, model CHB Vibrotamp or similar, Murphy type diesel generator-beltcrete system, side booms, hydro hammer, tractor mounted drill (quarry master), euclid loaders, concrete pumps, all CMI equipment, concrete central mix plant, automated asphalt, concrete central plant, derrick, whirlies, tower cranes, cableways, hydraulic cranes, power hoisting (2 drum and over), mucking machine

POWER EQUIPMENT OPERATORS - HEAVY AND HIGHWAY

GROUP I
Auger, auto grader, backhoe Oliver 88, Fordson, dynahoe, dual purpose and similar machines, barber green loader-euclid loader or similar type, central mix plant operator, cherry picker (cableway), compactor with blade, concrete portable hoist, C.M.I. or similar Conway or similar mucking machines, crane (crawler or truck) dragline, gradall, shovel backhoe, etc., derrick (stone-steel), elevator & cage, front end loaders, hoist single, double, triple drum, hoist portable mobile unit, hoist engineer-concrete (crane-derrick-mine hoist), hoist engineer-material, hydraulic boom, LeTourneau or Tournapull (scrapers over 20 yards struck), mucking machines, overhead crane, paver (concrete), power house plant, pulsometer, push button (buzz box) elevator, road mix machines, Ross carrier and similar machines, shovel (tunnels), side boom, spreader (Asphalt), scoopmobile-tractor-shovel over 1½ yards, trenching machines, telephies, tractor type demolition equipment, whirly, winch truck "A" Frame

NOTICES

DECISION NO. NY77-3118

POWER EQUIPMENT OPERATORS - HEAVY AND HIGHWAY (CONT'D)

GROUP II
Compactor self-propelled, grader, bulldozer D7 and similar tractors with a draw bar horsepower of 100 and over, maintenance engineer, mechanic (outside) all types, welder, scrapers 20 yards struck and under, shop foreman, vibratory roller, etc., roller 4 ton and over

GROUP III
Aephalt plant, boiler (high pressure), bulldozer D6 and similar tractors with a draw bar horsepower less than 100, compressor plant, concrete pump, conveyor belt machine-irrespective of motor size, firemen, forklift, forklift (electric), joy drill or similar tractor drilling machine, loader-1½ yds. and under, locomotive (all sizes), machine pulling sheeps foot roller, mixer concrete-21E and over, portable asphalt plant, portable batch plant, portable crusher, quarry master, stone crusher, well drilling machine, well point system

GROUP IV
Air tractor drill, batch plant, bending machine, concrete breaker, concrete spreader, curb cutter machine, farm tractor (all types), finishing machine-concrete, material hopper-sand-stone-cement, mulching grass spreader, roller under 4 ton, shop mechanic (not employed on job site), spreading & fine grading machine, steel cutting machine, sweeper, syphon pump-air-steam, tar joint machine, Turbo jet burner or similar equipment, fine grading machine

GROUP V
Concrete saw, mechanic's helper, oiler, oiler (fuel truck), oiler (grease truck)

GROUP VI
Hoist engineer-steel, sub-struct., engineer-pile driver

GROUP VII
Welder-certified crawlers or truck: 100 ft. but less than 149 ft. $2.00 per hour additional crawlers or truck: 149 ft. and over $3.00 per hour additional loader operators: Over 5 cu. yd. capacity $.50 per hour additional shovel operators: Over 4 cu. yd. capacity $1.00 per hour additional

DECISION NO. NY77-3118

POWER EQUIPMENT OPERATORS - HEAVY AND HIGHWAY (CONT'D)

GROUP VIII
Stockroom or stockroom attendant, paint compressor, pump under 4" or any combination not equal to 4" roller motorized (walk behind, welder's helper

GROUP IX
Compressor (steel erection)

GROUP X
Compressor, lighting unit (portable and generator), welding machine (steel erection excavation)

GROUP XI
Compressor to 125 cu. ft., dust collector, mixer-concrete under 21E, heater-all types, pump 4" and over, pump station (water and sewer), pump-gypsum, etc., pump-plasterer, steam jenny syphon pump-air-steam, tar-joint machine, vibrator (1 to 5)

GROUP XII
A. Jersey spreader, pavement breaker (air ram), post hole digger
B. Safety man 60 ton crane & over, helicopter signalman
C. Oiler asphalt paver, utility man
D. Helicopter pilot
E. Helicopter hoist operator
F. Engineer, tower crane, 3900 monitowac or over or similar (rail, truck, or crawler mounted
G. Master mechanic

PAID HOLIDAYS:
A-New Year's Day; B-Memorial Day; C-Independence Day; D-Labor Day; E-Thanksgiving Day and F-Christmas Day.

FOOTNOTE:
a. Holidays: A through F; Lincoln's Birthday; Washington's Birthday; Good Friday; Columbus Day; November Election Day and Veteran's Day.

DECISION NO. NY77-3118

POWER EQUIPMENT OPERATORS: HEAVY & HIGHWAY CONSTRUCTION	Basic Hourly Rates	Fringe Benefits Payments

DECISION NO. 0H77-2133

GROUP A - A-frames, air compressor on steel erection, rotary drills used on caisson work for foundations and sub-structure work, boiler or compressor operator mounted on crain (piggyback operation), boom trucks (all types), cableways, cherry pickers, combination concrete mixer and tower, concrete pumps, cranes (all types), derricks (all types), draglines, drodge (dipper, clam or suction) 3 man crew, elevating grader or euclid loader, floating equipment, gradalls, helicopter operator and helicopter winch operator when hoisting builders materials, hoes (all types), hoisting engines (two or more drums), lift slab or panel jack operator, locomotives (all types), maintenance engineer (mechanic or welder), mixer paving (multiple drum), mobile concrete pumps with boom, panelboard (all types on site), pile driver, power shovels, side booms, slip forms pavers, straddle carriers (building construction on site), hammerhead tower cranes, trench machines (over 24"wide), tug boat
GROUP B - Asphalt paver, bulldozer, C.M.I. type equipment , endloaders, Kohlman type loaders (dirt loading), lead greaseman, mucking machines, power grader, power scoops, power scrapers, push cat.
GROUP C - Air compressor (pressureizing shafts or tunnels), asphalt rollers, fork lifts, hoist (one drum), house elevators, man lift, power boilers (over 15 lbs. pressure), pump operators installing well points or other type of dewatering system, pumps (4" and over discharge), Submersible pumps (4" and over discharge), trenchers 24" and under
GROUP D - Compressors on building construction, conveyors (building material), generators, gunnite machines, mixers, (capacity more than one bag), mixers (one bag capacity; side loader), post driver, post hole digger, pavement breaker (hydraulic or cable),road widening trencher rollers,welder operator
GROUP E - Backfillers & tampers, batch plant, bar and joint installing machines, bull floats, burlap and curing machines, clefplanes, concrete spreading mach., crushers, deck hands, drum fireman (asphalt), farm type tractors pulling attachments, finishing machines, form trenchers, high pressure pumps over 4" discharge, hydro seeders, self propelled power spreader, self propelled sub-grader, tire repairman, tractors pulling sheeps foot roller or grader, vibratory compactors (with integral power)
GROUP F - Oiler, helpers, signalman, inboard & outboard motor boat launch, light plant operator, power driven heaters (oil fired), power boilers (less than 15 lbs. pressure, pumps under 4" discharge, submerisble pumps under 4" discharge

NOTICES

INDEX TO GENERAL WAGE DETERMINATION DECISIONS AND MODIFICATIONS AS OF AUGUST 5, 1977

There is set forth below an index to general wage determination decisions and modifications as published in the FEDERAL REGISTER pursuant to the Davis-Bacon and related Acts. The index lists general wage determination decisions and modifications by State and County. An updated index is published on the first Friday of each month.

The index is published for the convenience of the public and the Department of Labor will endeavor to keep it accurate and up to date. In the event the data in the index and published general decisions do not coincide, the published general decisions shall control.

Abbreviations

(B)—Building Construction.
(D)—Dredging.
(F)—Flood Control Construction.
(H)—Heavy Construction.
(Hw)—Highway Construction.
(R)—Residential Construction.
Mod.—Modification.
(HE)—Heavy Engineering.
(LE)—Light Engineering.
(U)—Utility.
(W&S)—Water and Sewer.

Signed at Washington, D.C., this 26th day of August 1977.

RAY J. DOLAN,
Assistant Administrator,
Wage and Hour Division.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The six-month trial period ended August 6. The program is being continued on a voluntary basis (see OFR notice, 41 FR 32914, August 6, 1976). The following agencies have agreed to remain in the program:

Monday	Tuesday	Wednesday	Thursday	Friday
NRC	USDA/ASCS		NRC	USDA/ASCS
DOT/COAST GUARD	USDA/APHIS		DOT/COAST GUARD	USDA/APHIS
DOT/NHTSA	USDA/FNS		DOT/NHTSA	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/OHMO	CSC		DOT/OHMO	CSC
DOT/OPSO	LABOR		DOT/OPSO	LABOR
	HEW/ADAMHA			HEW/ADAMHA
	HEW/CDC			HEW/CDC
	HEW/FDA			HEW/FDA
	HEW/HRA			HEW/HRA
	HEW/HSA			HEW/HSA
	HEW/NIH			HEW/NIH
	HEW/PHS			HEW/PHS

Documents normally scheduled on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

reminders

(The items in this list were editorially compiled as an aid to FEDERAL REGISTER users. Inclusion or exclusion from this list has no legal significance. Since this list is intended as a reminder, it does not include effective dates that occur within 14 days of publication.)

Rules Going Into Effect Today

NOTE: There were no items eligible for inclusion in the list of RULES GOING INTO EFFECT TODAY.

List of Public Laws

NOTE: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's LIST OF PUBLIC LAWS.

V 42 172 SEP 6 77 UMI

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 5—Administrative Personnel

CHAPTER I—CIVIL SERVICE COMMISSION

PART 213—EXCEPTED SERVICE

Department of Health, Education, and Welfare

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: The position of Confidential Assistant to the Special Assistant to the Secretary for Civil Rights is excepted under Schedule C because it is confidential in nature.

EFFECTIVE DATE: September 6, 1977.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202–632–4533.

Accordingly, 5 CFR 213.3316(q)(8) is added as set out below:

§ 213.3316 Department of Health, Education, and Welfare.

* * * * *

(q) *Office of the Special Assistant to the Secretary for Civil Rights.* * * *

(8) One Confidential Assistant to the Special Assistant.

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954–1958 Comp., p. 218)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.77-25899 Filed 9-2-77;8:45 am]

PART 213—EXCEPTED SERVICE

Department of Commerce

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: The following positions are excepted under Schedule C: (1) the position of Special Assistant to the Under Secretary because it is confidential in nature; and (2) the position of Deputy Director, Office of Special Projects, Economic Development Administration because it is confidential in nature and because the incumbent will participate in policy development and execution.

EFFECTIVE DATE: September 6, 1977.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202–632–4533.

Accordingly, 5 CFR 213.3314(a)(3) is amended and (q)(14) is added as set out below:

§ 213.3314 Department of Commerce.

(a) *Office of the Secretary.* * * *

(3) One Confidential Assistant, one Special Assistant, and two Private Secretaries to the Under Secretary.

* * * * *

(q) *Office of the Assistant Secretary for Economic Development.* * * *

(14) Deputy Director, Office of Special Projects.

(5 U.S.C. 3301, 3302; E.O. 10577, 3 CFR 1954–1958 Comp., p. 218)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.77-25900 Filed 9-2-77;8:45 am]

PART 213—EXCEPTED SERVICE

Federal Energy Administration

AGENCY: Civil Service Commission.

ACTION: Final Rule.

SUMMARY: This amendment changes the title of an existing Schedule C position from Staff Assistant, Congressional Affairs, to Staff Assistant to the Special Assistant, Congressional Affairs, to reflect the position's current supervisor.

EFFECTIVE DATE: September 6, 1977.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202–632–4533.

Accordingly, 5 CFR 213.3388(q) (2) and (3) are amended to read as follows:

§ 213.3388 Federal Energy Administration.

* * * * *

(q) *Office of the Associate Administrator for Congressional and Intergovernmental Affairs.* * * *

(2) Two Staff Assistants, Congressional Affairs.

(3) Five Staff Assistants to the Special Assistant, Congressional Affairs.

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954–1958 Comp., p. 218)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.77-25901 Filed 9-2-77;8:45 am]

PART 213—EXCEPTED SERVICE

Department of Agriculture

AGENCY: Civil Service Commission.

ACTION: Final Rule.

SUMMARY: The position of Staff Assistant to the Secretary is excepted under Schedule C because it is confidential in nature.

EFFECTIVE DATE: September 6, 1977.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202–632–4533.

Accordingly, 5 CFR 213.3313(a)(40) is added as set out below:

§ 213.3313 Department of Agriculture.

(a) *Office of the Secretary.* * * *

(40) One Staff Assistant to the Secretary.

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954–1958 Comp., p. 218)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.77-25902 Filed 9-2-77;8:45 am]

PART 213—EXCEPTED SERVICE

Department of the Treasury

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: One position of Assistant to the Treasurer of the United States is excepted under Schedule C because it is confidential in nature.

EFFECTIVE DATE: September 6, 1977.

PART 213—EXCEPTED SERVICE

Federal Energy Administration

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: The purposes of this amendment are as follows: To change the name of an existing organization from Office of the Deputy Administrator to Office of the Deputy Administrator (Policy) so that its function is more accurately described; to change the title of two existing Schedule C positions to reflect this latter organizational redesignation, specifically, from Staff Assistant to the Deputy Administrator to Staff Assistant to the Deputy Administrator (Policy) and from Special Assistant to the Deputy Administrator to Special Assistant to the Deputy Administrator (Policy), and; to except the position of Staff Assistant to the Deputy Administrator (Policy) from the competitive service under Schedule C because it is confidential in nature.

EFFECTIVE DATE: September 8, 1977.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202–632–4533.

Accordingly, 5 CFR 213.3388 (b), (b) (1) and (b) (3) are amended to read as follows:

§ 213.3388 Federal Energy Administration.

* * * * * *

(b) *Office of the Deputy Administrator (Policy).*

(1) Two Staff Assistants to the Deputy Administrator (Policy).

* * * * * *

(3) One Special Assistant to the Deputy Administrator (Policy).

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954–1958 Comp., p. 218)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

Title 7—Agriculture

CHAPTER XI—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS: MISCELLANEOUS COMMODITIES), DEPARTMENT OF AGRICULTURE

[Docket No. BRIA–1]

PART 1260—BEEF RESEARCH AND INFORMATION

Subpart—Beef Research and Information Order

Correction

In FR Doc. 77–24852, appearing at page 43053 in the issue for Tuesday, August 26, 1977 the following correction should be made:

On page 43054, under the heading of "Supplementary Information", the last sentence should read, "Therefore, the order published on April 15, adding Subpart—Beef Research and Information Order to 7 CFR Part 1260 shall not become effective and this proceeding is terminated."

CHAPTER XXVIII—FOOD SAFETY AND QUALITY SERVICE, DEPARTMENT OF AGRICULTURE

PART 2852—PROCESSED FRUITS, VEGETABLES, PROCESSED PRODUCTS THEREOF, AND CERTAIN OTHER PROCESSED FOOD PRODUCTS

U.S. Standards for Grades of Canned Ripe Olives; Correction

AGENCY: Food Safety and Quality Service, USDA.

ACTION: Correction.

SUMMARY: This document corrects numerical errors in a final rule that appeared at page 38585 in the FEDERAL REGISTER of Friday, July 29, 1977 (FR Doc. 77–21339).

FOR FURTHER INFORMATION CONTACT:

Dale C. Dunham, Processed Products Branch, Fruit and Vegetable Quality Division, Food Safety and Quality Service, U.S. Department of Agriculture, Washington, D.C. 20250 (202–447–4693).

SUPPLEMENTARY INFORMATION: 1. In Table I of § 2852.3754, printed at page 38587 of the FEDERAL REGISTER of July 29, 1977, the count per pound range of medium size olives was printed in error. Change the count range to read: "80–105."

2. In Table III, Acceptance Values of Drained Weights (Ounces), of § 2852.-3755, printed at page 38590, change the "X_d" value for a number 300 size Broken Pitted to read 5.6 and the "LL" value for a number 10 size Broken Pitted to read 48.8.

3. In Table III, Acceptance Values for Drained Weights (Grams), printed at page 38591, change the "X_d" value for number 300 size Broken Pitted to read 158.8 and the "LL" value for a number 10 size Broken Pitted to read 1383.4.

Dated: August 31, 1977.

ROBERT ANGELOTTI,
Administrator.

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Airspace Docket No. 77–WE–22]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Control Zone, Needles, Calif.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment changes the effective hours of operation of the Needles, Calif. control zone to coincide with the hours of operation of the Needles Flight Service Station (FSS) which were reduced from continuous to 0800 to 1600 local time, daily. This reduces the availability of special weather observations accordingly and necessitates the change in the control zone hours hours of operation to conform to the Needles FSS hours of operation and will make additional airspace available without due restrictions.

EFFECTIVE DATE: October 6, 1977.

ADDRESS: Copies of this final rule may be obtained from: Federal Aviation Administration, Air Traffic Division, Chief, Airspace and Procedures Branch, AWE–530, 15000 Aviation Boulevard, Lawndale, Calif. 90261.

FOR FURTHER INFORMATION CONTACT:

Thomas W. Binczak, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, 15000 Aviation Boulevard, Lawndale, Calif. 90261, Telephone: 213–536–6182.

SUPPLEMENTARY INFORMATION: The purpose of this amendment to Subpart F of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is to alter the designation of the Needles, Calif. Control Zone from a continuous to a parttime control zone. The Needles, Calif. Flight Service Station will reduce its hours of operation effective October 8, 1977. This action removes the availability of weather and communications which are mandatory requirements for the operation of a control zone. Therefore, this action is necessary in order to have the control zone effective during the hours of operation of the Needles Flight Service Station. The control zone will be effective during the specific dates and times established in advance by a Notice to Airman. The effective dates and times will thereafter be continuously published in the Airman's Information Manual.
